LOOKING FOR POWER SUPPLIES? SPECIFY ACOPIAN,

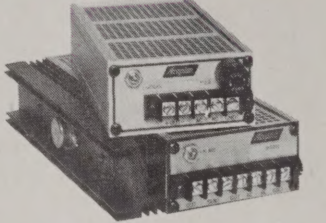
5V OR ±15V POWER FOR PCB'S

Acopian
MODEL
MINIATURE
AC to DC POWER MODULE

Mount these mini power modules, as small as 2.3" x 1.8" x 1.0", directly on printed circuit boards to save space and simplify wiring. Ratings at 5 volts from .250 to 2.5 amps; at ±15 volts from .025 to .5 amps. Short circuit protected. Prices start at $24. Guaranteed 3-day shipment.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

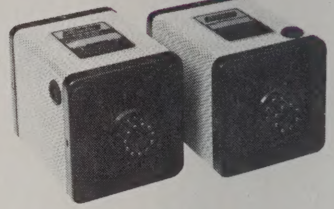
SUPPLIES THAT FIT IN THIN SPACES



Measuring only 1.68" high, Acopian narrow profile power supplies fit where many others cannot. Available in a wide range of ratings from 1 to 150 volts, to 4 amps. Regulation to ±0.005%. Tracking dual output models for op amps also available. Guaranteed 3-day shipment.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

SINGLE, DUAL PLUG-IN POWER



A plug-in power module can be installed in seconds. Simply plug it into a standard octal-type socket. Single output models from 1 to 200 volts. Duals combining two matched or dissimilar outputs in one case available in over 10,000 combinations. Warranty: 5 years. Shipment: 3 days.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

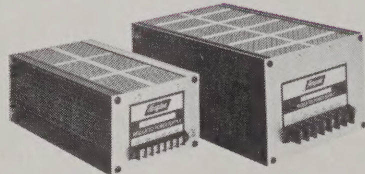
MULTIPLE VOLTAGES FOR PCB'S

Acopian
MODEL
DUAL OUTPUT REGULATED POWER MODULE

Simplify pc board layout with multiple output power mini's. Duals supply two isolated like or dissimilar outputs, 1 to 28 volts each. Op amp supplies provide ±12 or ±15 volts. Triples have two balanced, tracking outputs, a third for powering other circuits. Guaranteed 3-day shipment.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

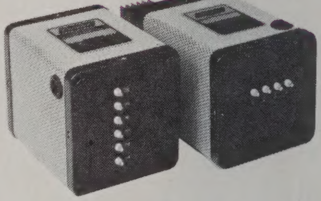
GENERAL PURPOSE POWER



Series A offers premium performance, with regulation to ±0.005%, ripple of 0.25 mv maximum and electronic current limiting. Series B supplies provide a lower-cost approach, with regulation typically ±0.1%. Ratings to 200 volts, to 32 amps. Guaranteed 3-day shipment.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

SOLDER TERMINAL MODULES



For applications where hard wiring is desired, Acopian offers modules with solder terminals. Included are single output models (regulated and unregulated) duals with two like or dissimilar voltages and high isolation supplies. Guaranteed 3-day shipment.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

POWER MINI'S FOR LOGIC OR OP AMPS

AC AC OUT T/C OUT
Acopian
MODEL
AC to DC POWER MODULE

Terminal strip input/output connections on these miniature power modules eliminate the need for sockets or soldering. They mount in an area only 3.5" x 2.5". Ratings: 5 volt models to 2.5 amps, ±15 volts to .5 amps. Other models from 1 to 75 volts, all with 3-day shipment guaranteed.

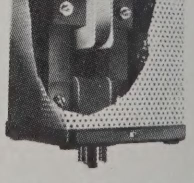
Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

MATCHED OR DISSIMILAR DUAL OUTPUT

Select the combination of matched or dissimilar outputs that you require. Hundreds of ratings available, from 1.5 to 150 volts. Outputs are isolated, and may be used in the same or opposite polarities. Acopian's 3-day shipment promise applies for any combination.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

HIGHLY ISOLATED POWER

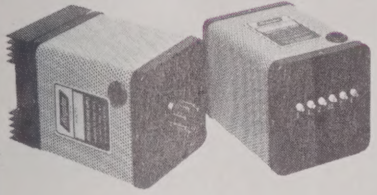


For applications requiring a power supply with unusually high isolation, such as for powering strain gage or other transducer circuits, Acopian offers models with ratings from 5 to 36 volts. Input-output isolation: 10,000 megohms minimum, 1 pF maximum. Guaranteed 3-day shipment.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

FAMOUS FOR 3-DAY SHIPMENTS . . . GUARANTEED

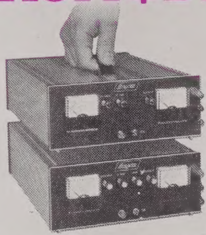
MIL-TESTED PLUG-IN POWER



MIL-tested power supplies withstand unusually severe environmental conditions. These extended-temperature plug-in modules exceed MIL specs for humidity, altitude, vibration and shock. Hundreds of single output models, thousands of dual output combinations, all guaranteed for 3-day shipment.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

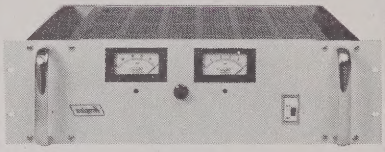
BENCHTOP POWER ...FROM $99



Reliable yet low-cost power supplies for circuit development and component evaluation. Single, dual and triple output models. Ratings from 0-7 to 0-50 volts. All have adjustable current limiting, coarse and fine voltage adjustments and two meters. They may be stacked to conserve bench space. Regulation, ± 0.01% or 2 mv. Ripple, 0.25 mv rms.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

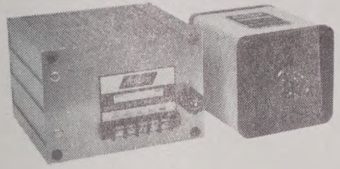
RACK MOUNT POWER ...TO 60 AMPS



Designed for mounting in standard 19" RETMA cabinet racks, these power supplies are available in 76 different output ratings from 1 to 50 volts, and from 5 to 60 amps. Regulation, ±0.05% or better; ripple, 1 mv rms or better. Options include metering and overvoltage protection. Shipment, 9 days after receipt of your order.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

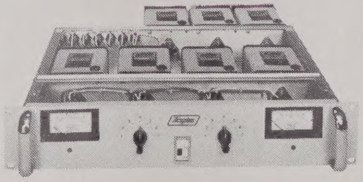
POWER FOR RELAYS AND DISPLAYS



Drive relays, lamps, small motors and similar loads with low-cost Acopian unregulated power modules. Built-in fusing protects against overloads or shorts. Series U models use terminal strip connections. Plug-in modules mount in standard octal sockets; many have adjustable outputs. Guaranteed 3-day shipment.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

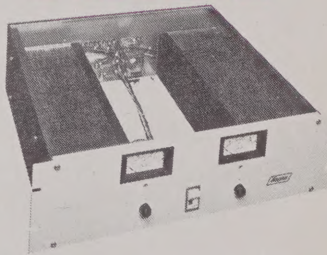
NEED A POWER SYSTEM?



Order multiple output power systems without searching through a catalog, preparing mechanical layouts, item-by-item pricing and detailed purchase requisitions. Instead, call Acopian. We'll listen to your needs, quote a firm price, and then ship your built-to-order system, fully wired and tested, in just 9 days.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

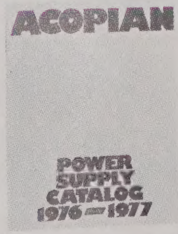
REDUNDANT POWER SYSTEMS



Output reliability is maximized by including two power modules for each voltage. If either fails, the other will continue to provide an uninterrupted output. Ratings from 3.6 to 28 volts, to 32 amps. Shipment, 9 days after receipt of your order.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

GUARANTEED 3 DAY SHIPMENT



Every power module listed in the Acopian 48-page catalog is shipped within 3 days of order. Guaranteed! Miniaturized supplies, narrow profile and plug-in modules, premium performance models, and a wide choice of other types are described in detail. Ask for your copy.

Acopian Corp., Easton, Pa. 18042 Tel: (215) 258-5441

See EEM pages 3169 to 3199, for detailed information about Acopian's broad line of power supplies and power systems.

HOW TO USE eem

eem/Electronic Engineers Master is the world's largest single collection of catalog pages from the manufacturers of electronic and electro-mechanical components, systems and equipment.

The catalog pages are divided into 43 product sections for rapid comparison and evaluation of similar products.

1. ALPHABETICAL INDEX OF MANUFACTURERS' CATALOG PAGES

To locate a particular manufacturers' catalog page by manufacturers' name, look them up in the complete alphabetical index which appears at the beginning of **Volumes 1 & 2.**

2. MANUFACTURERS' INDEX TO CATALOG PAGES BY eem PRODUCT SECTION NUMBER

To locate a particular manufacturers' catalog pages by one of the 43 product sections, look them up by section number in the complete index which appears at the beginning of **Volumes 1 & 2.**

3. PRODUCT INDEX AND DIRECTORY

The Product Index begins on **Page 1 of Volume 1.**

To locate a specific product, look in the alphabetical Product Index and Directory. Under each product heading, manufacturers are listed alphabetically. Those manufacturers with product information in the catalog are shown in **bold face** type with page numbers. For catalog information on this product, refer to the page numbers shown. Where a **bold face** listing appears with an asterisk, the product is not cataloged in this edition. Those manufacturers who have submitted data to verify that they do manufacture this product but have no further data in this edition, are shown in light face type.

NOTE:
The letter **"d"** preceding the listing indicates the product is available from distributors.

The letter **"m"** preceding the listing indicates the product is available to military specifications.

4. eem FILE SYSTEM

The **eem** File System is a method of conveniently filing manufacturers' catalogs, technical bulletins or magazine articles. It is divided into 43 product sections to coincide with the **eem** product section numbers as used in this edition. Use this index to file and locate information on specific products. In addition, in the sub-classification of **eem** products all similar products are grouped together by **eem** product section numbers. The **eem** File System begins on the green edged pages at the back of the Product Index and Directory.

5. MANUFACTURERS, SALES OFFICES AND TRADE MARKS DIRECTORY

To locate a manufacturer by name, refer to the alphabetical Manufacturers, Sales Offices and Trade Marks Directory. Each listing contains complete address and phone numbers of main offices, branch offices, local representatives and local distributors.

Bold face listings indicate manufacturers who have catalog pages in this edition. Their page numbers are included. Trade marks with descriptions of the products and names of their manufacturers are combined alphabetically with manufacturers' names and are identified by (TM).

Plus . . . This important additional information:
Federal Supply Code (FSC) Number
Corporate Logos

The Manufacturers' Directory begins on the yellow pages immediately following the green edged pages of the Product Index and Directory.

6. MANUFACTURERS' CATALOG PAGES

eem/Electronic Engineers Master is the world's largest single collection of catalog pages from the manufacturers of electronic and electro-mechanical components, systems and equipment. The white catalog pages appear in each **eem** product section in alphabetical order, where possible, by manufacturers' name. There is a complete guide to each product section appearing at the beginning of **Volumes 1 & 2.**

WE HAVE DRAWN UPON THE EXPERIENCE OF HUNDREDS OF ENGINEERS AND PURCHASING AGENTS TO DEVELOP A TIME-SAVING PRODUCT/INFORMATION SYSTEM. IT INCLUDES THESE MAJOR ELEMENTS:

volume 1
2
eem 77 78
77 78

1. eem/Electronic Engineers Master—

A bound catalog file for the complete product data of hundreds of manufacturers. This Catalog is divided into 43 product sections, to simplify and speed the comparison and evaluation of similar products. An industry-wide Product Directory plus a Directory of Manufacturers and Trade Marks place the products and sales offices of 3,000 manufacturers at the fingertips of the user.

electronic products

2. Electronic Products Magazine—

The electronic industry's only major magazine devoted 100% to products, product applications and product selection, keeps engineers and purchasing agents up-to-date on all phases of products.

CIRCULATION POLICY

eem/Electronic Engineers Master and Electronic Products Magazine are distributed at no charge to qualified engineers and purchasing agents, affiliated with North American Manufacturers, research laboratories and government agencies. To qualify for a subscription you must be actively engaged in application, selection, specification, design or procurement of electronic components, materials, equipment and related fabrication services. Official subscription form may be obtained by submitting the following on your company's letterhead: name, title and address. Please include building number or mail station with address. Letters must be signed personally. Group qualification is not acceptable. The cost of **eem** to nonqualified personnel is $30.00 a copy. The cost of EPM to nonqualified personnel is $15.00 a year.

NOTE:

Prices shown on **eem** catalog pages are furnished by manufacturers for information only — they are not as quotations. Participating manufacturers reserve the right to change specifications, revise prices or discontinue items without notice.

No coupons, inserts, order blanks, bleed or color accepted in this catalog.

While every precaution has been taken to assure accuracy in content, the publisher cannot be responsible for manufacturers claims and representations; nor can any guarantee be made against the possibility of error or omission.

No portion of this book may be reproduced without express permission of the publisher.

MANUFACTURERS' INDEX TO CATALOG PAGES BY eem PRODUCT SECTION NUMBER

These are the 43 eem Product Sections listing all manufacturers whose catalog pages appear in each section. **To locate specific products refer to the Product Index and Directory.**

eem PRODUCT SECTION 1100

Amplifier Assemblies 1101-1113

Amplifier Research Corp.
C-Cor Electronics, Inc.
Dynamic Electronic
  Products, Inc.
Electronic Navigation
Hope Electronics
Ithaco, Inc.
Preston Scientific, Inc.

eem PRODUCT SECTION 1300

Audio Equipment & Accessories 1114-1121

Crown International
International Electro-Magnetics
Lipps, Inc.
Mallory Capacitor Co.
Opamp Labs, Inc.
Projects Unlimited

eem PRODUCT SECTION 1400

Enclosures/Packaging Systems 1122-1161

Airpax Electronics
  (Cambridge Div.)
Bivar, Inc.
Buckeye Stamping Co.
Bud Radio, Inc.
Cabtron Systems, Inc.
Chassis-Trak
  Div. General Devices Co., Inc.
Environmental Container
  Systems, Inc.
Emcor Prods. Div. GF Business
  Equip.
Equipto-Elect. Corp.
Formica Metal Prods. Co., Inc.
Interlok
Optima Enclosures Div. Scientific
  Atlanta
Premier Metal Products Co.
Stantron Div. Wyco Metal Products
Techmar Corp.
Unitrack Div. Calabro Plastics, Inc.
Vector Elec. Co., Inc.
Vent-Rak
  Div. General Devices Co., Inc.
Zero Mfg.

eem PRODUCT SECTION 1500

Capacitors (All Types) 1162-1387

American Technical Ceramics
Arco Electronics
AVX Ceramics
Axel Electronics, Inc.
Centre Engineering
Component Research Co.
Corning Electronic Products
  Div. Corning
Custom Electronics, Inc.
Elpac Components
F-Dyne Electronics Co.
General Electric Co.
High Energy Corp.
Illinois Capacitor, Inc.
International Comp. Corp.
ITT Comp. Group
ITT Jennings
ISKRA/ISL Products, Ltd.
Jackson Bros. (London, Ltd.)
Johanson Mfg. Corp.
Johanson/Dielectrics, Inc.
Johnson Co., E. F.
Mallory Capacitor Co.
Murata Corp. of America
Nytronics Comp. Group, Inc.
PFC Capacitors/Arco
Panasonic
Republic Electronics Corp.
Semtech Corp.
Soshin Electric Co., Ltd.
Southern Electronic Co.
Sprague Prod. Co.
TRW Capacitors
Union Carbide (Compt. Dept.)
USCC Centralab Elec. Div.
Varadyne Ind., Inc.
Wesco Electrical Co.

eem PRODUCT SECTION 1600

Chemicals/Cleaners/Coatings/Materials 1388-1392

GC Electronics
Hardman, Inc.
Humiseal Div. Columbia Tech

eem PRODUCT SECTION 1700

Circuit Boards & Assemblies/Breadboarding Kits .. 1393-1412

Applied Circuits, Inc.
Continental Specialties Corp.
Datak Corp.
Defiance Circuit Corp.
E&L Inst.
United Wiring Mfg. Co.
Vector Electronic Co., Inc.
Vero Electronics

eem PRODUCT SECTION 1800

Coils & Chokes/Assemblies/Forms 1413-1457

Barker & Williamson, Inc.
Bell Industries Div. J. W. Miller
Caddell-Burns Mfg. Co., Inc.
Cramer Coil Div.
Dale Electronics, Inc.
Delevan Div. American
  Precision Industries
Endicott Coil Co., Inc.
Harbison Ind. Products, Inc.
North Hills Elec., Inc.
Nytronics Comp. Group, Inc.
Syntronic Instruments, Inc.
Torotel, Inc.

eem PRODUCT SECTION 1900

Communications/Telemetering Equipment 1458-1471

Colorado Video, Inc.
GRM Corp.
Power Technology
Re-el Circuits, Inc.
Repco, Inc.
Sonex, Inc., Philmont Electronics

eem PRODUCT SECTION 2000

Computing, Data Handling Equipment & Accessories 1472-1693

AMP Capitron Div.
American Electronic Labs, Inc.

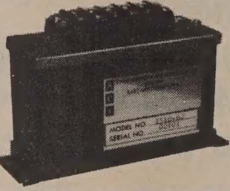
MEASUREMENT AND CONTROL

"an advanced line of transducer and sensor instrumentation utilizing state-of-the-art techniques providing high performance economically . . ."

FREQUENCY TRANSDUCER MONITOR

Model 3510 (55-65 Hz)
Model 3511 (380-420 Hz)

Output: 0-1 or 0-5 VDC
Accuracy: 1%
Linearity: .05% center Freq.
Temp.: −20°C to +71°C
Size: 4½″ x 1½″ x 3″



FREQUENCY TRANSDUCER CONTROLLER

Model 3750 (55-65 Hz)
Model 3751 (380-420 Hz)

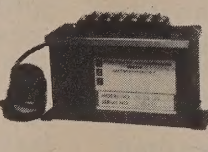
Output 1: 0-1 or 0-5 VDC
Output 2: Solid State or Relay adjustable Hi and Lo limits
Time Delay: Adjustable
Accuracy: 1%
Linearity: .05% center freq.
Temp.: −20°C to +71°C
Size: 6½″ x 1½″ x 3″

D.C. CURRENT CONTROLLER

Thru-Current Ranges:

0-10 MA	0-100 MA	0-1 Amp
0-20 MA	0-200 MA	0-2 Amp
0-50 MA	0-500 MA	0-5 Amp

Model 4501 — 4502
Excitation: 28 VDC ±4 VDC
Output 1: 0-5 VDC
Output 2: Solid State or Relay Single or Hi and Lo limits (adjustable)
Accuracy: 0.5% **PASS-THRU**
Size: 4½″ x 1½″ x 3″



A.C. CURRENT MONITOR/ CONTROLLER

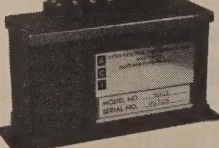
Model 4025 (60 Hz)
Model 4026 (400 Hz)

Excitation: 115 or 220 VAC
Output 1: 0-1 or 0-5 VDC
Output 2: Solid State or Relay adjustable Hi and Lo limits
Time Delay: Adjustable
Temp.: −20°C to +71°C
Size: 6½″ x 1½″ x 3″

A.C. VOLTAGE TRANSDUCER MONITOR

Model 9001 (60 Hz)
Model 9002 (400 Hz)

Input: 90-140 VAC
Output: 0-1 or 0-5 VDC
Accuracy: 1%
Response: less than 0.25 Hz
Temp.: −20°C to +71°C
Size: 4½″ x 1½″ x 3″



A.C. VOLTAGE TRANSDUCER CONTROLLER

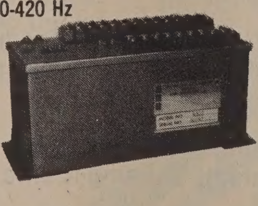
Hi and Lo Control Limits
Model 9601 (60 Hz)
Model 9602 (400 Hz)

Input: 90-140 VAC
Output 1: 0-1 or 0-5 VDC
Output 2: Solid State or Relay adjustable Hi and Lo limits
Accuracy: 1%
Response: Less than 0.25 Hz
Time Delay: Adjustable
Size: 6½″ x 1½″ x 3″

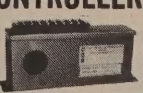
POWER LINE MONITOR/ CONTROLLER

Model 4301
1ϕ Voltage and Frequency
Model 4302 (60 Hz or 400 Hz)
3ϕ Voltage and Frequency

Voltage Band: 100-130 VAC
Freq. Band: 50-70 Hz or 380-420 Hz
Hi-Lo Limits: Adj. to any points within Band
Output Relay: SPDT or 3PDT 10 Amp
Time Delay: Adjustable 0 to 250 MSEC
Temp.: −20°C to +71°C
Size: 7½″ x 3″ x 3½″



WATTS/POWER FACTOR TRANSDUCER CONTROLLER



Model 9401-9405

Input: 90-150 & 160-250 VAC 0-500 W to 0-100 kW
Output 1: 0-1, 0-2 or 0-5 VDC
Output 2: Solid State or Relay adjustable Hi and Lo limits
Size: 6½″ x 1½″ x 3″

Watts Ranges:

0-500 W	0-10 kW
0-1 kW	0-20 kW
0-2 kW	0-50 kW
0-5 kW	0-100 kW

D.C. CURRENT SENSORS

Thru-Current Ranges:

0-10 MA	0-200 MA	0-5 Amp
0-20 MA	0-500 MA	
0-50 MA	0-1 Amp	
0-100 MA	0-2 Amp	

Model 6001
Excitation: 28 VDC ±4 VDC
Output: 0-5 VDC
Accuracy: 0.5% **PASS-THRU**
Response: 1 MSEC
Temp.: −20°C to +71°C
Size: 4½″ x 1½″ x 3″

Model 6002
Bi-Directional
Thru-Current Ranges:

0-10 MA	0-100 MA	0-1 Amp
0-20 MA	0-200 MA	0-2 Amp
0-50 MA	0-500 MA	0-5 Amp

Excitation: ±15 VDC
Output: 0- ±5 VDC
Accuracy: 0.5%
Response: 1 MSEC
Temp.: −20°C to +71°C
Size: 4½″ x 1½″ x 3″

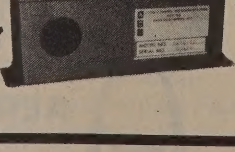
D.C. CURRENT SENSOR

Thru-Current Ranges:

0-10 MA	0-200 MA	0-5 Amp
0-20 MA	0-500 MA	0-10 Amp
0-50 MA	0-1 Amp	0-20 Amp
0-100 MA	0-2 Amp	0-50 Amp
		0-100 Amp

Model 6011
Excitation: 115 VAC ±10% 60 Hz
Output: 0-5 VDC **PASS-THRU**
Accuracy: 1%
Response: 0.5 Sec.
Temp: −20°C to +71°C
Size: 6½″ x 1½″ x 3″

50KV → ISOLATION



SENSOR CONTROLLER

Thru-Current Ranges:

0-10 MA	0-200 MA	0-5 Amp
0-20 MA	0-500 MA	0-10 Amp
0-50 MA	0-1 Amp	0-20 Amp
0-100 MA	0-2 Amp	0-50 Amp
		0-100 Amp

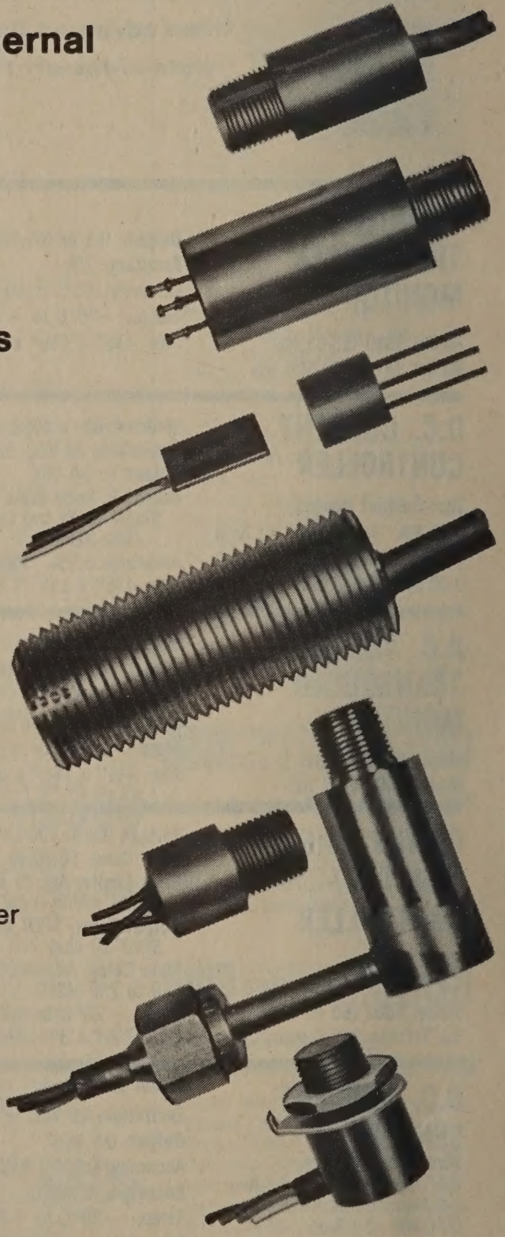
Model 4551
Excitation: 115 VAC ±10% 60 Hz
Output 1: 0-5 VDC
Output 2: Solid State or Relay adjustable Hi and Lo limits
Accuracy: 1%
Temp: −20°C to +71°C
Size: 6½″ x 1½″ x 3″

Telephone or write for individual detail sheets prices and applications assistance.

Speed-Independent Magnetic Pick-ups

Their output voltage amplitudes are totally independent of the rate of change to the external magnetic field. They provide

- **True zero speed sensing**
- **Contactless limit switches**
- **Translational and rotational velocity, direction and position sensing**
- **Counting, indexing, and timing functions**



Benefits:

- Simplify designs
- Low power consumption
- Rugged enough for engine environments
- Aerospace reliability
- Operate from logic power bus
- Freedom from EMI (no choppers or oscillators)
- Freedom from actuator mechanisms
- Can replace optical systems

Applications:

Computer peripherals—sensing of indexing marks for drive mechanisms in card readers / magnetic tape memories / paper roll drive, and character selection in printers

Transportation—wheel speed sensing (skid-controlled braking) / ignition system timing / vehicle sensing (traffic control)

Industrial — speed, position and limit sensing

Aerospace — wide applications

Other Products:

Solid state Push Button and Toggle Switches / Solid state current sensors / Hall Effect Devices / Magnetoresistors / Fluxmeters / Gaussmeters.

How to get up-to-date information from Airpax

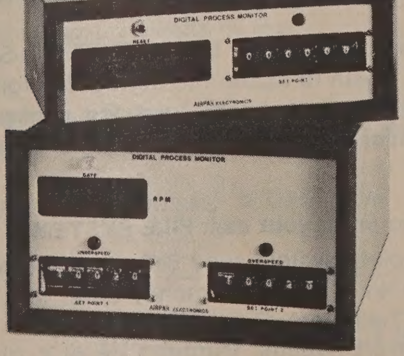
About analog tach systems,

Need indication alone? Indication and switching (with up to 4 switchpoints)? Or indication and industrial signal output? Airpax manufactures a system which will meet your needs for as low as $251.65, including the magnetic pickup, gear, tachometer, and meter. A wide variety of enclosures is available. For up-to-the-minute price and technical information, call or write Paul Webster.

4000
8000
12000
RPM
AIRPAX

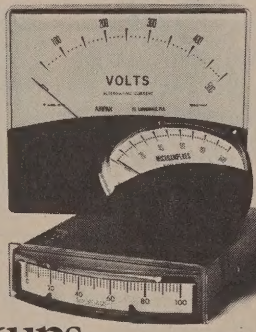
Or digital tachometers...

Airpax makes digital instrumentation which will handle anything from simple accumulation, to speed, to sophisticated ratio functions. You'll find features like overspeed and underspeed protection, input switching, adjustable clock rates, even current or voltage outputs. Pricing is competitive, even compared with less versatile tachometers. For more information, write or call Paul Webster.



Analog meters,

Two week delivery on your custom meter! Even faster delivery on our complete line of dependable panel and edge-reading meters. All panel meters feature a variety of ranges, extremely compact design (no protruding barrel), and ease of mounting. An edge-reading contactless control meter is available which is versatile enough for any number of function control applications. For catalogs, tech specs or price information, write or call Herb Hedberg.



Magnetic pickups,

Airpax manufactures a broad, standard line of high quality magnetic pickups. Delivery is virtually off-the-shelf. Design flexibility allows any unusual application to be promptly and economically handled by our design engineers. For catalogs, tech specs, or price information, call or write Bob Knabe.

Even custom systems.

Airpax has a staff of experienced design engineers who can produce whatever you need for your very special or even unique application. Call us.

AIRPAX

What can I use to keep all the manufacturers' product data I receive in order?
What system makes filing or retrieving manufacturers' catalogs fast and easy?
Which file system have thousands of engineers purchased because they know it works?

eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530

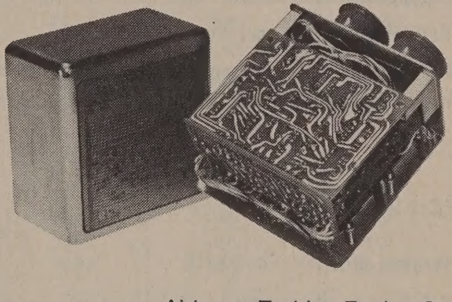
CUSTOM ELECTRONICS

Bring your DIFFICULT requirements for High Quality, Production Quantity, CUSTOM ELECTRONICS to us.

- 20 Years Demonstrated Capability
- Serving OEM and Government Customers
- Cost Competitive Design and Manufacture
- Rapid Response and Delivery
- Strict Quality Control (MIL-Q-9858A)
- Production Capacity

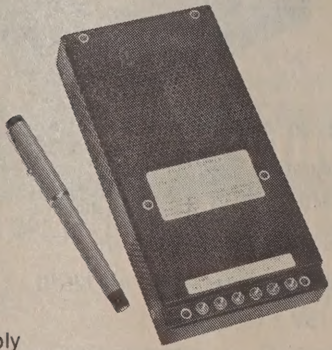
SENSORS & CONTROLS

Compact — Analog-Digital sensing and control of:
Speed - Temperature - Position - Voltage -
Current - Power - Phasing - Frequency -
Pressure - and Light Functions.



Airborne Turbine Engine Control

In Depth Commercial, Industrial and Aerospace Experience



Power Supply
85 Watts Output, 2.5 Watts/cu inch

POWER SUPPLIES

- Computer Grade/Mil Qualified
- Efficiencies to 90%
- Switching to 50 KHz
- Compact - Hi-Density Custom Packaging
- Single or Multiple Outputs
- Fully Protected Against Transients and Overloads
- EMI Filtered (MIL-STD 461)

OTHER CUSTOM PRODUCT CAPABILITIES

Converters • Delays • Detectors • Flashers • Inverters • Sensors • Timers • Transducers

High Precision Analog Multipliers

PRODUCT ACCURACY (MCM 1519-1) ± ½% OF ALL THEORETICAL OUTPUT VALUES OVER FULL MILITARY TEMPERATURE RANGE OF –55°C TO +125°C ZERO POINT ERROR FOR ANY INPUT COMBINATION IS ± 2MVRMS

FEATURES

- **No external trims required**
- **Distortion free AC output over entire dynamic range**
- **Linearity, product accuracy and zero point virtually unaffected by temperature**
- **All units are hermetically sealed and are not affected by external fields**
- **High analog product accuracy and wave quality allows dual multiplier assemblies to be matched within 1% of point over the specified temperature range**
- **Full four quadrant operation**
- **Package size, power supply requirements and other specs. may be altered to your exact requirements at no extra cost**

Type No.	*Product Accuracy	Operating Temperature Range
MCM 1519-1	± 0.5%	–55°C - +125°C
MCM 1519-2	± 0.5%	–25°C - +85°C
MCM 1519-3	± 0.5%	0°C - +70°C
MCM 1520-1	± 1.0%	–55°C - +125°C
MCM 1520-2	± 1.0%	–25°C - +85°C
MCM 1520-3	± 1.0%	0°C - +70°C

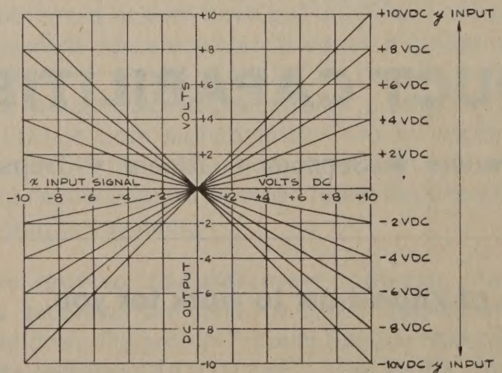
*Product accuracy is defined as the percentage error between the measured output voltage and the theoretical value of the product of the X and Y analog voltages (XY/10) at any point within the four quadrant range of the device. This specification applies over the full operating temperature range and guarantees superior accuracy at low level outputs when compared with devices specified in terms of full scale output. All accuracies are given as a % of point ± 2MVRMS (whichever is greater) in order to account for the zero point offset.

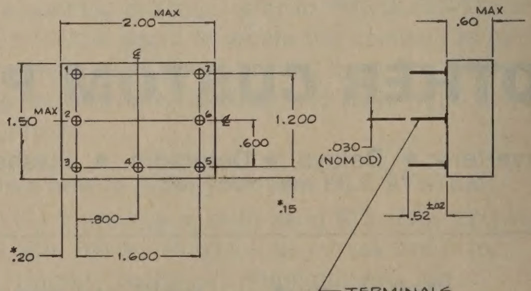
SPECIFICATIONS

- **Transfer equation:** Eo=XY/10
- **X & Y input signal ranges:** 0 to ± 10V PK
- **Maximum dynamic and static product error:** See chart for accuracy and temperature range desired
- **Maximum zero point error (X=0 Y=0 or X=± 10 Y=0 or X=0 Y=± 10):** 2MVRMS
- **Input impedance:** Both inputs 20K min.
- **Full scale output:** ± 10V peak
- **Minimum load resistance for full scale output:** 2K Ω
- **Frequency response characteristics (both inputs)**
  1% amplitude error: DC to 1200HZ (min.)
  0.5DB amplitude error: DC to 3500HZ min.
  3DB point: Approximately 10K HZ
  Roll off rate: 18DB/octave

ANALOG
MULTIPLIER
GENERAL MAGNETICS, INC.
BLOOMFIELD N.J.
TYPE NO
SER. NO

- **Output impedance:** 1 Ω
- **Short circuit duration:** 5 sec.
- **Noise level:** 5MV PK-PK at 100K HZ (approx.)
- **Operating temperature range:** See chart
- **Storage temperature range:** –55°C to +125°C
- **DC power:** ± 15V ± 1% @ 30MA





Weight: Approximately 4 oz.
Case material: High permeability nickel alloy
Terminals: Glass to metal hermatic seal pins

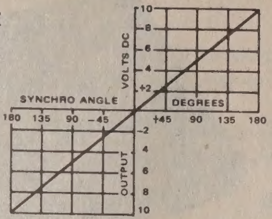
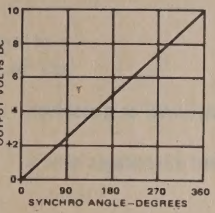
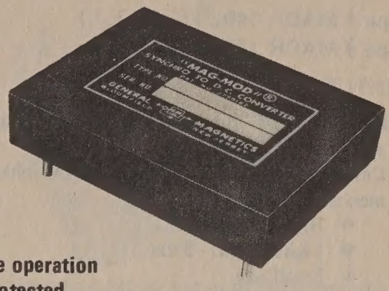
Solid State 3 Wire Synchro To Linear DC Converters...

RESPONSE CURVE
MAC 1422-1
MAC 1449-1
MAC 1458-1
MAC 1459-1



RESPONSE CURVE
MAC 1460-1
MAC 1461-1





FEATURES:

- **Develops a DC output voltage linearly proportional to a synchro angle over a ± 180° range.**
- **Completely solid state with all of the inherent advantages over a mechanical system such as:**
  - **High reliability (since there are no moving parts)**
  - **Light weight–6 ozs.**
  - **Small size**
  - **All units hermetically sealed**
- **Wide temperature range operation**
- **Output short circuit protected**
- **Three wire inputs isolated from ground**
- **Package size may be altered at no extra cost**
- **Units can be altered to accept different line to line voltages or different operating frequencies at no extra cost**
- **Not affected by reference voltage or power supply variations.**

Precision AC Line Regulators...

Type # MLR-1476-1/TOTAL REGULATION 0.1% MAXIMUM

FEATURES

- Distortion free output sine wave.
- Regulation control better than one order of magnitude superior to commercial AC Voltage Regulators transformer product lines.
- No active filter or tuned resonant circuits employed.
- Regulation virtually indifferent of frequency, line amplitude, temperature or load changes.
- 1 watt output level.
- Extremely small size.
- Isolation between input and output.

SPECIFICATIONS

AC input line voltage: 26vrms ±20% at 400 Hz. ±20%.
Output: 26vrms ±1% for set point range.
Load: 0 to 40 ma.
Total regulation: ±0.1% maximum (any combination line aplitude, frequency, load).
Distortion: Less than 0.5%
Temperature Range: −55°C to +125°C
Size: 2″ x 1.8″ x 0.5″
Output Phase Angle = 0° ±0.1° over entire temperature range and ±20% frequency variations.
Weight: 1 Oz.
Case material: High permeability Nickel Alloy
Terminals: Glass to metal hermetic seal pins

Type # MLR-1476-2

FEATURES

- 0.1% total line and load regulation
- Independent of ±20% frequency fluctuation
- 6.5 watt output
- Small size
- Input and output completely isolated
- Short circuit protected

SPECIFICATIONS

- AC line voltage: 115V ±20% @ 400Hz ±20%
- Line current at full load: 95ma
- Output: 26V ±1% for set point
- Load: 0 to 250 ma
- Total regulation for line, load and frequency changes: ±0.1%
- Distortion: 2%
- Temperature Range: −55°C to +85°C
- Size: 2″ x 4.5″ x 0.9″

There is No Substitute for Reliability

Solid State 4 Wire Resolver To Linear DC Converters...

GENERAL MAGNETICS INC
TYPE NO.
SER. NO.
RESOLVER TO DC CONVERTER

Type # MACR 1492 (11.8V L-L)
Type # MACR 1493 (90V L-L)

FEATURES

- Develops a DC output voltage linearly proportional to a resolver angle over a ± 180° range
- Completely solid state with all of the inherent advantages over a mechanical system such as:
  - High reliability
  - Light weight—6 ozs.
  - Small size
- All units come in hermetically sealed metal cans
- Four wire inputs isolated from ground and from each other
- Wide temperature range operation (MACR 1492-1 & MACR 1493-1)
- Economical room temperature units available (MACR 1492-2 & MACR 1493-2)
- Output short circuit protected
- Package size may be altered at no extra cost
- Units can be altered to accept different line to line voltages or different operating frequencies
- Not affected by reference voltage or power supply variations

SPECIFICATIONS

Transfer equation: ± 1V/± 18°

Accuracy:	1492-1	± 0.5% @ 25°C ± 20°C
	1493-1	± 1% @ –25°C to +85°C
	1492-2	± 0.5% @ 25°C ± 20°C
	1493-2	

Input voltage: 1492–11.8V, 400HZ 4 wire resolver input; 26V, 400 HZ reference
1493–90V, 400HZ 4 wire resolver input; 115V, 400HZ reference

Operating frequency: 400HZ ± 20%
Input impedance: 10K min.
Full scale output: ± 10V DC (± 180°)
Minimum load resistance for full scale output: 2K
Output impedance: < 1Ω
Storage temperature range: –55°C to +100°C
DC pwoer: ± 15V ± 1% @ 75ma (approximate)
Case material: High permeability nickel alloy

'Mag Mod' Micro-miniature Magnetic Modulators...

...Design Analog Computers with Micro Magnetics

Withstands High Intensity Nuclear Radiation

Circuit Isolation—DC to AC Sinusoidal Conversion and Amplification

"MAG MODS" PROVIDE FOUR QUADRANT OPERATION, extreme stability with negligible change of phase, gain and zero position over a wide temperature range. Design is simple, featherweight and rugged—with no vacuum tubes, semiconductors or moving parts to limit life.

TYPE NUMBER	IMM 987-1	IMM 821-1	IMM 847-1	IMM 1112-1
Reference Carrier Voltage and Frequency	115 V 400 Hz	3 V RMS @ 96 KHz	5 V @ 800 Hz	3.5 V RMS @ 1 MHz
Input Control Signal Range	0 to ±150 μa DC	0 to ±100 μa (DC to 1000 Hz)	0 to ±200 μa DC	0 to ±3 ma DC (DC to 200 KHz)
DC Resistance of Input DC Signal Winding	3 Inputs — 4.5 K each	150 ohms	12.5 K ohms	1000 ohms
AM Phase Reversing AC Output Range	0 to 5 V RMS @ 400 Hz	0 to 0.6 V RMS @ 96 KHz	0 to 1 V RMS @ 800 Hz	0 to 3 V RMS @ 1 MHz
Differential Gain RMS mv. AC Output/ua DC Sig. Input	33 mv RMS/μa DC	6 mv RMS/μa	5 mv RMS/μa DC	1 V RMS/ma DC
AC Output Null (Noise Level) RMS	25 mv RMS	20 mv RMS Max.	5 mv RMS	30 mv RMS
Output Impedance	1.2 K ohms	7.5 K ohms	10 K ohms	3 K ohms
External Load	25 K ohms	100 K ohms	50 K ohms	50 K ohms
Excitation (Carrier Winding) Impedance	200 K ohms	115 ohms	12 K ohms	800 ohms
Zero Point Drift over Temp. Range Referred to DC Input Terminals	±0.2 μa DC	±0.2%	±0.5 μa DC	±0.5%
Hysteresis in Percent of Max. Input DC Signal	±0.2%	±0.2%	±0.4%	±0.5%
% Harmonic Distortion in Output Wave	10%	5%	10%	3%
Temperature Range	–55°C to +80°C	0°C to +100°C	–55°C to +100°C	–55°C to +85°C
Frequency Response	DC to 100 Hz	DC to 1000 Hz	DC to 200 Hz	DC to 200 KHz
Overall Dimensions (in inches)	.550 X .750 X .550	0.562 X 0.40 X .750	13/16 X 13/16 X ½	0.4 X 0.5 X 0.6
Type of Mounting	2-56 Studs	Printed Circuit Board	Printed Circuit Board	Printed Circuit Board 1/10" Grid
Approximate Weight (in ounces)	0.3 ounce	0.12 ounce	0.2 ounce	0.1 ounce

"MAG MODS" conform to MIL-T-27A and MIL-E-5400 Specifications

The above units are but a fraction of the line of "MAG MODS" available for design applications.

There is No Substitute for Reliability

Solid State Sine-Cosine Synchro Converters...

This new encapsulated circuit converts a 3-wire synchro input to a pair of d-c outputs proportional to the sine and cosine of the synchro angle.

- Complete solid state construction.
- Operates over a wide temperature range.

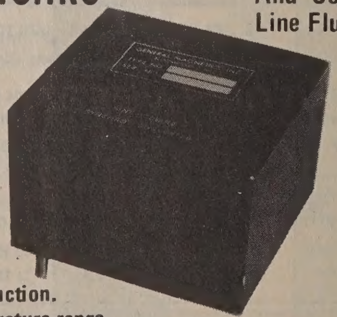
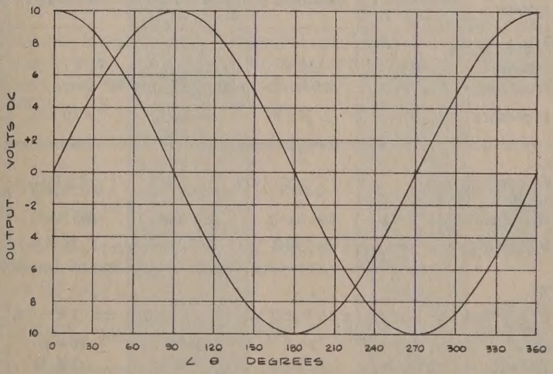
NON VARIANT SOLID-STATE SINE-COSINE SYNCHRO CONVERTER -

Type # DMD 1508-2



This New Encapsulated Circuit Converts A 3 Wire Synchro Input To A Pair Of DC Outputs Proportional To The Sine And Cosine Of The Synchro Angle Independent Of A-C Line Fluctuations



FEATURES:

- Complete solid state construction.
- Operates over a wide temperature range.
- Independent of reference line fluctuations
- Conversion accuracy–6 minutes.
- Reference and synchro inputs isolated from ground

SPECIFICATIONS

- **Accuracy:** Overall sin/cos conversion accuracy of 6 minutes. Absolute value of sine and cosine outputs accurate to 30 mv.
- **Temperature Range:** Operating –40°C to +85°C, Storage –55°C to +125°C
- **Temperature Coefficient of Accuracy:** ±10 seconds/°C on conversion accuracy, ±1 MV °/C on absolute output voltages.
- **Synchro Input (Isolated from Ground)** 90 V line to line ±5% @ 400 HZ ±5%.
- **Synchro Input Impedance:** 50 K minimum line to line
- **Reference Input (Isolated from Ground):** 115 V RMS ±5% @ 400 HZ ±5%
- **Reference Impedance:** 50 K minimum.
- **Output Variation with Reference Changes:** ±10 MV maximum for ±5% reference fluctuations.
- **DC Power:** ±15 VDC ±1% @ 60 MA
- **Output:** ±10 VDC full scale output on either channel @ 5 MA load (short circuit protected).
- **Tracking Speed:** Output within specified accuracy when the tracking speed is 20 RPM

There is No Substitute for Reliability

135 Bloomfield Ave., Bloomfield, New Jersey 07003 - Tel. (201) 743-2700

Solid State Magnetic Demodulators...

FEATURES

- High reference impedance resulting in very small reference power requirements
- Output as high as ±10 v. DC in present units
- Unit operation frequencies: 60 Hz to 100 KHz
- Very low DC offset null voltages (as low as 0.1% of full scale)
- Operation over wide environmental conditions
- Completely solid state—no moving parts
- Signal and reference terminals may be isolated
- Low output impedance
- Small physical size

Demodulator Type Number	DMD-903-1	DMD-931-1	DMD-1012-1	DMD-1013-1	DMD-1017-1	DMD-1023-1	DMD-1025-1	DMD-1040-1	DMD-1028-1

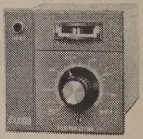
HARREL

PRECISION CONTROLS, SYSTEMS, & SENSORS

PROPORTIONAL TEMPERATURE CONTROLS

- CLOSE CONTROL: Proportional **plus automatic reset plus rate** action eliminates temperature "droop" and ensures close temperature control.
- RELIABLE: Latest integrated and hybrid circuitry ensures highest reliability and long life.
- HIGH POWER: From a few watts to 300 Kw; single phase or three phase; 115, 230, or 480 volts.
- ANY TEMPERATURE RANGE: Control either heaters or coolers from −200°C to +1100°C, using either resistance sensors or thermocouples.



¼ DIN

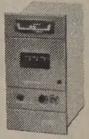
Compact plug-in instrument occupies only 4″ x 4″ panel space. Single turn or digital dial.

½ DIN

Plug-in instrument in popular ½ DIN standard metric size. Single turn or digital dial.

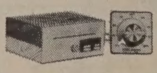
LARGE DIGITAL DIAL

Plug-in instrument with large 15/32″ high numerals easily readable from 30 ft. away. Includes front panel on-off switch, pilot light, and power output meter.



ENVIRONMENTAL EQUIPMENT CONTROLS

A complete line of controllers for temperature and humidity in environmental test equipment.

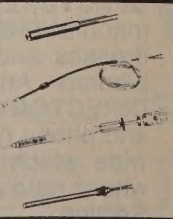


LOW COST CONTROLLERS

Performance of proportional plus automatic reset plus rate controllers at low cost. For built-in OEM applications.

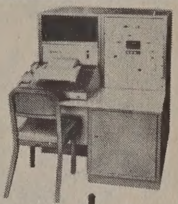
HIGH RELIABILITY MILITARY CONTROLLERS

Precision temperature control to a single selected temperature. Ideal for control of gyros, delay lines, and similar equipment. True proportional or RFI-free.



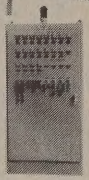
TEMPERATURE SENSORS

A complete line of temperature sensors. Patch type for surface measurement, tubular style, bayonet mount, air sensing, etc.



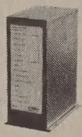
COMPUTERIZED CONTROL AND MANAGEMENT SYSTEMS

Complete digital control and management of industrial processes. Includes control of machine parameters, overall closed loop control of the process, and complete management reporting.



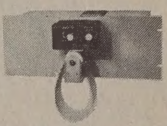
MICROPROCESSOR-BASED "DIGIPANELS"

Total control of industrial processes; includes transducers, interfaces, programming and application engineering.



COMPUTER INTERFACE/SIGNAL CONDITIONERS

A complete line of interface modules for computer control and monitoring of temperatures, pressures, RPM's, etc.



PROGRAMMERS

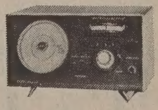
A complete line of programmers for control of temperature, pressure, etc., from a preset program.

PRESSURE CONTROLS

A complete line of pressure controls for extruders, blow molders, injection machines and similar industrial machinery.

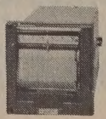
TEMPERATURE, PRESSURE OR RPM INDICATOR/ALARMS

Display temperature, pressure, or RPM in easy-to-read, ½″ high numerals. One or two process alarms for high, low, or two stage alarm.



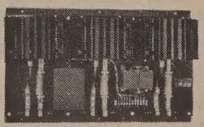
LABORATORY TEMPERATURE RECORDER

Expanded scale readout of temperature. Eleven ranges give .02% accuracy. 1, 7, and 30 hours.



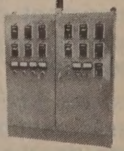
PANEL MOUNT: STRIP CHART

For continuous indication and recording of temperature and pressure at remote points.



SOLID STATE POWER UNITS

For reliable, long life control of heater power. Power to 300 Kw, single phase or three phase, 115 to 550 volts.



COMPLETE CONTROL PANELS

Complete panels for industrial processes. Includes temperature, pressure, and closed loop system controls. Computer control optional.

THE ELECTRONIC DISTRIBUTORS
MASTER CATALOG
FORMERLY: OFF-THE-SHELF CATALOG
THE ONLY NATIONAL CATALOG OF ELECTRONIC PARTS, INSTRUMENTS AND EQUIPMENT DESIGNED EXCLUSIVELY FOR DISTRIBUTORS AND THEIR CUSTOMERS
YESTERDAY'S RADIO MASTER IS TODAY'S
ELECTRONIC DISTRIBUTORS MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

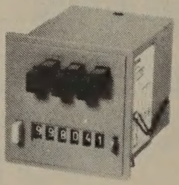
spring clip mount

PREDETERMINING COUNTERS

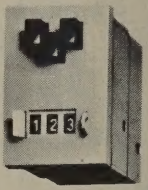
EVS13.11

EVS15.13

These two predetermining counters count down from the manually preset number to operate a built-in SPDT switch as the number wheels pass from all zeros to all 9's. Manual or optional electrical or automatic reset returns wheels to preset number and counter is ready to start again. Numbers are preset by holding in reset button, lifting locking bar and indexing up number wheels to preset position with small rod supplied or by built in pushbuttons.



MVS16.21
New 6 digit predetermining subtracting counter features large staggered buttons for easy preset . . . manual and electrical reset . . . plug-in socket box mount allows easy mating with M16 counter.



MVS13.21
New 3 digit predetermining counter. Identical functionally to 6 digit unit on left, but is narrower to take up less panel space. All mounting options available, also manual and electrical reset. Any voltage, AC or DC at speeds up to 50 counts per second.

HOW TO ORDER

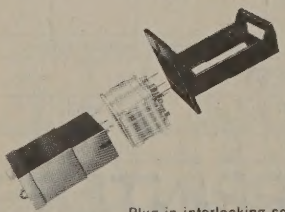
The basic catalog number i.e. M13, M14 through M18, plus MVS13,16 and EVS counters followed by:

1st Number: M16.2—
0 = Small Faceplate rear mount
1 = Large Faceplate panel mount by 2 screws
2 = Spring clip mount eliminates 2 screws

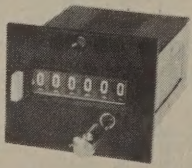
2nd Number: M16.—2
0 = No reset
1 = Manual Reset Only
2 = Electrical reset only
3 = Manual and Electrical

Followed by: Voltage required and count speed per second.

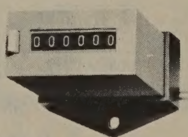
Some Optional Features



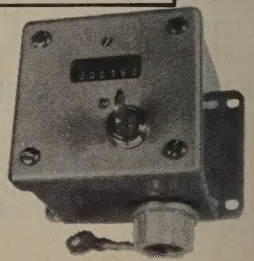
Plug-in interlocking sockets now available.



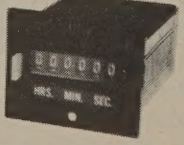
Spade key reset to prevent against unauthorized reset.



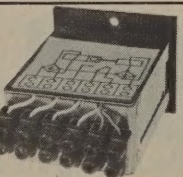
M16.61
New Surface Mounting Available for all M Seies Counters



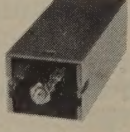
Nema 4 Water-tight & weather proof. Nema 7 explosion proof also available.



Special number wheels read out in time, money and reverse colors.



Standard insulated screw terminals on all E series counters.



Quick Disconnect terminals or solder terminals are standard on the M13 option on E series.

Transparent polycarbonate cover makes the M series water and dustproof.

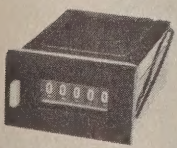
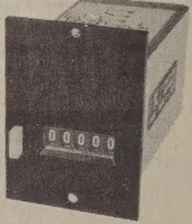
ADD SUBTRACT COUNTERS

These rugged units have proved extremely reliable for differential counting - they are all in stock for fast delivery.



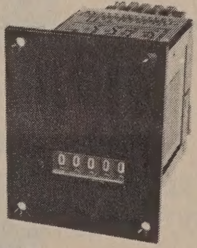
ED15.21
Available with or without manual or electric reset.
Count speed 10, 25, 40/sec.



ED25.11
Provides zero switch output with or w/o manual resets

VORWAHL
0 0 0 0 9

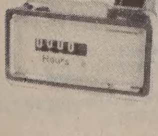
EDVS25.11
Add subtract predetermining.
Output switch point may be changed in the field.



EDA 15
Add subtract counter. Provides 10 line or BCD electrical read out.

ELAPSED TIME METERS

Accurate long life and attractive styling are features of these units.



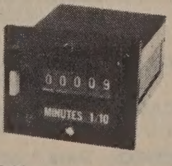
Type B2 for 110 or 220VAC. 60 HZ or 50 HZ. Attractive rear mounting. Hours only.

0 0 0 0 0
HOURS 1/10

ETH15.21
110V 60 HZ with or without electrical and manual reset.
Available in hours or minutes

0 0 0 0 0
SECONDS

EZ16.21
Stop clock reads seconds and 10ths directly from 50 or 60 HZ line.



ETMVS15.11
Predetermining Elapsed Time Counter: Operates SPDT switch as numbers pass from 00000 to 9999. AC or DC models. Hrs., Min., or Secs.

16C

These products conform to MIL-M-7793, special MIL specifications part numbers and cross reference data below.

FEATURES

Miniature Elapsed Time Indicators and Events Counters provide a built-in record of numbers that provide *how-long* data and *how-many* data.

Where safety is concerned, where operating fatigue exists, or component functioning must be measured, they provide the critical record — for maintenance, repair or replacement.

They —

- Anticipate breakdowns
- Predict component mortality
- Reduce "down time"
- Count the "ons" and "offs"
- Count the evolutions or revolutions
- Record the service life
- Warn of impending failure

The standard elapsed time indicators and events counters described on this page are only representative of the available special models that can be provided. Information on other capabilities will be supplied on request.

APPLICATIONS

General Time offers a complete line of subminiature elapsed time indicators and events counters for aerospace, military and industrial applications.

- SPACE EXPLORATION
- MILITARY MISSILES
- COMMUNICATIONS EQUIPMENT
- AIRCRAFT OF ALL TYPES
- COMPUTERS
- AUTOMATIC PRODUCTION MACHINERY
- LABORATORY EQUIPMENT
- GROUND SUPPORT EQUIPMENT
- PREVENTIVE MAINTENANCE SYSTEMS

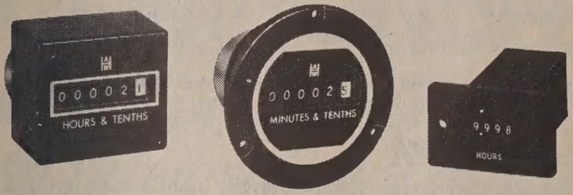
INDICATORS AND TIMERS

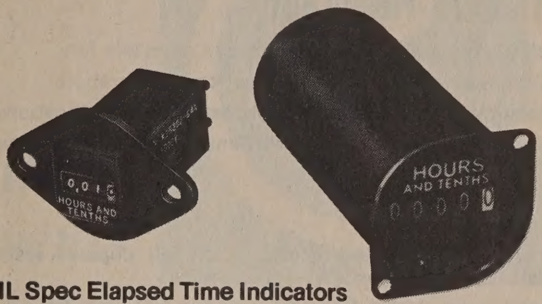


Commercial Elapsed Time Indicators

Maintain record of equipment on/off time and provide utilization time information for maintenance, billing, etc. Many different models and mounts. Up to 6 digit readouts.

Type	Series No.	Operating V ac	Styles
Standard Commercial	K42200	6-230, 50 or 60 Hz	Round and rectangular
Microminiature Commercial	K49200	115 60 or 400 Hz	End or side readout

Ask for Reference Sheets PI-125 and CI-706

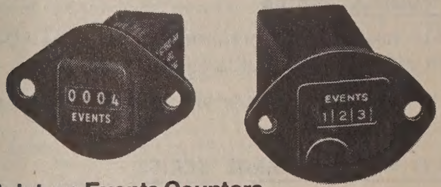


MIL Spec Elapsed Time Indicators

Conform to MIL-M-7793. In either subminiature (5-digit) or microminiature (4-digit) sizes. White numerals on black; "tenths" digit red on white. Hermetically sealed.

Type	Series No.	Operating Voltage
Subminiature	K4200 K23200 K25200	28V dc 115V ac, 60 Hz 115V ac, 400 Hz
Microminiature	K19200 (Square) K19220 (Round)	24 or 120V ac 400 Hz
	KT19700 (Square) KT19720 (Round)	24V dc

Ask for Reference Sheets MI-602 and MI-603

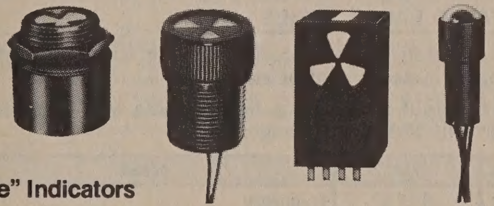


Microminiature Events Counters

Meet MIL-M-7793 environmental requirements. Up to 6 digit display, depending on model. Non-resettable and resettable types. Many standard mountings.

		Series No.		
Type	Digits	28V dc	115V 60 Hz	115V 400 Hz
Non-resettable	4	K19502	K19511	K19501
	5	K19504	K19513	K19503
	6	K19506	K19515	K19505
Resettable	3	LM19502	LM19511	LM19501
	4	LM19504	LM19513	LM19503
	5	LM19506	LM19515	LM19505

Ask for Reference Sheet MI-604

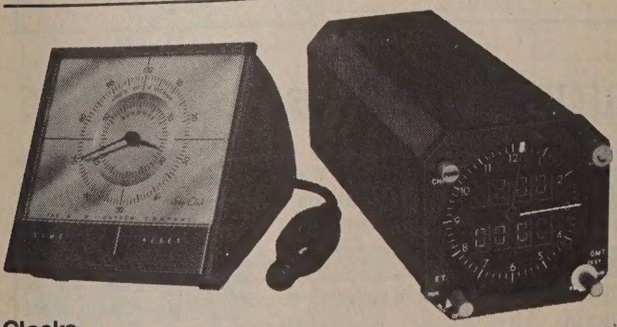


"Bite" Indicators

For monitoring circuit or system performance. Contrasting colored flag or ball appears in window to indicate fault condition. Magnetic latch retains fault condition until manually or electrically reset. Rectangular, round and ball-type units.

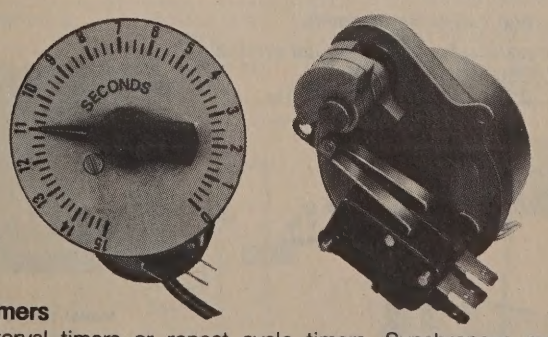
Type	Series	MIL Ref.	DC Voltage	Operating Time
Rectangular	K21500	MIL-E-5400J	17-29	50ms.
Round	K21600	MIL-M-83287	17-29	50ms.
Round-Manual Reset	L21603/01	MIL-M-83287	3-28	50ms.
Round-Electric Reset	L21603/02	MIL-M-83287	17-29	50ms.
Ball-Electric Reset	K21700		17-29	50ms.

Ask for Reference Sheets MI-605, MI-606, MI-607



Clocks

A wide range of clock devices from lab stop clocks to sophisticated electronic aircraft clock systems. Analog, digital or combination displays. Write for information.



Timers

Interval timers or repeat cycle timers. Synchronous motor driven. Stock items available. Most units U/L or CSA recognized. Write for information.

CONVERTERS & INTEGRATORS

North Hills

VOLTAGE-TO-FREQUENCY

Complete line of Voltage-to-Frequency Converters for:

- A/D conversion.
- Electronic integration.
- Telemetering.
- Process control applications.

All have one-cycle response, excellent linearity down to zero frequency, low TC.

FIXED RANGE SERIES

AC-line operated models accommodate all popular system interface configurations.

0-10 volt input, 0.02% linearity, zero and full-scale trimmers.

Standard full-scale output frequencies:
2.5, 5, 10, 25, 50, 100, 250, 500 Hz
1, 2.5, 5, 10, 25, 50, 100 kHz

Series	Output
DF-11	Transformer-isolated pulses
DF-12	5 or 13 V pulses, TTL, CMOS compatible
DF-13	5 V TTL balanced line driver
DF-14	Opto-isolated uncommitted transistor
DF-15	75 ohm coax line driver
DF-16	124 ohm balanced line driver
DF-17	EIA RS-232-C interface driver

ADJUSTABLE RANGE SERIES

AC-line operated models accommodate a variety of inputs, including all process control standards.

Full-scale output frequency is field-settable with high resolution over 1 to 100,000 Hz range.

Model No.	Input	Output
DF-100	0-10 V	Frequency
DF-101	1-5 mA	Frequency
DF-102	4-20 mA	Frequency
DF-103	10-50 mA	Frequency
DF-110	−10 to +10 V	Frequency and logic output indicating polarity
DF-120	−10 to +10 V	Separate frequencies for + and − inputs

PLUG-IN MODULE SERIES

Series DF-10 plug-in modules require ±15 Vdc at 25 mA.

Input: 0-10 V

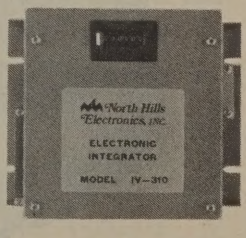
Input Impedance: > 100 MΩ

Linearity: 0.02%

Zero and full-scale trimmers

Full-scale output frequencies available:
25, 50, 100, 250, 500 Hz
1, 2.5, 5, 10, 25, 50, 100 kHz

Model DF-10
3.5 x 1.82 x 1 in.
±15 Vdc powered



Model IV-310

Model DF-12
3.5 x 8.5 x 2.3 in.
Ac-line powered

FREQUENCY-TO-VOLTAGE

Line of high-performance Frequency-to-Voltage Converters for:

- Tachometry.
- Telemetering.
- Frequency monitoring.
- Control application.

All feature ripple-free outputs and excellent linearity.

FULL-RANGE SERIES

AC-line operated models feature various input circuit options.

Output: 0-10 V

Linearity: 0.02% down to 1% of full-scale

Fast response, negligible ripple

Standard full-scale input frequencies available:
25, 50, 100, 250, 500 Hz
1, 2.5, 5, 10, 25, 50, 100 kHz

Series	Input Circuit	Input Level
FD-11	TTL balanced line driver	5 V nom.
FD-12	High impedance (> 100 KΩ)	1-100 V peak
FD-13	Opto-isolated diode	10 mA nom.

PLUG-IN MODULE SERIES

Series FD-14 has identical performance to Series FD-12, but requires an external source of ±15 Vdc power.

The unit is configured as a printed circuit plug-in module.

ULTRA-FAST NARROW RANGE SERIES

Series FT-100 Frequency Transducers cover narrow bands about power frequencies of 50, 60, and 400 Hz.

The instruments feature one-cycle response, internal crystal calibrators, and ±10 V output at 60 mA — sufficient to drive galvanometer and other types of recorders.

Model No.	Frequency Range
FT-101-1	40-60 Hz
FT-101-2	45-55 Hz
FT-102-1	50-70 Hz
FT-102-2	55-65 Hz
FT-103-1	360-440 Hz
FT-103-2	380-420 Hz

ELECTRONIC INTEGRATORS

Compute time-integral of sensor outputs; output pulses drive external or self-contained 24 V electro-mechanical totalizing counters (8 W max.). Full-scale output pulse rate field-settable with high resolution between 100 and 50,000 counts/hour.

Model No.	Input	Output
IV-100-X*	Process control currents	No count for less than min. current
IV-110	0 to 10 V	No count for −V
IV-200	−10 V to +10 V	Dual outputs for up-down counter
IV-201	−10 V to +10 V	Count ignores input polarity
IV-300	as above	Integral counter display

* 1 = 1-5 mA, 2 = 4-20 mA, 3 = 10-50 mA.

E-CELL (TM) COMPONENTS

First in Micro-Coulometry

- ***Timing: Seconds to Months***
- ***Integration: 1 to near ∞ events***
- ***Non-Volatile Memory***
- ***Low Cost***

① WHAT IS AN E-CELL DEVICE?

An E-CELL device is a new kind of circuit element that looks like a discrete electronic component but does the work of a complete electro-mechanical assembly. Its main functional part is a center "working" electrode, which is surrounded by an electrolyte. The unit's metallic container also serves as the second ("reservoir") electrode. Functionally, an E-CELL unit is a reversible micro-coulometer. By plating the "working" electrode, it converts electrical current-time integrals (up to several thousand milliampere-sec. into equivalent integrals of a mass of metal. Exactly one atom is transferred for each electron impressed on the E-CELL unit. Power drain is normally in the microwatt region. If the "working" electrode is then deplated at a known current, the deplating time will be proportional to the original integral. When a known mass is given as part of the initial condition (i.e. is preplated on the "working" electrode), this same process generates a precise time interval. The unit abruptly changes from a low-resistance to a high-resistance circuit element when its "working" electrode is completely deplated.

② HOW DO YOU USE AN E-CELL DEVICE?

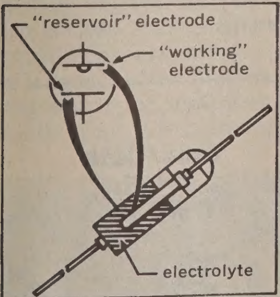
An E-CELL device has two generic functions: integration and timing. In both areas, the device is characterized by: electrical stability; small size; insensitivity to the physical environment; compatibility with the low current and voltage levels of modern circuitry; and the ability to operate over an extremely broad time domain. Compared to conventional mechanical and electro-mechanical devices which perform similar functions, an E-CELL device is much lower in cost.

For integration applications, an uncharged E-CELL unit accepts d-c, periodic, or random inputs in any waveshape — and stores the integral of these on the "working" electrode. To read out the stored value, the mass transfer process is reversed. The measured time to reach the point of the abrupt voltage swing, multiplied by the readout current, gives a precise value which represents a total count of the stimuli presented to the unit. The Model 500 EDR Digital Readout Instrument provides a convenient means of making these measurements.

Operation in the timing mode is essentially the same as that for integration. The E-CELL unit is pre-charged with a known mass of plating material. In operation, this mass is transferred to the "reservoir" electrode (container) at a constant known rate determined by the current value used. When the "working" electrode has been deplated, an abrupt voltage swing signals that the pre-set time has elapsed. This signal is normally used as a bias transition with semiconductor devices.

③ APPLICATIONS

The scope of applications is as broad as counting and timing functions themselves. We have a repertoire of many convenient, economical circuit designs that have been proven in actual field use. Our experienced applications specialists will help you apply E-CELL coulometric techniques to your particular problems. Representative applications: **REPETITIVE TIMING AND CONTROL** Repeat cycle timing for domestic and industrial appliances. **PULSE COUNTING AND MEMORY** Adding and subtracting pulses. Counting events for vending machines, traffic, etc. Confidential memory for security devices. **CURRENT-TIME INTEGRATION** Battery charging controls. Environmental monitoring. Data accumulation. Laboratory integration in physics, chemistry, meteorology, etc. **USE-TIME MEASUREMENT** End-of-life, elapsed time, and warranty indication. Use-accounting for office, automotive, or industrial machines. **TIMING** Ordnance, safing and arming devices. Sonobuoy scuttling. Long delays. **MIL Type 500, and Cyclic E-Cell Type 510, are also available.**



E-CELL Device and Circuit Symbol

E-CELL INTEGRATING AND TIMING COMPONENTS

Type (Actual Size)	Charge µa-hr	Application	Range Accuracy	Physical Characteristics
 Series 560	None	Integrating	10-1000 µa-hr ±2%	Single anode with axial leads. Current range up to 2000 µa. Temperature range −55°C to +71°C (See Bulletin 500 for additional information.)
	60-3000	Timing	0.1 to 3000 hr. ±2%	
 Series 550	None	Integrating	10-1000 µa-hr ±2%	Single anode, plug-in type. Current range up to 2000 µa. Temperature range −55°C to +71°C. (See Bulletin 500 for additional information.)

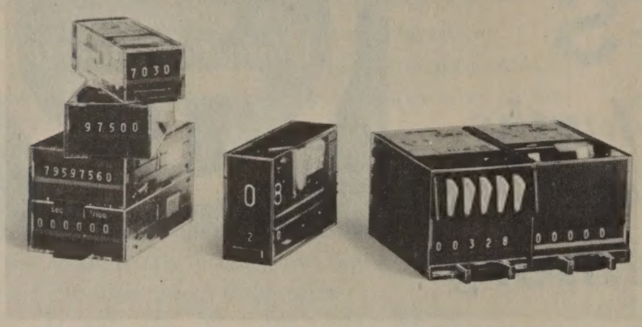
Guide to Sodeco impulse counters

★ The Sodeco R-Series: Up to 200,000,000 counts and speeds to 60 ips



Inside their rugged, clear packages, Sodeco's new R-series impulse counters pack many times the life of any other counter on the market. The most advanced counters you can buy, they're Swiss-engineered for greater precision, quieter operation, no missed counts. Instead of all the usual rattles, vibration and wear associated with standard ratchet mechanisms, our special escapement mechanism keeps them working better longer. Compact plug-in modules with power consumption as low as 0.8W are compatible with the most advanced solid state instruments and systems. Standard ± 15% voltage tolerances and a capacity for operating with a wide variance of pulse waveforms provide a maximum safety margin. For more details on R-Series counters check the asterisked items in the application categories below.

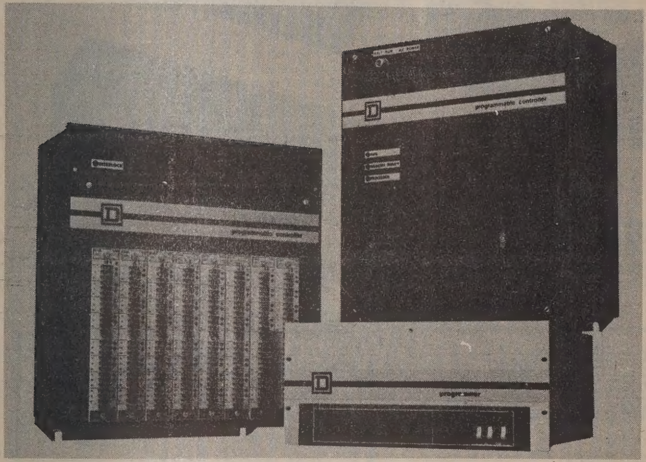
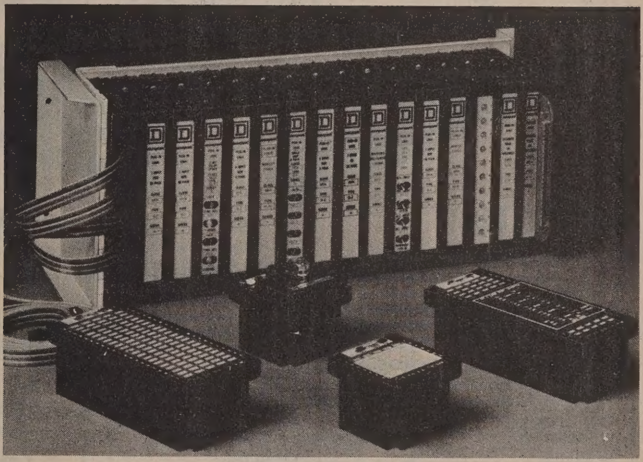
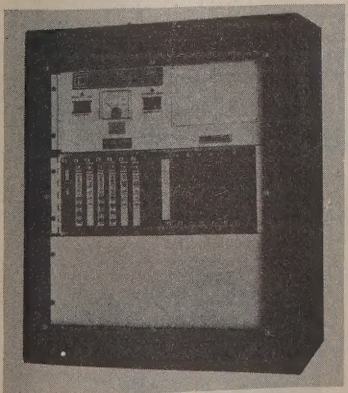
Complete control systems capability.



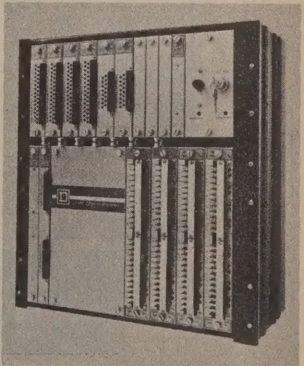


The Class 8881 Programmable Controller is designed for maximum flexibility. It can accommodate up to 2,048 inputs and outputs in increments of 16. Its memory is Read/Write core and is available from 1K to 16K words. Over 11,000 zone bits of synchronous and asynchronous shift registers and/or 991 digital timers and counters can be programmed. Arithmetic, compare, and data transfer operations are easily accomplished. Remote I/O (to 5,000 feet) and computer interfacing are also available. The controller can be programmed with either a programming box or the programming panel pictured above, allowing program entry in either ladder diagram contact configurations or Boolean Algebra. Up to 95 functions can be programmed in one rung of a ladder diagram, with the user determining series/parallel arrangement. Printed ladder diagram and Boolean statement documentation, in the language of your industry, are automatically provided by the programming equipment, as well as data logging and management reports in any format desired.



NORPAK® Demand Control is the low-cost solution to your facility's ever increasing electric bills. Reduction of the demand portion of the bill is accomplished by sensing instantaneous facility power with current transformers. Power is then limited by turning off, or shedding, certain controllable loads such as air conditioners, heaters, compressors, and so forth. Control is only taken during those brief periods when the facility power "peaks out." It is possible to reduce energy consumption by programming loads to be off line for timed intervals during peak and non-peak periods of the day. Savings due to energy reduction can be many times that of demand reduction. NORPAK demand control can be used in almost every facility from supermarkets to foundries. It should be considered whenever the electric bill exceeds $3,000/month.

NORPAK® Solid State Control is the ideal logic control in industrial environments. NORPAK logic functions are available in two forms—Encapsulated or Plug-in. Both are UL listed. The Encapsulated version is suited to environmental extremes. It withstands shock, vibration, dust and corrosive fumes. Plug-in NORPAK components are suited to less hostile atmospheres and feature the ease of plug-in maintenance. Both forms, when properly applied, are virtually immune to electrical noise.



The Ladder Diagram Processor is a small, economical programmable controller designed to replace relay or stepping switch control systems. It can accommodate up to 64 inputs and 32 outputs and has a memory capacity sufficient to handle up to 120 lines of a relay ladder diagram or schematic. Its cost is comparable to hard wired electromechanical relay systems. Light emitting diode status indicators on all inputs, outputs, relay equivalents, and lines of the ladder diagram provide continuous monitoring of the control system. Optional features such as timers, latches, shift registers, and counters are available.

For specific engineering data on Programmable Controllers, Plug-in and Encapsulated Solid State Logic or Demand Controllers, contact your nearby Square D field office. Or write Square D Company, Dept. SA-711, Milwaukee, Wisconsin 53201.

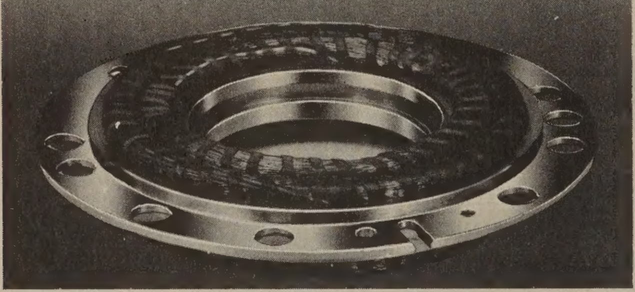
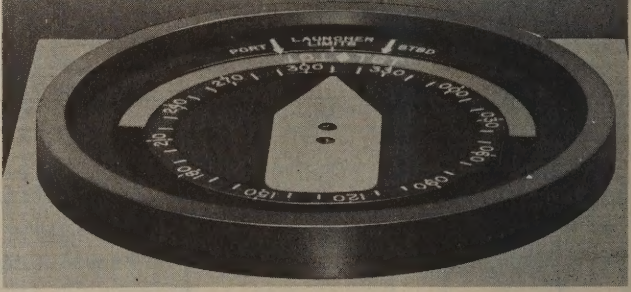
PANCAKE SYNCHROS AND RESOLVERS PROVIDE...

. . . Lower cost and higher accuracy in position sensing systems. Gimbal mounted synchros, resolvers and linear transformers are available in various configurations . . . single speed accuracies to 10 seconds . . . dual and multi-speed units with accuracies to 3 seconds. Other provisions include wide ranges of frequency, voltage, and temperature.



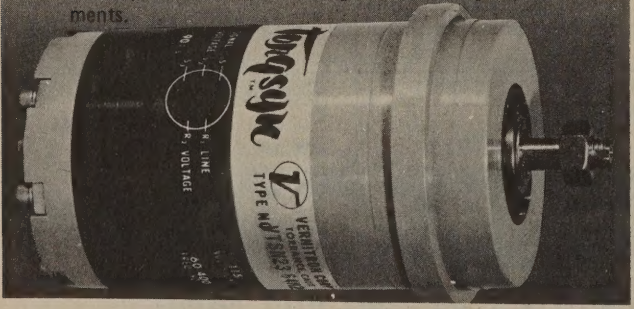
RELIABLE ELECTRO-MECHANICAL INDICATORS THAT...

. . . tell you where it's at — time after time. Simple remote readouts or complex multiple display — rudder angle, thrust direction, ship heading, target bearing, weapon system position — Vernitron can supply dependable performance under severe operating conditions. Talk to us about your electromechanical indicator requirements.



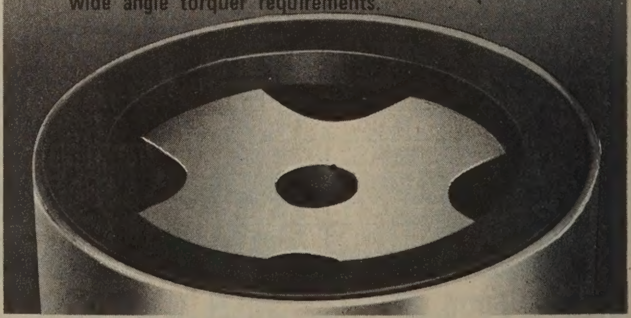
Torqsyn® REMOTE POSITIONERS ARE...

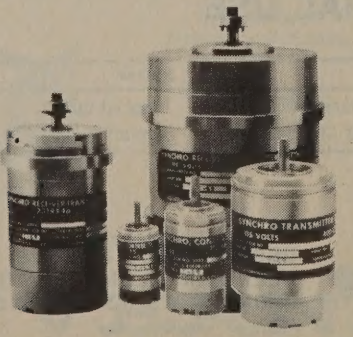
. . . completely integrated direct drive servo packages . . . no gearing required . . . compact. Operation over 50-440 Hz, most models. High input impedance . . . reliable . . . no reflected torque to driving source . . . high torque gradient . . . high inertia load capability. Available in frame sizes 11, 15, 23, and 37. Talk to us about your remote positioning and indicating requirements.



Vernitorq® WIDE ANGLE BRUSHLESS DC TORQUERS FOR...

. . . all your precise positioning, actuating, tensioning, measuring and indicating applications. Highly reliable, limited rotation, direct drive units are available frameless or housed in both two or four pole versions. Various sizes and outputs. Talk to us about your wide angle torquer requirements.





STANDARD SYNCHROS, RESOLVERS AND SELSYNS

Mil-Spec designs housed in all standard and existing frame sizes, plus Selsyn replacement type units are available with accuracies down to 20 seconds on housed synchros and resolvers. Additional features include temperature compensation, varying voltage, frequency and impedance levels.

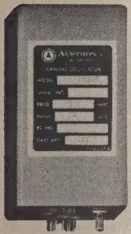
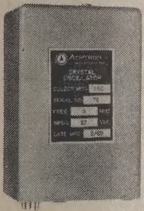
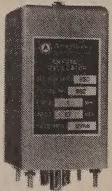
HIGH STABILITY OVEN-CONTROLLED SERIES 1100 CRYSTAL OSCILLATORS

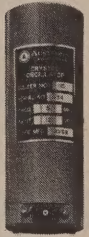
The Sulzer Model Oscillator is a compact, rugged crystal oscillator designed for use in counters, synthesizers and communications systems.





Model	Frequency:	Aging:	Output:	Input Voltage:	Input Power:	Size:	Weight:
1150	5 MHz	5 x 10^{11}/day ultimate aging	1 vrms sine wave	12 to 27 VDC	2.5 watts operating	2⅓ x 3-3/16 x 5"	32 oz.
1120	1 MHz	1 x 10^{9}/day ultimate aging	1 vrms sine wave	12 V to 27 VDC	3 watts operating	2¼ x 2-1/8" x 4"	9 oz.
1115	5 MHz	1 x 10^{9}/day ultimate aging	1 vrms sine wave	12 to 15 VDC	150 mw @25°C typical	2" diameter x 5½ length	12 oz.
1105	1 MHz	1 x 10^{9}/day ultimate aging	TTL	+5VDC	260ma operating	1¼ x 1¾" x 3¼	7 oz.
1100	5 MHz	1 x 10^{9}/day ultimate aging	1 vrms sine wave	12 VDC to 27 VDC	2 watts operating	1¼ x 1¾" x 3¼"	7 oz.





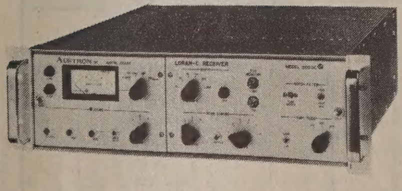
OPTIONS: Many options such as electrical tuning, special frequency, input and output voltage, pin connections and other aging rates.

NEW Lowest Phase Noise

1120S 5 MHz oscillator exhibits a SSB signal to noise ratio of 168 db/Hz at 100 Hz offset, and 176 db/Hz at 10 kHz. Corresponding Allan variance stabilities have been calculated at 3.5 x 10^{-13} for the 10 ms to 30 ms range of averaging times.

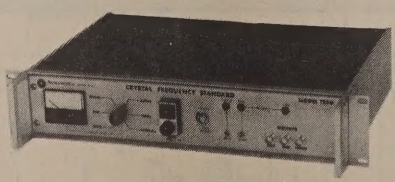
Time/frequency instruments

2000C



AUSTRON's Model 2000C Loran-C Receiver receives and phase-tracks Loran-C signals for time and frequency calibration and control, propagation study, and other purposes. When used to monitor the Loran-C groundwave, the Model 2000C permits time epoch determinations of sub-microsecond accuracy. Frequency measurements with an accuracy of one or two parts in 10^{12} are possible with one-day averaging.

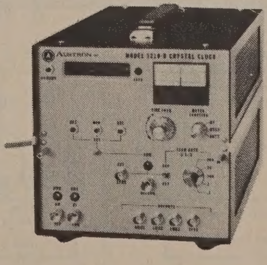
1250



The AUSTRON Model 1250 Crystal Frequency Standard generates highly stable output frequencies at 5MHz, 1 MHz, and 100 kHz. Each of these outputs has excellent waveform and spectral purity.

The Model 1250 employs an AUSTRON Model 1150 Crystal Oscillator. In Model 1150, a highly stabilized feedback amplifier is used in connection with an AGC system to maintain the crystal power at the low constant value that is necessary to attain high frequency stability.

1210D



The Model 1210D Portable Crystal Clock is a compact, self-contained, self-powered time reference providing stable time outputs at several pulse frequencies. Thus, the Model 1210D Clock can be used to transfer precise time from one geographical location to another. In additon to the pulse outputs, the Model 1210D has sinusoidal outputs at 5 MHz and 1 MHz. A time-of-day display is also provided.

BULOVA® Oscillators/ CRYSTAL and FORK

Crystal: PCOXOs, TCXOs and XOs

HIGH STABILITY

PCOXO

The high frequency stability of these oscillators results from housing a high precision crystal and an oscillator circuit with AGC to maintain low constant crystal drive in a stable DC proportional control oven.

	MILITARY		INDUSTRIAL	
MODEL	PCOXO-101	PCOXO-106	PCOXO-3	PCOXO-5
Frequency Range	1.0 to 10MHz	30 to 100 MHz	1.0 to 10MHz	1.0, 3.0 or 5.0MHz
Temp. Range	−55°C to +70°C	−55°C to+70°	0°C to +60°C	0°C to +60°C

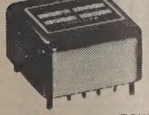
TEMPERATURE COMPENSATED



TCXO-2
TCXO-50

TCXO-1
TCXO-100

Bulova temperature compensated crystal oscillators employ a computer selected and optimized variable capacitance diode and thermistor compensation network to maintain frequency stability over wide temperature ranges, without the use of an oven.

MODEL	TCXO-1	TCXO-2	TCXO-50	TCXO-100
Frequency Range	3MHz to 12MHz	3, 4 or 5MHz	1MHz to 12MHz	1MHz to 12MHz
Frequency Adjustment Range	±3PPM	±0.3PPM	±3PPM	±3PPM
Frequency Stability	±1PPM over Temp. Range of −40°C to +70°C	±0.2PPM over Temp. Range of −40°C to +75°C	±0.5PPM over Temp. Range of 0°C to +60°C	±2.5PPM over Temp. Range of 0°C to 60°C
Aging Rate per yr.	±1PP10^{6}	±1PP10^{6}	±1PP10^{6}	±1PP10^{6}
Power Input	12VDC ±2% at 150mw	12VDC ±5% at 50mw	12 and 5 VDC	12 and 5 VDC
Output	1VP-P into 1K ohm	125 mv RMS into 50 ohms	T^{2}L	T^{2}L
Size	2″ x 2″ x 0.5″	2″ x 2″ x 1″	2″ x 2″ x 1″	2″ x 2″ x 0.5″
Weight	3 oz.	5 oz.	5 oz.	3 oz.

COMPUTER CLOCK

XO-140
XO-14

XO-304
XO-302

These computer clock oscillators feature crystal stability, printed circuit board mounting and outputs directly compatible with DTL or TTL loads. 14 pin dual in-line configuration.

MODEL	XO-140	XO-304	XO-14	XO-302
Frequency Range	8KHz to 1MHz	4MHz to 25MHz	8KHz to 1MHz	4MHz to 25MHz
Temp. Range	−40°C to +70°C	−55°C to +85°C	0°C to +60°C	0°C to +60°C
Frequency Stability	±120PPM over Temp. Range	±50PPM over Temp. Range	±65PPM over Temp. Range	±25PPM over Temp. Range

CRYSTALS

SOLDER SEAL CRYSTALS 1 MHz — 180 MHz

Inexpensive solder seal crystals are ideal for applications in which long-term stabilities in the range of 5-10 ppm/year are acceptable. CTS Knights solder seal crystals are used in digital clock circuits, test and measuring instruments and commercial as well as military communications equipment. CTS Knights' test lab is government approved for qualification testing to military specification MIL-C-3098F.

Data shown in the table and graphs applies to typical crystal designs. CTS Knights will, at no additional cost, design a crystal for your specific oscillator requirements. When ordering a crystal, the following minimal specifications must be given: 1) Frequency, 2) Calibration Tolerance at 25°C (or Oven Temperature), 3) Mode (Fundamental or Overtone), 4) Load Capacitance, 5) Holder.

CTS Knights is QPL approved on the following Military Crystal types:

CR-5A/U

† Stability over temperature measured from frequency at 25°C.

‡ Temperature ranges of −55°C to +105°C, −30°C to +60°C, 0 to 70°C and 0 to 50°C are available.

HIGH STABILITY PRECISION COLDWELD CRYSTALS 1 MHz — 150 MHz

Precision crystals are used in applications where long term aging of better than 5 ppm/year is required. The aging rate shown in the table below is after 30 days of operation at a constant temperature.

Frequency stability over temperature is tailored to customer's specific need. Frequency deviation over temperature may be held within ±5 ppm of the characteristic at curve.

Pricing varies with crystal parameter specifications. Contact CTS Knights for specific pricing.

SPECIALISTS IN FREQUENCY MANAGEMENT

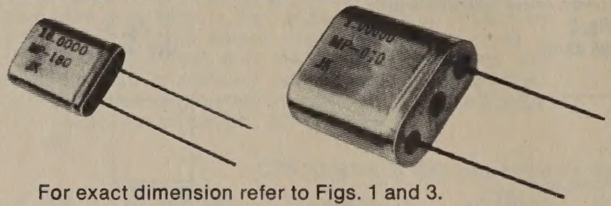
STANDARD MICROPROCESSOR CRYSTALS



For exact dimension refer to Figs. 1 and 3.

CTS Knights microprocessor crystals feature low start-up resistance. Reliability is assured by the use of mil-approved manufacturing processes. Final frequency calibration with gold and silver guarantees outstanding long-term stability.

Microprocessor crystals are available as "off the shelf" items from CTS authorized distributors.

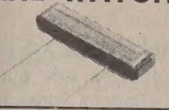
CRYSTALS/VCXO's

32.768 KHz WATCH CRYSTALS/CRYSTAL OSCILLATORS



This watch crystal design incorporates major advances in cost reduction and miniaturization. A ceramic base and epoxy hermetic seal simplify assembly and eliminate the expensive cold weld package. Superior shock performance is achieved with the aid of special conical feed-through holes in the base.

TEMPERATURE COMPENSATED CRYSTALS (TCX)

The temperature compensated crystal (TCX) is designed to give good stability over a broad temperature range at a minimum of cost. Typical applications are land mobile and radio telephone equipment that require a stability of ±5 ppm over an ambient temperature range of −30°C to +60°C. The TCX is easily furnished in a variety of frequencies. Extremely low power consumption makes the TCX ideal for portable applications.

CRYSTAL OSCILLATORS

TEMPERATURE COMPENSATED OSCILLATORS (TCXO)

Low power requirements, high stability and excellent environmental capability characterize CTS Knights' temperature compensated crystal oscillators, CTS Knights has many years experience in developing economical TCXO designs for instrument and communications applications. Stabilities as high as ±5 x 10^{-7} over a wide temperature range are practical. CTS Knights can supply most TCXO designs with sine wave, TTL and CMOS compatible output. Special designs available. Modifications to most specifications possible. Contact CTS for feasibility.

JKTCXO-7

The JKTCXO-7 offers the circuit designer a stable oscillator requiring less than 120 milliwatts input power. This unit also has the advantage of being on frequency at extreme ambient temperatures. The JKTCXO-7 is particularly suited for use where space, low power consumption and being on frequency at turn on is a requisite.

TERMINATION OPTIONS FOR JKTCXO-8

Option A: 4-40 inserts are available in lieu of the 4-40 studs.

Option B: Case available with 4 .040″ dia. mounting terminals in lieu of the 4 4-40 studs and trim access centered. Connections to the oscillator are to the 4 .040″ terminals.

The JKTCXO-8 is a low cost temperature compensated oscillator designed for use as a time base for military and/or commercial equipment. Since this unit is temperature compensated, the power consumption is less than 125 milliwatts, and it is on frequency at turn on at extreme temperatures. The unit size is only 2″x2″x⅝″ which makes it attractive for printed circuit board use.

OVENS

Precise control and reliability are the main features of CTS Knights ovens. Snap-action thermostats known for their long life are used on every thermostat design. Hermetically sealed, double insulated thermostats are used on 115 V models and are optional on others. Contact CTS Knights for special cavity and internal component mounting requirements.

CUSTOM FILTERS

The basic building block for all custom built CTS Knights filters is the two-pole monolithic filter available in standard package styles as shown in figures 32 and 33.

Two-pole monolithic filters can be cascaded to produce four, six and eight or more pole filter responses with the addition of coupling capacitors between two-pole sections. Using the bandwidth, impedance and shape factor charts (fig's. 34, 36 and 37) the equipment designer can specify an inexpensive filter supplied by CTS Knights to his specifications as a set of two, three, four or more "Monolithics" (coupling capacitor information will also be provided). For applications requiring plug-in packaged filters, the filter specifier may select one of the five standard CTS Knights packages (fig's. 39, 40, 41, 42, 43) or supply dimensional termination and mounting information on a package of his choice. Input/Output impedances of packaged filters may be specified at 50 ohms minimum.

Filter parameters such as insertion loss, ripple, spurious response and ultimate attenuation are not easily chartable. However, some general guidelines to specifying these values are given below:

Insertion loss — typically 1.5 dB per 2-pole section
Ripple — 1 dB minimum for most designs

Ultimate attenuation — 35 dB maximum per 2-pole section for acoustically coupled designs

Spurious attenuation — (Best attainable for most designs)	2-pole	20 dB
	4-pole	35 dB
	6-pole	45 dB
	8-pole	60 dB
	10-pole	75 dB

ELECTRICAL RESPONSE CODE

Over 100 different 10.7 MHz (CTS 1000 Series) and 21.4 MHz (CTS 2000 Series) filter configurations are available with virtually OFF-THE-SHELF delivery from CTS Knights. The basic building block for CTS Knights' standard filters is the H3W3 dual resonator monolithic crystal. Standard filters ordered as "Monolithic Sets", are supplied as loose H3W3 dual resonator crystals separated by type with instructions on how to couple the crystals together for total filter performance. Filters ordered in standard packages A, B, C, D, or E provide plug-in convenience. Order from table by part number as shown below.

Electrical Response Code	3 dB BW$_3$ KHz Min.	40 dB BW$_{40}$ KHz Max.	60 dB BW$_{60}$ KHz Max.	Insertion Loss dB Max.	Ripple dB Max.	Input/Output Impedance Ω Nom.		Mechanical Configuration		Approximate 25 Piece Price

10.7 MHz and 21.4 MHz

LAYOUT OF NATURALLY TERMINATED FILTERS

P.C. BOARD LAYOUT FOR FILTERS PURCHASED AS "MONOLITHIC SETS"

A good board layout will, 1) Maximize ultimate attenuation, 2) Minimize interstage and terminating stray capacitances and 3) Maintain acceptable levels of ripple and insertion loss.

Shown below are a circuit diagram of an 8-pole filter, plus 2 acceptable P.C. board layouts. The following points are important in board layout design:

1) Separate the signal input and output as much as possible.
2) Keep interstage connections as short as practical to reduce electro magnetic coupling directly from input to output.
3) Make conductive runs to the interstage capacitors as short as possible.
4) If possible, separate each 2-pole stage with a ground strip.
5) Provide a single run ground plane and make sure that input and output trimmers and coils are connected to the ground plane through single conductive runs.

STANDARD FILTERS

TESTING STOCK FILTERS 10.7 MHz AND 21.4 MHz

Test fixtures for naturally terminated 10.7 and 21.4 MHz filters are not difficult to build; however, completely enclosed test fixtures equipped with standard BNC IN/OUT connectors, plug-in sockets (for crystals and junction capacitors) and surface access to tuning capacitors are available from CTS Knights at a nominal cost of $50.00 each. Order by part number shown with test circuit.

MEASURING INSERTION LOSS

1. For 50 ohm filters and other purely resistive terminations: Replace filter with a short; use this as 0 dB reference level. Remove short and replace with filter. The difference between the two signal levels is the insertion loss.
2. For naturally terminated monolithic crystal filters: In these applications the load is not purely resistive, thus the 0 dB reference signal level must first be determined by tuning the test fixture itself to maximum response with filter shorted. (With a spectrum analyzer/tracking generator, the 0 dB reference can be determined simply by switching to a broad frequency range and reading the peak response of the fixture.) The next step is to replace the short with the filter and retune for optimum bandpass characteristics. The difference between the previously determined 0 dB reference level and the peak response of the filter is the insertion loss.

AM Version	750-1500 ohms	50 ohms

CRYSTAL DISCRIMINATORS

CTS Knights' packaged crystal discriminations offer excellent crossover stability, low distortion and small size. We offer a variety of packages and circuit options. The following table briefly summarizes our recommended design limitations:

CTS Knights also offers monolithic dual resonator crystals to function with integrated circuit quadrature detectors such as the RCA CA3089E. These crystals are available with center frequency bandwidth limitations as shown in the table. Contact factory for price.

Center Frequency	Peak-to-Peak Bandwidth	Linearity	Center Frequency Stability	
MHz	% of Center Freq.	%	ppm	
8-25	.05 to .25	3-7	±3x10⁻⁵	−20 to 85°C

CRYSTAL CLOCK OSCILLATORS

CTS Knights' crystal clock oscillators provide a highly reliable timing function for military and commercial digital applications. The discrete packaged units such as the JKTO-77 and 78 are useful in applications where size is not a problem. The JKTO-79 series cold-weld sealed hybrid oscillators are ideal for applications where size must be reduced to a minimum while maintaining reliability. The most economical hybrid clock oscillator in the CTS line is the MXO-40. Contact CTS for special frequencies or output requirements.

DISCRETE CLOCK OSCILLATORS

Hermetically sealed metal package. Sine wave and CMOS configurations available. Operating temperature range −55°C to +125°C. Frequency to 60.0 MHz. Designed to MIL-O-55310A environmental specifications.

*Note: Any Anti Resonant value may be used.

$$C_1 \cong \frac{2(C_o + C_x^*)\,\Delta f}{f}$$

$$L = \frac{1}{(2\pi f)^2 C_1}$$

$$Q = \frac{1}{4\pi R \Delta f\,(C_o + C_x)}$$

Where: C_o = Total shunt capacitance of crystal unit in farads.
C_x = Equivalent load capacitance in series with crystal in series mode oscillator in farads.
R = Equivalent series arm resistance of crystal unit in ohms.
C_1 = Equivalent motional arm capacitance of crystal unit in farads.
L = Equivalent motional arm inductance of crystal unit in Henries.
Δf = Δf or difference in series resonant frequency and anti resonant frequency with C_x in series with crystal in cps.
f = Frequency in cps.

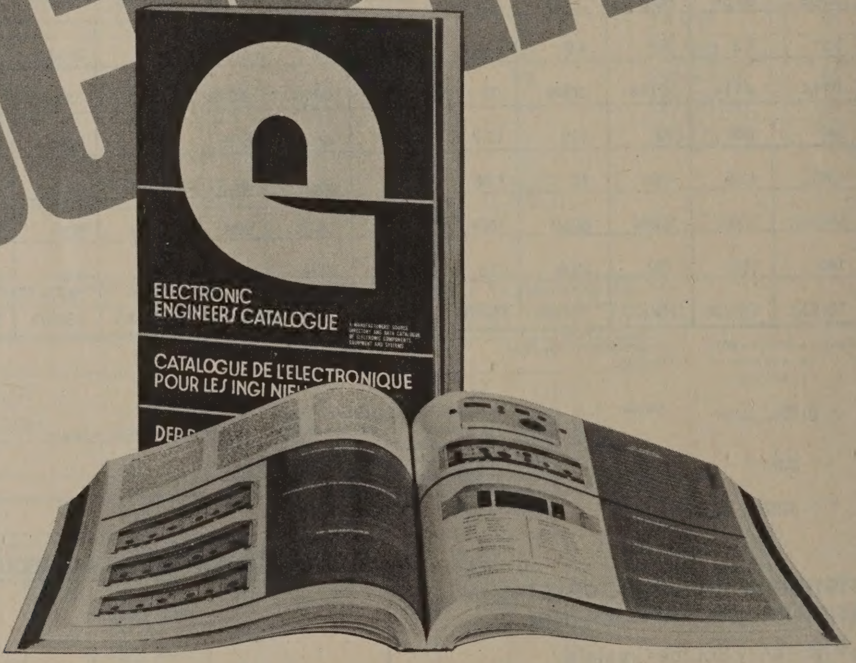
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

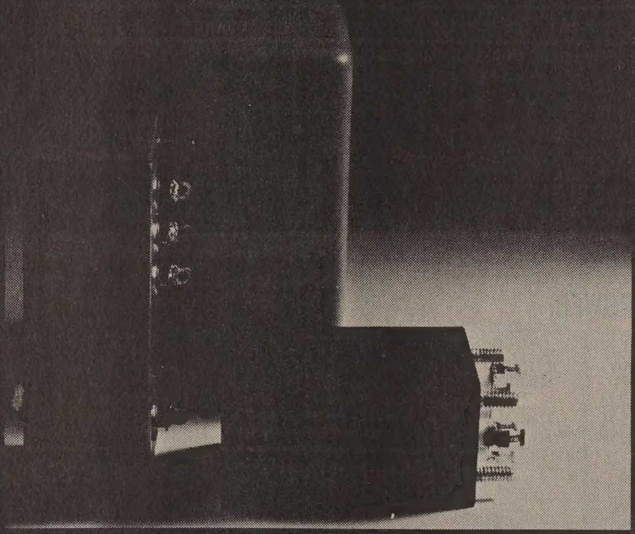
Comstron-Seg... for all your Crystal Filter needs.



Comstron-Seg's on-time delivery of "impossible" crystal filters, from engineering conception to mathematical synthesis, through quality oriented production, satisfies our most demanding customers. Whatever your needs... from spectral shaping and phase correction to time-domain synthesis... you can rely on the crystal filter experts at Comstron-Seg. Computer-optimized custom designs from 5 kHz to 150 MHz with sharp roll offs, phase correction, or wide bandwidths, all in production quantities with competitive pricing. NAME IT AND COMSTRON-SEG WILL DELIVER IT ON SCHEDULE!

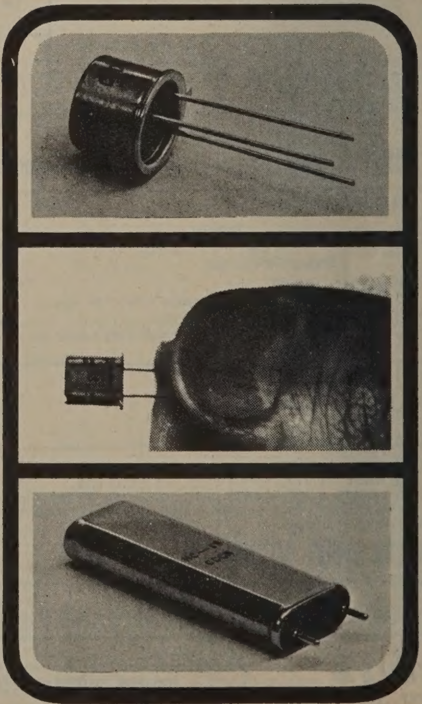
Croven Today - For Tomorrow

Today, more than at any other time in history, man's advances in the fields of space technology, telecommunications and mobile communication, depend on being able to obtain components of the highest possible quality and reliability. Croven has the people, the technology and the capability to keep on developing quartz crystals that will meet your most exacting demands.

Whether your requirement is for solder seal, or low-aging coldweld, we can supply crystals in a large variety of electrical and environmental parameters.

Try us ! ! ! Our technical staff is at your disposal or write for our free catalogue.



All U.S. Shipments are quoted in U.S. dollars f.o.b. BUFFALO, N.Y.
We clear customs and pay all duties.

CRYSTALS

Crystals are available over a broad Frequency Range in the following Crystal Cuts and Standard Enclosure Sizes:

Cut	Enclosure Type
AT	6, 18, 36, 40, 44, 46
CT	6, 12, 36, 46
DT	6, 12, 36, 46
H	13

Cut	Enclosure Type
NT	13
SL	6, 12, 36, 46
+5E	13

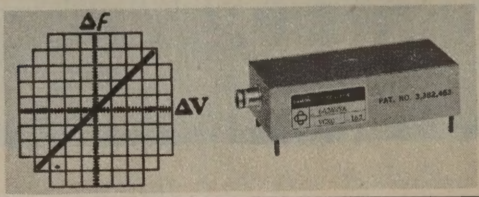
DAMON THE FORM FACTOR SPECIALISTS

VCXOs — 1 KHz to 500 MHz

Damon VCXOs provide high stability over a broad range of center frequencies. An optional square wave or pulse output signal compatible with I. C. logic circuits is available.

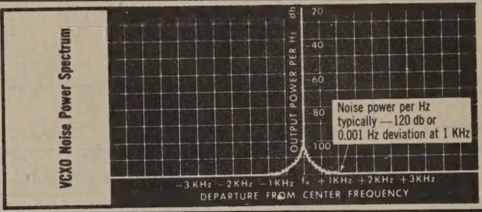


VCXO CHARACTERISTICS:

Center Frequency	1 KHz to 500 MHz
Deviation	.01% to 0.5% of Center Frequency
Linearity	1% to 5% of Peak Deviation
Frequency Stability	Determined by Peak Deviation and Operating Temp.
Modulation Rates	DC to 2 MHz

Low Noise VCXOs

Damon low noise miniaturized VCXOs are all solid state quartz crystal stable oscillators whose frequencies can be varied linearly by an external DC or AC modulating signal. Only a source of power and control signal are required . . . no auxiliary compensating circuitry.

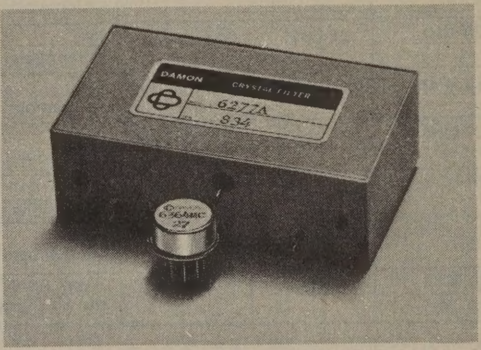


TYPICAL CHARACTERISTICS:

Center Frequency	10.000 MHz ±1 KHz
Deviation	±10 KHz
Linearity	±1%
Modulation Rate	Flat to 4 KHz
Output Power	>1 MW

Gaussian Crystal Filters

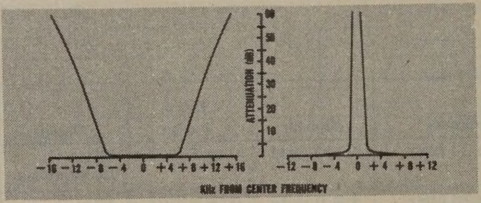
Gaussian Crystal Filters of either conventional or monolithic design. Useful in FM communications or radar systems where flat time delay is required. In a coherent pulsed radar, it can minimize return-pulse overshoot. Eliminates ringing problems in swept spectrum analysis. Available in 2 to 8 pole designs.



Center Frequency	
Conventional	10 KHz - 35 MHz
Monolithic	3 - 30 MHz
3 dB Bandwidth	100 Hz - 30 KHz
Shape Factor, 30 dB to 3 dB	3:1 to 7:1
Ringing, Pulse or Impulse	25 - 50 dB down
Phase Linearity	±2%
No. of Poles	
Conventional	2 - 8
Monolithic	2 - 4
Volume	
Conventional	1 - 6 cu. in.
Monolithic	0.016 - 0.4 cu. in.

Band-Pass/Reject Crystal Filters

A wide variety of conventional crystal filters are produced at Damon. Standards designs such as Butterworth, Chebyshev, Gaussian, Bessel, and Legendre, as well as custom tailored designs are available.

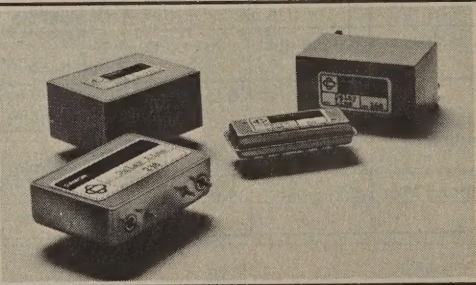


RANGE OF PARAMETERS:

Center Frequency	10 KHz - 75 MHz
Bandwidth	.01% - 3% of C.F.
Shape Factor	Down to 1.2:1
Differential Phase Shift	±2°
Group Delay Uniformity	±5%

Surface-Wave Delay Lines

With signal transfer **across** the surface instead of through the body (a state-of-the-art development), the new Surface-Wave concept results in substantially smaller packages, lower cost in production quantities and superior performance over a 20 MHz to 300 MHz range.

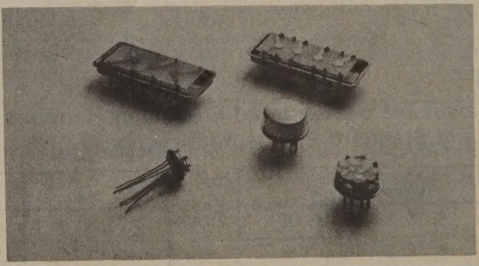


RANGE OF PARAMETERS:

Frequency Range	20 MHz - 300 MHz
Time Delay Range	0.5 - 20 Microsecs.
Bandwidth at −3 dB	3% - 30% of Center Frequency
Insertion Loss	10 - 20 dB
Spurious Responses	25 - 30 dB below Desired Response
Environment	Full Military Temp., Shock, Vibration Available
Typical Size	< 1 cu. in.

Monolithic Crystal Filters

Damon Monolithic Filters utilize a single quartz plate for multiple resonators and the coupling medium between them. Advantages over conventional crystal filters include smaller size, superior stability, and lower cost. Available in a wide variety of computer-assisted designs from Chebyshev to Gaussian characteristics and from 2 to 8 poles.



MONOLITHIC CHARACTERISTICS:

Center Frequency	2.5 - 30 MHz
3 dB Bandwidth	0.3 - 30 KHz
No. of Coupled Resonators	2 - 6
Insertion Loss	1 - 6 dB
Ripple	0.5 dB Max.
Terminations	50 Ohms to 20 Kohms
Size	TO-5, TO-8, or Flat-Pack

Precision Oscillator

IT FINALLY HAPPENED!

AFTER 15 YEARS IN THE OSCILLATOR BUSINESS, WE HAVE ACCUMULATED TOO MANY MODELS TO LIST ANY MORE

So here are a few of our capabilities:

XO^s at .001Hz to 50MHz

±.001% over +10°C to +50°C
±.003% over 0°C to +75°C (XO33)
±.007% over −40°C to +85°C (XO100)
±.01% over −55°C to +125°C (XO33A)

TCXO^s at 1Hz to 50MHz

±1PPM over 0°C to +50°C (TCXO101)
±.1PPM over 0°C to +50°C (TCXO152)
±.5PPM over 0°C to +65°C
±1PPM over −40°C to +70°C (TCXO152A)

VCXO^s at 1Hz to 85MHz

±25PPM to ±10% control at 5% linearity
±.1PPM to ±.1% stability over 0°C to +50°C
other temp. ranges within
−55°C to +125°C

VCO^s at 1Hz to 75MHz

±1% to ±60% control at 1-10% linearity
Stabilities to ±.5% over 0°C to +75°C
0 to Full Scale Frequency at
.1% linearity (VCO115)

OCXO^s at 1Hz to 30MHz

±1PP10^8 over −20°C to +55°C (PGX147)
±1PP10^7 over 0°C to +50°C (PGX50)
±5PP10^7 over −55°C to +80°C
Short term stability to 5PP10^{10} for 1 sec.
Phase noise: 146db down at 1KHz f_o
Oven voltages: 115VAC, 28VDC, others

Timer/clocks 1Sec to 12 Hours

±10% to ±.0001% over 0°C to +50°C
±10 sec/day over −30°F to +130°F
to ±5 sec/mo over +14°F to +120°F
Hours and minutes readout
Battery and AC powered
Also RC and LC oscillators

GENERAL FEATURES AVAILABLE ON MOST MODELS

Outputs: TTL, CMOS, ECL, Sinewave (1mw into 50Ω to 8V pk-pk into 10KΩ)
Power: +5VDC to +28VDC at a few mw for CMOS to 15W for oven units
Packages: Dual-in-line low profile; solder-on modules; plug-in assemblies
Aging: 2PP10^8 per day to 1PPM per year, plus others
Misc: Manual trim; gated input/output; shock & vibration; military parts

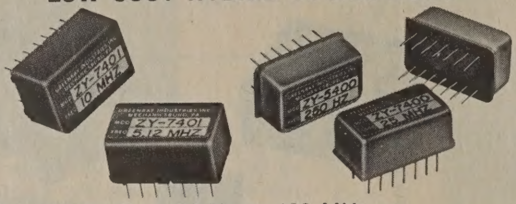
**We have in our library of circuits:
over 120 standard designs (full catalog available) and 250 special designs (individual specs available)**

If we can't come up with one to fit your needs we'll send you to our competitors.

TYPICAL DELIVERIES: off-the-shelf to 4 wks for XO^s; 6 wks for TCXO^s
PRICE RANGE: $25 to $500 (1-9 qty)

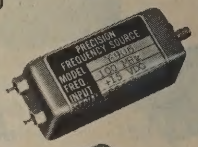
Oscillators .01 Hz to 600 MHz

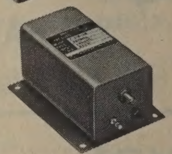
LOW COST HYBRID OSCILLATORS



- Available from 50 Hz to 100 MHz
- Small size—typically .8 × .5 × .3″ (L-W-H) or less
- Stabilities up to $\pm 1 \times 10^{-6}$
- Outputs: To drive TTL, CMOS, ECL or sine wave
- Temperature ranges from laboratory up to −55° to +125°C
- Most units fit DIP socket
- Some units available from stock

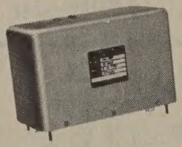
CRYSTAL OSCILLATORS and TEMPERATURE COMPENSATED CRYSTAL OSCILLATORS

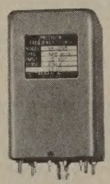




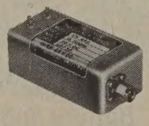
- Available from 1 Hz to 600 MHz
- Many size, mounting, and connector configuration
- Stabilities up to $\pm 5 \times 10^{-7}$
- Output levels from 1 mw to 10 watts, or outputs to direct drive TTL, CMOS or ECL logic are available
- Temperature ranges from laboratory up to −55° to +125°C
- Low phase noise designs—off-the-shelf

HIGH STABILITY OSCILLATORS

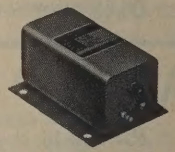


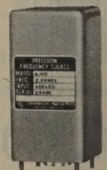


- Available from 1 Hz to 600 MHz
- Stabilities up to $\pm 5 \times 10^{-10}$
- Outputs in sine wave or to direct drive all popular logic types
- Temperature ranges from Laboratory up to −55° to +125°C
- Low single sideband phase noise versions
- Short term stabilities up to 1×10^{-12}/second
- Dual proportional oven designs available
- Many low power oven designs available
- Low aging designs

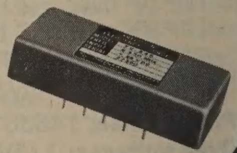


VOLTAGE CONTROLLED OSCILLATORS





- Available from 1 Hz to 600 MHz
- Voltage controlled crystal oscillators will supply frequency deviation to ±1% of center frequency
- Voltage controlled L-C and R-C oscillators will supply frequency deviation to ±30% of center frequency
- Outputs in sine wave or to direct drive all popular logic types
- Stabilities up to $\pm 1 \times 10^{-9}$
- Temperature ranges from Laboratory up to −55° to +125°C
- Excellent for phase locked loop applications.



GREENRAY INDUSTRIES, INC. manufactures a complete line of oscillators for all applications. Units may be custom designed to your exact requirements.
Call or write for your copy of our latest catalogs or to discuss a new requirement you may have.

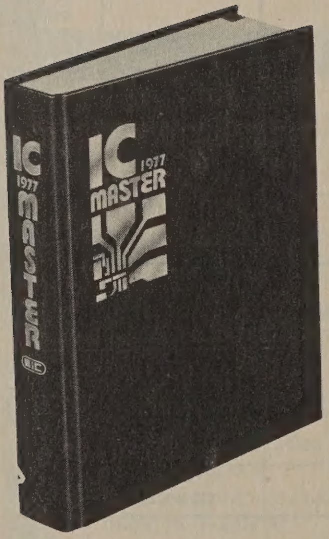
WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

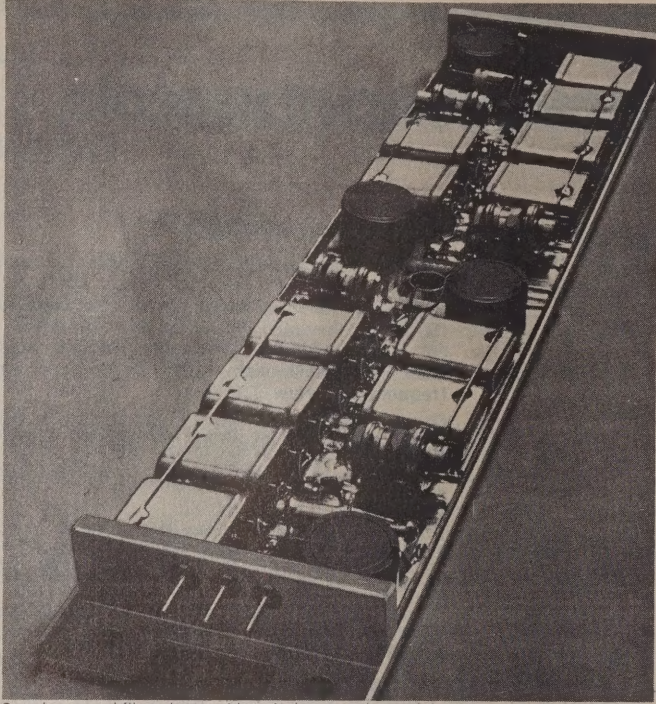
The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

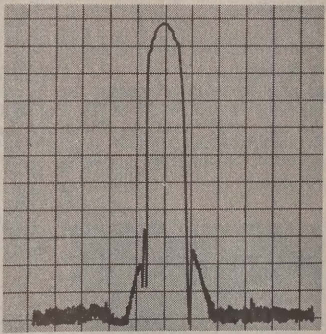
- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

United Technical Publications, 645 Stewart Ave., Garden City, NY 11530

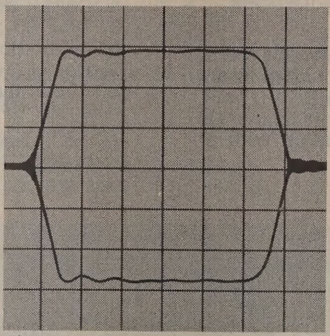
Hughes equency Control Devices



Complex crystal filter shown with typical attenuation and time response characteristics.



Frequency response



Time response

Crystal Filters

- Bandpass filters—shape factors to 1.15:1 (60 to 3dB)
- Band reject filters—shape factors to 1.5:1 (60 to 3dB)
- Upper sideband filters—shape factors to 1.11:1 (60 to 3dB)
- Lower sideband filters—shape factors to 1.11:1 (60 to 3dB)
- Gaussian (linear phase) filters—shape factors to 5:1 (60 to 3dB)
- Phase (or delay) compensated filters (to ± 1%)—shape factors to 1.15:1 (60 to 3dB)
- Frequency selection: 20 kHz to 125 MHz
- Percent bandwidth range: .005 to 5.0

Discriminators—Frequencies/ bandwidths similar to filters

TCXOs

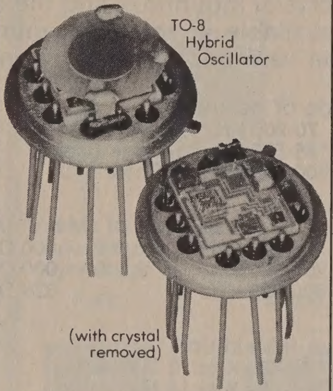
- Computer synthesized selection of components
- Small size, light weight, low power drain, instant warmup
- Frequency range: 1 Hz to 200 MHz
- Frequency stability: ± 1 ppm over −55° to +85°C or ±.1 ppm over 0° to +70°C

TC/VCXOs

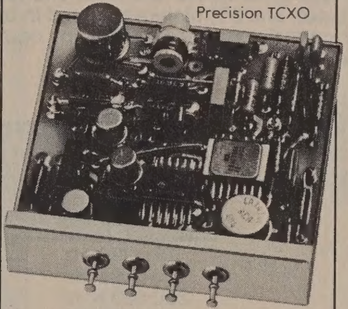
- Frequency range to 200 MHz
- Frequency deviation to ± 3000 ppm
- Deviation sensitivity to ± 250 ppm/volt, or as desired
- Linearity to ± 1% of best straight line
- Short term stability to ± 1 ppm/sec.
- Frequency stability: ± 1 ppm over −55° to 85°C or ± .1 ppm over 0° to +70°C

Hybrid Oscillators

- TO-5, TO-8, E-7, DIP configurations
- TTL, CMOS compatible
- Frequency range: 1 Hz to 40 MHz
- Frequency stability: ± 40 ppm over −55° to +125°C
- Capable of meeting MIL-STD-883



Note: Input voltages from ± 5 VDC to ± 50 VDC are acceptable for all oscillators. Input power, dependent on application, can be as low as 10 mW.



All Hughes' filters, discriminators and oscillators are capable of meeting military, commercial or space-qualified environments. For more information, send for six-page frequency control device brochure describing Hughes' custom and standard product capabilities.

Low Frequency Crystals

70 KHz – 999 KHz

On this page we present our four most popular crystal mountings and the data for the crystals available in these mountings according to the various frequency ranges.

mode of oscillation
70-200 KHz . . . Length Shear
185-599 KHz . . . Edge Shear
600-999 KHz . . . Shear

shunt capacitance 7 pf (Maximum)
70-200 KHz . . . 10,000- 7,000 Ohms
200-500 KHz . . . 6,500-11,000 Ohms
800-999 KHz . . . 625 Ohms

drive (Maximum)
70-499 KHz 2 Milliwatts
500-999 KHz 10 Milliwatts

REMEMBER: Just any crystal and just any oscillator will not combine to produce designated spot frequencies!

DESCRIPTION AND DATA: All of these crystals are of the plated, wire mounted type. Low drift, AT-cut blanks are used in these units above 600 KHz, and low drift CT-cut, DT-cut, SL-cut, and 5°X blanks are used in units below 600 KHz. Any crystal can be supplied for operation with or without an oven.

TYPE SPECIFICATIONS

1. **General Purpose** (GP) crystals will be calibrated to within ±.02% of frequency when operated into the customers specified fundamental load capacitance only (32 pf will be used when none is specified).
   GP crystals 500-999 KHz will hold temperature tolerance of ±.005% from —30° to 60°C and ±.02% for frequencies below 500 KHz.
2. **Commercial Standard** (CS) crystals will be calibrated as noted below, as specified for operation in customers load. CS crystals will hold temperature tolerance ±.003% —30° to 60°C above 500 KHz and ±.02% below 500 KHz.
   CIRCUIT: As specified by customer. Crystals are available for all major two-way equipment and in most cases the necessary correlation data is on file. Where circuit is not specified, the crystal will be calibrated for operation into a load capacitance of 32 mmf.
   The CS series of crystal units is available to commercial or military specifications demanding tight frequency tolerance, long term stability and low frequency response.

WHEN ORDERING — SPECIFY THE FOLLOWING FOR EACH CRYSTAL

- **A.** Crystal frequency
- **B.** Type GP or CS
- **C.** Calibration temperature (Room temperature or over 60°C)
- **D.** Holder (see below)
- **E.** Circuit load and correlation data.

Note: For GP specify 10, 20 or 32 pf. Do not specify equipment types in the case of GP crystals. These are made only to 10, 20 or 32 pf load. When circuit load is not specified crystals will be correlated for a 32 pf load.

FREQUENCY	TYPE			
	GENERAL PURPOSE (1)		COMMERCIAL STANDARD (2)	
	Calibration Tolerance As Noted		Calibration Tolerance As Noted	
70- 99 KHz	.02%	$22.00	.01%	$23.50
100-199 KHz	.02%	13.90	.01%	15.90

Medium Frequency Crystals

1 MHz — 22 MHz

FUNDAMENTAL TYPE

TYPE SPECIFICATIONS

1. **GENERAL PURPOSE** (GP) crystals will be calibrated to within ±.01% of frequency when operated into 10, 20 or 32 pf load capacitance only (32 pf will be used when none is specified.)
   GP crystals will hold temperature tolerance of ±.005% from —30° to 60°C.
2. **COMMERCIAL STANDARD** (CS) crystals will be calibrated to either .0025% or .001% as specified for operation in customer's load. CS crystal will hold temperature tolerance ±.003% —30° to 60°C.
3. A calibration tolerance of ±.001 (or special) can only be obtained when a definite circuit load capacitance and drive level are specified. Where a definite load capacitance is not specified and correlation is required from a copy of the intended circuit a tolerance of ±.01%, should be expected.
4. **HIGH ACCURACY** (HA) crystals are for use in circuits where tolerances better than ±.002% —30° to 60°C are required. Tolerances of .0005% over the range —30° to 60°C will require circuit compensation. Without compensation the range will be limited to —10° to 60°C. Compensators are not included with the crystals and tolerance is for crystals only and does not allow for any change in circuit parameters over the temperature range.

WHEN ORDERING — SPECIFY THE FOLLOWING FOR EACH CRYSTAL

- **A.** Crystal frequency
- **B.** Type — GP, CS, or HA
- **C.** Calibration tolerance — .0025% or .001% / Special (not required for GP as this type is supplied only in .01%).
- **D.** Calibration temperature (room temperature or over 60°C, 75°C, 85°C.
- **E.** Holder (see below)
- **F.** Circuit load and correlation data
  Note: For GP specify 10, 20 or 32 pf. Do not specify equipment types in the case of GP crystals. These are made only to 10, 20 or 32 pf load. When not specified crystals will be correlated for a 32 pf load.

High Frequency Crystals

15 MHz — 160 MHz

Crystals for use in military equipment can be supplied to conform to specifications of MIL-C-3098E

MODE OF OSCILLATION

15- 66 MHz	Shear third mechanical overtone AT
61-100 MHz	Shear fifth mechanical overtone AT
111-139 MHz	Shear seventh mechanical overtone AT
141-160 MHz	Shear ninth mechanical overtone AT

Shunt Capacitance ...... 9 pf (Max.)

RESISTANCE ((Max.)

15- 60 MHz	40 ohms
60-110 MHz	60 ohms
110-140 MHz	80 ohms
140-160 MHz	100 ohms
Drive (Max.)	2 milliwatts

TYPE SPECIFICATIONS

1. **General Purpose** (GP) crystals will be calibrated to within ±.01% of frequency when operated into the customer's specified circuit load only. When none is specified series resonance will be used.
   GP overtone crystals will hold temperature tolerance of ±.005% from —30° to 60°C.
2. **Commercial Standard** (CS) crystals will be calibrated to either .0025% or .001% as specified for operation in customer's load. CS crystal will hold temperature ±.003% —30° to 60°C.
3. A calibration tolerance of ±.001% (or special) can only be obtained when a definite circuit load and drive level are specified. Where a definite load is not specified and correlation is required from a copy of the intended circuit a tolerance of .01% should be expected.
4. **High Accuracy** (HA) crystals are for use in circuits where tolerances better than ±.002% —30° to 60°C are required. Tolerances of .0005% over the range —30° to 60°C will require circuit compensation. Without compensation the range will be limited to —10° to 60°C. Compensators are not included with the crystals and tolerance is for crystals only and does not allow for any change in circuit parameters over the temperature range.

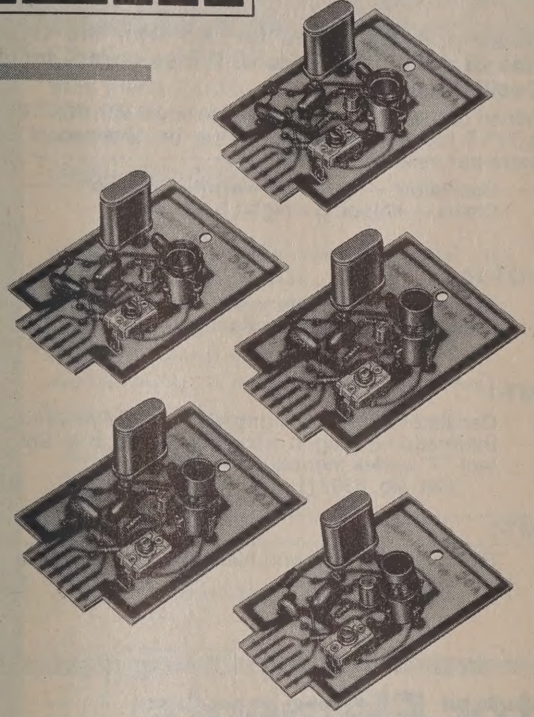
Plug-in Transistor Oscillators

direct crystal control to 160 MHz

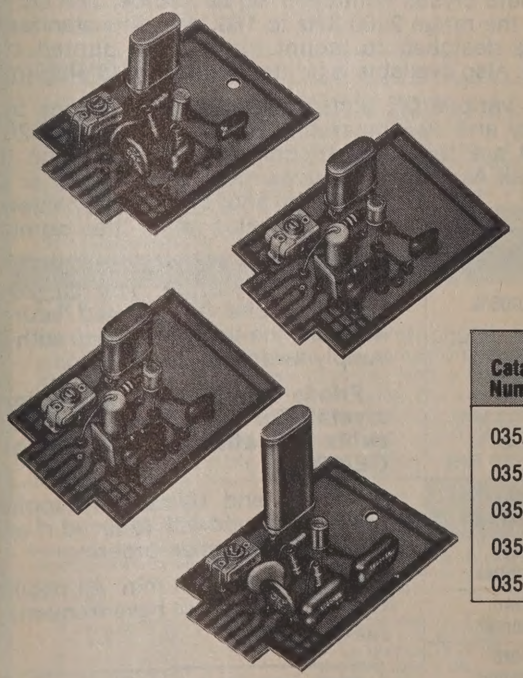


HIGH FREQUENCY (20 MHz — 160 MHz)

- Signal Generators For Receiver Alignment
- Quick-Change Plug-In Oscillators

Five transistor oscillators covering 20 MHz - 160 MHz. Standard 77°F calibration tolerance ±.0025%. The frequency tolerance is ±.0035%. Oscillator output is .2 volts (min.) across 51 ohms. Power requirement: 9 vdc @ 10 ma. max.

Catalog Number	Oscillator Type	Oscillator Range	Temperature Tol. −40°F to 150°F	Oscillator (Less Crystal) Price
035200	OT-124	20-40 MHz	±.0035%	$7.00
035201	OT-146	40-60 MHz	±.0035%	7.00
035202	OT-161	60-100 MHz	±.0035%	7.00
035203	OT-1140	100-140 MHz	±.0035%	7.00
035204	OT-1160	145-160 MHz	±.0035%	7.00



LOW FREQUENCY (70 KHz — 20,000 KHz)

- Band Edge Markers
- Frequency Markers For Oscilloscopes
- Portable Signal Standards
- Accessory Cases

Four transistor oscillators covering 70 KHz - 20,000 KHz. Trimmer capacitor for zeroing crystal. When oscillator is ordered with crystal the standard will be ±.0025%. Oscillator output is 1 volt (min.) across 470 ohms. Power requirement: 9 vdc @ 10 ma. max.

Catalog Number	Oscillator Type	Oscillator Range	Temperature Tol. −40°F to 150°F	Oscillator (Less Crystal) Price
035205	OT-11	70-150 KHz	±.015%	$7.00
035206	OT-12A	150-400 KHz	200-600 KHz±.01%	7.00
035207	OT-12	400-5,000 KHz	600-5,000 KHz±.0035%	7.00
035208	OT-13	2,000-12,000 KHz	±.0035%	7.00
035209	OT-14	10,000-20,000 KHz	±.0035%	7.00

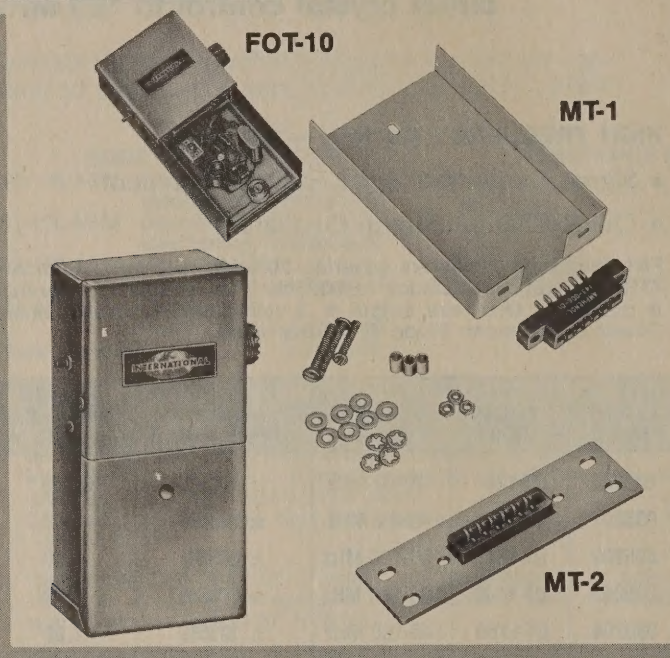
ICM Oscillator Cases



Small portable cases for use with the OT series of plug-in oscillators. Prices do not include Oscillators.

(When oscillator and crystal are ordered with FOT-10 case a 77° F tolerance of ±.001% may be obtained at $2.00 extra per oscillator/crystal unit.

Oscillators — shipping weight: 1 lb. each
Cases — shipping weight: 3 lbs. each

FOT-10

Basic case with battery and output jack for general wider tollerance applications
Cat. No. 035210 **$14.50**

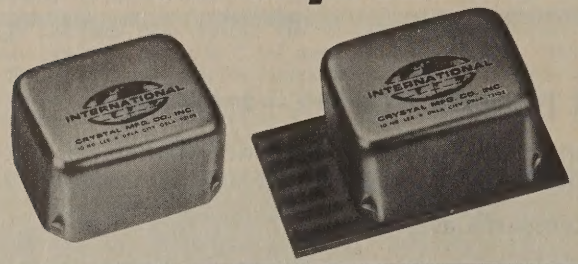
MT-1

Oscillator board mounting kit. Provides mounting for International plug-in transistor oscillators. Six contact "T" series mounting with shield.
Cat. No. 035211 **$4.95**

MT-2

Six contact socket and plate for oscillator case.
Cat. No. 035212 **$2.50**

OE Crystal Oscillator Elements



OE series of Crystal Oscillator Elements provide a complete crystal controlled signal source. The OE units cover the range 2000 KHz to 160 MHz. The standard OE unit is designed to mount direct on a printed circuit board. Also available is printed circuit board plug-in type.

The various OE units are divided into groups by frequency and by temperature stability. Models OE-20 and OE-30 are temperature-compensated units. The listed "Overall Accuracy" includes room temperature or 25° C tolerance and may be considered a maximum value rather than nominal.

All OE units are designed for 9.5 to 15 volts dc operation. The OE-20 and OE-30 require a regulated source to maintain the listed tolerance with input supply less than 12 vdc.

Prices listed include oscillator and crystal. For the plug-in type add the suffix "P" after the OE number; eg OE-1P.

OE-1, 5 and 10 can be supplied to operate at 5 vdc with reduced rf output. Specify 5 vdc when ordering.

Output −10 dbm min. All oscillators over 60 MHz do not have frequency adjust trimmers.

Catalog Number	Oscillator Element Type	2000 KHz to 60 MHz	61 MHz to 139 MHz	140 MHz to 160 MHz	Overall Accuracy	25°C Tolerance
035213	OE-1	$12.50			±.01% −30° to +60°C	±.005%
035214	OE-1		$14.50			
035215	OE-1			$17.50		
035216	OE-5	$16.00			±.002% −10° to +60°C	±.0005% 2−60MHz ±.001% 61 to 139 MHz ±.0025% 140 to 160 MHz
035217	OE-5		$19.00			
035218	OE-5			$25.00		

Catalog Number	Oscillator Element Type	3000 KHz to 20000 KHz	Overall Accuracy	25°C Tolerance

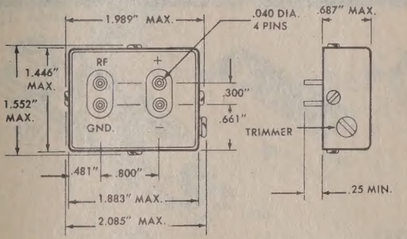
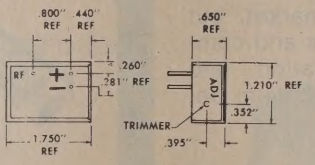
OUTLINE DETAILS

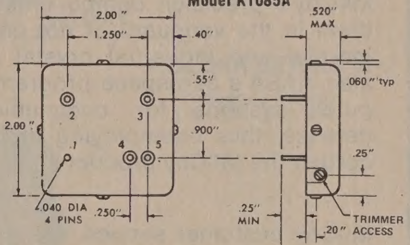
Model K1084A



Model K1087A



Model K1085A

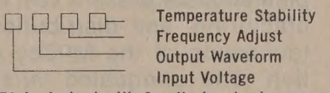


ORDERING INFORMATION

Each TCXO ordered must have a suffix code denoting input voltage, output waveform, whether frequency adjust is desired and the temperature range required. This suffix is added to the basic model number. The first suffix number denotes the input voltage; the second, a letter, denotes waveform; the third, a number, denotes frequency adjustment; and the fourth letter suffix, the stability over the temperature range. The versatility of this suffix system allows you to specify a single Oscillator from many models without poring over endless specification sheets.
The diagram shows this format more clearly.

Model No. **Suffix** **Denotes Option for**

K1087A



If for instance, Model K1087A is desired with 9 volts input, sine-wave output, frequency adjustment, and a temperature stability of ±1 x 10^{-6} from 0°C to +55°C, the Model Number is K1087A-2S1B.

CRYSTAL FILTERS

Microsonics has been manufacturing crystal filters since 1962. During that time, the company's expertise has grown by imaginative planning and a firm commitment by management to produce the best precision crystal filters available. Today, Microsonics offers customized precision designs with operating frequencies to 150 MHz in typical filter types such as bandpass, single sideband, comb sets and crystal discriminators. Production capabilities include crystal manufacturing, cold welding, automated wave soldering, high reliability assembly techniques and automated test equipment. Typical custom tailored filters previously designed and manufactured are described below.

FILTER MODEL P108C

Features a very good shape factor combined with excellent phase linearity.
Fo: 10 MHz
Bandwidth:
9.4 kHz @ 1 dB
12.5 kHz @ 15 dB
15.7 kHz @ 40 dB
Insertion Loss: 4 dB
Ripple: 1 dB
Spurious: 40 dB
Impedance: 50 ohms
Ultimate Rejection: 45 dB
Phase Linearity: ±6° max.
Size: 2.5 x 1.0 x 1.25

FILTER MODEL P961

Equalized to improve phase linearity while maintaining a 2.75 to 1, 3 dB / 60 dB shape factor.
Fo: 7.470 MHz
Bandwidth:
±2 kHz min. @ .5 dB
±3 kHz min. @ 15 dB
±6 kHz max. @ 60 dB
Insertion Loss: 3 dB
Ripple: .25 dB
Spurious: 60 dB
Impedance: 50 ohms
Ultimate Rejection: 70 dB
Phase Linearity: 8° over Fo ±2 kHz
Size: 2.1 x 1.515 x .7
Shock: 2500 G Pyrotechnic
Vibration: 100 G Sine
This filter has successfully passed all qualification tests for space satellite systems.

FILTER MODEL P408B

Demonstrates Microsonics' ability to manufacture high frequency, 42 MHz, fundamental AT cut crystals. Bandwidths of 2.5% of center frequency are possible at frequencies up to 40 MHz.
Fo: 40 MHz ±3 kHz
Bandwidth: 100 ±10 kHz
Shape Factor: 2:1
Insertion Loss: 5 dB max.
Spurious: 50 dB
Ripple: 1 dB max.
Impedance: 480 ohms
Ultimate Rejection: 60 dB
Operating Temp.: 0°C to 65°C
Size: 1.765 x .865 x .60 max.
Meets Requirements of MIL-F-18327

CRYSTAL DISCRIMINATOR MODEL D402C

A Discriminator which demonstrates exceptional bandwidth at 40 MHz with good linearity.
Fo: 40 MHz ±2.5 kHz
Bandwidth: ±80 kHz P-P
Linearity:
5° over ±25 kHz
10° over ±50 kHz
Source Impedance: 1 kHz
Load Impedance: 20 kHz
Operating Temp.: 0 to 50°C
Size: 2.1 x 1.0 x .75
Shock-Vibration MIL-STD-202
Methods 201A, 202C

McCOY ELECTRONICS COMPANY

a subsidiary of **OAK Industries Inc.**

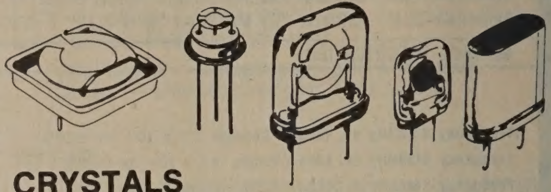
MT. HOLLY SPRINGS, PA. 17065 • 717-486-3411 - TWX: 510-650-3548

Nearly a quarter century of dedication to **Quartz Crystals, Filters,** and **Oscillators** has earned McCoy Electronics Company the foremost reputation for performance. McCoy's achievements have provided the base for extensive domestic sales representation and worldwide distribution. The versatility of design and capability in McCoy's precision components has placed them in the vanguard of not only the commercial and industrial crystal market, but also NASA's aerospace programs and computer systems for communication and defense, thus exemplifying the esteem accorded the McCoy product line.

McCoy customer service has grown in unison with the rapidly expanding McCoy technology. An additional plant facility now supplements the present vast engineering, manufacturing, and distribution capability—the foundation of the McCoy Company reputation. The unequaled versatility of custom manufacturing and resultant customer confidence are enhanced with ever increasing efficiency by our computer assisted design capability. Laboratory trial and error efforts are eliminated through the accurate analyses and directions provided by the computer.

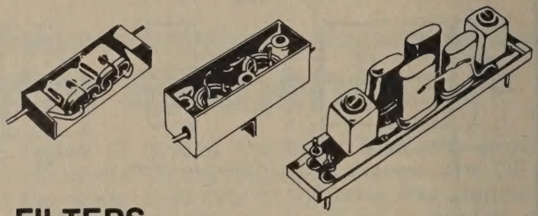
The McCoy name has been synonymous with quality in the crystal industry for more than two decades. Our catalog contains crystals, filters, and oscillators continually proven to be the ultimate in performance critique. The various components listed herein are supported by PC Board, chemical milling, and other photo-fabrication capabilities, and represent only a small cross section of products and services offered. Our many years of experience assure each customer that the industry's finest skills are at his command.

"ADVANCING CRYSTAL TECHNOLOGY FOR TWO DECADES"



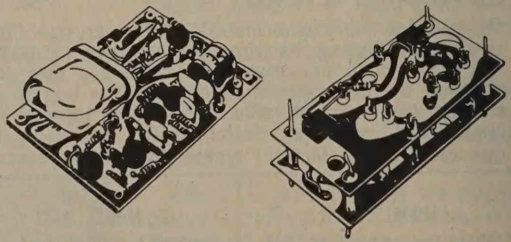
CRYSTALS

McCoy's leadership in crystal design and production permits precision blanks from 700 Hz to 250 MHz to be cut, angles controlled to within ±15", and fundamental frequencies lapped to 45 MHz. Thousands of electrode masks, permitting maximum latitude in controlling motional parameters, give range and depth to McCoy's crystal capabilities.



FILTERS

Crystal filters from 1KHz to 250MHz are designed by computer assistance to exacting specifications. Monolithic filters, with spurious mode suppression capabilities, offer an infinite variety of designs for custom application.



OSCILLATORS

The precision standard, oven, temperature compensated (TCXO) and voltage controlled (VCXO) crystal oscillators each feature a matched McCoy crystal. Coupled with the McCoy expertise in manufacturing smooth discontinuity-free crystals, these oscillators offer unequaled performance when tailored to blend with the equipment or system needs.

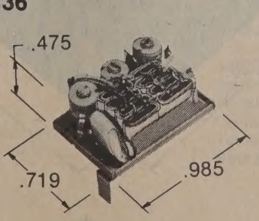
McCOY CRYSTAL FILTERS

Filter
MODEL 80B36

F_0 57.836 MHz

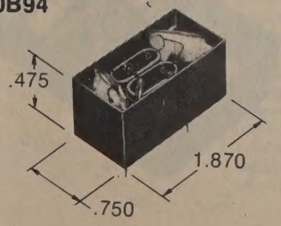


SPECIFICATIONS

Package FM 3965
3db BW ±25 KHz min.
45db BW 140 KHz max.
Insertion Loss: 6db max. @ RT, 7db over temp.
Ripple: 1db max. @ RT, 2db over temp.
Temperature Range: −54° to +100° C
Source/Load Impedance: 50 Ω
Shock: MIL-F-18327, Method I
Vibration: MIL-STD-202, Method 204B, Test Condition A
Spurious Response Attenuation:
35db min. from 58.036 to 58.236 MHz
45db min. from 10 to 57.766 MHz and 58.236 to 150 MHz

Filter
MODEL 20B94

F_0 17.000 MHz



.475
1.870
.750

SPECIFICATIONS

Package FM 2856
3db BW ±115 KHz min.
40db BW ±400 KHz max.
Insertion Loss: 4db max.
Ripple: ±1db max.
Temperature Range: −55° to +105° C
Source/Load Impedance: 50 Ω

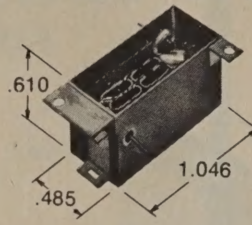
McCOY ELECTRONICS COMPANY

a subsidiary of **OAK Industries Inc.**

MT. HOLLY SPRINGS, PA. 17065 • 717-486-3411 - TWX: 510-650-3548

McCOY CRYSTAL FILTERS

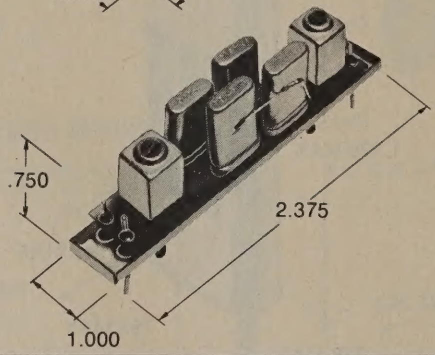
Filter
MODEL 2B164
F_o 30.000 MHz



SPECIFICATIONS

Package FM 3389
3db BW ±31.8 KHz min.
6db BW ±34.5 KHz min.
60db BW ±57 KHz max.
Insertion Loss: 3db max.
Ripple: 1db max. over ±25 KHz
Ultimate Attenuation: 60db min.
Temperature Range: −55° to +105° C
Source Impedance: 2000 Ω
Load Impedance: 50 Ω

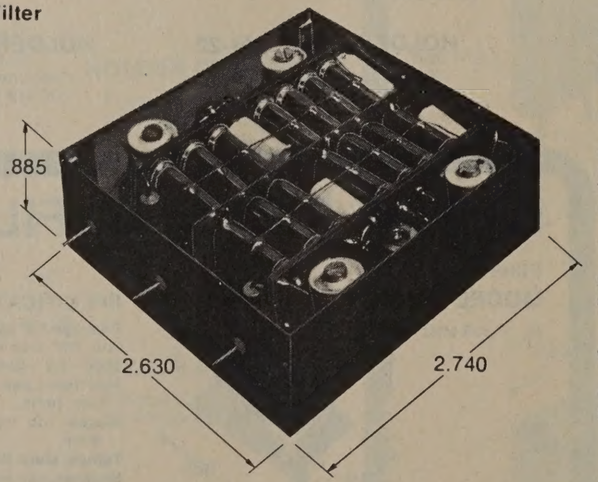
Filter
MODEL 53B20
F_o 455.000 KHz



SPECIFICATIONS

Package FM 3361
3db BW ±150 KHz min.
60db BW ±925 KHz max.
Transmission Loss: 14db max.
Ripple: 3db max.
Ultimate Attenuation: 60db min.
Temperature Range: −40° to +85° C
Transfer Impedance: 6500 Ω ±20%

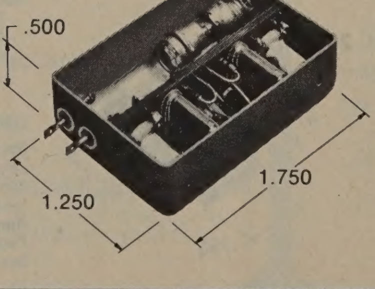
Single Sideband Filter
MODEL 20B110
F_o 1.750 MHz



SPECIFICATIONS

Package FM 2871
BW min. @ 1db F_o +295Hz to F_o +3100Hz
BW max. @ 60db F_o −125Hz to F_o +3975Hz
Insertion Loss: 5db max.
Ripple: 1db max. over 1db BW
Temperature Range: −40° to +70° C
Intermodulation Distortion Levels: At least 65db below two equal level (100mv.) signals, F_o +900Hz and F_o +2800Hz, applied simultaneously
Source/Load Impedance: 500 Ω
Shock: MIL-STD-202, Method 205, Test Conditions set forth in para 4.8.11.1 of MIL-F-39025
Vibration: MIL-STD-202, Method 204A, Test Condition A
Carrier Attenuation: @ F_o 40db min.
Differential Delay: 400 ms. max. over the band defined from F_o +800 Hz to F_o +3050 Hz

Crystal Discriminator
MODEL 6D1
F_o 11.000 MHz



SPECIFICATIONS

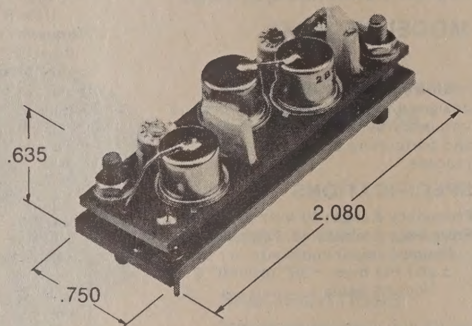
Package D1007
Peak-Peak BW: ±20 KHz
Linear BW: ±15 KHz
Linearity: ±3%
Sensitivity: .75 v/KHz
Driver Source Impedance: 1000 Ω
Discriminator Load Impedance: 75000 Ω
Drive Level: 3VRMS @ F_o
Temperature Range: +10° to +50° C

McCOY ELECTRONICS COMPANY

a subsidiary of **OAK Industries Inc.**
MT. HOLLY SPRINGS, PA. 17065 • 717-486-3411 - TWX: 510-650-3548

McCOY CRYSTAL FILTERS

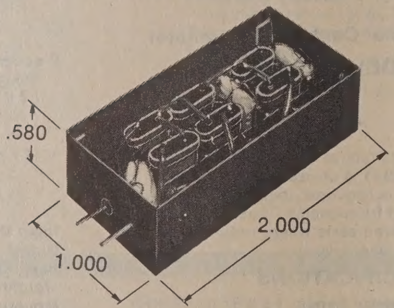
Filter
MODEL 2B308
F_o 25.500 MHz



SPECIFICATIONS

Package FM 7055
6db BW ±34.5 KHz min.
60db BW ±80 KHz max.
Insertion Loss: 5db max.
Ripple: 1db max.
Temperature Range: −55° to +71° C
Source/Load Impedance: 2700 Ω
Shock: 50G^S 11ms
Vibration: 5-500 Hz 10G^S

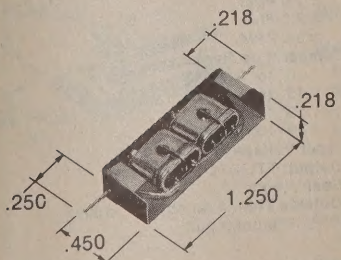
Filter
MODEL 2B91
F_o 9.000 MHz



SPECIFICATIONS

Package FM 2561
3db BW ±6 KHz min. ±7 KHz max.
60db BW 51 KHz max.
Insertion Loss: 6db max.
Ripple: 1db max.
Ultimate Attenuation: 60db min.
Temperature Range: −40° to +70° C
Source Impedance: 450 Ω
Load Impedance: 50 Ω

McCOY MONOLITHIC FILTERS

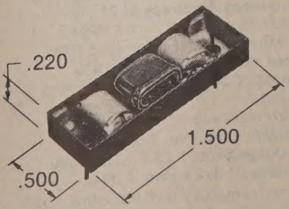


Monolithic Filter
MODEL 48Q3
F_o 11.500 MHz

Quality four pole space saver for miniaturized applications.

SPECIFICATIONS

Package FM 2885
3db BW ±10.5 KHz min.
40db BW 59 KHz max.
Insertion Loss: 2.5db max.
Ripple: 1db max.
Ultimate Attenuation: 60db min.
Temperature Range: −40° to +70° C
Source/Load Impedance: 2700 Ω



Monolithic Filters
MODELS 20Q4
1 through 16
F_o 11.000 - 15.000 MHz

Compact filter with termination matched to customer's requirement.

SPECIFICATIONS

Package FM 3919
3db BW ±7 KHz min.
10db BW 32 KHz max.
20db BW 50 KHz max.
Insertion Loss: 2db max.
Ripple: ±1db max.
Ultimate Attenuation: 30db min.
Temperature Range: −40° to +70° C
Source/Load Impedance: 50 Ω
Spurious Response Attenuation: 15db min.

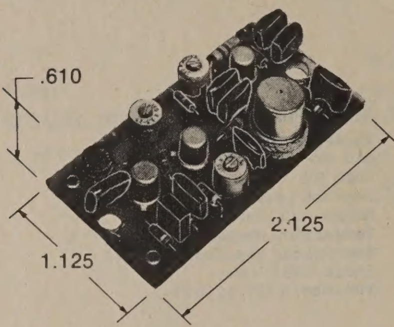
a subsidiary of **OAK Industries Inc.**
MT. HOLLY SPRINGS, PA. 17065 • 717-486-3411 - TWX: 510-650-3548

McCOY CRYSTAL OSCILLATORS



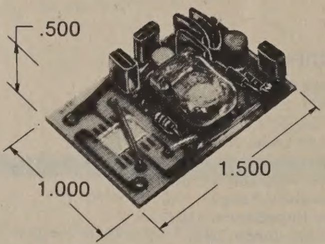
Crystal Controlled Oscillator

MODEL MC308X1

Multi-frequency crystal oscillator designed to allow the user to change frequency by inserting a new crystal and performing a simple retuning process.

SPECIFICATIONS

Frequency Range: 80 MHz to 110 MHz
Frequency Stability vs. Temperature Range (typical choices):
±20 PPM over −20° to +60° C from RT value
±50 PPM over −55° to +85° C from RT value
±100 PPM over −55° to +85° C from RT value
Frequency @ RT: Resolution of less than 1 PPM
Input Voltage: +12VDC ±2%
Input Current: 15ma. max.
Output:
7mw. min. into a 50Ω Load, sine wave, (−20° to +60° C)
5mw. min. into a 50Ω Load, sine wave, (−55° to +85° C)
Weight: 2 ounces max.
Mounting: Direct to printed circuit board using 4 wire leads
Package Volume: 1.63 cubic inches nominal
Crystal Type Used: TO-5 (McCoy Type W-6)



NOTE: Where height is critical, order MODEL MC210A1 which is the same as MC209A1 except height of .360 max.

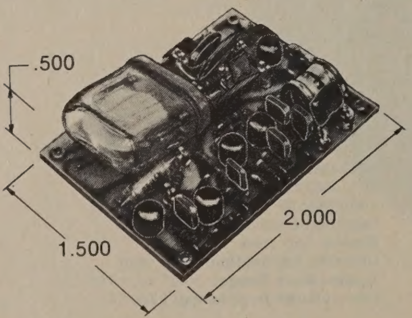
Crystal Controlled Oscillator

MODEL MC209A1

An offshoot of our MC109A1, the MC209A1 is utilized where an extra logic is required, thus obtaining lower output frequencies. It uses all MIL-approved parts where required on government work.

SPECIFICATIONS

Frequency Range: 1.8 KHz to 650 KHz
Frequency Stability vs. Temperature Range (suggested values only):
1.8 KHz to 12 KHz
±150 PPM over −55° to +105° C
± 70 PPM over 0° to +50° C
12 KHz to 650 KHz
± 50 PPM over −55° to +105° C
±100 PPM over −55° to +105° C
± 30 PPM over 0° to +50° C
Input Voltage: +5VDC ±5%
Output: Logic
Seal: Hermetic
Weight: 1.5 ounces max.
Mounting: Direct PC Mount



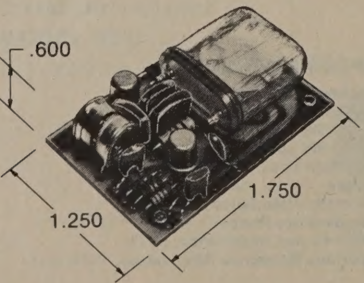
Temperature Compensated Crystal Oscillator

MODEL MC380A2

High Stabilities achieved with a single +5VDC input instead of 2 separate inputs.

SPECIFICATIONS

Frequency Range: 187.5 KHz to 25 MHz
Frequency Stability:
±0.5 PPM
±1.0 PPM
±2.0 PPM
±5.0 PPM
Temperature Range:
0° to +50° C
−10° to +70° C
−30° to +70° C
−40° to +85° C
Input Voltage: +5VDC ±1%
Output: TTL/DTL Compatible
Seal: Hermetic
Outside Trim: Available on request (5 PPM total pull)



Standard Oscillator

MODEL MC350X1

Versatile, economical crystal oscillator for PC board applications offering frequency trim adjustment and square wave output.

SPECIFICATIONS

Frequency Range: 188 KHz to 25 MHz
Frequency Stability: ±50 PPM
Temperature Range: −55° to +105° C
Frequency Accuracy at 25° C:
*Units with Trim - ±1 PPM
*Units without Trim - ±5 PPM
Input Voltage: +5VDC ±5%
Output: Compatible with TTL and DTL Logic
Seal: Hermetic
Weight: Less than 3 ounces
Package Size: 1.25 x 1.75 x .600
Volume: 1.312 cubic inches
*The frequency trim adjustment is optional and should be specified when required.

McCOY
ELECTRONICS
COMPANY

a subsidiary of **OAK Industries Inc.**

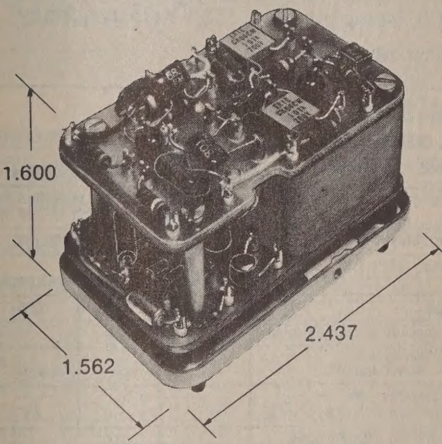
McCOY CRYSTAL OSCILLATORS



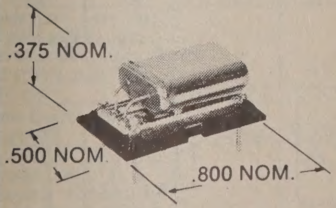
Oven Controlled Crystal Oscillator

MODEL MC645X4

Small, stable oven used where the upper ambient must be as high as +90° C.

SPECIFICATIONS

Frequency Range: 2.0 to 25 MHz
Frequency Stability: ±10 PPM over the temperature range
Temperature Range: −55° to +90° C
Input Voltage:
Oscillator: +16VDC ±5%
Oven: +18VDC to +35VDC (select value)
Output Waveshape: sine or square
Output Voltage: 4VP-P ±3db into a 10,000 Ω Load
Outside Trim: Yes, to better than 0.1 PPM of nameplate frequency
Oven Control: Proportional Type Solid State
Oven Power:
6 watts max. at −55° C turn-on and +28VDC input
3.5 watts max. steady state at −55° C and +28VDC input
Warm-up time: 10 minutes at −55° C (unit will be within frequency tolerance over the temperature range.



Miniature Dip Crystal Clock Oscillator

701/702 SERIES

SPECIFICATIONS

Size:
MC 701A1 -4 Pin Dip Plastic Pkg.
MC 702A1 -14 Pin Dip Plastic Pkg.

Pin Conn:
MC 701A1/MC 702A2 Pin #1 NC
Pin #7 GND
Pin #8 RF Output
Pin #14 +5VDC

Frequency Range:
156 KHz to 25 MHz

Frequency Stability Over Temp:
± 20 PPM, +15 °C to +34 °C
± 50 PPM, 0 °C to +70 °C
± 60 PPM, -40 °C to +85 °C
± 70 PPM, -55 °C to +105 °C

Frequency Calibration @ +25 °C:
± 25 PPM
± 10 PPM (Optional @ Prem.)

Frequency Stability vs. B+ (5.0 VDC) ± 10%:
± 2.0 PPM

Frequency Stability vs. A Load, 1 to 10 Loads:
± 2.0 PPM

Aging vs. Time:
± 5 PPM, 1st Yr. ± 3 PPM/Yr. For Subsequent Yrs.

Symmetry:
40% to 60% Typ., 35% to 65% max.

Risetime:
(.5V to 2.4V): 10 to 25 nsec Value Related to Output Frequency

Fall Time:
(2.4 to .5V): 10 to 25 nsec Value Related to Frequency

Fanout:
1 to 10 ^{2}T L Loads
(1 sink = 16.0 ma. max., 1 source = 4 ma. max.)

Output Voltage:
Logic "1": 2.4V min.
Logic "0": 0.4V max.

Input:
+5VDC. ± 10%
2.5 MHz to 25 MHz, 15 ma. typ. (25 ma. max.)
625 KHz to 2.5 MHz, 30 ma. typ. (50 ma. max.)
156 KHz to 625 KHz, 40 ma. typ. (65 ma. max.)

Features: MC701A1:
Utilizes 4 pins to facilitate mounting on PC board solder operation.

MC702A1:
Utilizes 14 Pins for mounting in 14 pin dip socket for maximum engagement under shock and vibration conditions.

MF CRYSTAL OSCILLATORS

MF GUARANTEED CRYSTAL OSCILLATORS (TCXO and XO) • 1 Hz - 20 MHz

- Improved input voltage characteristic
- Screwdriver adjustable
- Choice of 2 cases

HOW TO ORDER: For Part Number...Add case style and frequency to the Series
For example:
Series 5401, Flatpack case, 10 MHz frequency
5401 — 1 — 10 M
Series 5403, Compact case, 153.6 KHz frequency
5403 — 2 — 153.6K

SERIES 5401

TEMPERATURE COMPENSATED CRYSTAL OSCILLATORS (TCXO) • 1 Hz - 20 MHz

	5401-1, 2	5401-3, 4
Frequency range	As specified from 250 KHz to 20 MHz	As specified from 1 Hz to 249 KHz
Input Current, Maximum	50 ma	100 ma

	MINIMUM	TYPICAL	MAXIMUM	
Input Voltage	4.75	5.00	5.25	Volt
Frequency Screwdriver Adjustment	±5	±10		ppm
Frequency Stability with Temperature from 0 to 65°C		±0.4	±0.8	ppm
Frequency Stability with Input Voltage from 4.75 to 5.25 volts		±0.1	±0.2	ppm
Ageing, per month, after 60 days		±0.2		ppm
Output Fan Out			10	TTL loads
Symmetry, at 1.5 volts	40/60		60/40	
Rise Time, 0.8 to 2.4 volts				
1 Hz to 10 MHz		7	20	ns
Over 10 MHz to 20 MHz		2.5	5	ns
Fall Time, 2.4 to 0.8 volts				
1 Hz to 10 MHz		4	20	ns
Over 10 MHz to 20 MHz		2	5	ns

MF DIP CRYSTAL OSCILLATORS

MF GUARANTEED DIP OSCILLATORS

The Broadest line in the industry.

- Most units molded—greatly resistant to moisture and abuse.
- Units use overtone crystals from 20 MHz to 65 MHz, very stable electrically and more reliable mechanically.
- Each oscillator serialized and date coded.
- Units specified at temperatures exceeding 0 to 65°C are individually recorded 100% for frequency vs temperature-insuring compliance.
- All units guaranteed for one year to operate within specifications.

DESCRIPTION	FREQUENCY	PART NO. (substitute frequency for ...)	TOTAL ACCURACY Parts Per Million	TEMPERATURE	
Round pins, commercial.	4 to 65 MHz	5404- ...M	± 50 ppm	0 to +65°C	Fig. A
Round pins, commercial.	4 to 65 MHz	5404-1...M	± 25 ppm	0 to +65°C	
Dual DIP, commercial.	80 KHz to 4.99 MHz	5405 ...M	±200 ppm	0 to +65°C	Fig. B
Dual DIP, commercial.	80 KHz to 4.99 MHz	5405-1...M	±100 ppm	0 to +65°C	
Molded DIP, .300" high	4 to 65 MHz	5406 ...M	± 50 ppm	0 to +65°C	Fig. C
Molded DIP, .300" high	4 to 65 MHz	5406-1...M	± 25 ppm	0 to +65°C	
Molded DIP, .300" high	4 to 65 MHz	5406-2...M	± 50 ppm	−55 to +65°C	
Molded DIP, .300" high	4 to 65 MHz	5406-3...M	± 50 ppm	0 to +85°C	
Molded DIP, .300" high	4 to 65 MHz	5406-4...M	± 75 ppm	0 to +125°C	
Molded DIP, .300" high	4 to 65 MHz	5406-5...M	± 50 ppm	−55 to +85°C	
Molded DIP, .300" high	4 to 65 MHz	5406-6...M	± 75 ppm	−55 to +125°C	
Molded DIP, .300" high all dashes same as 5406, except units tunable.	4 to 65 MHz	5407 ...M	± 50 ppm	0 to +65°C	
Molded DIP, .300" high, 4 pins, lowest cost.	4 to 65 MHz	5408 ...M	±100 ppm	0 to +70°C	
Molded DIP, herm. seal, crystal and IC. Mil use.	4 to 65 MHz	5410 ...M	± 50 ppm	−55 to +85°C	
Same as above with stand-off.	4 to 65 MHz	5410S ...M	± 50 ppm	−55 to +85°C	
Molded DIP, herm. seal, crystal and IC. Mil use.	4 to 65 MHz	5411 ...M	± 75 ppm	−55 to +125°C	
Same as above with stand-off.	4 to 65 MHz	5411S ...M	± 75 ppm	−55 to +125°C	
Molded DIP, herm. seal, crystal and IC; all hi-rel parts. Additional screening available. Mil use.	4 to 65 MHz	5412 ...M	± 50 ppm	−55 to +85°C	
Same as above with stand-off.	4 to 65 MHz	5412S ...M	± 50 ppm	−55 to +85°C	
Molded DIP, herm. seal, crystal and IC; all hi-rel parts. Additional screening available. Mil use.	4 to 65 MHz	5413 ...M	± 75 ppm	−55 to +125°C	
Same as above with stand-off.	4 to 65 MHz	5413S ...M	± 75 ppm	−55 to +125°C	
Herm. seal case, herm. seal crystal and IC. Mil use.	4 to 65 MHz	5420 ...M	± 50 ppm	−55 to +85°C	Fig. D
Herm. seal case, herm. seal crystal and IC. Mil use.	4 to 65 MHz	5421 ...M	± 75 ppm	−55 to +125°C	
Herm. seal case; all hi-rel parts. Cold weld crystal. Mil use, extensive 100% screening. Most reliable part available.	4 to 65 MHz	5422 ...M	± 50 ppm	−55 to +85°C	
Herm. seal case; all hi-rel parts. Cold weld crystal. Mil use, extensive 100% screening. Most reliable part available.	4 to 65 MHz	5423 ...M	± 75 ppm	−55 to +125°C

HOW TO ORDER:

For Part Number . . . Add frequency to the Series

For example:

Series 5404, ±50 ppm, 0 to 65°C → **5404 - 10M** ← 10 MHz frequency

Series 5406-5, ±50 ppm, −55 to +85°C → **5406-5 - 4.096M** ← 4.096 MHz frequency

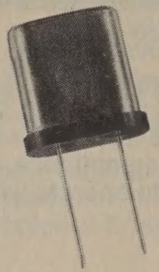
CRITICAL CRYSTALS come from M-tron INDUSTRIES, INC.



Commercial Crystals from 1 MHz to 100 MHz

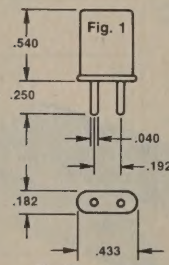
Inexpensive quartz crystals for high volume assembly applications. Widely used in circuits where long-term stabilities in the range of 5 to 10 ppm/year are acceptable. M-tron commercial crystals have typical applications in electronic clocks, TV games, color TV, microprocessors, instrumentation, avionics, CB radios, and other personal communication equipment.

GENERAL SPECIFICATIONS FOR COMMERCIAL CRYSTALS

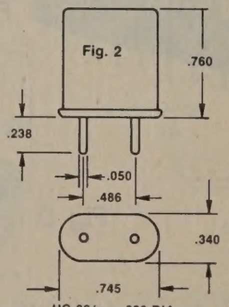
TYPICAL APPLICATION	PRODUCT TYPE	HOLDER STYLE	DIMENSIONAL OUTLINE	FREQUENCY RANGE (MHz)	CALIBRATION TOL. at 25°C (PPM)	STABILITY OVER TEMP. RANGE (PPM)	TEMP. RANGE		LOAD CAPACITY (Pf)	MAX. DRIVE LEVEL* (mW)
							−C°	+C°		
Hand-Held CB radio	CB-1	HC-25/u	Fig. 1	26.965 to 27.405	±15	±30	−20	+60	65	2.0
CB Radio	CD-1	HC-25/u HC-18/u	Fig. 1	5.0 to 60.0	±20	±30	−20	+60	32	2.0
Toy Hand-Held Radio	LP-1	HC-25/u	Fig. 1	49.830 to 49.890	±25	±50	−20	+50	65	2.0
Quartz Clocks	QC-2	HC-33 mod.	Fig. 3	4.194304 or 2.097152	±25	±50	−20	+60	15	2.0
TV Color Burst Osc.	TV-2	HC-33 mod.	Fig. 3	3.579545	±20	±30	−20	+65	18	2.0
Video Games	VG-2	HC-33 mod.	Fig. 3	3.000 to 5.000	±30	±35	−10	+65	18	2.0
Micro-processor	MP-1	HC-18/u	Fig. 1	3.579 to 28.356	±25	±35	−20	+70	18	2.0
Micro-processor	MP-2	HC-33/u	Fig. 2	1.000 to 5.000	±25	±35	−20	+70	18	2.0

**All tests performed at 0.1 mW drive level.*

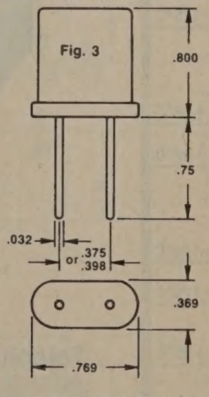
Standard Holder Styles



HC-18/u = .017 DIA. x
1.5 LONG LEADS



HC-33/u = .030 DIA. x
1.5 LONG LEADS



Custom Crystals

M-tron normally manufactures crystals to the general specifications shown here. Should your requirements vary, M-tron will provide custom crystals to your specifications. To reduce developmental time significantly, specify the following parameters when ordering custom crystals.

- Frequency in megahertz
- Mode of oscillation
- Frequency calibration tolerance @ 25°C
- Frequency deviation over the temperature range
- Operating temperature range in °C
- Maximum series resistance in ohms
- Shunt capacitance in picofarads
- Load capacity in picofarads
- Maximum drive level in milliwatts
- Holder type

M-TRON COMPONENTS DISTRIBUTION PROGRAM

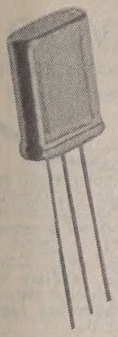
M-tron carries out an aggressive crystal marketing campaign for the electronic distributor. Crystals are available from stock 2 weeks after the receipt of an order. Non-stock items are shipped within 4 weeks. This includes all of M-tron's stocking programs which are listed at right.

In addition, an order entry system is available for distributors to request larger volumes of crystals to their own specifications. This delivery ranges from 6 to 8 weeks after receipt of an order.

M-tron currently has in stock the following crystal product lines:

- Scanner radio crystals
- Scanner radio crystal certificates
- Plug-in CB radio crystals
- Plug-in CB radio crystal certificates
- CB radio synthesizer replacement crystals
- CB radio synthesizer replacement crystal certificates
- Microprocessor crystals
- **M-tron 9** emergency delivery program

CRITICAL CRYSTALS come from M-tron INDUSTRIES, INC.



2 Pole Monolithic Filters

M-tron manufactures inexpensive 2 pole monolithic filters for high volume assembly applications. These units have normal applications in personal communications equipment, scanner radio, AM-FM-CB radio combinations and many other signal processing applications at 10.7 MHz.

Custom Monolithic Filters

M-tron builds filters to the general specifications listed below. Should your specifications vary, M-tron will custom manufacture to your exact requirements. Developmental time can be significantly reduced if the parameters listed in the chart below are specified when ordering.

CENTER FREQUENCY (MHz)	NUMBER OF POLES	BANDWIDTH AT THE −3 dB POINTS (KHz MINIMUM)	BANDWIDTH AT THE −20 dB POINTS (KHz MAXIMUM)	RIPPLE (MAX.)	SPURIOUS RESPONSE (MIN.)	INSERTION LOSS	INPUT & OUTPUT IMPEDANCE (Ω)
10.700	2	±7.5	±35.0	1 dB	15 dB	1 dB	3K
10.700	2	±3.0	±15.0	1 dB	15 dB	2 dB	1K
10.700	2	±15.0	±75.0	1 dB	15 dB	1 dB	3K

Military Crystals

M-tron is approved to build the following crystals to meet the U.S. military specifications. These applications include time base oscillators, communications equipment and other military frequency control requirements.

M-tron is QPL Approved for the following Military Crystal Types:

CR-5A/U
CR-6A/U
CR-8A/U

Quality Control and Inspection

M-tron maintains a detailed Quality Control manual which is revised regularly to reflect the latest requirements for processing and testing quartz crystals. In addition to a quality audit to verify 100% production testing, an in-line quality system is employed to insure product quality. This program is in accordance with MIL-I-45208A.

Computer-Aided Design

M-tron's engineering department is ready to work with you on your new programs involving volume assembly application.

- Computer-aided design
- Excellent engineering liaison
- Samples in 3 to 4 weeks
- Consistent product design quality

Equipment Calibration is in accordance with MIL-C-45662A with frequency standards synchronized to WWVB at Fort Collins, Colorado. M-tron's ENVIRONMENTAL TESTING is performed in our government certified testing laboratory using MIL-C-3098 as the quality guideline.

Get the action YOU need from M-tron…the solid source.

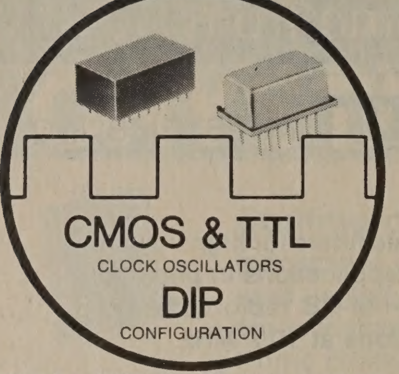
INDUSTRIES, INC.
P. O. Box 630, Yankton, South Dakota 57078



Monitor has CMOS and TTL logic crystal-controlled precision clock oscillators for all your commercial, industrial, and military environment needs. Example: The 800 Series low profile TTL logic, 50Hz-40MHz, as low as $4.50 ea. in quantity! Designs per MIL-O-55310 available. OFF-THE-SHELF DELIVERY ON STANDARD FREQUENCIES.

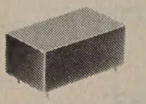
ECONOMY TTL LOGIC 50Hz-125MHz/DIP PLUG-IN

800 Series

900 Series

Input: 5VDC±10% / Output: "0" = +.4Vmax., "1" = +2.4Vmin / Current Drain: 50MA/Typ./Stability to ±30 PPM, 0°-60°C. Nominal calibration: ±50PPM @ 25°C. Full ambient units available/ Size: as small as 1"x.75"x .35"./DIP plug-in, TO-116 compatible pin pattern.

978A SERIES/3-10MHz CMOS LOGIC/14-PIN DIP

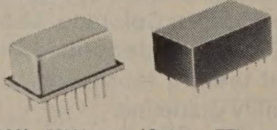


Input: 10-15VDC, 3MAmax./ Output: "0" = +.5V-max., "1" =80% of supply voltage min./ Stability: ±.005% —40° to +85°C. Nominal calibration: ±.01% @ 25°C/Std. frequencies: 4.194304MHz (1Hz binary multiple). 3.932160MHz (60Hz binary multiple), 4.096MHz (1KHz binary multiple).

870A SERIES/10Hz-10MHz CMOS LOGIC/PCB MOUNTING

Input: 10-15VDC, 10MA (<5MA for 877A)/Output: "0"=+.5V max., "1"=90% of supply voltage min. (80% for 877A, 879A)/Stability: to ±.005% 0°-60°C (—25° to +75°C for 877A, 879A), nominal calibration: ±.005%@25°C (±.01% for 877A)/ Other frequencies, stabilities to ±25PPM available on special order

TTL LOGIC/14-PIN DIP 218KHz-20MHz

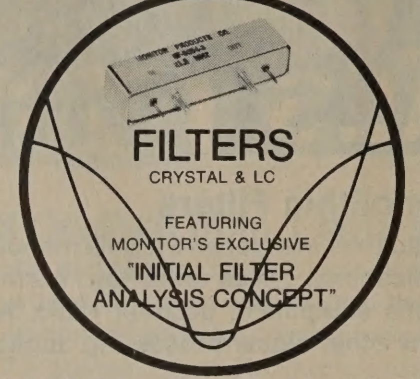


Hermetically Sealed

Input: 5VDC±10%, 50MA max./Output: TTL symmetry 60/40, +2.4V min./Rise-Fall: 20 nanosec. nominal/Load: Up to 10TTL gates (1.6MA ea.)/ Typ. stability: ±100PPM, 0°-70°C std., —55° to +125°C opt. (stabilities to ±25PPM available)/ Set tolerance: ±100PPM@+25°C (±20PPM available)/Environmental: Ref. Mil-Std-202, Mil-O-55310

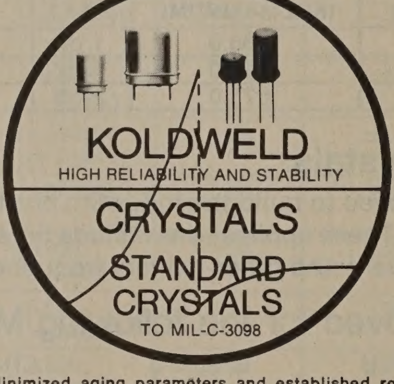
968/969 SERIES/MULTIPLE OUTPUT/TTL LOGIC/14-PIN DIP

Multiple binary related output from the same unit. 1, 2, 4, 8 and 16 MHz, Type 969. 1.25, 2.5, 5, 10, and 20 MHz, Type 968. Microprocessor clock frequencies standard/.46"x.80"x.35"h.



Among leading suppliers of LC and quartz crystal filters, Monitor will meet your Total Filter Needs, in the frequency spectrum from audio to 30MHz. No restriction to bandwidth. The "Initial Filter Analysis concept" in computerized plot and tabloid form, will assist you in optimizing your network.

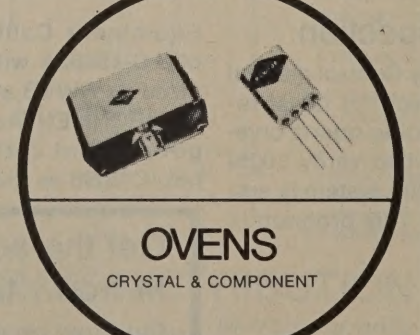
- **CCIR Filters for Multi-Channel Transmission Systems**
- **Diagnostic Filters for Dynamic Analysis**
- **Comb-Filter Sets**
- **Very Narrow Bandwith Filters**
- **Multiplex Filters**
- **Single Side Band Filters**



Minimized aging parameters and established reliability (ER) conformance are inherent in Monitor's Koldweld Crystal techniques.

The KX Types are cross referenced to standard HC-6, HC-18 and HC-13 military specification units. Monitor's KTO Series is an extension of the TO-5/TO-18 Configurations.

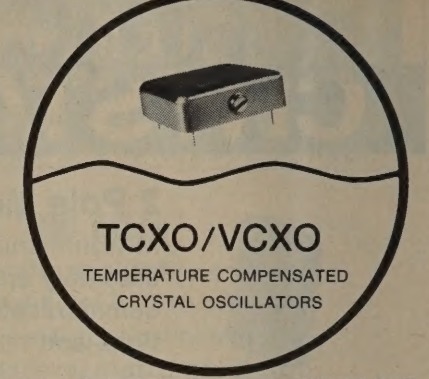
Write for our Crystal Engineering Handbook. Delivery from stock on small quantities of most standard frequencies.



Solid State Mercury 28VDC and 115VAC

Proportional Control 12VDC, 28VDC and 115VAC

Several hundred models available based on over three decades of oven design experience. Why settle for less?



Monitor Temperature Compensated Crystal Oscillators assure precise frequency control and high stability, extremely low current drain and zero warm up time. A full range of designs are available with sine wave, TTL or CMOS compatible outputs. Monitor TCXOs and TC/VCXOs are widely used in industrial, military and spacebourne environments where high density packaging, and maximum reliability are required. Ref. Mil-Std-202 and Mil-O-55310.

TCXOs, TC/VCXOs .2-20MHz

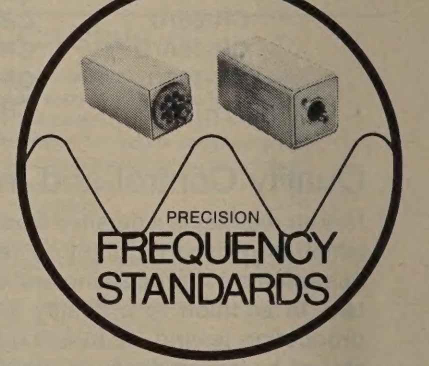
Designs available from 50Hz-50MHz. Check our stock for your needs.

E07-E42
2"x2"x.53"

E43-E78
1.5"x1.5"x.53"

E79-E90
2" dia.x.9"

Input: 5-15VDC (+15V±5% std.), 3-20MA/Outputs: TTL std. (10TTL loads), CMOS and sine wave (0 DBM min., 50 ohms)/Temp. vs. stability: ±.5PM, 0°-55°C; ±1PPM 0°-60°C; ±2PPM, —55° to +71°C; ±1PPM —20° to +70°C, other stabilities available/Aging: ±1 part in 10^{-6} per year, ±.5 parts in 10^{-7} available.



Order your precision frequency standards from Monitor. Major electronic counter and instrument manufacturers are satisfied users. Ask for our complete line of thermally stabilized standards.

Typical Specifications-Input: 115VAC or 28VDC oven, 2 watts @25°C, 6 watts turn-on; 15-30VDC oscillator, 15MA typical/Outputs: TTL compatible, sine wave and CMOS optional/Frequencies: 1, 5 and 10MHz std., other available/Aging rates up to 3 parts in 10^{-9} per day std., 1 part in 10^{-9} per day opt./Short term stability: ±5 parts in 10^{-10} per second, typ./Size: as small as 1.5"x1.5"x3.25"h.

Microprocessor clock models K1117A and MC6870A are designed to provide the critical two-phase, non-overlapping wave forms required by the specific microprocessor, as well as TTL outputs for VMA. Additional input and output features are added to models K1117B, MC6871A, and MC6871B to accommodate systems that use fast and slow memories, direct memory access, etc. Crystal, oscillator, NMOS drivers and necessary wave shaping circuitry are packaged by hybrid thick film IC technology into one dual-in-line module that reduces your component count and board space.

DIP Hybrid Circuit Crystal Oscillators

Low-cost Models DT1-121 & DT1-221 designed for digital clock applications

- **Frequency Range:** 20KHz to 25MHz
- **Overall Stability:** ±0.10%—Model DT1-121
±0.005%—Model DT1-221
- **Temperature Range:** 0°C to +70°C
- **Output Waveform:** Squarewave 50/50±20% to drive 10 TTL loads. 0.4V max. "0" and 2.4V min. "1" level.
- **Input Power:** Voltage +5±5%. Current 30 to 120MA depending on frequency.
- **Package:** 14 pin DIP, glass-filled nylon. Fits into standard 14-pin socket.
- **Size: (WLH):** Approx. 0.50"×0.80"×0.37".

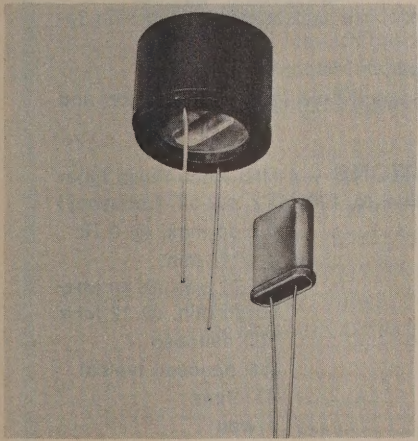
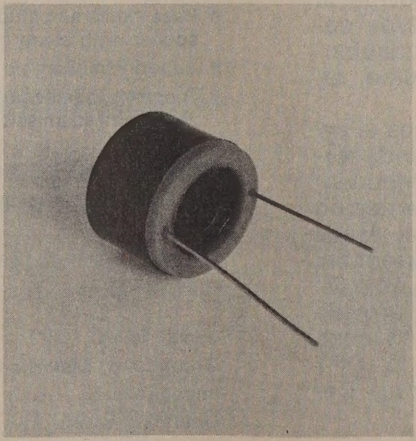
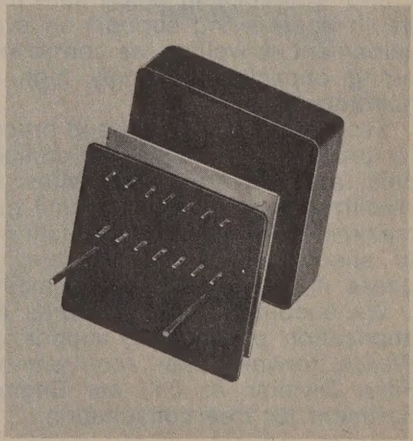
ovens







Miniature Crystal & Component Ovens for:

- HC-18/U, HC-25/U, HC-42/U, HC-43/U Crystals.
- TO5 & TO8 Crystal, Transistor or IC.
- 14 or 16 pin DIP IC.

State-of-the-Art PTC Proportional Control.

Low Power Consumption

Space-Saving PCB Mount

Wide range of Voltages and Temperatures

Adjustable Temperature Models Available

Single and Multiple Crystal Models.

OVENAIRE ALSO OFFERS A COMPLETE RANGE OF OVENS FOR COMMERCIAL AND MILITARY APPLICATIONS.

- Band Pass
- Linear Phase
- Constant Group Delay
- Constant Time Delay
- MIL-F-18327

OPT is a major supplier of active and passive custom designed filters. Our active filter capability employs the classical solutions that are augmented by unique circuit approaches. Our passive filter capability include L-C and Crystal versions. Frequencies range from low audio to 400 MHz.

OPT is at the forefront of filter engineering as a result of company sponsored research and development in addition to the technology gained through the acquisition of Burnell Company, Nytronics Filter Division; Omnitec Corporation, Filter Division; Ortho Filter Company; and Bulova Watch Company, Crystal Filter Division. Broad application experience, supported by a library of computer synthesis, analysis and optimization programs, assist in supplying the best solution to specific requirements.

OPT is unique in being able to provide in depth engineering support on prototype development as well as the controlled manufacturing capacity to supply high volume requirements.

Production equipment and processes allow for production of laminated components, toroids, and pot core assemblies. Component stabilization procedures permit guaranteeing maximum stability with operating life. Areas of specialization include delay correction, phase matching and time domain synthesis.

We encourage your inquiries and provide application engineering support at no cost. Please forward your requirements to OPT Filter Division or call our Engineering Department for free consultation.

TYPICAL EXAMPLE CUSTOM L.C. FILTER

ACCU-PULSE SERIES

P/N
opt
INDUSTRIES INC
PHILLIPSBURG, N.J.

FEATURES

- Constant time delay throughout pass band, into stop band
- Excellent step frequency discrimination characteristics
- Flat group delay
- Pass band amplitude response approximates Gaussian response with steep stop band roll-off
- Superior monotonic amplitude response
- Precisely balanced pass band pole frequency location and zeros of transmission

TYPICAL SPECIFICATIONS—4 MHz Accu-Pulse Filter (Accu-Pulse Filters available to 100 MHz cut-off frequency)

Insertion Loss	0.2 db max. @ 0 Hz
Cut-off Frequency (3 db)	4 MHz min.
Attenuation	35 db min. @ 10 MHz 60 db min. @ 12 MHz
Group Delay	100 nanosec
Group Delay Distortion	±6 nanosec typical
Impedance	75 ohms
Operating Level	1 watt
D.C. Voltage	50 vdc max.

OTHER PRODUCTS

OPT Industries also manufactures custom power supplies and transformers. See our product data on these products in Section 4000 page 3290.

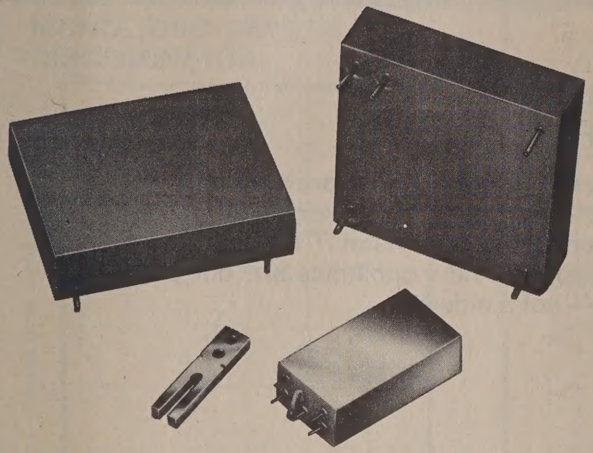
Call or Write For Our Facilities and Capabilities Brochure



Tuning Fork Oscillators

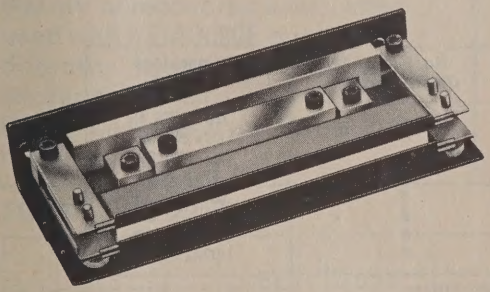
Extremely **rugged** and **reliable** hermetically-sealed frequency sources using 10 KHz to 20 KHz separately evacuated 20,000 Q Tuning Fork Resonators. C/MOS dividers used for output frequencies below 10 KHz.

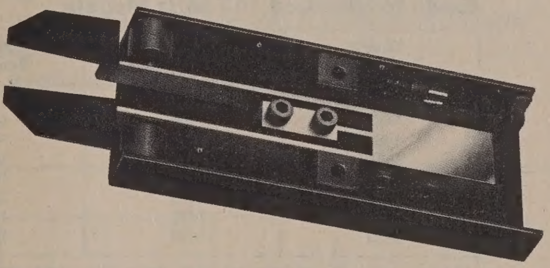
Absolute frequency accuracies from ±.05% to ±.001% over temperature ranges up to from −55°C to +105°C

Sine Wave Outputs: low distortion, constant voltage, from 60 to 10,000 Hz, DC inputs from +15V to +30V.

Logic Outputs: 1.0 to 20,000 Hz, DC inputs +5V & up

MIL quality components, low current drain designs, full MIL shock & vibration & environmental capability





Tuning Fork Light Choppers

Frequencies from 40 to 1000 Hz . . for modulating or chopping light or energy beams. May often be used to replace motor driven choppers . . offering weight and power savings plus eliminating need for lubrication.

Particular design & construction technology provides exceptional fork balance and high resistance to shock and vibration as required for most MIL applications.

Tine ends may be fitted either with shutters, lenses, or mirrors to suit your special requirements. Drive circuits available either for slave or oscillator mode.

Philamon® products are known for their conservative ratings and performance reliability and are extensively used in major MIL programs. Our QC exceeds MIL-I-45208A and subscribes to the "intent" of MIL-Q-9858A.

For complete application information on either standard models or custom engineered units to suit your particular needs . . . phone, write, or twx . . .

MONOLITHIC CRYSTAL FILTERS

If you need crystal filters, chances are your best bet is a monolithic — for cost, for size, for performance. If you need monolithics, you need PTI — the oldest and largest supplier. And monolithics are our principal product — not a sideline.

STANDARD MODELS

For low cost, take our 10.7 MHz and 21.4 MHz integrated crystal filters. All models are available off-the-shelf. All feature tandem monolithic construction for minimum size and high stopband performance. Our 10.7's and 21.4's are available in upright, flatpack, p.c. assemblies or sets of monolithic units for assembly on your own board.

Guide to Standard 10.7 MHz Models

13 kHz Bandwidth	15 kHz Bandwidth	30 kHz Bandwidth	No. Poles (Resonators)	Dimensions WxLxH
2194F	2195F	2196F	2	.185x.432x.45
1463	1464	1465	4	.47x.59x.60
1466	1467	1468	4	.63x.89x.23
1469	1470	1471	6	.47x.59x.60
1472	1473	1474	6	.63x1.32x.23
1475	1476	1477	8	.50x.75x.60
1478	1479	1480	8	.63x1.75x.23
1433	1434	1435	8	1.02x2.39x.52

Models 1433 - 35 interchange with commonly used conventional crystal filters.
Standard European configurations are also available.

Guide to Standard 21.4 MHz Models

13kHz Bandwidth	15 kHz Bandwidth	30 kHz Bandwidth	No. Poles (Resonators)	Maximum Dimensions WxLxH (in.)
2249F	2250F	2251F	2	.185x.432x.45
1617	1618	1619	4	.47x.59x.60
1620	1621	1622	4	.63x.89x.23
1623	1624	1625	6	.47x.59x.60
1626	1627	1628	6	.63x 1.32x.23
1629	1630	1631	8	.50x.75x.60
1632	1633	1634	8	.63x 1.75x.23

PTI also offers standard models at many other popular frequencies including 5.26, 6.46, 8.0, 16.9, 20.0, 30.0, 32.0, 75 and 156 MHz.

CUSTOM MODELS

The same cost saving techniques of PTI standard integrated crystal filters can be applied to your high volume custom requirements in I-F filtering, spectrum clean-up, parametric up-conversion and front-end filtering, just to name a few. PTI engineers will work with you from start to finish to meet your specific requirements from 5 to 300 MHz. They'll be glad to discuss performance characteristics, packaging and cost. Prototypes are usually available within 4 to 6 weeks. Specification forms are yours for the asking. Write or call. If you have questions about monolithics, we've got the answers.

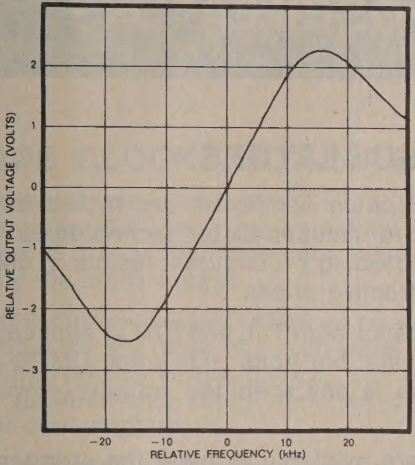
The standard in monolithic crystal filters

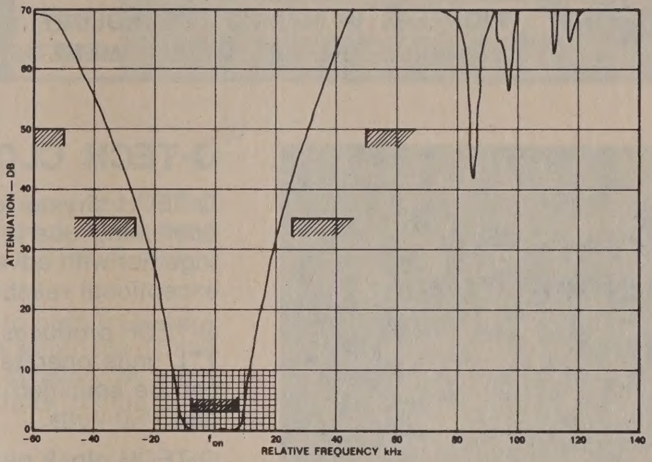
More Off The Shelf From P.T.I.

MONOLITHIC CRYSTAL DISCRIMINATOR



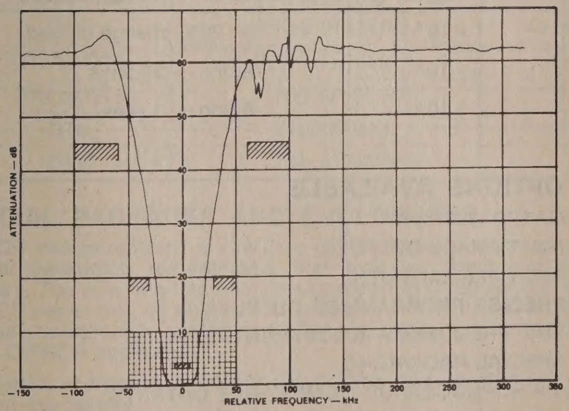
Model 2283F, at 10.7 MHz, offers 1% total harmonic distortion and 800 mV of recovered audio when used with a CA3089E quadrature detector. Model 2378F offers similar performance at 21.4 MHz. Data sheets available on request.

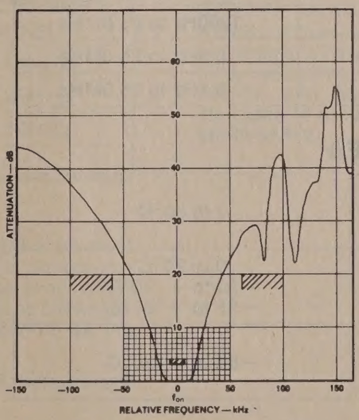
A 45 MHz SPECIAL



Our new 45 MHz Model 4371F is a 4-pole monolithic crystal filter offering maximum performance in a single HC-18 envelope. Designed for first IF use in new generation 900 MHz mobile receivers. Attenuation is 3dB max. over ± 7.5 kHz. Data sheet available on request.

FRONT-END FILTERS





These two-pole and four-pole monolithic crystal filters are designed especially for use as front-end filters for VHF low-band and high-band land mobile radios. All models are suitable for field or factory installation. They are matched to 50 ohms and fitted with phono-jacks (2-pole models) or BNC connectors (4-pole models). Two-pole models offer alternate channel rejection of 20dB min. and ultimate attenuation of 30dB. Four-pole models offer adjacent and alternate channel rejection of 20 and 45 dB (high-band) or 15 and 40 dB (low-band).

Case dimensions: l - 2.39 w - 1.02 h - 1.07

Other case styles available on special order. For OEM applications the monolithic elements can be supplied individually.

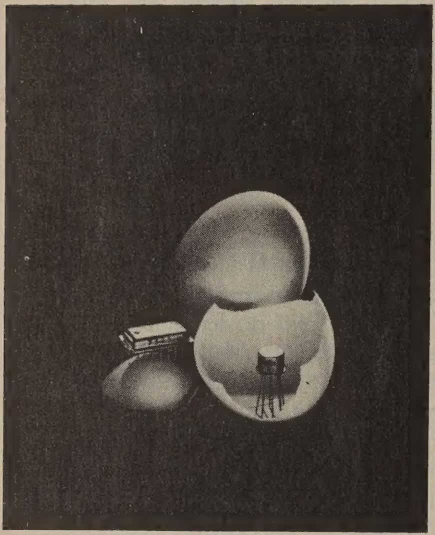
Q-Tech Corporation

PIONEERS IN HYBRID TECHNOLOGY
STATE OF THE ART DEVELOPMENT

MINIATURE / CRYSTAL CLOCK OSCILLATORS



Q-TECH CLOCK OSCILLATORS

Q-TECH Crystal controlled clock oscillators are hybrid devices combining quartz crystal and semiconductor technologies. This, together with advanced processing procedures, results in units of exceptional reliability at attractive prices.

Q-TECH produces oscillators for both TTL and CMOS applications. TTL units operate at a nominal 5.0 Volts ±.5 Volts. CMOS units can be specified to operate at any specified voltage between 5 and 15.0 Volts.

Q-TECH clock oscillators are available to meet the stringent requirements of a MIL-STD-883A, screens to Level A or Level B.

Q-TECH clock oscillators are available in 3 types: TO-5 (8 lead), TO-8 (8 or 12 lead), and DIP (14 or 16 lead). The TO-5 units covers a limited frequency range, while the TO-8 and DIP both have an extremely wide output frequency range for an extensive variety of applications. The tables below provide full details.

FREQUENCY RANGES

TO-5 (QT1)	100KHz to 30.0MHz
TO-8 (QT2, 3)	1000Hz to 25.0MHz
14 Pin DIP (QT4 & QT6)	0.1Hz to 25.0MHz
16 Pin DIP (QT5)	0.1Hz to 25.0MHz

TYPICAL TOLERANCES

±.01% ±.005% ±.0005%	0 to 50°C
±.005% ±.0025% ±.005%	0 to 20°C −20 to + 70°C −55 to +105°C
±.003% ±.005% ±.01%	−55 to +125°C

STABILITIES AVAILABLE

2×10^{-6}	for 10% change of Vcc
1×10^{-6}	for 20% change of load
5×10^{-6}	Aging — 30 days
1×10^{-5}	Aging — 1 year

Q-Tech Corporation

PIONEERS IN HYBRID TECHNOLOGY
STATE OF THE ART DEVELOPMENT

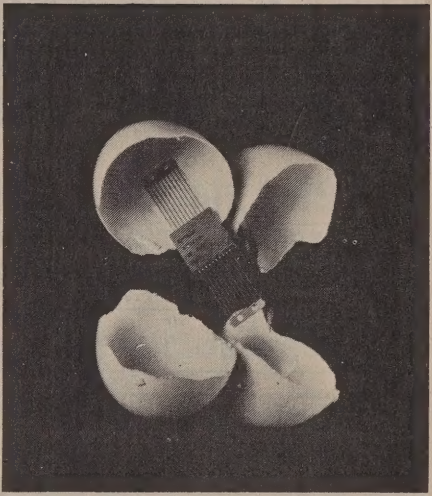
MINIATURE / CRYSTAL
CLOCK
OSCILLATORS

C-MOS CLOCK OSCILLATORS

Frequencies available in the C-MOS line of oscillators are limited presently to 10.0 MHz. This frequency limit is also related to input voltage. It is essential, therefore, when ordering a C-MOS unit to specify the input voltage.

Power requirements of C-MOS units are related to both frequency and input voltage. Most of the power is dissipated within the crystal oscillator portion of the device, and buffering, division, or other logic requirements within the unit contribute little to the total power consumption.

To accommodate low power and/or low voltage requirements for C-MOS application that are frequently encountered, two new series of oscillators are offered. These are the QT8 and the QT9. The larger diameter packages enable Q-TECH to continue to offer the stabilities of AT-cut crystals in relation to frequencies as low as 0.1 Hz and additionally, afford low power consumption and operating voltages (VDD) as low as 3-5V. Frequency ranges that may be obtained from the two packages as shown in the tabulation "FREQUENCY RANGES AVAILABLE."



FREQUENCY RANGES AVAILABLE

Package Size	C-MOS Frequency Range	TTL Frequency Range
QT1	50KHz to 10MHz	400KHz to 30MHz
QT2 or QT3	300Hz to 10MHz	1KHz to 25MHz
QT4 or QT6	.1Hz to 10MHz	.1Hz to 25MHz
QT8	.1Hz to 6MHz	.1Hz to 16MHz
QT9	.1Hz to 3MHz	—

QUALITY CONFORMANCE AND RELIABILITY ASSURANCE

Q-Tech's facilities are qualified to Mil-I-45208 and are well equipped to perform the screening, quality conformance and reliability assurance requirements of Mil-M-38510A and Mil-Std-883. Q-Tech is fully equipped to provide hybrid oscillators under **Mil-Q-55310.**

SPECIAL PACKAGES AND ENCLOSURES

Q-TECH has introduced a new line of Flat-Pack enclosures, designed to meet special packaging requirements that may be demanded by the aerospace industry. The new line has been designated the QT20 Series, and as in all other Q-TECH series may be obtained to interface with TTL or C-MOS. These packages are fully hermetically sealed and offer the same high reliability potential as the other Q-TECH enclosures.

For details of frequency, output capabilities, and specific Flat Pack dimensions, consult the factory.

HIGH-RELIABILITY CRYSTALS

All Reeves-Hoffman crystal units pass rigorous final inspection, including a temperature test that measures frequency and deviations in frequency over the range −55° to +125° C. All test equipment is calibrated against our in-house standard that continuously monitors Bureau of Standards' VLF transmissions.

FILTER CRYSTALS. For filter applications, crystals are available with special C_0, C_1, L_1; with temperature coefficients to your specifications; pre-aged to guarantee stability; in special designs for high shock and vibration. All units meet Mil-3098D requirements.

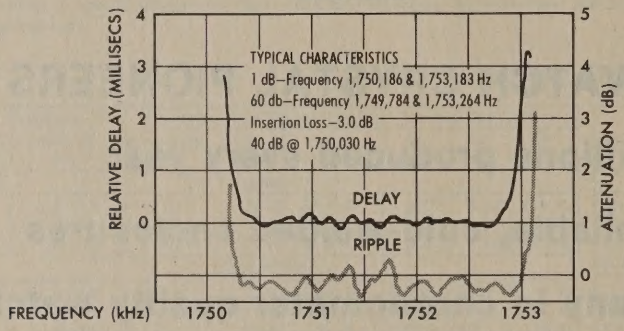
CRYSTAL FILTERS

- ★ Computer-aided design saves development time and assures optimum performance
- ★ All crystals designed and built in Reeves-Hoffman's own plant, pre-aged and temperature tested for improved stability
- ★ Packaged to meet your most exacting requirements
- ★ Modern equipment automatically measures critical parameters over the specified temperature range to assure top performance
- ★ Complete environmental testing facilities

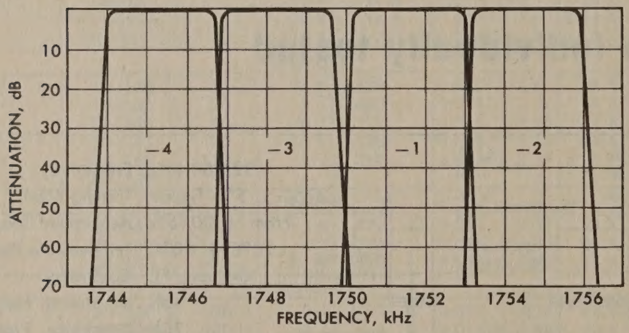
To order filters, please specify:

1. Center frequency and tolerance.
2. 3 or 6 dB bandwidth.
3. 40 or 60 dB bandwidth and frequencies at these points if asymmetric.
4. Minimum attenuation in stopband.
5. Passband ripple.
6. Insertion loss.
7. Input and output impedance (tolerance).
8. Operating temperature range.
9. Packaging details.
10. Additional electrical and environment specifications as required.



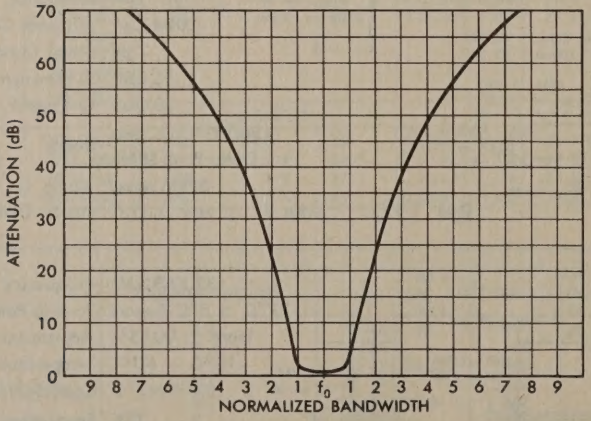
EQUALIZED DELAY FILTERS

FREQUENCY RANGE: 100 kHz–2 MHz
TYPICAL DELAY DISTORTION <200 μs
TYPICAL SHAPE FACTORS <1.2:1
IMPEDANCE LEVELS: To specifications
MEET MIL. STD. 188



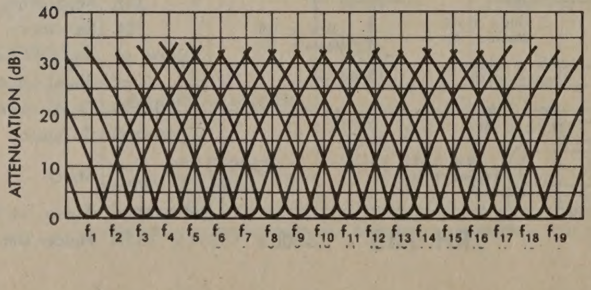
SINGLE SIDEBAND FILTERS

FREQUENCY RANGE: 10 kHz–30 MHz
SYMMETRICAL—Use for either sideband
REGULAR—Specify upper or lower
SHAPE FACTOR: From 1.1:1
TYPICAL CARRIER ATTENUATION >30 dB
Illustrated: Model F11234—4-channel SSB multiplexing.



VERY NARROW BANDWIDTH FILTERS

DESIGNS: Bessel, Butterworth, Gaussian, Chebyshev
FREQUENCY RANGE: 10 kHz–30 MHz
TYPICAL SHAPE FACTOR <6:1
IMPEDANCE LEVEL: To specifications



COMB FILTERS

FREQUENCY RANGE: 10 kHz–30 MHz
TYPICAL BANDWIDTH <0.2%
TYPICAL SHAPE FACTOR <6:1

MONOLITHIC CRYSTAL FILTERS

- ★ Computer-aided design
- ★ Coupled, two-pole or multi-pole configurations
- ★ Custom packaging to your specifications
- ★ Complete environmental testing facilities
- ★ Conformance to all military specifications

CRYSTAL OSCILLATORS

- ★ Employing our own crystals, pre-aged for reliability
- ★ Complete environmental testing facilities
- ★ Outputs compatible with any logic family
- ★ Packaging to your specifications

HIGH-STABILITY OSCILLATORS

FREQUENCY RANGE:
100 kHz–60 MHz
TYPICAL STABILITY:
1 part in 10^8 per day to 2 parts in 10^{11} per day
OPERATING TEMPERATURE RANGE:
−55° C to +80° C
OUTPUTS:
1 volt RMS sine or to specifications
OUTPUT:
harmonics, noise & spurious—30 dB–100 dB

TEMPERATURE-COMPENSATED OSCILLATORS

FREQUENCY RANGE:
1 cps–200 MHz
TEMPERATURE RANGE:
Typical 0° C to 50° C
FREQUENCY STABILITY:
Typical, 1 part in 10^6
OUTPUT:
Sine or square wave
PACKAGING:
To specifications

VOLTAGE-CONTROLLED OSCILLATORS

FREQUENCY RANGE:
1 kHz–200 MHz
FREQUENCY DEVIATION:
0.01%–0.5%
TYPICAL LINEARITY:
1%–5% of peak deviation
MODULATION RATE:
0 to 200 kHz

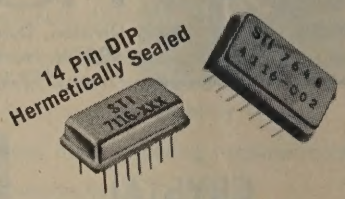
Spectrum Technology

Crystal Oscillator / IC Logic Clocks
Hybrid Circuit Oscillators



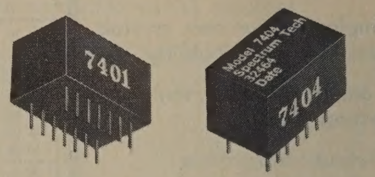
MULTIPLE OUTPUTS AVAILABLE

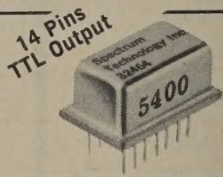
DUAL-IN-LINE LOW PROFILE CRYSTAL OSCILLATOR HYBRID CIRCUIT LOGIC CLOCK: Stability ±.005%, −55 to +105°C, ±.01% to 125°C.

SERIES 7116 — Frequency: 1 KHz to 25 MHz; 5V d-c; TTL; Package: .87″ x .50″ x .20″. **SERIES 4116** — Frequency: 2 Hz to 10 MHz, 5 to 15V d-c; CMOS; Package: .87″ x .50″ x .20″. **Available with MIL-STD-883 Level B Screening and in accordance with specified requirements of MIL-O-55310/8A.**

DUAL-IN-LINE CRYSTAL OSCILLATOR I.C., LOGIC CLOCKS:

SERIES 7401 — Frequency: 3 MHz to 50 MHz; Stability: ±.005% over 4 standard ranges up to −55 to +105°C; TTL output, +5V d-c input; Package: .80″ x .50″ x .375″; Pin 7 Com, 8 out, 14 plus. Also available 2 Com, 11 or 4 out, 5 plus. **SERIES 7404** — Frequency: 200 KHz to 25 MHz; Stability: ±.005%; Package: .80″ x .50″ x .55″. Pin 7 Com, (8 out, .8 to 25 MHz) (2 out, .4 to .8 MHz) (12 out, .2 to .4 MHz) 14 plus. **SERIES 7405** — Frequency: 200 KHz to 25 MHz; Stability: ±.005%; Package: .80″ x .50″ x .55″; Pin 2 Com, 11 or 4 out, 5 plus. **SERIES 4024** — CMOS Output DIP Oscillator; Stability: ±.005%; Package: .82″ x .50″ x .375″; Frequency: 200 Hz to 10 MHz; 14 pin.



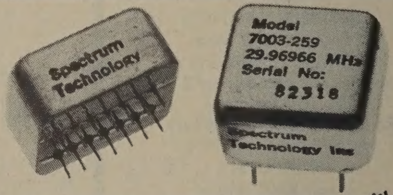


HERMETICALLY SEALED DIP CRYSTAL OSCILLATOR: Designed for applications where stability vs. temperature to ±.005% (50 ppm) is required over entire "Military" temperature range of −55 to +125°C.

SERIES 5400 — Frequency: 3 MHz to 25 MHz; Accuracy: ±.001% at +25°C; Package: .90″ x .56″ x .40″.

HIGH FREQUENCY PC OR DUAL-IN-LINE CRYSTAL OSCILLATOR I.C. LOGIC CLOCKS: Provide clocking signals for use where space is critical or power is limited. Also available with sine wave output for communications applications. PCB or DIP Mounting. Stability: ±.005% over 7 standard ranges including 0 to +70°C and −55 to +125°C. Output TTL; ECL; or sine 0.25V rms, 50 to 1000 ohm load.

SERIES 7003 — Frequency: 3 MHz to 100 MHz; Package: .88″ x .88″ x .45″. **SERIES 7004** — Frequency: 200 KHz to 100 MHz; Package: .88″ x .88″ x .50″.

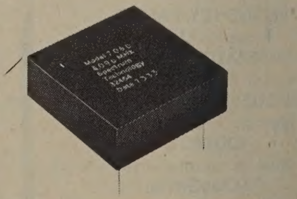


Hermetically Sealed

LOW PROFILE (0.25″ Seated Height) CRYSTAL OSCILLATOR I.C. LOGIC CLOCKS: Low Profile, minimal weight make close card spacing possible. Stability: ±.005% over 5 standard ranges to −55 to +125°C.

SERIES 7042 — Frequency: 1 KHz to 25 MHz ±10 ppm at +25°C; Package: 1.50″ x 1.50″ x .25″. **SERIES 7048** — Frequency: 200 KHz to 25 MHz ±10 ppm at +25°C; Package: 1.28″ x 1″ x .25″. **SERIES 7600** — Frequency: 1.0 MHz to 50 MHz; Package: .80″ x 1.39″ x .223″. DIP pin spacing.

LOW COST CRYSTAL OSCILLATOR I.C. LOGIC CLOCK: As low as $4.00 each depending on quantity and frequency. Eliminate oscillator design, crystal procurement, and test problems. Low power consumption. Supply +5V d-c. Drive TTL or CMOS logic. **SERIES 7060** — Frequency: 200 KHz to 50 MHz; Stability: ±.005%, 0 to +70°C; Output: Logic "0" = +0.4V max. sink 16 mA, Logic "1" = +2.4V min. source .4 mA; Package: 1.50″ x 1.50″ x .50″. **SERIES 4060** — Frequency: 200 Hz to 10 MHz; 5 to 15V d-c; Stability: to ±.005%, 0 to +70°C; Output: CMOS; Package: 1.50″ x 1.50″ x .50″.



MINIATURE DIP OVEN OSCILLATOR: New design oscillator and oven control circuit provide hybrid proportional control ovenized oscillator.

SERIES 8000 — Frequency: 3 MHz to 20 MHz; Stability: to ±1 x 10^{-7}, −40 to +70°C; Input: +28 and +15V d-c, 3.5 W at turn-on; Output: sinewave, 1V p-p, 1000 ohm load.

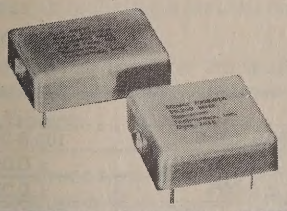
QUALITY CONTROL measures at Spectrum Technology exceed requirements of MIL-I-45208A for inspection systems and MIL-C-45662A for equipment calibration. Workmanship and soldering standards are in accordance with Requirements 5 and 9 of MIL-STD-454B. Oscillators are designed and tested to the requirements of MIL-O-55310. Hybrid oscillators are designed and produced to the requirements of MIL-O-55310 and are available screened in accordance with MIL-STD-883. FOR HIGH RELIABILITY applications, Spectrum Technology uses standard proven, conservative circuit designs and "ER" components. All soldering is in accordance with N.H.B. 5300.4 (3A). Specific sections of MIL-Q-9858A are applicable on an as required basis. Traceability of all components, and assembly and test inspection points is on a unit serialized basis. Processing specifications include special screening on crystal units as well as production screening and testing during manufacturing including high temperature burn-in. Environmental levels proven by continuing tests include 50g sine vibration, $0.2g^2$/Hz random vibration, 4000g acceleration and 1500g shock. 100% production screening tests include these plus thermal shock, temperature cycling, and leak test on an "as specified basis."

Spectrum Technology

Temperature Compensated Crystal Oscillators

For applications requiring low power and zero warm-up time. Designed for mounting on PC cards. Required supply voltage in range of 10 to 20 volts with regulation of 5 to 10%. Output TTL, CMOS, or Sine (1.0V rms, 50 to 1000 ohm load). Frequency adjustment range for 5 to 10 year aging. Stability to ±3 x 10^{-7}, 0 to +55°C; to ±1 x 10^{-6}, −20 to +65°C, −40 to +70°C, and −55 to +85°C. Other stabilities and temperature ranges available.

SERIES 7000 — Frequency: 100 KHz to 20 MHz; Package: 2″ x 2″ x .63″. **SERIES 7001** — Frequency: 10 KHz to 20 MHz; Package: 2″ x 2″ x .75″. **SERIES 7002** — Frequency: 1.0 MHz to 20 MHz; Package: 2″ x 2″ x .50″.

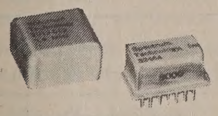


SMALLER SIZE TCXO's:

SERIES 7006 — Frequency: 1 MHz to 20 MHz; Package: 1.50″ x 1.50″ x .50″; Output: TTL, CMOS, or Sine (1.0V rms, 50 to 1000 ohm load). **SERIES 7076** — Frequency: 2.7 MHz to 20 MHz; Package: 1.25″ x 1.75″ x .50″; Output: TTL or CMOS.

CMOS TCXO's:

SERIES 4000 — Frequency: 200 Hz to 7 MHz; Package: 2″ x 2″ x .50″; Low Power: 5mA typical, 10 to 15V d-c Supply; Output: Logic "0", $0.1V_{DD}$ max.; Logic "1", $0.9V_{DD}$ min.



HYBRID AND SUBMINIATURE TCXO's:

SERIES 7013 — Frequency: 6 MHz to 20 MHz; Package: 1″ x 1″ x .50″; Output: TTL or CMOS. **SERIES 9000** — Frequency: 6 MHz to 20 MHz; Package: DIP .56″ x .90″ x .50″; Output: TTL or CMOS.

Special Custom Designs

Spectrum Technology manufactures a complete line of oscillators and timing systems, including temperature compensated crystal oscillators, crystal controlled oscillators, and integrated circuit logic clocks. Special custom-designed devices and systems include oscillator/modulator assemblies, gated oscillators, and multiple frequency oscillators.

Spectrum Technology specializes in proven reliability design devices featuring • Subminiature Size • Extremely Low Profiles • Low Power Consumption • High Stability • Output Frequencies or Pulse Rates from One Pulse Per Hour to Beyond the 100 MHz Region. Standard packages are available for PC mounting or dual-in-line circuit packaging cards.

Typical Applications for Spectrum Technology devices include: Computers, Medical Instruments, Distance Measuring Equipment, Video, Motion Picture, and Sound Recording Constant Speed Drives, Seismological Recording and Sensing Systems, Aircraft Instrument Computers, Inertial Guidance Systems, Communication Satellites, Ground Support Systems, Tracking Systems, Torpedo Control Systems, Manned Space Applications.

STATEK

LOW FREQUENCY
QUARTZ CRYSTALS
MODELS SX-1H & SX-1V

STATEK

FEATURES

- Low cost
- 10 kHz to 300 kHz
- Hermetically sealed TO-5 can
- 18 SX-1 stock frequencies
- Low aging

APPLICATIONS

SX-1H CRYSTAL used in series resonant oscillator circuits (two inverters)

SX-1V CRYSTAL for parallel resonant (Pierce) oscillator circuits (single inverter)

SX Crystal in TO-5 Can

SPECIFICATION SUMMARY[1]

		SX-1 SERIES			
Frequency Range (kHz)		10.0-30.0	30.0-50.0	50.0-100.0	100.0-300.0

WATCH & TIME KEEPING
QUARTZ CRYSTALS
MODEL WX-6
MODEL WX-7

FEATURES
- Tuning Fork Design
- Low cost
- Laser Tuned Accuracy
- Low aging
- Small size
- High Shock Resistance

DESCRIPTION
Laser trimming of sealed tuning fork produces a very stable and high accuracy quartz watch crystal. Low cost is achieved by using semiconductor photolithographic wafer processing techniques and low cost packaging.

APPLICATIONS
Any timekeeping function from the smallest ladies watch to standard electrically powered timers.

SPECIFICATIONS*

Frequency	32.768 kHz
Frequency Tolerance, at 25°C	From ± 5 ppm
Motional Resistance, R_1	45 K ohm typical 70 K ohm maximum
Motional Capacitance, C_1	1.20 f F typical
Q (Quality factor)	90,000 typical 60,000 minimum
Shunt Capacitance, C_0	1.0 pf typical
Drive level	1 μw maximum
Turning Point, T_0	25 ± 5°C
Temperature Coefficient, K	—0.033 ppm/°C
Aging (first year, at 25°C)	3 ppm maximum
Shock (1 M drop onto hard board)	3 ppm maximum
Vibration (10g RMS, 10 to 500 Hz)	1 ppm maximum
Operating Temperature	—10 to +60°C
Storage Temperature	—20 to +70°C

LOW FREQUENCY

CRYSTAL OSCILLATORS

MODEL SQXO-2

FEATURES

- Oscillator frequency range — 10 kHz to 250 kHz
- Extremely small size
- Low milliamp current consumption
- Wide operating temperature range
- Withstands high shock and vibration levels
- CMOS and TTL compatible

DESCRIPTION

The SQXO-2 is a stable, rugged, buffered subminiature oscillator built using thick and thin film parts and the SX-1H Crystal.

APPLICATIONS

AF standards • computer clocks • data loggers • instruments • modems • pacemakers • POS terminals • telephone equipment • timers • tone generators • ultra sonic detectors

SPECIFICATION SUMMARY*

	SQXO-2
Calibration and Operating Voltage	5± 0.5 VDC
Supply Voltage Range	4 to 10 V 6v max at 100 kHz
Current (typical, at Calibration Voltage into 10 pf and 10 MΩ load)	0.50 mA at 10 kHz to 2.0 mA at 250 kHz
Frequency Ranges	10 kHz to 250 kHz
Stock Frequencies Non-stock frequencies 10 to 300 kHz available, contact factory.	10.0, 12.8, 15.36, 16.0, 16.384, 19.2, 32.768 & 100.0 kHz
Standard Frequency (Calibration A) at 25°C	± 0.01% from 10 to 50 kHz and ± 0.02% from 50 to 250 kHz
Frequency Stability over Temperature Range	Approximates SX-1 Crystal Characteristics
Operating Temperature	0 to 70°C, (C) −40 to + 85°C (I) −55 to + 125°C (M)
Shock and Operating Vibration Improved shock and vibration specifications available.	1000 g, 1 ms, ½ sinewave; 10 g, 10 to 1000 Hz sine sweep

*Specifications subject to change without notice.

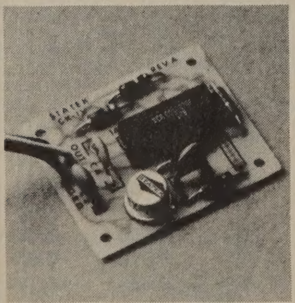
CRYSTAL OSCILLATOR KITS — MODELS CK-1H & CK-1V

LOW FREQUENCY CRYSTAL OSCILLATOR KITS



NOTE: Models CK-1H and CK-1V Kits **do not** include integrated circuits, resistors, capacitors or wiring.

THE CK-1H AND CK-1V OSCILLATOR KITS CAN BE USED FOR:

- Oscillator breadboards
- Low volume production oscillators
- Reference oscillators for frequency correlation

DESCRIPTION

The CK-1V kit utilizes a Pierce (single inverter) oscillator circuit and contains five SX-1V crystals. The CK-1H kit utilizes a series circuit (two inverters) and contains six SX-1H crystals. The frequency calibration is ±0.01% for all frequencies except 100 kHz & 240 kHz which is ±.02%.

The table below lists the frequencies included in the kits.

Frequency	Applications
10.000 kHz	Decimal Time Base
15.360 kHz	60 Hz Time Base
19.200 kHz	Modem Clock
32.768 kHz	Seconds Timer
100.000 kHz	Decimal Time Base
240.000 kHz	Motor Speed Control

Both kits have an etched and drilled circuit board. The Model CK-1H Kit circuit uses three low cost transistors. The Model CK-1V Kit uses a CMOS 4007A Dual Complementary Pair Plus Inverter I.C.

DOCUMENTATION

The circuit documentation supplied with each kit consists of:

- Circuit schematics with a table of component values for different oscillator frequencies.
- A physical layout of the oscillator
- A parts list for various oscillator frequencies

Description of circuit operation, layout characteristics and mounting provisions are also included.

The kits are priced at $27.00 each in single quantity.

LOW FREQUENCY

CRYSTAL OSCILLATORS REPEAT CYCLE TIMERS

LQXO-3 DQXO-3

STATEK

NEW

FEATURES

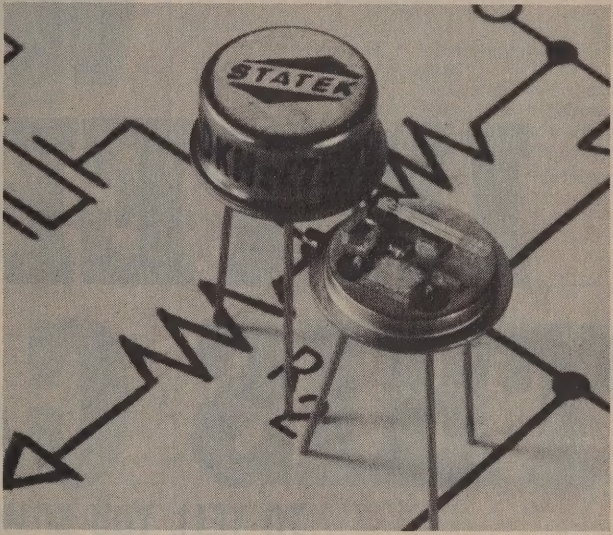
- LQ Series — 10 kHz to 300 kHz
- DQ Series — divided outputs to 1 cycle per day
- Low milliampere current
- TO-5 package
- Quartz stability
- Low aging

DESCRIPTION

The LQXO-3 is a tuning fork quartz crystal oscillator built using hybrid chip and wire construction. The DQXO-3 is an LQXO-3 with a CMOS divided output for frequencies below 10 kHz.

APPLICATIONS

The small size, moderate power consumption, high shock, CMOS drive capability of the LQXO-3 makes it suitable for instrumentation time bases, time-of-day clocks, audio standards, phase locked loop oscillators, digital circuit clocks, and industrial controllers. The longer period outputs of the DQXO-3 make it suitable for remote data timers, process controllers, long period repeat cycle timers, and tone generators.



DQXO-3

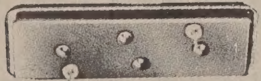
QUARTZ CRYSTALS



Frequencies from 80 KHz to 125 MHz manufactured to the highest tolerances and hermetically sealed with the latest methods.

Resistance weld sealing is available **at no extra cost** in the HC-6/U, HC-18/U, HC-25/U and HC-33/U standard holders. This process uses an electrical weld to seal the crystal unit in a helium-nitrogen atmosphere. Solder balls and aging due to flux contamination are completely eliminated.

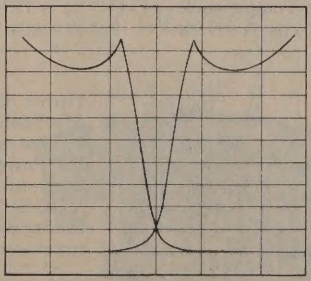
QPL-3098

In house laboratory facilities can perform testing to MIL-C-3098F. Many standard types are QPL approved and custom designs are available on request.

CRYSTAL FILTERS

Crystal filters from 10 KHz to 30 MHz are computer designed for maximum performance. Custom designs are considered a challenge. Contact Torotel's engineering staff for assistance.

WE SPECIALIZE IN THESE TYPES OF PASSIVE NETWORKS:



BAND PASS
BAND REJECT
LOW PASS
HIGH PASS
IN THE FREQUENCY RANGES FROM DC TO 35 MHz

LINEAR PHASE
PHASE EQUALIZER
AMPLITUDE EQUALIZER
DELAY LINES

FOR APPLICATIONS INVOLVING:

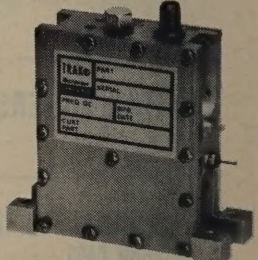
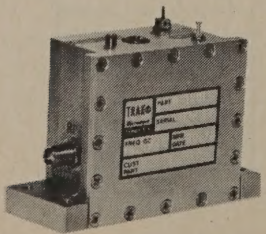
Oscillators

Fundamental Transistor Oscillators—Frequency: 2500 MHz to 5000 MHz, fc specified by customer within ±1 MHz; Tuning Range: Mechanical, ±1% min of fc; Stability Over Temperature: ±0.05% (−20°C to +77°C), ±0.1% (−54°C to +77°C); Pushing: ±0.005%/volt from DC to 3 kHz, ±0.001%/volt typical; Pulling: ±0.05% into 3.0:1 load VSWR all phases; ±0.01% typical; Output VSWR: 1.7:1 within ±300 MHz of fc; RF Power Out: +10 dbm min; Power vs. Temperature: ±3 db max, ±1 db typical; Turn-on Time: Full power within 1 second, freq. within 0.1% of fc <1 min, 5 sec typical; Harmonics: −30 db, −50 dbc typical; Spurs: −80 db; DC Power: +15 V nom. @ 40 mA max, 25 mA typical; Size: 2.75″ L × 1.0″ W × 2.5″ H; Weight: 5.0 oz max, 4.3 oz typical; Connectors: SMA-F (RF), solder pin (DC); Operating Temperature: −54°C to +77°C; Mounting: Base plate—Flange; Vibration: 25g 10-100 cps, 7g 100-200 cps; Acceleration: 12gs any axis.

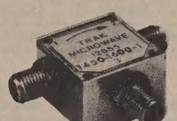




Gunn Oscillators—Center Frequency: 8 to 16 GHz (customer specified); Tuning: Mechanical, ±0.5% of center frequency; Stability: ±.05% over temperature; short term: 1 PPM/sec; Pushing: <±.002%/volt, DC to 3 kHz; Pulling: ±.01% for 3:1 load VSWR: RF Power Out: +13 dbm min to +19 dbm max; Turn-on: Full power within 1.0 sec over temperature, frequency within 0.1% of nominal frequency within 5 min; DC Power: +15 VDC @ 600 mA max, Turn-on: +15 VDC @ 700 mA max; Harmonics: >−50 dbc; Non-Harmonic Spurs: >−80 dbc; Connectors: SMA-F (RF), Solder pin feed thru (DC); Temperature: −54°C to +71°C.

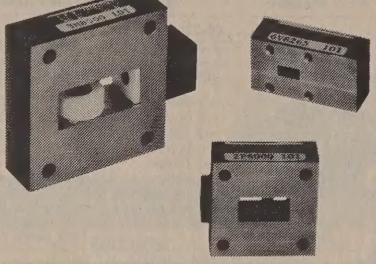
CIRCULATORS, ISOLATORS, AMPLIFIERS, SOURCES, AND HYBRID COMPONENTS

Coaxial and Drop-in circulators and isolators

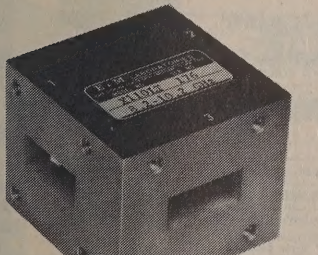


MINIATURE CIRCULATORS AND ISOLATORS *Frequency Range:* 0.5 to 18 GHz *Bandwidth:* 5% to greater than octave *Isolation:* 20 db minimum narrow band, 17 db minimum octave *Insertion Loss:* 0.3 db typical, 0.5 to 0.8 maximum *VSWR:* 1.17 typical, 1.25 maximum (narrow band) *Operating Temperature:* −54° C to +95° C (most models) *Size Range:* 1 x 1 x 0.5 inches to .375 x .375 x .375 inches nominal (narrow band) *Weight Range:* 1.8 to 0.3 ounce (narrow band) *Connectors:* SMA female *Isolator Termination:* 1 watt others optional

Waveguide circulators and isolators

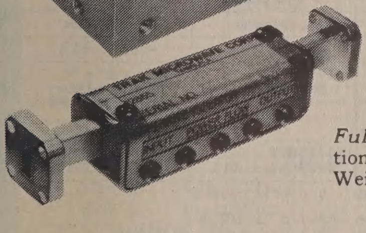


E & M Laboratories, Division of TRAK Microwave Corporation offer a complete line of waveguide and coaxial devices. Below are general specifications for the waveguide components. Specific information is available upon request.



Flange Waveguide Isolators—Frequency Range: 7.05 to 40.0 GHz; Bandwidth: 1 to 5%; Isolation: 20 db nominal; Insertion Loss: 0.5 db max; VSWR (Bilateral) 1.35:1 max.

3-Port Waveguide Circulators—Full waveguide bandwidth Wye Type. Frequency Range: 8.2 to 26.5 GHz; Isolation: 17 db nominal; Insertion Loss: 0.5 db max; VSWR: 1.3:1 max; Dimensions: 1.75 to 2.89 inch diameter, 1.57 to 2.0 inch height; Broad Bandwidth Tee Type. Frequency Range: 3.7 to 40 GHz; Isolation: 20 db nominal; Insertion Loss: 0.5 db max; VSWR: 1.3:1 max.



Full Bandwidth Waveguide Isolators—Frequency: 2.6 to 40 GHz; Isolation: 25 db nominal; Insertion Loss: 1.5 db max; VSWR (Bilateral) 1.3:1 max; Peak Power: 20 KW peak; Length: 3.75 to 14 inches; Weight: 1.5 to 14 pounds.

Hybrid Components

OSCILLATORS *Model 1016-1047 Series Specifications: Frequency Range:* 60-1200 MHz *Output Power:* 10 mW, 100 mW and 1 watt ±1.5 db into a 50 ohm load* *Frequency Set Accuracy at Room Temp:* ±0.0005% *Stability:* ±0.0025% *Temperature Range:* −54° C to +85° C *Non-harmonically Related Spurious (1MHz BW):* ≥60 dbc *Harmonics and Sub-harmonics (nominally 100 HMz 5th overtone 'tals used):* ≥30 dbc *Supply Requirements:* +15 VDC, 250 mA maximum *Size (excluding protrusions):* .69″ x .59″ x .49″ to 1.33″ x 1.33″ x .49″

*other power levels optional

COMB GENERATORS *Model 3822-1600 Specifications: Frequency Range:* 4 to 8 GHz *Comb Spacing:* 100 MHz *Power Output:* −25 dbm, ±10 db *Pulse Rise and Fall Time:* 0.2 μs maximum *Frequency Stability:* ±1.75 MHz *Non-Harmonically Related Spurious (1 MHz BW):* ≤70 dbm *Power Stability:* ±6 db *Operating Temperature:* −55° C to +71° C *Load Impedance:* 50 ohms nominal *Connector:* SMA female *Size:* 1.17″ x 0.67″ x 0.79″ *Supply Requirement:* +15 VDC at 50 mA maximum *Mounting:* Base plate

IF AMPLIFIERS *Model 8400-1000 Specifications: Frequency:* Customer specified from 20 to 150 MHz *3 db Bandwidth:* 10 MHz typical *Gain:* 70 ±3 db *Noise Figure:* 3 db maximum *AGC Range:* 60 db minimum *Input Dynamic Range (with AGC):* 80 db minimum *1 db Compression Point:* +6 dbm minimum *Power Supply:* +12 VDC @ 35 mA nominal *Temperature:* −55° C to +85° C *Input Impedance:* 50 ohms nominal *Output Impedance: IF:* 50 ohms nominal *Detector:* 1K ohms nominal (optional) *Input and Output Connectors:* SMA female *Size:* 1.16 x .66 x .49 inches

GAIN AND PHASE MATCHED IF AMPLIFIERS *Model 8400-1003 Specifications: Frequency:* 60 MHz *3 db Bandwidth:* 10 MHz minimum *Selectivity:* 20 db/octave *Band Pass Ripple:* ±0.5 db nominal *Small Signal Gain:* 60 db minimum *Small Signal Dynamic Range:* 40 db minimum at any AGC setting *AGC Range:* 50 db minimum *Noise Figure:* 3 db maximum *Gain Tracking:* ±2 db *Phase Tracking:* ±8° *Video Gain Tracking:* ±1 db (Note: IF tracking error can be cumulative with video gain error.) *Video Output Level:* 5 volts maximum across 2K ohm resistive load *IF Output Level:* +6 dbm minimum @ 1 db compression point *Input Impedance:* 50 ohms nominal *Input VSWR:* 1.15:1 maximum *Supply:* +12 VDC @ 50 mA maximum (each amplifier) *Size:* 2.27 x 1.28 x .04 inches *IF Input and Output:* 3 inches of RG 188 (connectors optional) *Supply, AGC, and Video Output Connections:* Solder terminals

Clock Oscillators

TTL

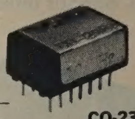
	PRINTED CIRCUIT BOARD MOUNT			DIP COMPATIBLE			
Features:	*Most economical Broadest range of frequencies & options*	*Low profile only 0.3" high*	*Small board area only 1 inch sq.*	*Consumes space of only one 14 pin DIP .35" high*	*Reduced height 14 pin DIP .28" high*	*Larger DIP package but with frequencies as low as 50 Hz*	*Lowest profile unit only .225" high*
Model:	**CO-231**	**CO-231LA (or B)**	**CO-232**	**CO-238A (or B or T)**	**CO-234A (or B)**	**CO-235**	**CO-239A (or B)**
Frequency:	1 Hz thru 100 MHz	200 KHz thru 30 MHz	3 MHz thru 30 MHz	3 MHz thru 100 MHz	4 MHz thru 25 MHz	50 Hz thru 30 MHz	4 MHz thru 100 MHz
Output:	Drives 10 TTL Loads. Logic "0": 0.4V max, sink 16 ma. Logic "1" 2.4V min, source 2 ma. (above 50 MHz drive capability decreases; at 100 MHz drives 2 Schottky TTL loads)						
Input Voltage:	5 VDC ±5%	5 VDC ±5%	5 VDC ±5%	5 VDC ±5%	5 VDC ±5%	5 VDC ±5%	5 VDC ±5%
Size:	1½" x 1½" x ½" 38 x 38 x 12.7 mm	1½" x 1½" x 0.3" 38 x 38 x 7.6 mm	1" x 1" x 0.5" 25 x 25 x 12.7 mm	.5" x .8" x .35" 12.7 x 20.3 x 8.9 mm	.5" x .8" x .28" 12.7 x 20.3 x 7.1 mm	1½" x 1½" x ½" 38 x 38 x 12.7 mm	1.4" x .8" x .225" 35.6 x 20.3 x 5.7 mm
Tuning Option Available:	*YES	NO	*YES	**YES	NO	*YES	NO
	*Models with "T" suffix include tuning adjustment with nominal range of ±30 ppm below 25 MHz and 15 ppm above 25 MHz — setability is <.0001%						
Accuracy: (at 25°C)	**CO-231**: ±.001% ***CO-231T**: ±.0001%	**CO-231LA**: ±.005% **CO-231LB**: ±.001%	**CO-232**: ±.001% ***CO-232T**: ±.0001%	**CO-238A**: ±.005% **CO-238B**: ±.001% ****CO-238T**: ±.0001%	**CO-234A**: ±.005% **CO-234B**: ±.001%	**CO-235**: ±.001% ***CO-235T**: ±.0001%	**CO-239A**: ±.005% **CO-239B**: ±.001%

(**CO-238T: 3-25 MHz only)

Stability: **Standard:** 0°C to + 70°C: ±.0025%

—1 Option: —55°C to + 85°C: ±.005% (—40/+85°C for CO-231-1 <60 Hz)
—2 Option: —55°C to +125°C: ±.005% (70 MHz max for CO-238-2 & CO-239-2)
—3 Option: 0°C to + 50°C: ±.0003% (6 MHz min for CO-232, CO-238, CO-239, CO-234; 50 Hz min for CO-231; 100 Hz min for CO-235)
—4 Option: 0°C to + 50°C: ±.0001% (only for CO-231 in 12 KHz-20 MHz range)
—5 Option: 0°C to + 50°C: ±.0005% (4 MHz min for CO-232, CO-238; 100 Hz min for CO-235)
—6 Option: 0°C to + 50°C: ±.001%
—8 Option: 0°C to + 70°C: ±.01% (includes initial accuracy; do not specify A or B accuracy, or tuning with —8)
Y Option: Aging improved from 5 ppm/year typical to 1 ppm/year (only for CO-231 in 3-20 MHz range)

CO-231



CO-238

Option "C": Fully sealed metal can for 100% r.h. requirements — results in slight height increase. Not available with tuning option.

CMOS

Features:	*Most economical Broadest range of frequencies and options*	*DIP compatible Consumes space of one 14 pin DIP*	*Larger DIP package but with frequencies as low as 60 Hz*
Model:	**CO-236**	**CO-636A (or B)**	**CO-536**
Frequency:	.01 Hz thru 10 MHz	3 MHz thru 10 MHz	60 Hz thru 10 MHz
Output:	CMOS compatible	CMOS compatible	CMOS compatible
Input:	5 VDC-15 VDC for frequencies below 6 MHz; 1-2 ma typical below 2 MHz.		
Size:	1½" x 1½" x ½" 38 x 38 x 12.7 mm	.5" x .8" x .42" 12.7 x 20.3 x 10.7 mm	1½" x 1½" x ½" 38 x 38 x 12.7 mm
Tuning Option Available:	*YES	NO	*YES
	*Models with "T" suffix include tuning adjustment with setability <.0001%		
Accuracy: (at 25°C)	**CO-236**: ±.001% ***CO-236T**: ±.0001%	**CO-636A**: ±.005% **CO-636B**: ±.001%	**CO-536**: ±.001% ***CO-536T**: ±.0001%

Stability: **Standard:** 0/+ 70°C: ±.0025%

—1 Option: —40/+ 85°C: ±.005%
—2 Option: —55/+125°C: ±.005%
—3 Option: 0/+ 50°C: ±.0003% (2.5 MHz min; 6 MHz min for CO-636)
—4 Option: 0/+ 50°C: ±.0001% (only CO-236, 3-10 MHz)
—5 Option: 0/+ 50°C: ±.0005% (4 MHz min for CO-636)
—6 Option: 0/+ 50°C: ±.001%
—8 Option: 0/+ 70°C: ±.01% (includes accuracy)
—Y Option: Aging improved from 5 to 1 ppm/year (only CO-236, 3-10 MHz)

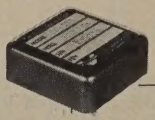
Option "C": Fully sealed metal can; results in slight height increase.

ECL

Features:	*Most economical*	*Highest frequencies*	*DIP compatible*
Model:	**CO-233ME**	**CO-233MEHA (or B)**	**CO-633A (or B)**
Frequency:	5 MHz thru 149.9 MHz	150 MHz thru 200 MHz Higher frequencies available in larger package	5 MHz thru 125 MHz
Output:	ECL compatible	ECL compatible	ECL compatible
Input Voltage:	—5.2 VDC ±5%	—5.2 VDC ±5%	—5.2 VDC ±5%
Size:	1½" x 1½" x ⅝" 38 x 38 x 16 mm	1½" x 1½" x ⅝" 38 x 38 x 16 mm	.5" x .8" x .5" 13 x 20 x 13mm
Tuning Option Available:	*YES *Tuning setable to .0001%	NO	NO
Accuracy: (at 25°C)	**CO-233ME**: ±.001% ***CO233MET**: ±.0001%	**CO-233MEHA**: ±.005% **CO-233MEHB**: ±.001%	**CO-633A**: ±.005% **CO-633B**: ±.001%

Stability: **Standard:** 0/+ 70°C: ±.0025%

**—1 Option: —55/+ 85°C: ±.005%
—2 Option: —55/+125°C: ±.005% (to 125 MHz)
—3 Option: 0/+ 50°C: ±.0003% (6 - 150 MHz)
—5 Option: 0/+ 50°C: ±.0005%
—6 Option: 0/+ 50°C: ±.001%
—8 Option: 0/+ 70°C: ±.01% (includes initial accuracy)
**—30°C lower limit above 125 MHz



Screen Tested Clock Oscillators

Each of the Clock Oscillators described above, except those with tuning, is available in a fully sealed metal can; simply add "C" to the Model No. (e.g. CO-238B-1C). For those high reliability applications requiring Screen Tested components, Vectron now offers the same Clock Oscillators:

- 100% Screen Tested as follows:
  - (A) Thermal Shock per MIL-STD-202, Method 107D, Test Condition A
  - (B) Seal Test per MIL-STD-202, Method 112B, Test Condition A
  - (C) Burn-in for 168 hours at maximum specified operating temperature
- Packaged in fully solder sealed metal housing
- Ruggedized for shock and vibration

HOW TO SPECIFY MODEL NUMBER . . .

□□□□ — □ S — □ at ▭

Basic Model
Accuracy at 25°C
Stability option
Indicates sealed, screened model
★Shock and vibration
Frequency

For example, 238A-2S-1 at 10 MHz = CO-238 Type at 10 MHz with
"A" accuracy of ±.005% at 25°C
"—2" stability of ±.005% over —55°C to +125°C
"S" for screen tested oscillator in solder sealed metal can
"—1" shock of 100g, 6 msec and vibration of 10g, to 500 Hz

★The following codes define the alternative shock and vibration specifications to which the oscillator is designed:

Code	Shock (MIL-STD-202, Meth 213B)	Vibration (MIL-STD-202)
"0"	30g, 11 msec per Test Cond J	10-55 Hz, .06" DA per Meth 201A and 5g to 500 Hz
"1"	100g, 6 msec per Test Cond C	10g to 500 Hz per Meth 204C, Cond A
"2"	100g, 6 msec per Test Cond C	20g to 2 KHz per Meth 204C, Cond D and 20 grms overall random to 2 KHz per Meth 214, Cond I-F

About VECTRON . . .

VECTRON'S customers include virtually every major U.S. electronics manufacturer, each of the prime military and government agencies and numerous foreign users.

VECTRON oscillators are widely used for both commercial and military applications in ground, shipboard, mobile, airborne, missile and space systems.

VECTRON quality and calibration procedures are per MIL-I-45208, MIL-Q-9858A and MIL-C-45662.

VECTRON has received U.S. Government SBA Subcontractor of the Year and prime contractors Zero Defects Quality awards.

VECTRON's high volume production capability is matched with a Quick Reaction group which handles small quantity "specials" economically and expeditiously.

VECTRON's scope is solely designing and manufacturing crystal oscillators and associated instrumentation . . . specialization which assures each Vectron customer expert attention and devotion to his full and specific requirements.

NOTES

1. Many models and frequencies are available with off-the-shelf delivery.
2. When ordering a standard product, please specify model, frequency and any desired option.
3. While Vectron offers a broad line of standard products, we are equipped to handle "specials" expeditiously and economically.

TYPE 18 AND TYPE 227

Delay Tolerance: 3% or 1 nsec
Thermal Coefficient of Delay: 0.005%/°C to 0.01%/°C
Test Voltage: 800 VDC
Temperature Range: −65°C to 125°C
Ordering Information: Part Numbers are given by designating first the type number and then the delay, e.g., 227-0.75. Other values of delay and impedance can also be furnished.

TYPE 227

10 Taps, equally spaced
Rise Time: 10% of total delay time
Dimensions: ½" x 3/16" x 2½" (lead face is 3/16" wide)
Leads: #22 AWG tinned solid wire, 1¼" long

Leads on end faces are spare ground leads to provide added mounting rigidity. They may be clipped off if not needed, since a third ground lead is provided on the long face.

SERIES "HF", "HR" & "VHR"
LUMPED CONSTANT DELAY LINES
HIGHEST $\frac{\text{TIME DELAY}}{\text{RISE TIME}}$ RATIO EVER BUILT!

These Delay Lines have the highest ratio of time delay to rise time that has ever been built in a Lumped Constant Line. Unlike other types of high ratio lines, the Lumped Constant Delay Line has a passband from D.C. to its cutoff frequency and maintains a constant delay over these frequencies. These lines are also unique in that they offer relatively low insertion loss. The units are characterized by tight time delay tolerances, low pulse distortion, excellent phase linearity and good temperature stability.

To calculate rise time in microseconds, divide the ratio into the delay. To calculate bandwidth, divide rise time in microseconds into .36. Answer will be in MHz. Attenutation range 9 to 20db.

"HF"

50/1 RATIO
Delay Range .25 to 10 microseconds.

75/1 RATIO
Delay Range .5 to 10 microseconds.

100/1 RATIO
Delay Range 1 to 10 microseconds

"HR"

100/1 RATIO
Delay Range 11 to 500 microseconds.

130/1 RATIO
Delay Range 5 to 500 microseconds.

"VHR"

150/1 RATIO
Delay Range 5 to 500 microseconds.

200/1 RATIO
Delay Range 10 to 75 microseconds.

250/1 RATIO
Delay Range 20 to 100 microseconds.

PULSE & VIDEO DELAY LINE TYPE AV-397 STOCKED

These delay lines are designed to be used with any 75 ohm system for either pulse or video delay. Although intended primarily for equalizing the delays in various lengths of coaxial cable, the line can be used wherever any delay from .025 μs. to 2.075 μs. is needed. The delay is changed by adding individual lines of various delays to give the desired total delay.

Maximum Delay: 2.075 microseconds ±3% variable in .025 microsecond steps from .025 microseconds to 2.075 microseconds.
Time Delay of Individual Lines: 1, .5, .2, .2, .1, .05, .025 microseconds.

Rise Time for Entire Line: .06 microseconds maximum.
Frequency Response: 3 db down at 5 MHz for 2.075 microseconds delay.
Distortion: 2% maximum with .2 microsecond input pulse.
Impedance: 75 ohms ±5%.
Temperature Coefficient: 50 parts/million/°C from −55°C to 105°C.
Attenuation: 7% maximum for 2.075 microsecond delay.
Mechanical: Hermetically sealed in a steel can 2" x 2½" x 5½", painted gray with black identification markings, and using 10/32 x ½ inch studs spaced on 1½" x 2" centers for mounting.

ALSO AVAILABLE: Model 75-2 — A switch variable version of the above Pulse & Video Delay Line.

"THE NANNO SWITCH"
SWITCH VARIABLE DELAY LINE

The units consist of individual delay lines each having its own switch. The time delay is changed by switching one or more individual delay lines in series with the input and output connections. The delayed output is always the summation of individual delay lines and not the result of a tapped line. This feature is an important factor in eliminating undesirable reflections in the output pulse. BNC female connectors are supplied for input and output terminations.

Part No. for 50 ohm impedance	V127Z050	V255Z050
Part No. for 75 ohm impedance	V127Z075	V255Z075
Maximum delay	127 nanosec.	255 nanosec.
Individual delay lines	1, 2, 4, 8, 16, 32, 64 nanosec.	1, 2, 4, 8, 16, 32, 64, 128 nanosec.
Rise time at maximum delay	14 nanosec.	16 nanosec.
Frequency response at maximum delay	−3 db @ 25 MHz	−3 db @ 22 MHz
Attenuation	5% maximum	8% maximum

Delay Tolerance at any Setting: 5% or 1 nanosecond, whichever is greater.
Distortion: 3% maximum with 20 nanosecond input rise time.
Temperature Coefficient: 50 parts/million/°C from −25°C to +85°C.

TV LINE EQUALIZER TYPE AV-535 STOCKED

The Allen Avionic's AV-535 Equalizer is designed to compensate for losses in RG-11/U (75 ohm) cable and its equivalents. The unit is capable of equalizing 50 to 300 feet in 50 foot increments.

Terminals on mounting surface are so arranged to provide for simplified strapping for compensation of different cable lengths. All units are foamed and hermetically sealed in steel cans.

Size: 2 x 3½ x 5 inches (not including mounting stud length).
Mounting Centers: 1½ x 3 inches.
Stud Size: 8/32 x ½ inch long.

Impedance: 75 ohms ±2 ohms to 8 MHz.
Attenuation of Cable Plus Equalizer: 3 db.
Attenuation of equalizer alone is as shown in the following table:

Feet	0.1 MHz	2 MHz	4 MHz	8 MHz
50	2.97 db	2.86 db	2.79 db	2.67 db
100	2.93	2.68	2.53	2.27

SPIRADEL®* THE MOST COMPACT

Highest Time Delay to Rise Time Ratio DISTRIBUTED DELAY LINE

FOR IMMEDIATE DELIVERY!

SPIRADEL is a small diameter, distributed constant fixed delay line, featuring higher delay to rise time ratio and excellent pulse fidelity. Its new shape offers greater package design versatility than most other delay lines available, and the entire unit is encapsulated for maximum environmental protection.

SPIRADEL covers a delay range of 20 to 6000 nanoseconds. Any delay within this range may be selected.

Time delay to rise time ratios range up to 30 to 1. Any impedance from 50 to 1000 ohms is available. Standard delay tolerance is 5%, although tighter tolerances can be held.

SPIRADEL is designed for operation from −55°C up to +105°C. Temperature coefficient over this range is 150 parts/million/°C. Bandwidth is from DC to frequency f = .35/rise time.

NEW

THE ULTIMATE IN MINIATURIZATION

Lumped Constant, completely passive, delay lines housed in a commercial T05 package (.385 dia. x .330 high). Designed for compatibility with semiconductor and logic assemblies where space and good performance are prime considerations. Stocked in delays from 10 to 100 nanoseconds.

Delay Tolerance: ±5%.

Working Voltage: 50 volts DC.

Temp. Coefficient Over 0 to 80°C: 100 parts/million/°C.

Part No.	Time Delay (Nano-seconds)	Rise Time Max. (Nano-seconds)	Band-width (MHz)	Impe-dance (Ohms)	Atten-uation (%)

THE "LC DIP" offers the ultimate in high density packaging and tapping capabilities. These units are excellent for high frequency applications. The availability of 10 equal delay increments and the dual-in-line packaging along with its low silhouette make for compatibility with semiconductor and other assemblies where circuit board height must be held to a minimum. This makes the "LC DIP" extremely adaptable for the computer and allied industries.

Delay Tolerance:
±5% or 4 ns (whichever is greater) for delays of 250 ns or less.
±5% or 20 ns (whichever is greater) for delays of over 250 ns.

Working Voltage: 50 volts DC. **Construction:** Epoxy encapsulated.

NOW AVAILABLE – A COMPLETE SERIES OF 20 TAPPED LUMPED CONSTANT 24 PIN DUAL-IN-LINE DELAY LINES

Available in delays from 10 nanoseconds to 1 microsecond, offering time delay to rise time ratios of 10 to 1.

DUAL-IN-LINE "MIDI" SPIRADEL®*

THE WORLD'S LOWEST COST DELAY LINE HAVING TIME DELAY TO RISE TIME GREATER THAN 5/1

"MIDI" SPIRADEL offers the same excellent pulse fidelity and phase linearity as the Standard Spiradel. Its low silhouette and dual-in-line mounting permit packaging with semiconductor and comparable components. In high volume use, the unit's low cost is competitive with all types of active devices with no sacrifice in stability and reliability. While units listed are standard-stocked, other delays and impedances are available on special order. Standard Delay Tolerance 10%. (5% on special order.)

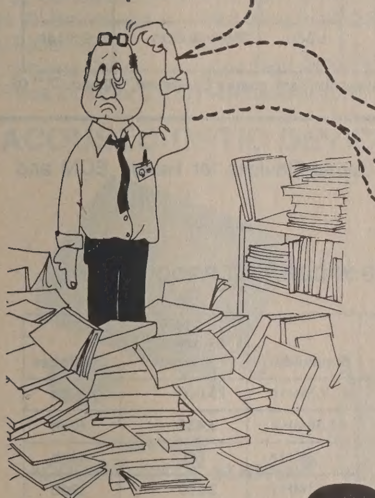
Add Dept. EM to address to tell them you saw it in eem

What can I use to keep all the manufacturers' product data I receive in order?

What system makes filing or retrieving manufacturers' catalogs fast and easy?

Which file system have thousands of engineers purchased because they know it works?



eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

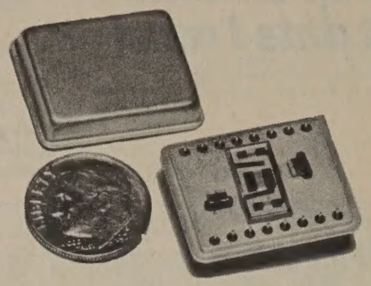
United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530

SAW BANDPASS FILTERS .... For Satelite Communications, CATV/TV, Microwave Communications, Radar, ECM. Featuring linear phase, high rejection, low shape factor, compact size, stability, low cost.

BP150-3 SAW FILTER



Andersen's engineering staff provides quick turn around on custom designs in the 10 to 400 MHZ range. Andersen's production staff is facilitated for high volume manufacture.

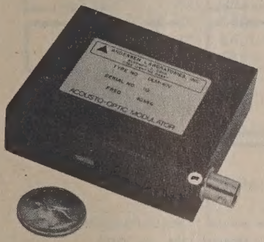
Part No.	PDL 631 B. D. E	PDL 631F	PDL 631M	PDL 641 B. D. E	PDL 641F	*VD-1
Center frequency, MHz	3.579545	3.579545	3.575611	4.433619	4.433619	27
Delay, usec (+.005)	63.556	63.556	63.485	63.943	63.943	63.555 +10ns
-3 db min. Bandpass. MHz	2.83-4.33	2.83-4.33	2.7-4.4	3.4-5.2	3.4-5.2	14
Insertion loss, db (+3)	8	12	8	8	12	30
Max. delay drift, nsec (+20° C to + 50° C)	5	5	5	5	5	15
Triple travel, db	≥ 22	≥ 26	≥ 22	≥ 22	≥ 26	≥ 50
Other spurious, db	≥ 30	≥ 26	≥ 26	≥ 30	≥ 26	≥ 50
Operating temperature range	-20° C to +70° C	-20° C to +70° C	-20° C to +70° C	-20° C to +70° C	-20° C to +70° C	0 to 50° C

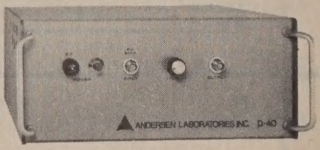
*Available ½H, 1H or 2H

ACOUSTO-OPTIC DEVICES

.... Modulators, beam deflectors, Q-Switches, Modelockers for laser recording, facsimile, non-impact printing, communications, and industrial application.



DLM-40V
ACOUSTO-OPTIC ELEMENT



D-40 DRIVER

ACOUSTO-OPTIC MODULATORS IN CURRENT PRODUCTION

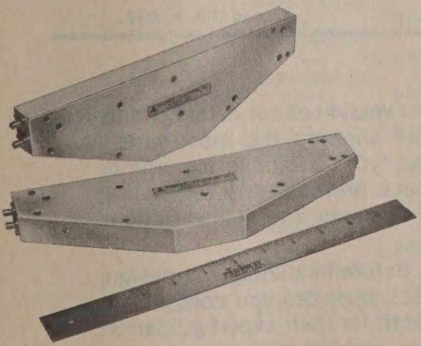
	DLM-40V	DLM-40-IR	DLM-80V	DLM-80-UV
Operating wave-length range	440-700nm	1060-1150nm	440-700nm	300-400nm
Optical trans-mission min.	96%	95%	96%	97%
Laser Polarization	random	random	random	linear-vertical
Active aperture height	2mm	1mm	.5mm	1.5mm
Acoustic center frequency	40MHz	40MHz	80MHz	80MHz
Rise time (10%-90%)	50ns	50ns	25ns	25ns
Modulation bandwidth (—3db point)	7MHz	7MHz	14MHz	14MHz
1st order deflection efficiency min.	85%	85%	85%	85%
Contrast ratio min.	1000 to 1	1000 to 1	1000 to 1	1000 to 1
RF drive power max.	2 watts	3.5 watts	2 watts	2 watts
Driver	D-40	D-40	D-80	D-80

Beam Deflectors wave length 325 to 1064 nm resolvable spots 1 to 300 acess times 300ns to 10 usec.

Q-Switches and Mode Locks for most commercial YAG lasers

SIGNAL PROCESSING SUB-SYSTEMS

.... For radar, ECM, communications, and laser recording.



PULSE COMPRESSION RECEIVERS

PULSE EXPANSION–COMPRESSION EQUIPMENT: complete sub-systems including dispersive delay lines and all necessary electronics to perform pulse expansion, pulse compression, and sidelobe suppression.

UNITY GAIN DELAY CHANNELS: complete sub-systems containing dispersive or non-dispersive delay lines with electronics as needed to satisfy specified gain, amplitude and phase requirements.

UNITY GAIN VIDEO DELAY MODULES: containing the modulation drive and recovery circuity necessary to pass base-band NTSC, SECAM and PAL video with outstanding fidelity. Available in 1H, 2H, 1/2H or custom delay time configurations. For dropout compensators, vertical aperture correctors, comb filters, video disc systems.

DUAL-IN-LINE DELAY LINES

- Delays from 1-1000 nanoseconds.
- Band Width to 60 mhz.
- Impedance 50 to 1000 ohms.
- Resistive Terminations if desired.
- Tapped Delay Lines available.
- Several separate lines in one case.
- Contact Bel Engineering for special applications.

DIP DELAY LINES

- Built to conform to MIL-D-23859.
- Temperature Range −55°C to +125°C.
- Temperature Coefficient 100 ppm/°C or less.
- Will meet most stringent MIL requirements.
- Low attenuation.
- Excellent pulse fidelity.
- Compatible with TTL and other logic modes.
- Other delays available upon request.
- Contact Bel Engineering for special applications.

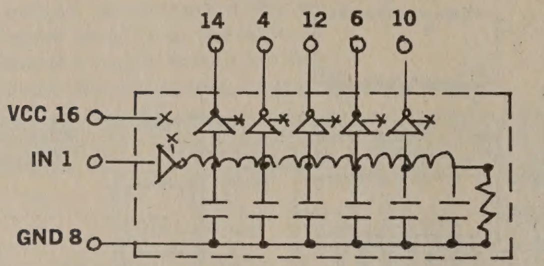
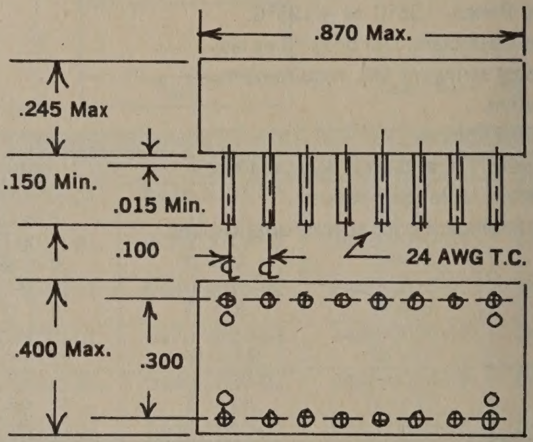
DIGITAL DELAY LINE SERIES 447

Bel Fuse Digital Delay Line Series 447 features five equally tapped delay lines with total delays of 25 to 500 nanoseconds. The lines are compatible with TTL and DTL circuits. Either Logic "1" or Logic "0" inputs are accepted. Cascading of units causes no undesirable reflections. The .870 x .400 x .260 dimensions, with standard Dip Pin-Out permits dense packaging on your circuit board. Delay tolerances for total delay is 5%. Tap tolerances are ±2nsec or 5% whichever is greater. Operating temperature is 0°-70°C. Special designs upon request.



PIN		PIN	
1	Input	6	80% Delay
14	20% Delay	10	100% Delay
4	40% Delay	8	Ground
12	60% Delay	16	Vcc



Part Number	Td (1)	Td Tap (1)	No. Taps	Tr (2)
0447-0025-01	25 Ns.	5 Ns.	5	4 Ns.
0447-0050-01	50 Ns.	10 Ns.	5	4 Ns.
0447-0100-01	100 Ns.	20 Ns.	5	4 Ns.
0447-0250-01	250 Ns.	50 Ns.	5	4 Ns.
0447-0500-01	500 Ns.	100 Ns.	5	4 Ns.

(1) Measured at 1.5 Volt Level, Leading Edge (2) Measured from 0.75V to 2.4V

Supply Voltage Vcc	4.5 to 5.5 Volts
Logic 1 Input Current	50 Microamps Max.
Logic 0 Input Current	2 Milliamps Max.
Logic 1 Output Voltage	2.6 Volts Min.
Logic 0 Output Voltage	.5 Volts Max.

All Measurements Made at VCC = 5.0 Volts @ 25°C

INPUT TEST CONDITIONS

Pulse Voltage	3.2 Volts
Rise Time	3.0 Nsec.
Supply Current	60 ma
Pulse Width	Min. of 40% Delay

DRIVE CAPABILITIES

Logic 0 Output	10 TTL Loads/Tap Max. (20 TTL loads/Unit Max.)
Logic 1 Output	10 TTL Loads/Unit Max.

FORMERLY: OFF-THE-SHELF CATALOG
THE ONLY NATIONAL CATALOG OF ELECTRONIC PARTS, INSTRUMENTS AND EQUIPMENT DESIGNED EXCLUSIVELY FOR DISTRIBUTORS AND THEIR CUSTOMERS.
YESTERDAY'S
RADIO MASTER
IS TODAY'S
ELECTRONIC DISTRIBUTORS
MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

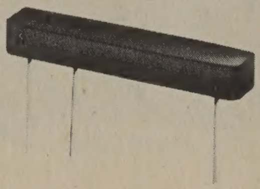
Q-Lines (Lumped Constant)

State-of-the-art design and packaging technology enables CCC to offer delay to rise time ratios of up to 100:1, with the smallest envelope sizes possible. Coupled with extremely low attenuation, distortion and operating temperature ranges of −55°C to +125°C make CCC Q-Lines ideal for a wide range of applications.

Write for data sheet DL-6-368

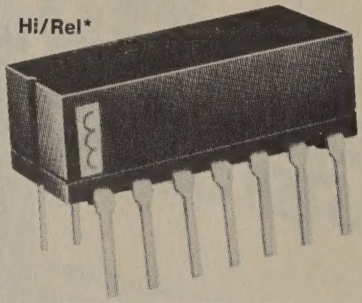


Minilines (Distributed Constant)

Economically priced delay lines featuring low profile envelopes which are ideal for printed circuit mounting and applications requiring high package density. Delays up to 2 μsec, impedances for 100 to 1,000 ohms and rise times as low as 2.5 nanoseconds are available and meet all applicable portions of MIL-D-23859A.

Write for data sheet DL-4/5-368

Hi/Rel*



DIP-TAPPED DELAY LINES

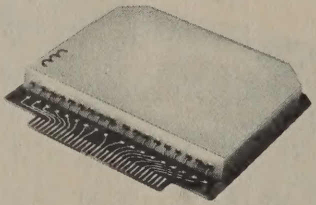
SERIES 500

- Delay: From 10 nsec to 200 nsec.
- No. Taps: 5 equally spaced taps.
- Taps Accuracy: ±5% of tap delay.
- Impedance: 50Ω, 100Ω, and 200Ω ±10%.
- Delay/Rise Time: 3/1.
- Dielectric: 50 Vdc min.
- Environment: Meets or exceeds MIL-D-23858C.
- Temperature Coefficient: 100 PPM/°C.
- Standard 14 DIP Case.

SERIES 1000

- Delay: From 10 nsec to 400 nsec.
- No. Taps: 10 equally spaced taps.
- Taps Accuracy: ±5% of tap delay.
- Impedance: 50Ω, 100Ω, and 200Ω ±10%.
- Delay/Rise Time: 5/1.
- Dielectric: 50 Vdc min.
- Environment: Meets or exceeds MIL-D-23859C.
- Temperature Coefficient: 100 PPM/°C.
- Standard 16 DIP Case.

*High Reliability: Fully MIL-SPEC quality assurance available.

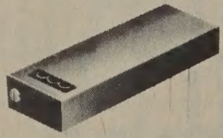


Transponder and Beacon Coder Delay Lines

Tap delay spacing of 1.45 microseconds with special tap delays designed for the various systems are available as off shelf and customer designed items. These lines have minimum volume and weight for airborne use and are normally supplied wired to printed circuit cards. These delay lines exhibit high delay accuracy and unsurpassed temperature stability — normally 10 PPM/°C.

Electrically Variable Delay Lines (E.V.D.L.)

Sophisticated voltage variable devices for applications such as Aperture Phase Correction in color television signal generation. Or as a Phase Modulator where the modulating voltage is used as the device bias. CCC E.V.D.L.'s are being used at frequencies up to 50 MHz by major producers of studio broadcasting equipment.



Varilines (Mechanically Variable Delay Lines)

Columbia manufactures a wide range of precision variable delay lines encompassing delay ranges of from 0 to 20 nanoseconds, to 0 to 15 microseconds in impedance ranges of 50 to 2,000 ohms. These units can be supplied continuously variable or may be decade switched, and suitable for printed circuit applications.

Write for data sheet DL-1-368

Magnetic Core Delay Cable

Economical low-loss, high impedance delay elements for use in pulse work demanding extremely fast rise times. These delay cables can be supplied in calibrated lengths with molded-on end terminations, ready for installation or may be obtained in bulk. Delivery is usually from stock.

Write for data sheet DL-7-368

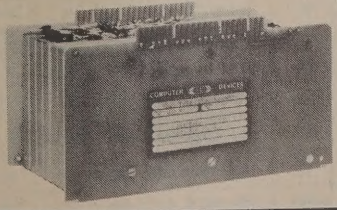
DELAY LINE COMPUTER MEMORIES DELCOMS



THE DELAY LINE COMPUTER MEMORY (DELCOM) offers the **Lowest Price Per Bit** of any high speed memory device. Computer Devices Corp. offers convenient standard packages for all practical storage capacities from 10 bits to 20,000 bits in single delay line units as well as multi delay line units* with massive storage capacities. All Delcoms are compatible with DTL and T²L logic. Normal power requirements are +12 and −12 VDC and +5 VDC. However, Delcoms are tailored to your bit rate, delay, input-output logic and power requirements.

MANY OTHER MODELS AND SPECIALTY Delay Lines are available.
If exactly what you want is not listed, please call.

COMPUTER DEVICES CORP.

military & commercial

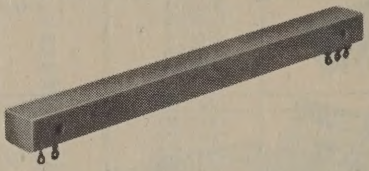
DELAY LINES

WITH OR WITHOUT CIRCUITRY

MAGNETOSTRICTIVE ★ LUMPED CONSTANT ★ ULTRASONIC ★ DISTRIBUTED CONSTANT ★ DISPERSIVE STRIP

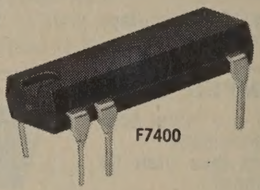
MAGNETOSTRICTIVE DELAY LINES — Fixed and variable delays to 10,000 microseconds. Fixed — FMS Series; Variable — VM Series.

FIXED MAGNETOSTRICTIVE DELAY LINE — Up to 10,000 bits of data for memory storage. Circuitry compatible with all microcircuit logic. Choice of data format: RZ, NRZ or Bipolar.

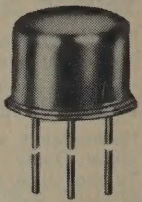


ULTRASONIC DELAY LINES — Replaces most quartz or glass lines. Offers superior performance, lower attenuation and smaller size at less cost. Frequencies to 30 MHz. Delays to 200 usec and greater.

SUBMINIATURE DELAY LINES



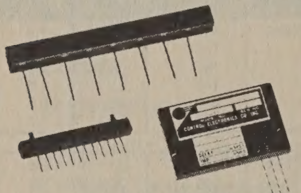
F7400



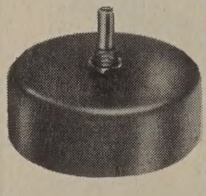
F-TO-5

TO-5 and micrologic packaged delay lines from 0.01 to 0.64 and longer delays. Ideal for timing transistors and other circuit components.

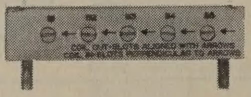
LUMPED CONSTANT DELAY LINES — Many shapes available including miniature types with pin connectors for PC Boards, connector fingers for plug-in units...multi-tapped units...terminal-ended units, etc. Delays from 0.05 usec to 500 usec for standard units. Delay to risetime ratios up to 100:1. Temperature stability to 50 ppm/C°.



COMPACT FIXED DELAY LINES FOR PC BOARDS — Extremely high density packaging. Typical Unit: 25:1 delay-to-rise-time ratio in a volume of 2 cubic inches.



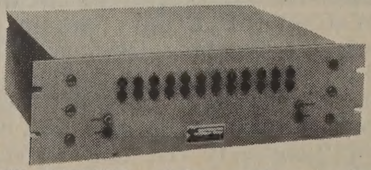
VARIABLE DELAY LINE Resolution of 1 part in 120. Delay up to 10 usec. 1″ x 3″.



UNIQUE BINARY CODED SECTIONAL DELAY LINE — Uses miniature transfer switches. Also available with terminals for remote switching.

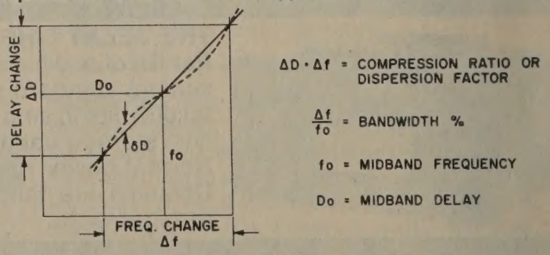
IFF MULTI-TAP DELAY LINES Standard IFF delay lines with taps every 1.45 usec. High density packaging available for airborne transponder use.

AUDIO, HIGH FREQUENCY & DISTRIBUTED CONSTANT DELAY LINES — With unusual circuits, extreme delays, high frequency application, rapid rise times, conforming waveform circuits and corrective circuits. Write for complete details.



AUDIO DELAY CABINET — Relay rack mounted cabinet houses 25 millisecond delay with taps at every ms. Units can be cascaded for longer delays.

DISPERSIVE STRIP DELAY LINES — Delay varies with frequency. A prime application is in Pulse Compression Radar Systems, eliminating large, expensive filter components. Compression ratios of 150:1, typical.



For all your Delay Line requirements, contact:

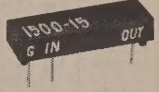
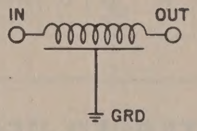
SERIES 1500 & 1501

STOCKED





SPECIFICATIONS

- Taps available
- Td/Tr ≥ 3/l and 2/l series 1501 & 1500 respectively
- Withstanding voltage — 100 vdc for series 1500; 50 vdc for series 1501
- Impedance — 100 to 500 ohms
- Longer cases available for longer delays
- Cases available without studs
- #22 gauge leads, hot-tin-dip

DATA DELAY DEVICES

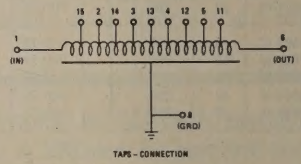
SERIES 1519
10 TAPS



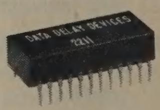
SPECIFICATIONS

- Delay accuracy – ±5% (others on request).
- No. taps – 10 Equally spaced taps.
- Taps accuracy – ±5% of tap delay.
- Impedance tolerance – ±10% (others on request).
- Rise-Time – 20% of time delay.
- Withstanding voltage – 50 Vdc. Min.
- Temperature coefficient – 100 PPM/°C.
- Environment – Meets or exceeds MIL-D-23859C.
- Overall case height – 0.280 inches.

DUAL-IN-LINE DELAY LINES

SERIES 2211

STOCKED



SPECIFICATIONS

- Standard 24 pins DIP.
- TTL and DTL compatible.
- Td/Tr = 10/1
- Delay tolerance: +5% or 1NS whichever is greater.
- Temperature coefficient: 100PPM/°C.
- Temperature range: –55°C to +125°C.
- Dielectric breakdown: 50 Vdc.
- Meets or exceeds MIL-D-23859.
- Epoxy encapsulated.

SPECIFICATIONS

- Continuously variable delay
- Multi-turn adjusting screw (40 turns approx.)
- Impedance (see table)
- Withstanding voltage — 50 Vdc
- Temperature Coefficient — 100 PPM/°C
- #20 gauge leads
- Resolution — .12NS approx.

FEATURES

- Continuously variable
- High resolution, 0.15 Ns
- Long delay, 4.3 US
- One turn delay adjustment
- Low attenuation
- High fidelity of pulse reproduction

CONTINUOUSLY VARIABLE DELAY LINES

SERIES 636

SPECIFICATIONS

- Continuously variable delay adjustment.
- Multiple shaft revolution (60 Min.).
- Delay tolerance – ± 5%
- Impedance tolerance – ± 10%
- Operating temperature – −40°C to +85°C.
- Hermetically sealed unit.
- "O" ring provided at the shaft's end.
- Meets or exceeds MIL-D-23859C.
- Miniature size.
- Maximum delay – 2.5 US.

SPECIFICATIONS

TOTAL DELAY: See table. TAP DELAY: Normal IN and OUT (100 taps can be accommodated). DELAY ACCURACY: ±3% (±½% on request). IMPEDANCE: 200 to 10,000 ohms. ±5%. ATTENUATION: 6db or better. PHASE RESPONSE: ±1% over bandwidth. TEMPERATURE RANGE: −55°C to +85°C (others on request). TEMPERATURE COEF. 100 PPM/°C (others on request). DIELECTRIC STRENGTH: 50Vdc (others on request). CASE: Hermetically sealed metal. SIZE: 5-3/4 x 3-3/16 x 2-1/2 (14.6 x 8.1 x 6.3cm) MOUNTING: (4) 10-32 studs, 1/2" long, spaced 3-1/2 x 2 (8.90 x 5.10 cm). TERMINALS: Glass-to-metal seal or press-fit type.

DESCRIPTION

L-C networks in tandem, with precise delay increments and low attenuation. Use as delay syntesizers for evaluation of Worst-Case design analysis; as time delay standards and Phase measuring devices. Meets Military specifications. Type 510 and 511 use a single 10 positions switch.

SPECIFICATIONS

ACCURACY: ± 2% of setting. ATTENUATION and *TIME DELAY see table. *RISE TIME: 2% of time delay or less. TEMPERATURE COEFFICIENT: ± 50 PPM/°C. DISTORTION: Less than 3% for pulse signals on most types. Essentially no harmonic distortion for sine wave signals. SIZE: 8 x 3.5 x 4.5 (20.32 x 8.89 x 11.43 cm) Max. for type 510 and 511. 16.75 x 5.25 x 5.5 (41.54 x 13.33 x 13.97 cm) Max. for type 1510 and 1511 (Rack-Mount Panel available on request).

*other can be provided on request.

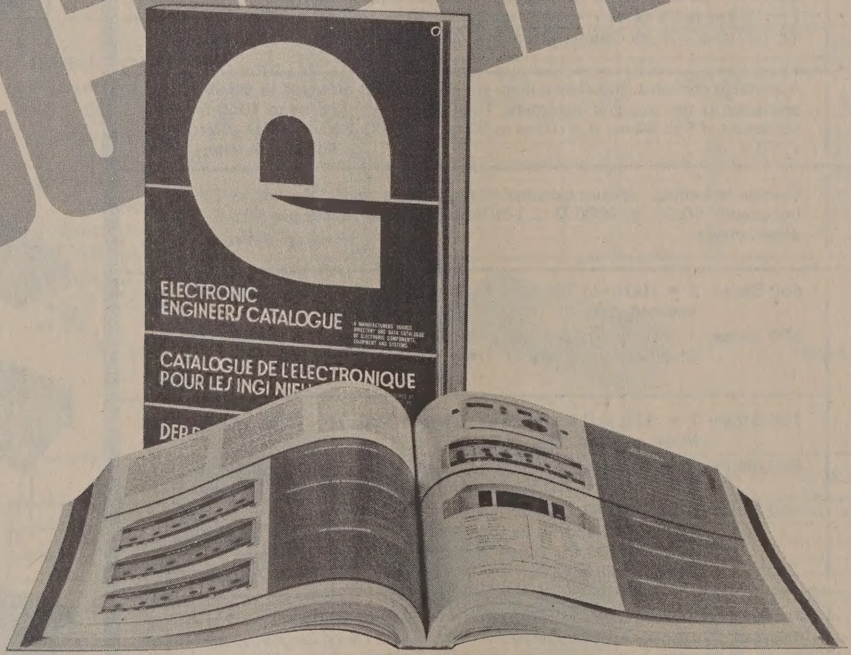
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

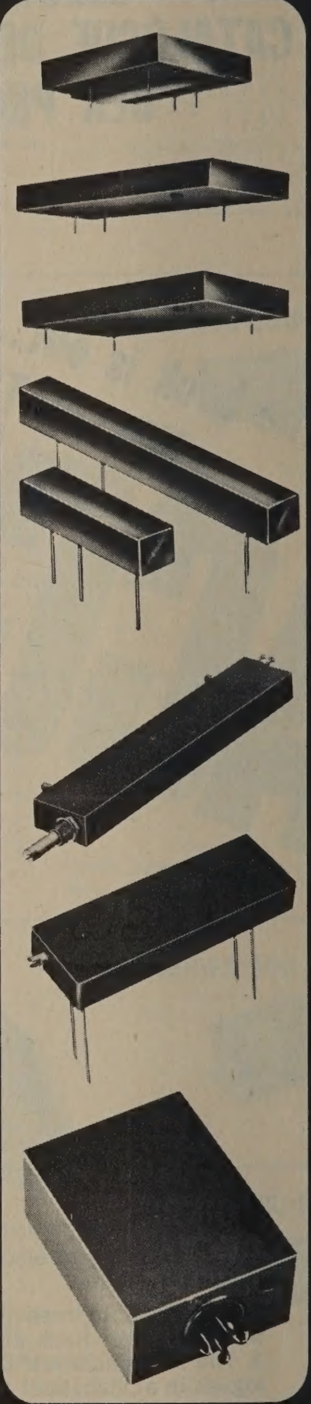
DELAY LINES

DUAL-IN-LINE DELAY LINES	**EC Series:** From delay (T) of 5 ns and rise time (tr) of 2.5 ns to T = 25 ns and tr = 10 ns, Impedance (Z) = 200, 300, 400 or 500 Ω Size: .66 x .250 x .250 **EP Series:** From T = 20 ns to 50 ns, tr = 5 ns to 12.5 ns, Z = 200, 300, 400 or 500 Ω Size: .46 x .76 x .25 **EL Series:** From T = 50 ns to 100 ns, tr = 8.5 ns to 17 ns, Z = 200, 300, 400 or 500 Ω Size: .46 x 1.40 x .25 *Request Bulletin — ECPL* **D Series:** (Low temp. coeff. of Delay Types) From 20 ns to 100 ns, T/tr = 3.3, Z = 100 Ω or 200 Ω Size: .46 x .76 x .25 **E Series:** (Low temp coeff. of Delay) From 50 ns to 500 ns, T/tr = 6, Z = 100 Ω or 200 Ω Size: .46 x 1.4 x .25 **F Series:** (Low temp. coeff. of Delay) From 100 ns to 1000 ns, T/tr = 10, Z = 100 Ω or 200 Ω Size: 1.0 x 1.5 x .25 *Request Bulletin — DEF*
DISTRIBUTED CONSTANT DELAY LINES	Delays from 20 ns to 1100 ns, tr from less than 20 ns to 120 ns depending upon delay. Impedance from 100 to 1800 Ω. *Request Bulletin — DC*
SUB-MINIATURE NANOSEC DELAY LINES	**SM Series:** T = 10 ns to 50 ns at Z = 100 and 200 Ω; T = 100 ns to 300 ns at Z = 500 Ω T/tr = 3.5 average; Size = 1 x .32 x 32: T = 50 ns to 120 ns at Z = 100 and 200 Ω and T = 400 ns to 1200 ns at Z = 500 T/tr = 5 to 10; Size 2 x .32 x .32 *Request Bulletin-SM*
TAPPED DELAY LINES	Delays of 100 ns to 1000 ns; tapped in 10 or 20 equal increments tr = 10 ns for T = 100 ns to 55 ns for T = 1000 ns, Z from 50 Ω to 200 Ω ; Size 1 x 3 x .35 for 100 and 200 ns delay; 1.25 x 5 x .35 for longer delays. *Request Bulletin-T*
PROGRAMMABLE DELAY LINES	Adjustable constant Impedance lines with increments arranged in binary order; resolution is the smallest increment. Total delay from 125 ns to 1000 ns with resolution of 5 to 40 ns; tr = 10 ns to 80 ns; Z = 100, 200 or 500 Ω Size: .875 x 3.0 x .45 *Request Bulletin — PR*
STANDARD MIL TYPE LUMPED CONSTANT DELAY LINES	Chassis mounting, steel enclosures', delays range from 1.0 μsec to 50 μsec, Impedance 50 Ω to 2000 Ω ; T/tr from 10 to 50. Specs per MIL-D-23859 Slash sheets. *Request Bulletin — MIL*
CONTINUOUSLY VARIABLE DELAY LINES	**400 Series:** T = 100 ns to 700 ns; tr = 30 to 95 ns; Z = 100 to 1500 Ω Metal encased, Size: 6 17/32 x .66 x 1 1/4 **500 Series:** T = 1.0 to 12.0 μsec; tr = .15 to 1.9 μsec; Z = 75 to 1000 Ω Metal encased, Size: 7 1/4 x 1 x 1 5/8 *Request Bulletin-400/500* **700 Series:** T = .125 to 1.5 μsec, tr = .03 to .1 μsec, Z = 75 Ω to 1800 Ω Metal encased, Size: 4.5 x .5 x 1.51 **800 Series:** T = 10 to 280 ns; T/tr = 4 for size 2.25 x .75 x .35 and T/tr = 7 for 4 x .75 x .35, P.C.B. mounting, Epoxy enclosure. ("Trimline" TM) **900 Series:** Size: .76 x .46 x .25 for T = 5, 10 and 20 ns with T/tr = 2 to 2.5 for T = 30, 40 and 50 ns with T/tr = 3.3 Size is 1.5 x .46 x .25 Z is 200 and 300 Ω Epoxy enclosure for P.C.B. mounting. ("Mini-Trimline" TM) *Request Bulletin — 700/800/900*
HIGH DENSITY PC MOUNTING DELAY LINES	For delays of .5 μsec to 10.0 μsec with T/tr from 18 to 29 Size is 2 x 2 x .4. For delays of 15 μsec to 30 μsec with T/tr = 40 Size is 2.75 x 4.2 x .65.Z varies from 50 Ω at shorter delays to 500 Ω for longer delays. *Request Bulletin — PC*
EXTENDED DELAY/RISE TIME DELAY LINES	Delay/Rise time from 100 to 250; T = 10 μsec to 100 μsec; Z from 75 Ω to 250 Ω. Volume is 91 to 294 cu. in. depending upon T/tr. *Request Bulletin-HP*
MILLSECOND DELAY LINES	Delays from .1 msec to 5 msec; T/tr = 25, 33 and 50; Z = 500, 1000 and 2000 Ω : Volume is from 40 to 162 cu. in., hermetically sealed metal cased construction. *Request Bulletin — MS*



The lines described above represent only a small segment of our total design capability. ESC also designs and manufactures, typically . .

VIDEO	Fixed programmable and mechanically-variable delay lines for the TV broadcast industry, including video cable simulators and voltage variable delay lines.
HI-REL	Proven design, manufacturing capabilities, and facilities encompassing all quality levels dictated by MIL-I-45208 and MIL-Q-9858A.
SONAR	Delay lines used in beam forming systems. These units are manufactured to precision tolerances and are supplied in matched sets or groups.
ATC	Precision tapped delay lines for Air Traffic Control systems of all types, IFF, Beacon Systems, Tacan, Vortac, etc.

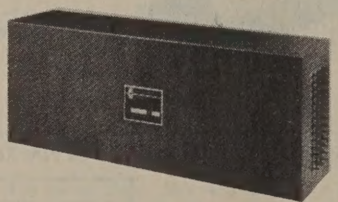
PRECISION SONAR DELAY LINES / SERIES A

The basic design of this series incorporates unsymmetrical Pierce sections with precisely controlled equalization. These sections consist of closely matched high Q inductors and precision tolerance capacitors to assure unsurpassed performance.

SPECIFICATIONS

Delay Range: from 500 μsec to 10^6 μsec ±1%
Delay Linearity: available to within ±0.05%
Bandwidth: 70 KHz maximum
Dielectric Strength: 100 VDC
Operating Temperature: −55°C to +125°C
Temperature Stability: under 50 ppm/°C



SUPER-η* DELAY LINES / SERIES H

SUPER-η LINES embody a new design principle providing the highest efficiency yet obtainable in lumped constant delay lines. Use of network synthesis techniques** rather than conventional m-derived methods result in sharply improved delay line efficiency. Compared to ordinary delay lines of the same delay-to-rise-time ratio, **Super-η** LINES use far fewer LC sections. For this reason these newly-developed lines provide such outstanding advantages as: • Greater Inherent Reliability • Smaller Package Size • Appreciable Cost Reduction

**KAPPA Technical Report #TR-101

SPECIFICATIONS

Delay Range: 0.5 μsec to 500 μsec ±5%
Delay-to-Rise-Time Ratio: as required, up to 150
Delay Linearity: ±1%
Bandwidth: 70 MHz maximum
Distortion: ±10% maximum
Dielectric Strength: as required
Operating Temperature: −55°C to +125°C
Temperature Stability: 50 ppm/°C

*η = Delay Line Efficiency = $\frac{R}{N}$

where R = Ratio of Delay-to-Rise-Time
N = Required number of LC sections

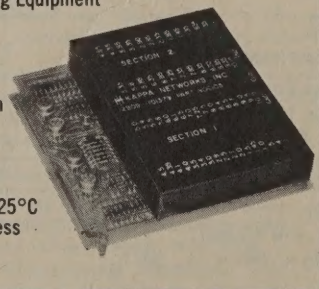
TRANSPONDER LINES / TACAN LINES DME LINES / SERIES C

Designed to meet the requirements of MIL-D-23859 and to withstand the most rigorous military environments.

• Tap Selection to Precise Tolerances • Compact Packaging • Used in Air and Ground Measuring and Signalling Equipment

SPECIFICATIONS

Tap-Spacing: as required
Tap Tolerance: as required
Delay-to-Rise-Time Ratio: 100 maximum
Delay Linearity: ±0.5%
Attenuation: from 1.5 to 6 db
Distortion: as required, to 1%
Dielectric Strength: as required
Operating Temperature: −55°C to +125°C
Temperature Stability: 50 ppm/°C or less



LOW DISTORTION LINES / SERIES D

Used primarily in precision instrumentation where high bandwidth and low distortion are critical considerations.

SPECIFICATIONS

Delay-to-Rise-Time Ratio: 50 maximum
Bandwidth: 50 MHz maximum
Dielectric Strength: as required
Operating Temperature: −55°C to +125°C
Temperature Stability: 50 ppm/°C
Distortion at Output: 2% maximum
Distortion at Taps: less than 5% at any tap
Distortion Limit: as low as 0.1% if required
Delay Range: up to 100μsec
Standard Tolerances: ±1% on Delays
±5% on Impedance

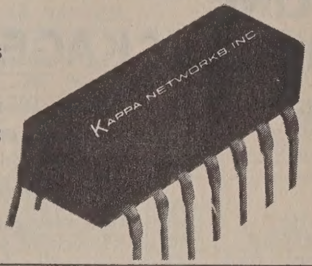
Kappa Networks, Inc. DELAY LINES

DUAL IN LINE / DELAY LINE / SERIES DP

This series widely used in computer, radar and timing applications. • Available with Tapped Delay Increments • Plug into Standard Dual-in-Line Sockets or P.C. Board • Manufactured and Tested to MIL-D-23859

SPECIFICATIONS

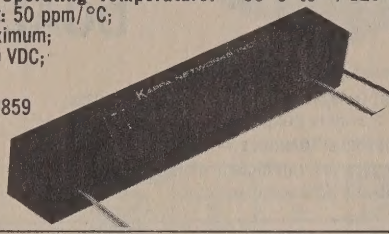
Delay Range: to 1000 nanoseconds
Distortion: 10%
Operating Temperature: –55°C to +125°C
Temperature Stability: 50 ppm/°C
Dielectric Strength: 100 VDC



MINIATURE NANOSECOND DELAY LINE / SERIES KM

This series of lumped constant design, incorporates an advanced technique of packaging, to offer high figure of merit in small volume.

SPECIFICATIONS: Operating Temperature: –55°C to +125°C; **Temperature Coefficient:** 50 ppm/°C; **Attenuation:** 0.5 db maximum; **Dielectric Strength:** 100 VDC; **Distortion (typical):** ±10%; Meets MIL-D-23859

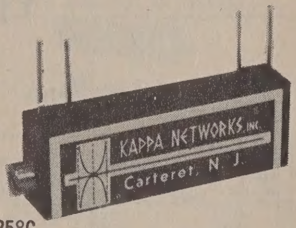


MINIATURE CONTINUOUSLY VARIABLE DELAY TRIMMERS / SERIES TT

This Series is the smallest of its kind and is immediately available from stock. Intermittent-free operation is assured by KAPPA's unique contact design.

SPECIFICATIONS

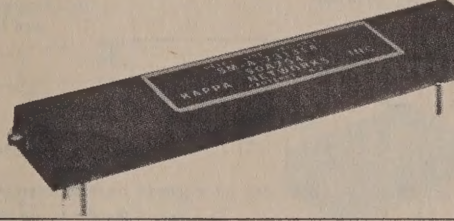
Size: ¼ cubic inch
Delay Range: up to 120 nanoseconds
Resolution: —25 nanoseconds or less
Relay-to-Rise-Time Ratio: 4/1
Bandwidth To: 70 MHz
Attenuation: .25 db maximum
Distortion: ±15% maximum
Dielectric Strength: 100 VDC
Operating Temperature: –55°C to +125°C
Temperature Stability: 200 ppm/°C



MINITRIM DELAY LINE / SERIES MT

This series available in both distributed and lumped constant design. • Ideal for P.C. Board Insertion • Wide Range of Delay • KAPPA Minitrim Delay Lines are Designed for Circuits Requiring Precise Delay Adjustments

SPECIFICATIONS: Delay Range: up to 300 nanoseconds; **Resolution:** less than 1 nanoseconds; **Attenuation:** less than .5 db; **Dielectric Strength:** as required; **Operation Temperature:** –55°C to +125°C



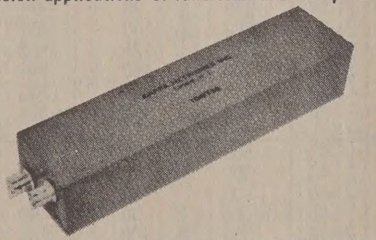
VIDEO BROADCAST DELAY LINES / SERIES BC

KAPPA Video Broadcast Delay Lines yield a greater delay-bandwidth from fewer components than conventional units, and their performance more nearly approaches constant delay at all transmitted frequencies than do conventional (m-derived) delay lines.

This performance has established their wide acceptance for use in the most demanding color television applications of American and European Systems.

SPECIFICATIONS

Delay Range: to 10 μsec
Impedance: 75 ohms ±2%
Linear Delay Bandwidth:
to 14 MHz, Delays to 1 μsec
7 MHz, Delays to 5 μsec
5 MHz, Delays to 10 μsec



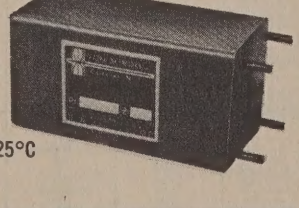
STANDARD LUMPED CONSTANT DELAY LINES / SERIES LC

Most standard KAPPA Lumped Constant Delay Lines utilize either the highly efficient Golay or unsymmetrical Pierce designs. Equalization is precisely calculated and realized, fully accounting for variations in magnetic core permeability, distributed capacity and other variables. The resulting units exhibit the specified delay linearity tolerance to frequencies beyond the 3 db passband.

SPECIFICATIONS

Delay: 50 nanoseconds to 1 second*
Impedance: 20 ohms to 50 K ohms
Delay-to-Rise-Time Ratio: 150 maximum
Delay Linearity: ±0.5%
Bandwidth: DC to 250 MHz*
Distortion: ±10% or as required
Operating Temperature: –55°C to +125°C
Temperature Stability: 50 ppm/°C

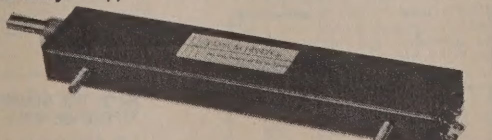
*Subject to a limit on delay X bandwidth



CONTINUOUSLY VARIABLE DELAY LINES / SERIES K

This series offer continuously variable delay lines of lumped constant design. Incorporating special contact feature for intermittent free variation.

SPECIFICATIONS: Delay Range: to 2.0 μsec; **Resolutions:** 1/1000 of total delay or 1 nanosecond whichever is greater; **Delay-to-Rise-Time Ratio:** up to 10:1; **Attenuation:** under 1.5 db; **Dielectric Strength:** as required; **Operating Temperature:** –55°C to +125°C; **Temperature Coefficient Delay:** 50 ppm/°C



STANDARD DISTRIBUTED CONSTANT DELAY LINES / SERIES DC

These Delay Lines offer limited delay-rise-time ratio and small volume at lowest cost. • Available for P.C. Board Insertion • Short Delivery Cycle

SPECIFICATIONS: Delay Range: up to 3 μsec ±5%; **Delay-to-Rise-Time Ratio:** 11 maximum; **Bandwidth:** 30 MHz maximum; **Distortion:** ±5% typical, ±10% maximum; **Dielectric Strength:** as required; **Operating Temperature:** –55°C to +125°C; **Temperature Stability:** 200 ppm/°C maximum

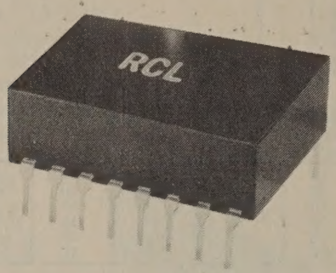
DELAY LINE DUAL-IN-LINE "DIP" OPTION BLOCKS For Micro Programming



Designed to be used for bussing or micro programming, such as code conversion and rate multiplication. The units can also be used as shorting modules for test fixture compensation.

- 14 & 16 pin packages
- Custom configurations are available
- Shorting pattern may be modified by simply cutting off individual leads
- Allows shorting of multiple arrangements of pins for various circuit applications on circuit boards using a standard DIP spacing.
- May be used for bussing or micro programming, such as code conversion and rate multiplication.
- Can be used as shorting modules for test fixture compensation.

OTHER PARAMETERS & TOLERANCES AVAILABLE ON REQUEST

ECONOLINE DELAY LINES Series L-09

Lumped Constant, Econoline Modules are designed primarily for computer applications where large quantities of low cost time delays are required. Eleven different time delay values between 10 and 200 nanoseconds are available in this new modular form. Each module unit is a single time delay section. The required total delay and delay to rise time ratio can be obtained by simply interconnecting a number of modules. The accompanying chart shows how to select the proper module values.

Econoline Delay Line Modules are also ideal for prototypes and breadboard circuits. Single modules can be connected together on a circuit board with taps available at each connection point, if needed.

Econoline Delay Line Modules should be used in applications where pulse distortion and tolerance are not critical. They provide a convenient low cost time delay for commercial and industrial usage.

SELECTION CHART

The chart above can be used to determine the number of modules required to provide a desired delay and rise time.

1. Determine the delay to rise time ratio by dividing the desired time delay by the desired rise time.

2. Using the chart determine the number of sections required for this T_d/T_r.

3. Divide this number of sections by the total delay to determine the delay per section.

Total delay is the sum of the individual section delays. It can be trimmed to the desired value by selecting the proper value of the last module.

ACTIVE-DIGITAL DELAY MODULES (FOR TTL & DTL APPLICATIONS)

NOW RCL OFFERS DIGITAL DELAY MODULES WITH EXTENDED RANGE OF DELAYS

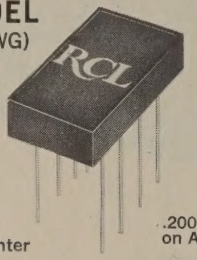
- **DDM Range Extended from 25 to 1000 nsec.**
- **TTL and DTL Compatible**
- **Extremely Low Profile (.250″ Off Board)**

SPECIFICATIONS

Rise Time (All Models)	2 nsec. Max.
Logic 1V Out (All Models)	2.4V Min.
Logic 0V Out (All Models)	0.6V Max.

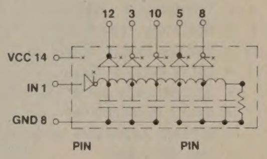
5 TAP MODEL

(All leads #24 AWG)



.300 Center-to-Center

.200 Center to Center on Adjacent Leads



RCL now adds an entirely new dimension to its regular series of Delay Line Modules. 5 TAP packages (1″L x .4″W x .250″High), 10 TAP packages (1″L x .8″W x .250″High).

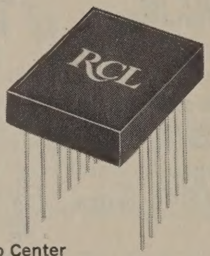
Built-in interface offers the customer direct plug-in devices without the necessity for additional components. Every model in the line is TTL and DTL compatible.

RCL offers 14 different models ranging in total delays from 25 to 1000 nsec.

AS LOW AS $10 EACH IN UNDER 100 QUANTITIES

10 TAP MODEL

(All leads #24 AWG)



.100 Center to Center on Adjacent Leads

.600 Center to Center

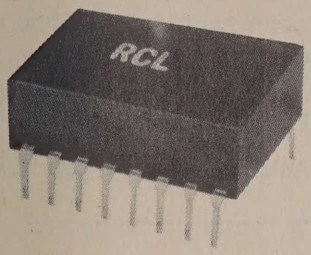
"PLUG-IN" DIGITAL "DIP" DELAY MODULES



- **Fast Rise Time — Independent of Delay**
- **DTL and TTL Compatible**
- **5 Tapped Delays**

RCL "Plug-In" Digital Delay Modules provide the precise timing features of a Delay Line in a device which can be easily used with the DTL and TTL families. Considerable space savings and flexibility are achieved over the use of conventional components.

- **High Fan Out Capability**
- **50 ns, 100 ns, 250 ns Delays**
- **16 Pin Dip Pattern**
- **In Stock**

TTL DELAY MODULES

TTL Delay Modules are designed to be used directly with super high speed TTL, standard TTL and DTL logic circuits. They provide many timing applications without any or with minimum interface.

TTL Delay Modules can be cascaded to get any combination of delay without degrading output rise time (T_R+ or T_R-). The delay to rise time ratio (T_D/T_R) of individual modules is very high (approximately 50:1) and improves with cascading modules.

Output rise times of each module are independent of input rise times up to 50 nsec. Each module can handle input pulse widths as low as 15 nsec. (with ≤2.5 nsec. input rise times). TTL Delay Modules are encapsulated by transfer molding. They are pin compatible*with 74/54 Series TTL/SSI 14 Lead DIP Circuits.

Fanout: Logic 1 — 20 Loads. Logic 0 — 10 Loads.

PART NO.	NANOSECONDS					ALL TAPS

T_D — Time between +1.5 volt points on input and output voltage wave forms either low to high or high to low.
T_R — Time between +0.8 volt and +2.0 volt points on output wave form either low to high or high to low.
Delay Characteristics @ V_{CC} = 5.0V. 25°C.

All units are available in four versions:
Commercial, commercial with additional testing "MY," Military "M," and Military Hi-Rel "MX."
Commercial units use standard commercial grade IC's (plastic package), temperature range 0-70°C.
Military "M" units use military grade IC's (ceramic package) to meet MIL-STD-883 but not screened to that specification, temperature range −55°C to +120°C.
Military "MX" units use hermetically sealed IC's in a ceramic case meeting MIL-STD-883 and 38510/Mach IV program (Hi Rel. Spec.), screened and burned in. Temperature range −55°C to +125°C.
Consult factory for detailed specifications.

ALCOKNOB

HIGHEST QUALITY INSTRUMENT KNOBS WITH ANODIZED FINISH

Remember that knobs are the most visible part of your equipment. Therefore, field acceptance of your product depends largely upon its' physical appearance.

ALCO has become a leading source in the USA for anodized aluminum knobs offering a wide variety of styles in five basic diameters. These all have a durable anodized finish in either natural, black, gold or black/natural duo-tone.

Our knobs are better because they are totally machined with no compromise, even on the knurls. This offers a new dimension in appearance that is sure to enhance any panel.

All knobs illustrated in our catalog are generally available "off-the-shelf" in production quantities. However, we would be glad to quote on custom knobs either by modifying existing models or perhaps create new designs of your own choosing.

By the way, we also make a large variety of phenolic knobs, each meeting the following criterias; brass bushing, allen head set screws and a bright aluminum spin plate on black phenolic. These knobs are also stocked in quantity and fit 1/4" or 1/8" shafts.

We urge you to call Customer Service at (617)-685-4371 or Telex 710 342-0552. Our salespeople know how to tend to your immediate needs. Also, don't forget to ask for our latest 24-page catalog and free sample!

Mark chassis, terminals, circuit boards and components with this handy set. Includes all standard component ID letters and consecutive number sheets from 1 to 209. Contains 24 3″x5″ sheets.

966 Black set	**$6.95**
967 White set	**$6.95**

DATAMARK titles and alphabets

These economical sets offer DATAK quality in 12 specialized assortments of titles, symbols, alphabets and numerals. Each set of 6 sheets (3″x5″) covers one electronic specialty. Sets use the same typeface and size as "Titles for Electronic Equipment" so they make handy refills. Coat transferred titles with DATAKOAT for permanency.

K58B Black (K58W — White) Audio, TV, Hi-Fi	**$1.69**
K59B Black (K59W — White) Amateur Radio & CB	**1.69**

Use directly on control panels and meter dial plates or as 1:1 master art. Tap switch marks are set for standard 15° and 30° detents but can be transferred at any angle for special situations. The complete set has meter arcs and graduations in black and red (white available as a refill)*. Other patterns, letters and numbers supplied in black, white and red. Protect finished panels with DATAKOAT SPRAY. Do not coat dialplates.

968 Meter & Dial Kit	**$6.95**
K19/# (color) Refill of 4 Identical Sheets	**$4.58**

DATAKOAT protective coating

High solids water-clear coating encapsulates transfers under a tough plastic film. Will not attack most plastics, lacquers or cured enamels.

04176 Brushcoat & Thinner Kit (1 oz. ea.)	**$1.49**
04177 Gloss Spray (16 fl. oz.)	**3.39**
04178 Matte Spray (16 fl. oz.)	**3.39**

Collet Knobs and Accessories

INTERLOK
ONE OF THE **PURDY** GROUP OF COMPANIES

770 AIRPORT BLVD., BURLINGAME, CA. 94010 • (415) 348-5625 • TWX 910-374-2353 • TELEX 34-9373

INTERLOK offers two collet knob programs; A and C with either wide or narrow fluting, with or without wings, and with or without line markings. Knob diameters include 10-mm, 14.5-mm, 21-mm, 28-mm and 36-mm as standards. 9-mm and 45-mm are also available on order.

INTERLOK knobs are available in three different colors and with a metalized finish. Three different cap styles are available in nine different colors. A variety of pointers, stators, figure dials and nut covers are available to complete the knob assembly.

Collets are available for 1/8″, 1/4″ and metric dimensions. Because of their collet construction, the knobs can be combined into three different sized concentric knobs as well.

Covering of the tightening nut is accomplished with nut covers for the 10-mm and 14.5-mm collet knobs. A recess is built-in for the larger knob types.

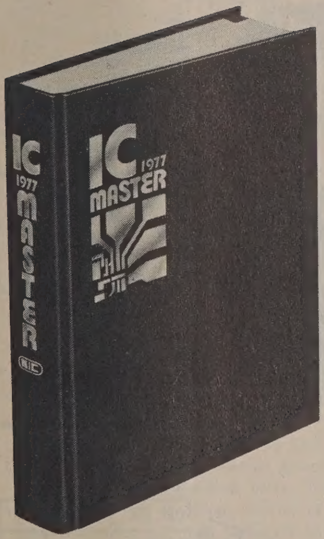
Knob Designer Kits

INTERLOK has a great idea for the packaging designer. We have a series of five designer kits that give you a complete idea of the many applications for each of our knob sizes. Each kit contains one of every item relating to that size knob.

Description	Part Number
10 mm Knob Designer Kit	070-1000
14.5 mm Knob Designer Kit	070-1450
21 mm Knob Designer Kit	070-2100
28 mm Knob Designer Kit	070-2800
36 mm Knob Designer Kit	070-3600

WHEN THE CHIPS ARE DOWN...

THE NEW 1977 ICMASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

RATIO DRIVES FOR FINE INSTRUMENT AND MACHINE CONTROLS

BALL BEARING TYPES — Compact, Durable, Exceptionally Smooth Action

These unique ratio drives employ precision ball bearings. Used for rotary control of components in instruments, they provide unexcelled smooth motion. Ruggedly built, permanently sealed and lubricated, JAN Ratio Drives accommodate applications where miniaturization is essential.

Input and output snafts of these units operate in the SAME DIRECTION. Type "RDL" provides "in-line" input-output shafts. Type "RDLC" is supplied with **concentric** shafts whereby the output envelopes the input shaft. An added feature of Type "RDLCC" is the output shaft in the rear.

Cat. No.	Ratio	A	B O.D.	 I.D.	C	D	Input Shaft E	F	Bolt-Mtg. Dia.
RDL-1	2.6:1	1	3/8	1/4	1 1/8	1 13/16	1/4	3/4	1 15/32

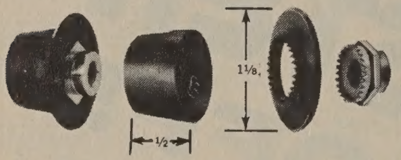
KNOB RATIO DRIVE



9 to 1 ratio (to dial skirt).
1:1 to potentiometer.

Cat. No. KRD-11
(Plain Gripping Surface)

Cat. No. KRD-12
(Knurled Gripping Surface)

Exploded view shows engineered miniature gear system, to permit precise, fine tuning of controls. As shown, 9 to 1 ratio (to dial skirt). 1:1 to potentiometer. Other ratios designed to specifications.

Brass gears; black anodized aluminum knob and dial. Available with knurled or non-knurled outside knob. Available for 1/8" shafts. 1/4" on special order.

Now! Corrosion Resistant!

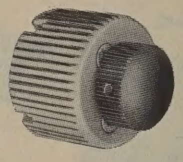
Variations Available to Customers Specifications

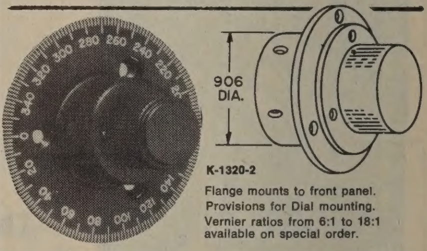
For smooth rotary control of components requiring Vernier adjustments. Suitable for use where panel space is at a premium. Durable, ruggedized ball bearing mechanism.

MACROVERNIER CONTROL KNOBS



K-1320-1

Macroposition—
1" Dia. Knob; Ratio 1:1
Vernier Position—
5/8" Dia. Knob; Ratio 10:1
Vernier ratios from 6:1 up to 18:1 available on special order.
Torque capacity factory adjusted in increments up to 6 lb.-in.



K-1320-2

Flange mounts to front panel.
Provisions for Dial mounting.
Vernier ratios from 6:1 to 18:1 available on special order.

RIGHT ANGLE RATIO DRIVES — Versatile, Miniaturized, Right Angle Rotary Controls

Featuring dual output stainless steel shafts at right angles to input, these engineered drives provide ideal type instrument control. Available with matched bevel worm gears covering a wide range of ratios.

JAN's Right Angle Drives are especially useful for handling spring or gravity-loaded components since the output shaft automatically locks in any desired position yet remains free for smooth adjustment by the input shaft. Assembled in dust-proof housings, the gears are permanently pinned in place on stainless-steel shafts mounted in oilite bearings and held under constant pressure.

LIMIT STOP COMPONENTS

Designers can now consider the limit stop as a component to design with, such as potentiometers, capacitors, or other standard units. The simplicity of adjustment and the large number of available turns enables the stop range to be set with extreme precision. Conveniently located dual locking screws maintain settings under all conditions of shock and vibration.

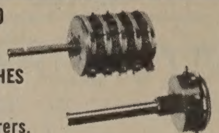
POTENTIOMETERS / PRECISION WIRE WOUND



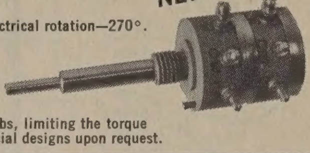
• LINEAR AND NON-LINEAR • SINGLE AND MULTI-TURN
• PENDULUM OPERATED • SECTORS AND GYRO PICKOFFS • SWITCHES

Reliable, competitively priced wire-wound potentiometers for commercial, industrial and military electronic equipment manufacturers.

- **EXCELLENT LINEARITY:** 0.03% available in single turn 5″ diameter unit.
- **LONG LIFE:** Over two million revolutions with base metal windings.
- **WIDE TEMPERATURE RANGE:** Available for operation from −55°C to +125°C.
- **MAXIMUM STORAGE LIFE:** Platinum alloy winding also insures low noise level.
- **RELIABILITY:** Welded taps for better mechanical and electrical connections.
- **HIGH RESOLUTION:** Wire as fine as 0.0003″ diameter can be used.
- **CUSTOM DESIGNS:** Fast prototype delivery on special linear or non-linear units.
- **PRECISION CONSTRUCTION:** Anodized aluminum housings and polished steel shafts.
- **ACCURATE FUNCTIONS:** Welded taps to a single turn of wire eliminates shorted sections of winding at intermediate taps.
- **RUGGEDNESS:** Meets all applicable MIL Specs.
- **LOW NOISE** Maintained over long life and extreme environments by unique wiper designs compatible with winding configurations.

RESISTOR, VARIABLE. Single and Dual gang.

NEW!



Conforms to MIL-R-12934. Resistance values as required. Linear design.
Power: 1 watt continuously, up to 70°C.; Mechanical rotation—300°; Electrical rotation—270°.
Noise level less than 1% of total resistance.
Operating torque: 4.0 to 6.0 oz. in., detent where specified.
Detent torque: 5 oz. in. above operating torque, or 6.0 to 14.0 oz. in. including unit operating torque.
Min. rotational life: 25,000 cycles. Operating Temp.: —65°C to 150°C.
Clutch Knobs: These potentiometers must be adjusted solely by clutch knobs, limiting the torque exerted on shafts beyond their rotational limits. See Jan catalog. Special designs upon request.

HI-VOLTAGE INSULATED COUPLINGS U.S. PATENT NO. 2,681,387

MEETS MILITARY SPECIFICATIONS — TEMPERATURE - HUMIDITY - SHOCK - VIBRATION - FUNGUS

HI-VOLTAGE INSULATED COUPLINGS

15 KV Breakdown — 10 inch pounds torque
Series No. AK-5079 and No. AK-5164

Engineered with stainless steel shaft and precision, screwdriver tip molded-integrally with Diallyl Phthalate Material in accordance with Military Specifications. Completely shock, vibration and fungus proof, they operate with ease over an ambient temperature range of −75°C to +175°C. Supplied complete with nickel plated mounting hardware.

Stainless steel screwdriver tip fits all standard slotted shafts (potentiometer, etc.) without need for further machining. Ideally suited to adjust high voltage controls thus protecting operating personnel against danger. They are also used to reduce ground capacitance on other types of sensitive instrument controls.

For Commercial Instrument Applications . . .
These couplings are available in general purpose Black Bakelite.
Cat. No. 6164-(X or B)-( ) For Standard Type
Cat. No. 6079-(X or B)-( ) with Locking Type Bushing.
Dimensions are identical with 5000 Series, in chart below.

STANDARD TYPE

Cat. No.	Dimensions in Inches			
	"A"	"B"	Shaft	"C"
AK-5164-X-1	3/8	3/16	Slotted	5/16

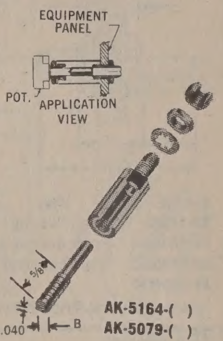
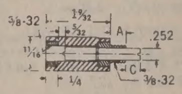
AK-5079-B-2	9/16	1/16	Slotted	9/32

Note: (3/16″) to be used with 1/8″ long shaft.
(1/16″) to be used with 1/4″ long shaft.



AK-5164-( )
AK-5079-( )



HI-VOLTAGE INSULATED COUPLINGS FOR 1/8″ SHAFTS

Cycalac material. Voltage rating: 6000 VDC.
Hubs — Brass, Nickel Plated; Shafts — St. Steel.
*Insert letter "S" or "N" followed by first two numbers of decimal equivalent, for fractional length of shaft beyond bushing.
"S" = with slot. "N" = no slot.

Typical Part Number: AK-2164-N31 =
5/16″ long shaft beyond bushing (standard), no slot. If length is 1″ use "X".

Typical Part Number: AK-2164-SX =
1″ long shaft beyond bushing, slotted.
If length exceeds 1″, use "X" and decimal equivalent for balance of number.

Typical Part Number: AK-2164-NX31 =
1 5/16″ long shaft beyond bushing, no slot.

AP-1538-4	1/4	1/2	27/64	1 7/64±1/32

Cat. No. AP-1530 and AP-1538

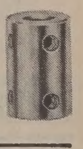
A unique series of shaft couplers that accommodate either similar or dissimilar 1/8″, 3/16″ or 1/4″ shafts. Permits offset misalignment to 1/16″ and 5° angle. Operates free of backlash. Self-extinguishing low water absorption characteristic plastic insulator between precision cast aluminum hubs. Each hub has 2 set screws for firm attachment. Alodine finish.

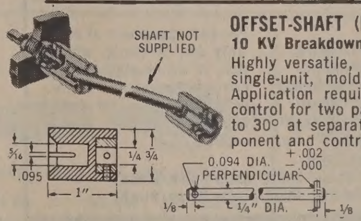
1/4″ SHAFT COUPLING EXTENDER

Cat. No. AP-1010
Nickel plated brass with 2 set screws for firm attachment to shaft. 1/2″ O.D.; 1 3/4″ overall length.
Cat. No. AP-1321
Same as above, except extends 1/4″ shaft to 1/8″ overall length 2 1/2″.

SHAFT COUPLING

Cat. No. AP-15150
A rugged, nickel plated brass coupling for joining two 1/4″ shafts. Supplied with 4 set screws for firm attachment to shafts.
Cat. No. AP-15151
Same as above, 2 set screws.





OFFSET-SHAFT (INSULATED) COUPLINGS

10 KV Breakdown ±30° Offset Cat. No. AP-15299

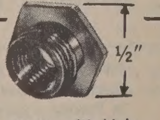
Highly versatile, durable, insulated couplings made with single-unit, molded Nylon-to-metal insert construction. Application requires two couplings — permits smooth control for two parallel shafts offset from each other up to 30° at separations greater than 3″. Secured to component and control shafts by 2 set screws.

Note: Coupling is accomplished with a 1/4″ shaft of any length (not furnished). Coupling shaft keyed to coupler by steel drive pins supplied.

AK5610
INSULATED
COUPLING

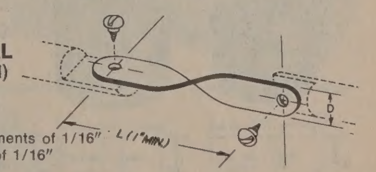
For 1/4″ shaft. Permits linear and angular misalignment up to .005″ and/or 10°
Breakdown voltage 3KV
3/4″ dia. x 5/8″ overall length.

REDUCER
INSERT
BUSHING
Cat. No.
AK771



Used as an adapter with high voltage insulated couplings to accommodate miniature (1/8″ shaft) potentiometers. External thread 3/8x32. Internal thread 1/4x32.

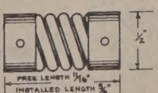
UNITWIST JAN UNIVERSAL
(shoulder screws supplied)



Specify:
1. Torque Requirement
2. Shaft Diameters (D) in increments of 1/16″
3. Distance "L" in increments of 1/16″

NEW!

SHAFT COUPLING
Cat. No. AP 1441-( )



Accommodates either similar or dissimilar 1/8″, 3/16″, or 1/4″ shafts, round or "D" flatted. Torque capacity 12 to 16 oz. in. Other drive torques and sizes available on request.

—(2) 1/8″ shaft	—(B) 1/8″ D flatted
—(3) 3/16″ shaft	—(D) 1/4″ D flatted
—(4) 1/4″ shaft	

Typical Part Nos.
AP1441-24 couples 1/8″ shaft to 1/4″ shaft.
AP1441-2D couples 1/8″ shaft to 1/4″ D flatted.

JACK COVERS (TRIMMER COVERS)

These sturdy Jack Covers fit jack or panel bushings and are used to keep out dust and moisture as well as to prevent inadvertent disturbance of control settings. Outer surfaces are finished in standard colors of baked enamel.

To Order Colors Specify:
(-1) Black Wrinkle; (-2) Smooth Gray; (-3) Smooth Olive; (-4) Smooth Black. Other colors on request.

Example: Jack cover, color black wrinkle, order as J-1301 (-1)

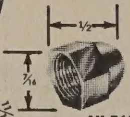
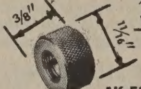
AK-5106



AK-5107



AK-5108

For ⅛″ thread, specify AK5109.
(¼-28 thd. ⁷⁄₃₂″ long. x ⁵⁄₁₆″ dia.)

PANEL BEARING AND SHAFT ASSEMBLIES

Cat. No. AP-15350 Series

Used for rotary control of components. Passivated stainless steel shaft is ¼″ dia. with one end flattened for attaching to knob control by set screws. Supplied completely assembled with two retaining rings, jam nut with lock washer and nickel plated, brass panel bearing. Fits panels up to ³⁄₁₆″ thick; mounts in ¹³⁄₃₂″ dia. hole.

Thread	"C" Dia.
¼-28	.127
⅜-32	.252

Can be made to order with special nylon bearings.

NEW ITEMS! SHAFT LOCKS

One-piece; fits standard ⅜″-32 thread of shaft bushing. Friction grip holds ¼″ shaft to prevent accidental or vibrational disturbance of control settings. Adjustment for semi-permanent locking, provided. Also avail. for ⅛″ shafts.

AK-1048
Metal with plastic insert.

AK-1049
All plastic.
(Do not exceed 5 lb./in. torque to tighten).

AK-1050
Plastic with metal insert.

SHAFT KNOB LOCK

Cat. No.
AK-1057-2 (*) (⅛″ shaft)
AK-1057-4 (*) ¼″ shaft)
(Used with 71 Series Knob)
AK-1059-4 (*) (¼″ shaft)
(Used with 91 Series Knob)
*Specify "M" or "G" for matte or glossy finish.

Prevents movement of controls due to shock, vibration, or accidental manual contact. Available in matte or glossy finish, for commercial or military applications.

Typical Part Numbers: AK-1057-2MA = For ⅛″ Shaft/matte finish/Black
AK-1059-4GA = For ¼″ Shaft/glossy finish/Black

BUSHING EXTENDERS
Cat. No. AK-5075-1 thru AK-5075-11

Permit staggered mounting of components having ¼″ shafts, behind a panel. Useful in meeting problems of space economy. Supplied in nickel plated brass.

Note:
Extender AK-5075-9 is a locking (collet) type and is supplied by JAN with lock nut.

CHASSIS AND CABINET BUMPERS

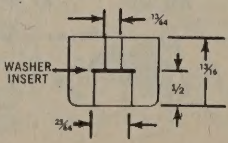
Durable, low-friction polyethylene. Guards against scuffing. Supplied in either black or russet brown, with recessed hole for screw or bolt usage.

To Order Colors: Black, specify (4); Brown, specify (7). Other colors on request.

AK-574 also available in white nylon; thru hole .187 dia., C bore ⅜″. Specify No. AK-577-8

NO. AK-576-4 HEAVY DUTY CHASSIS AND CABINET BUMPER
(WITH STEEL WASHER INSERT)

Molded neoprene. 1″ diameter, ¹³⁄₁₆″ high. Configuration similar to AK-574 above. Color: Black. Other colors on request.



GROUND STUDS Multi-termination ground lugs.

Electrically Sound ● Easily Installed ● Space Saving

- Provides equipotential chassis termination for ground leads.
- Minimizes resistance between circuit contacts and ground point.
- Diminishes noise, pick-up and regenerative feedback.
- Eliminates the need for buss bars or stacks of lugs.
- Can be use as "Floating Ground" with proper insulation.

NEW! FIBRE CASES —

A complete range of lightweight, high impact vulcanized Fibre Cases. Built for maximum strength and durability. Steel corners, clamps and hinges. Comfortable handles. Straps of extra heavy webbing. Water repellant finish. Ideal for motion picture film, tapes, tool cases, sample cases, electronic equipment, etc. Wide range of styles available. Special cases made to order.

JOLTA SHOCK TEST MACHINES

For Reproducible Impact-Shock Test Pulses

Four Models Engineered to Reproduce the Entire Spectrum of All Significant Impact Shock Waves

Designed for laboratory and production testing of light to medium weight components as well as complete instrumentation. Produced to meet practically all requirements of common Mil. Spec. qualification tests. Each JOLTA is electronically calibrated to certify compliance with test specifications.

JOLTA Bench Model No. 1001 — Produced to meet JAN-S-44 and Mil-Std. 202 (202A). Standard model range 30-120G. Accessory plate springs available for test pulses to 500 G.

JOLTA Bench Model No. M-500 — Produced to meet Mil-T-12679A (Sig. C) and Mil-T-19500A. Standard model range — 200 to 1000 G at 1.0 millisecs. Alternate anvil and pad kits available to order.

JOLTA Floor Model Nos. F-3003-C1, C2, C3 — Designed for high impact shock testing for small and moderate-sized components. Precision-machined magnesium casting utilized for higher shock amplitudes. Typical tests with these units 50 to 5000 G at .2 to 11.0 millisecs. For high impact testing, accessory springs and twin anvil combinations yield impulses of 0.2 millisecs to 5000 G.

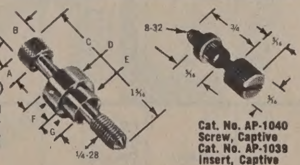
CAPTIVE SCREW AND NUT ASSEMBLY

No. CS-711-(1)
No. CS-711-(2) (screw only)

Consists of slotted, knurled thumb screws made of corrosion resistant steel bar, and nickel-plated (on brass) panel inserts.



Cat. No. AP-1040
Screw, Captive
Cat. No. AP-1039
Insert, Captive

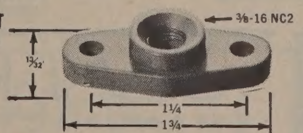
—2	¼	29/64	1 7/16	9/16	13/32	5/16	⅜	8-32

Cat. No. AP-1197
Screw, Captive
1/16" slotted knurled head (7/16" O.D.)
1¼" overall length; 8-32 thread.

RETAINER NUT
Cat. No. R-1030



Used in conjunction with captive screw and nut assemblies. Die casting. Can be painted. Other thread sizes available upon special order.

SHIELDS

JAN's Magnetic Shields are made of MU-Metal or equal and are hydrogen annealed by a special process to assure optimum orientation of the molecular structure of the alloy for best magnetic shielding. JAN's Magnetic Shields prevent distortion and intensify modulation of the electron beam due to stray magnetic fields. In addition, the use of these shields protect personnel against the dangers of accidental tube breakage. Mounting holes are tapped for No. 6-32 screws as shown. These shields are designed to fit JAN's standard bezels as listed below. See following page for specifications on JAN's Bezel Assemblies.

BEZELS

JAN's Bezels enhance the appearance of the instruments on which they are used. These units are functionally designed to provide OPTIMUM UTILIZATION OF THE C.R.T. SCREEN, as well as safety against tube breakage and danger to operating personnel.

JAN Bezel Assemblies are supplied with **a bezel, calibrated graticule,** (where applicable) **light filter** and **C.R.T. cushion.** Bezels are finished in a smooth dull black non-reflecting surface. These units fit JAN Mu-Metal Shields.

Edge-lit Bezels (E.L.B.A.)**

These Bezels are designed to provide edge lighting of the engraved scale-calibrated graticule by means of pilot lights.

Camera Mount Bezel

These units provide an integral cast mounting flange that fits all standard 3″, 5″ and 7″ C.R.T. cameras.

DISTINCTIVE FEATURES

- Engineered for 2″, 3″, 4″, 5″, 7″, 8″, 10″ C.R.T.
- Maximum display area
- Precision engraved, scale-calibrated graticules; standard or to customer's specifications
- Materials and finish to "Mil Spec"
- Heavy buna-S shock cushion
- Models for edge-lighting
- Phosphor-matched light filters
- Non-reflecting matte surfaces
- Rugged camera mounts
- Models for curved and flat-faced C.R.T.

*To Order Specify: (1) frame only; (2) frame with clear window; (3) frame with clear window scribed with a center line.

JAN's molded, black, shock-resistant plastic escutcheons are available in an exceptionally wide variety of different types and sizes. They provide a pleasing window to frame dial plates mounted behind the panel.

Plastic escutcheons are available in the following ways: frame only; frame with clear windows; frame with clear window scribed with a center line.

For especially large working areas, stamped aluminum escutcheons, finished in dull black are available to meet the needs for space economy. Withstands temp. shock −65°C to +80°C. NON INFLAMMABLE.

VIEWING HOODS

Cat. No. H-465
AND/OR ADAPTER

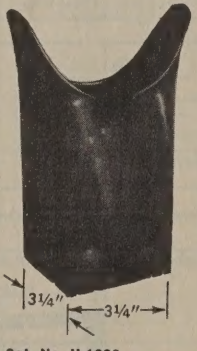
Can be used as viewing hood, on 2¾″ dia. bezels. (#1427; 1428; 1429). Also serves as adapter to permit use of face-fitting neoprene rubber viewing hoods (see above). All aluminum. Has dull black enamel finish.

Cat. No. H-689-1
(5⅝″ I.D.)

Black neoprene rubber, contour-molded, fits the shape of face. Keeps out ambient light when viewing scope.

Used with following Jan Bezels: 19636; 19495; 13584; 1465.

No. H-689-2 (4⅞″ I.D.)
Used with JAN Bezel #545

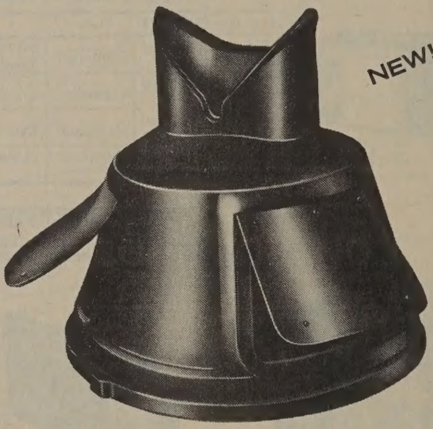


Cat. No. H-1008
TO FIT RECTANGULAR BEZELS

Black, contour molded neoprene rubber. Keeps ambient light out, when viewing scope. Fits shape of face. Can be adapted for smaller I.D.'s.

Can be used with JAN Bezel CP-1328P. Can be adapted for #1533-P

NEW!



Cat. No. H-1063

Black, contour molded neoprene rubber. Keeps ambient light out, when viewing scope. Fits shape of face. Flanges provided for hand access to PPI settings.

Cat. No. H-1361

Black neoprene rubber, contour-molded, fits the shape of face. Keeps out ambient light when viewing scope.

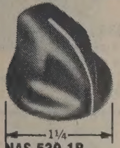
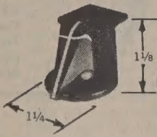
KNOBS

TRANSILLUMINATED POINTER KNOBS

K1430
For 1/8″ or 1/4″ shaft.
One set screw.
5/8″ high x 3/4″ dia.
Plastic w/metal insert.
Can be backlited.



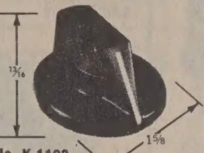
NAS 539-1B
NAS 539-1C
Similar knob also available with 1½″ dia.
Order No. 00278



USAF 61D 404 74
Cat. No. K-977

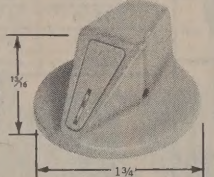
MS25165-1

MS91528

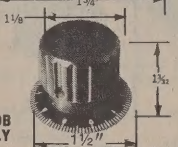


Cat. No. K-1103

Precision molded of JAN's transparent plastic material, to NAS specs, with dull finish. Transilluminated pointers permit easy reading under subdued lighting conditions. For use on instrument panels, switchboards electrical and electronic apparatus.



Cat. No. LM
USED ON LUNAR MODULES!
Precision aluminum casting. Adaptable for back lighting. With slip clutch features similar to K1375.

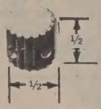


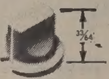
Cat. No. K-936-5
Black phenolic molded knob, with beveled aluminum skirt, black with white contrasting markings. Accurately centered brass insert, for 5/16″ shafts.
Cat. No. K-936-4
(1/4″ shaft)
Variations on shaft sizes and markings available in production quantities.

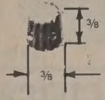
KNOB ONLY
Cat. No. K-929-5 (5/16″ shaft)
Same as above, less skirt.
Cat. No. K-929-4 (1/4″ shaft)

MINIATURE KNOBS

PLASTIC





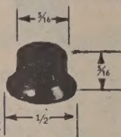


K-101295(   )
-1 w/white dot
-2 plain
For 1/8″ flatted shaft.
Can also be supplied with 1/8″ round shafts.

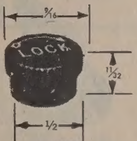
K-101294(   )
-1 11/16″ skirt dia.
-2 3/4″ skirt dia.

K-101297

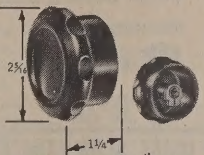
METAL



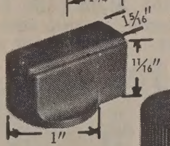
BK-1080
1/8″ flatted shaft



AK-1326
For 1/4″ shaft



TUNING KNOB
Cat. No. K-243
For 5/16″ shaft. Die cast aluminum. Made to Fed. Spec. QQ-A-591 and MIL-F-14072. Use no-mar clamp Cat. No. 937-8 for mounting (not supplied).



BAR KNOB For 1/4″ shaft
Cat. No. K-783
Phenolic molded knob, with metal insert. Set screw at back, for shaft attachment. Finished to specifications.
Two #3-48 tapped holes on bottom.

K1329
Knurled edge for easy turning. Twin set screws. 23/32″ high x 5/8″ dia. Available with & w/o marking.

K1428
For 1/8″ or 1/4″ shaft.
Twin set screws. 5/8″ high x 3/4″ dia. Plastic with brass insert. With or without backliting.
Can be supplied with backlited indicator line.

STANDARD PLASTIC KNOBS

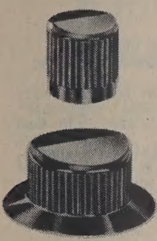
SAFETY KNOBS



"PRESS-TO-TURN" KNOBS

FOR LOW TORQUE APPLICATIONS

Knobs spin freely . . . and **Must Be Pressed-In** while making changes. Developed specifically to prevent inadvertent changing of settings. For basic dimensions, see our "Deluxe Instrument Knobs" (9, 12, 17 and 22 body dia. series). When ordering, be sure to substitute prefix "T" for 9 Series and "Q" for 17 Series, as per typical part numbers.

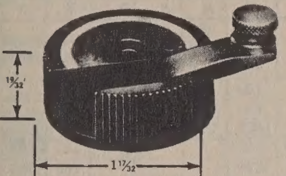
TIC4GA = .90 Dia./Press-to-Turn/Round/Dial/¼″/Glossy/Black

PRESS TO TURN

NEW!

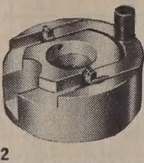
K1435
For ¼″ shaft.
One set screw.
⅞″ high x 1$\frac{1}{32}$″ dia.
Plastic with metal insert. Backlited line and arrow.

Cat. No. MS-91522-1 CRANK KNOB Retractable Spinner



Aluminum Olive Drab. For ¼″ shaft. Other colors and shaft diameters on request. 2⅝″ minimum clearance required with handle in open position.

NEW!



Cat. No. K1622
Retractable Spinner CRANK KNOB

Modified version to replace MS91522. Incorporates brake mechanism to lock control in position.

SLIP-CLUTCH KNOB with Spinners

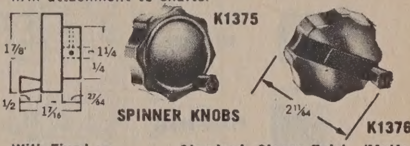
Cat. Nos. K-1375 & K-1376 (For ¼″ Shafts)

For driving devices such as variable capacitors, inductors, potentiometers, etc., the "slip-clutch"* automatically disengages and slips when the pre-determined torque has been exceeded. Knobs are fluted, and are equipped with either fixed or retractable spinner for fast turning. Backlash-free units safeguard delicate and costly instruments against careless or inadvertent cranking beyond their normal stops.

*Normally set for 3-6″ lbs. Can be modified for other requirements.

Model No. K-1376 is identical with No. K-1375 but has the additional feature of a retractable spinner. Spring loading provides positive, toggle-type action to lock spinner in either open or closed position. Model No. K-1376 is designed for use where economy of space is essential.

Cat. Nos. K-1275 & 1276 (For ¼″ shafts)
In appearance, these knobs are identical with No. K-1375 and No. K-1376 but without JAN's Slip-Clutch mechanism. Made with single-unit, molded Bakelite-to-metal-insert construction, with two set screws for firm attachment to shafts.

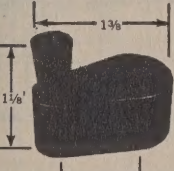


SPINNER KNOBS

With Fixed or Retractable Spinners

Standard: Glossy finish. (Matte finish avail. on special order)

Cat. No. K-1125
SPINNER KNOB
For Limited Space Applications



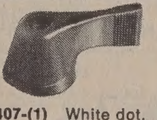
For ¼″ shaft.

Other shaft diameters on request.

Cat. No. K1358
MINIATURE SPINNER KNOB
Nylon. $\frac{19}{32}$″ High x ¾″ Wide. Spinner section diameter ⅜″. Accepts ⅛″ shaft or smaller.

Straight knurl aluminum knob. Twin set screws. For ¼″ shaft. Other sizes available. 1⅜″ dia. skirt, tapers to 1″ dia. at top. Height, 1″ Std. Torque 1 to 3 in/lbs. Available from ½ in/oz. to 48 in./oz.

Cat. No. K1357 CLUTCH KNOBS



K1408 Fits shaft $\frac{5}{16}$″ rd. x $\frac{13}{64}$″ flat. 1$\frac{29}{32}$″ long x 1$\frac{13}{16}$″ high.

K1407-(1) White dot. $\frac{9}{16}$″ high x $\frac{23}{64}$″ O.D. Shaft hole dia. .083 with .48 flat. Screwdriver slot on top.

K1407-(2) Same as above but only ½″ high, and Shaft hole dia. ⅛″ with .083 flat.

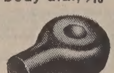
PULL TO CAGE

K1409 For $\frac{3}{16}$″ shaft. 1 set screw and 1 spot-drill hole for pinning. $\frac{11}{16}$″ high, ¾″ head dia., $\frac{7}{16}$″ shank dia. Can be supplied without marking.

K1327 For ¼″ shaft. Twin set screws. 1″ high x $\frac{11}{16}$″ body diameter. 1⅜″ overall width.

K1337 Shaft hole .260. Twin set screws. 1⅛″ long x ⅜″ high x ½″ body diameter.

K1342 Knob switch. For ¼″ D flatted shaft. 1½″ long x $\frac{7}{16}$″ high. 1″ body dia., $\frac{7}{16}$″ bar dia.

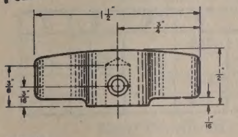


BAR-KNOB
Cat. No. K-1325

Precision cast aluminum for ¼″ shafts. Furnished with twin 8-32 set screws for shaft attachment. Provides a 1.0″ integrally cast lever arm for heavy-load switching. Finished to specifications.

51A30C82
Aluminum cast bar knob for high torque applications.

NEW!



K1431
For $\frac{7}{32}$″ shaft. ½″ x 1½″ wide.
Aluminum casting.
Must be pinned to shaft.

K1387 For $\frac{5}{32}$″ shaft hole. Twin set screws. ¼″ high x $\frac{23}{32}$″ diameter. Aluminum die-cast.

K1389 For ¼″ shaft. Twin set screws. $\frac{27}{32}$″ high x $\frac{15}{16}$″ diameter. Aluminum die-cast.

K1390 For $\frac{9}{64}$″ shaft. Two set screws. $\frac{11}{16}$″ high x $\frac{9}{16}$″ diameter. Aluminum die-cast.

K1391 For ⅛″ shaft. Twin set screws. $\frac{43}{64}$″ high x ⅝″ diameter. Aluminum die-cast, with white-filled line.

K1392 For $\frac{3}{16}$″ shaft. Two set screws. $\frac{25}{32}$″ high x $\frac{11}{16}$″ diameter. (Bar is $\frac{13}{16}$″ long). Aluminum die-cast.

K1394 For ⅛″ shaft. Two set screws. ⅞″ high x ½″ diameter. Aluminum die-cast.

DELUXE INSTRUMENT KNOBS

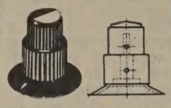
MEETS PERFORMANCE OF MIL-STD-242D (SHIPS) & MS 91528D

Molded of polycarbonate, these knobs will withstand the extreme environmental conditions of MIL-E-16400. **QPL #3926 — T.R. #J101**

TACTILE SHAPE CONTROL CAPS

Expressly made for both visual and tactile function identification. Each Tactile Knob is produced in the standard recognizable color identified with its configuration. Available in other colors on special order. See column below for applicable tactile shape.

Dual Knobs for Concentric Controls
APPROVED FOR USE MIL-STD-242D & MS-91528C



Molded of polycarbonate plastic, these "piggy-back" knobs are used with dual concentric potentiometers and in other similar applications. Meet performance of military specs above. See diagrams below for dimensions of each knob.

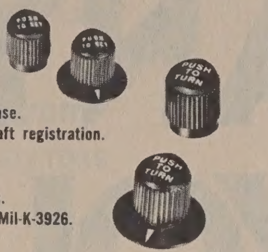
JANSET® KNOBS

U.S. Patent #4,012,966.
other Patents Pending

"PUSH-TO-SET" or "PUSH-TO-TURN"



JANSET® Knobs are precision engineered and are completely integral with its mechanism totally enclosed within the knob body configuration. They protect control settings against accidental change due to shock or vibration. Only when they are depressed can the setting be altered. The knob provides infinite resolution with zero backlash such that registration to indicators (illuminated arrow, dot, cutouts etc.) is maintained throughout a full excursion. To use for existing or new designs JANSET® KNOBS REQUIRE NO MODIFICATION TO PANEL DESIGN.

Available from ½″ to 2¼″ diameters with ring or dial skirts; with or without indicator markings. Fits all ¼″ or ⅜″ panel bushing and ⅛″ thru ¼″ shafts. (Except ½″ diameter knob which is not available for use with ¼″ shaft.)

Distinctive Features

- Knob locks automatically upon release.
- Infinite resolution with absolute shaft registration.
- Guards critical settings.
- Completely integral assembly.
- Installation same as standard knobs.
- Configuration meets MS-91528 and Mil-K-3926.

FOR TACTILE SHAPE CONTROL CAPS, SEE INFORMATION ON PRECEDING PAGE.

"PUSH-TO-SET" with Overriding Clutch.

Knob can be rotated (if not pushed in) without changing shaft settings.
To specify, use part number system shown above, except use prefix PSC, PTC & PNC.
For use with other than standard top, use prefix PSCO and then specify as above.

INCREMENTAL KNOBS.

Knob locks automatically at exact point, with zero backlash. Easily provide precise setting to pre-determined positions. Equipment can now be tuned repeatedly with finite exactness to as many as 32 or as few as a single specific position.

(11) TOTAL ANGULAR ROTATION IN DEGREES AND MINUTES
SPECIFY 0° to 360°

FOR SPECIAL KNOBS — GIVE FULL DESCRIPTION OR SKETCH WITH ORDER.

TYPICAL PART NUMBERS
IIB4MA/WD [17E 180°] = Std. Top/.90 Dia./Round/Plain/.253 Dia. Shaft Hole/Matte/Black/White Dot/17 Incremental Positions/Equally Spaced, in 180° Rotation.
MLL1C4GB [5N 300°] = Alum. Anodized Top/1.25 Dia./Round/Dial with Pointer/.253 Dia. Shaft Hole/Glossy/Red/5 Incremental Positions/ Unequally Spaced, in 300° Rotation (See Table).

New Products!

Spin free push-to-engage knob with skirt registration.
Recommended where component shaft torque exceeds 4 oz.-in.
To specify, use prefix PTN.

Spin free push-to-engage knob with shaft friction clutch and skirt registration.
Recommended where component shaft torque is less than 4 oz.-in. and/or where minor excursions of shock and vibration are anticipated.
To specify, use prefix PTCN.

Torque knob, with shaft friction clutch.
Recommended where positive feel is desired and/or where minor excursions of shock and vibration are anticipated. *To specify, use prefix TC.*

Pull to lock knob.
Similar to push to turn series except knob must be pulled back to lock shaft. Available for spinner type knobs. *To specify, use prefix PL.*

Limit stop knob.
Up to 10 turn stops are available within the knob body, accurate within 5°. Available with or without overriding clutch. Specify/suffix (required angle 0-3600°) Precision stops available on request. *To specify, use prefix LS, LSC.*

Slip clutch knob.
Knob driving torque in detented position, 0.7 min. to 1.5 max. lb.-in. Four detented positions in 360°; functions as standard knob between limit stops. When limit stop has been reached and knob rotation continues in same direction, clutch mechanism overrides the stop without applying torque to shaft in excess of that specified.

***A note to our Customers:** If you cannot afford the space behind the panel, we can provide the function within the knob body.*

MATERIAL

With the exception of the transparent figure dials, all mouldings of the collet knob range are produced from polyamide. The transparent dials are made of luran.

Brass 58 is used for the collets, sleeves and nuts, while steel is used for the screws and washers.

TEMPERATURE STABILITY

With normal mechanical stresses: −20°C to +70°C.

For further information please contact our closest distributor, representative or RCL direct. We can also provide special types of knobs and accessories and custom color matching at the lowest price, with fastest delivery.

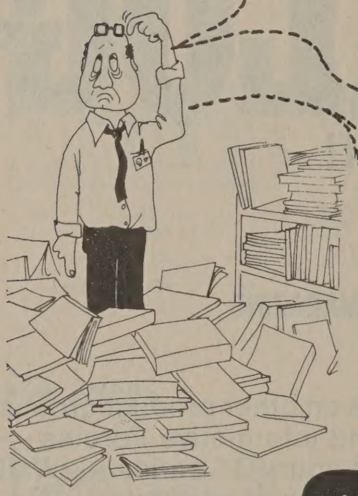
What can I use to keep all the manufacturers' product data I receive in order?

What system makes filing or retrieving manufacturers' catalogs fast and easy?

Which file system have thousands of engineers purchased because they know it works?



eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530

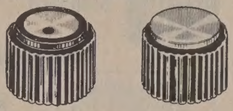
STANDARD SERIES

Raytheon Standard Series Control Knobs feature top quality and lend distinctive customer appeal to your products. All knobs have a common motif, resulting in uniform appearance regardless of function. Standard Series includes hundreds of knobs in many functional shapes, sizes and colors meeting MIL-K-3926 and MS91528. All are molded from high-impact polycarbonate with corrosion-resistant aluminum inserts for maximum strength.

DESIGNER SERIES

Give your product a fine, custom appearance with these Designer Series Knobs. Contrasting with the black bases, the aluminum caps, protected by baked-on epoxy coating, give a sunburst effect which is modern, aesthetically pleasing and implies quality. Knob bases are molded of high quality polycarbonate. Set screws, inserts same as for Standard Series. Colors or other modifications available on special order.

REGENCY SERIES



Regency Series Control Knobs offer the combination of fine quality and a custom appearance at a **modest cost,** with the choice of spun aluminum cupped caps (RS Series) or flat inlaid discs (RSF Series), protected by an epoxy coating. These knobs are particularly suited for use in industrial and instrumentation applications.

400 SERIES

To complement or contrast with the color and design of your products. The 400 Series Knobs are made of durable, high-impact acrylonitrite—butadiene—styrene (ABS) with a lusterless finish. All contain metal bushings and two set screws.

PANELRAMA SERIES

These knobs, molded of durable, high-impact acrylonitrite-butadiene-styrene (ABS), have a black matte finish capped with an epoxy-coated aluminum disk. All contain circular shaft metal inserts with two 6-32 UNC-3A set screws.

SELF-LOCKING

PUSH
TO
TURN

Designed for applications in which control settings must be maintained under conditions of shock and vibration. The setting can not be changed accidentally, since the knob must be depressed before movement. Zero backlash allows the operator infinite resolution of setting, yet prevents control shaft from rotating when released. Design is identical to Raytheon's standard line of control knobs, allowing uniformity of panel design when used in conjunction with other types.

FOR SPECIFICATIONS SEE PAGE 2562

ORDERING INFORMATION

Catalog numbers published here are for stocked items. For other variations, contact factory. The derivation of the catalog numbers for each series is shown below. This does not imply that all combinations are available. Mirror finish is specified on most Standard and Designer Series Catalog numbers listed. Where matte (dull) finish is specified the suffix G is added. Note 400 and Panelrama Series have a matte finish.

Raytheon knobs are available through franchised distributor. See listing of representatives in yellow pages to call for location of your nearest distributor.

Sample knobs are available for your evaluation, write Raytheon Distributor Products Operation, Fourth Ave., Burlington, Mass. 01803, Dept. EEM.

SELF-LOCKING KNOBS—Standard Series

Knob must be depressed **before** shaft can be turned. Available in two styles:

PT Series: For applications where relationship between knob rotation and shaft rotation **must** be maintained. Both knob and shaft are locked until knob is depressed.

PTE Series: For applications where knob-to-shaft relationship does not need to be maintained. Knob is free to rotate while shaft is locked until knob is depressed.

SPECIFICATIONS FOR ALL SERIES

STANDARD SERIES

A. Material and performance per MIL-K-3926
B. Dimensions per MS91528
C. Colors per FED-STD-595. Black No. 37038 (matte): 17038 (mirror). Gray No. 36231 (matt); 16231 (Mirror).
D. Moisture Resistance: 10 days, method 106 MIL-STD-202.
E. Salt Spray: 48 hours, method 101, Cond. B of MIL-STD-202.
F. Temperature: −65° to +125°C.
G. Torque: 15 pound inches with 4-40 set screws, maximum diameter ¾" 30 lb. inches with 8-32 set screw and larger diameters.
H. Set Screws: Corrosion treated steel with hex heads, cup points. Fluted socket and stainless steel types available.
J. Flammability: self extinguishing.

DESIGNER SERIES

Moisture Resistance: 10 days
Temperature: −65° to +125°C
Torque: 15 pound inches with 4-40 set screws, maximum diameter ¾", 30 lb. inches with 8-32 set screw and larger diameters.
Set Screws: Corrosion treated steel with hex heads, cup points. Fluted socket and stainless steel types available.

REGENCY SERIES

Molded parts in accordance with MIL-K-3926.
Color per FED-STD-595.
Black number 37038 (MATTE), 10738 (MIRROR).
Flammability: self extinguishing.
Set screws: per FFS200, corrosion-treated steel with hex heads and cup points.

NOTES:

Standard Series

(a) Two set screws are provided:
4-40 UNC-3A on all 50 & 70 series and all 1/8" shaft models
8-32 UNC-3A on all others
(b) Custom skirt or body marking available on special order
(c) Some sizes available from stock in gray or red. Other colors on special order
(d) Reducing bushings available to reduce 1/4" shaft to 1/8" or 3/16" (RB-100=1/8") (RB-200=3/16")

Designer Series

(a) Two set screws are provided:
4-40 UNC-3A on all 70 series and 1/8" shaft models
8-32 UNC-3A on all others

400 and Panelrama Series

(a) Two set screws are provided:
4-40 UNC-3A on all 1/8" shaft models
6-32 UNC-3A on all others

Regency Series

(a) Two set screws are provided:
4-40 UNC-3A on all 1/8" shaft models
8-32 UNC-3A on 1/4" shaft models

EXPLANATION OF CATALOG DESIGNATIONS FOR CONCENTRIC KNOBS

Concentric knobs bear a dual designation, those at the left of the slash mark describe the upper round knob (1) the series, (2) the diameter, (3) the cap marking if any. The designations to the right of the slash mark describe for the lower concentric knob (1) the diameter, (2) the type, (3) the through shaft hole size and (4) the finish of both upper and lower knobs.

Note: Two set screws are provided:
4-40 UNC-3A on all 1/8" shaft models
8-32 UNC-3A on 1/4" shaft models

CUSTOM CONTROL KNOBS

Increase the sales appeal of your equipment by coordinating its front panel design. Control Knobs don't have to be just functional "add-on" accessories; you can design your knobs to enhance the appearance of panels and instruments. Our product specialist will assist you in your design efforts by selecting the exact color, size, shape and materials to fully satisfy your requirements.

RAYTHEON

BINDING POSTS/SHAFT LOCKS

5-WAY BINDING POST

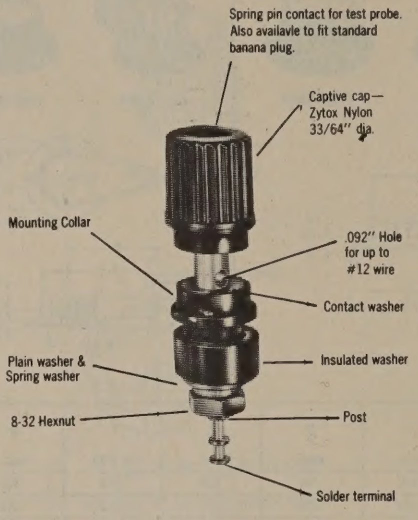
The only 5-way binding post available in two models, for plug-in of either banana plug or a standard .080″ test prod, this new unit features the exclusive Raytheon spring pin contact, providing a smooth comsistent, hard-gripping spring action. A tough nylon insulator provides complete insulation from ground.

The following types of connecitons may be made:

1. Wire looped around shaft and clamped.
2. Wire (up to #12) inserted through hole in shaft and clamped.
3. Alligator or clip lead fastened to shaft.
4. Spade lug inserted around shaft and clamped.
5. Either banana plug or .080″ test prod (depending on model used) plugged into post at the top of the fluted cap.

The solder terminal is tin plated to provide for instant soldering. A flat on one side of the nylon mounting collar permits mounting in a punched "D" hole to prevent rotation.

All metal parts are plated to withstand a 50-hour salt spray test. The unit has passed a 250-hour, 95 per cent relative humidity test at 40°C with no adverse effects.



Spring pin contact for test probe. Also availavle to fit standard banana plug.
Captive cap—Zytox Nylon 33/64″ dia.

SHAFT LOCKS

Raytheon Shaft Locks prevent control shafts from rotating under conditions of shock, vibration, or accidental contact. They form a dust and waterproof seal at the shaft and also at the panel surface. One-piece construction, they are simple, effective, and inexpensive.

The Shaft Lock's tapered nylon collar grips the control shaft tightly forming a dust and water-tight seal and exerting an even frictional drag which resists accidental rotation. A molded lip at the outer edge of the base compresses against the panel surface to complete the sealing function of the device. To adjust the control smoothly and accurately, merely insert a screwdriver and turn—no unlocking and relocking required. Tests have demonstrated no significant change in locking torque and water sealing even after 10,000 full on-full off cycles.

Shaft Locks mount directly to the threaded bushing found on most potentiometers and other variable controls. Simply discard the nuts and washers supplied with the control, slip on the Shaft Lock, and tighten with any type of standard 1/2 inch wrench. Once in place, the Shaft Lock need never be loosened—a distinct advantage over conventional two-piece metal split bushing types.

The Knob Lock, Model SL-110B, fits underneath the 90 Series knob and is completely out of sight. It is often a replacement for more expensive and complicated locking devices and provides the same high quality performance as the regular models.

SPECIFICATIONS

Nylon—MIL-M-20693
Insert—Brass per QQ-B-626 Nickel plated per QQ-N-290, Class I, Type V
Shock—50 g's
Vibration—5 hours at 10 to 55 cps with amplitude of 0.06″
Water Immersion—50 hours under 3 ft. head of water. Control shaft rotated every 10 hours.
Temperature Shock—Five cycles of 30 munutes at each extreme, −55°C and +85°C
Humidity—150 hours at 95% relative lhumidity 40°C
Life Wear—10,000 complete cycles

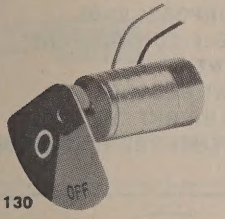
ELECTROMAGNETIC INDICATORS

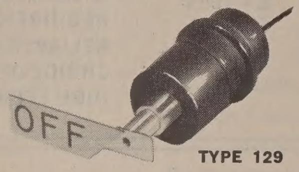
ALLARD INSTRUMENT DIV.
OF AFI

Designed for compact instrument and control panels, Allard miniature electromagnetic indicators provide positive visual signaling, are not subject to burnout, assure high readability in strong incident light. One-piece balanced rotor for dependable performance under shock and vibration. Models for momentary or latching operation, from DC or rectified AC. All models can be supplied to meet particular requirements for operating voltage, type of display and mounting, to commercial or MIL specifications.



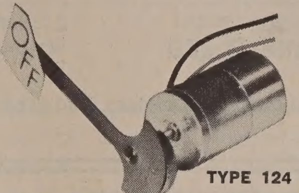
TYPE 130

Tiny indicator, totally enclosed structure. Rotation up to 60°. CW or CCW. For use with plug-on flags. Operates in any position. Case size: 7/16" O.D. x 25/32" L.



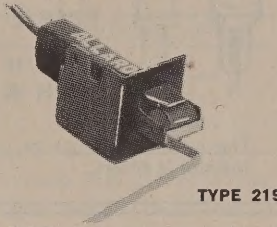
TYPE 129

Short, powerful semaphore indicator for CW or CCW rotation using demountable flag arms. Rotational anges to 60°. Works in any position. 7/16" diam. x 3/4" long.



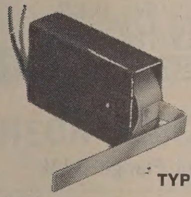
TYPE 124

Miniaturized semaphore indicator with rotation up to 60°. Available with CW or CCW rotation. For use with plug-on flags. Operates in any position. Case size: 3/8" O.D. x .575" long.



TYPE 219

Relatively inexpensive version of our highly successful instrument and panel mount indicator. Can display legends on the drum face or rotate a flag arm CW or CCW. 2 or 3 position momentary or 2 position latching operation. Indicator drum is .300" wide x .300" diam. Total length is 1⅝".

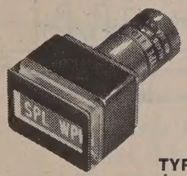


TYPE 109

2 or 3 position slim indicator for narrow locations. Can supply power to rotate a flag arm up to 60° or can display a legend directly on rotor face. CW or CCW for two position operation. .270" x .562" x 1".

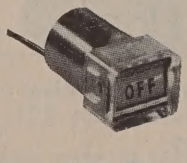
TYPE 108

Small indicator for 2- or 3-position momentary or 2-position latching (memory) indication. Prism-cut plastic lens in head can focus external light on indicator face. Colors or legends as required. 1⅛" long, 3/8" dia., 7/16" square head.



TYPE 110

Extended face indicator, permits display of complete words - or multiple symbols. For 2- or 3-position momentary, or 2-position latching indication. Plastic capped for dust and moisture protection. Length 1¾", head 1" by ¾".



TYPE 120

Tiny broad faced indicator available with 2- or 3-position momentary or 2-position latching indication. Shows colors or legends. Head is 9/16" wide by 7/16" high. Body ½" dia. Overall length 15/16".

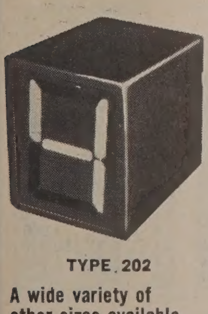
ELECTROMECHANICAL READOUTS

All units illustrated are made under one or more of the following patents:
Re 24943/3,096,594
3,273,270/3,553,619



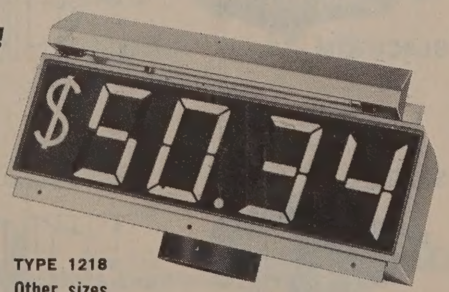
TYPE 202

A wide variety of other sizes available in single and multi-unit packages.

Compact digital indicating modules for instrument, data presentation and other display systems. Seven electromagnetic indicating segments can be operated in any desired combination by low power DC signals. Momentary or latching types. Windings available from 1 to 30 V, 1 15/16" h. x 1 7/16" w. x 2¼" d. Digit size 1½" h. x 1" w. Other digit sizes up to 4" and custom units, with as many lines as necessary, also available. Operating time less than 0.03 sec. Units also supplied with packaged encoders and decoders.

High Visibility!
Inherent Memory!

Complete readout display operating as remote repeater of cash register readings. Contains readouts, encoding matrices, pulsing and cycling circuitry and its own power supply. Use of latching (memory) type readouts makes average power consumption negligible. Packaged for all-weather, outdoor use. Uses 4 Type 218 readouts, 4" high.



TYPE 1218

Life Expectancy	>10 years	>10 years

The SP-330 and SP-350 Series Displays are designed for interfacing with MOS/LSI and are recommended for use in all dc or multiplexed applications, with or without suppressed (blanked) zeros. The displays can be quickly, easily read even in direct sunlight. Continuous, "no gap" characters make the displays most attractive to users. A keep-alive cathode provides an internal ion source that reduces reionization time to less than 30 microseconds, allows zero suppression, and improves the operation of the display in dark environments and at low temperatures. Units are horizontally stackable in any combination with uniform centerline spacing.

Viewing Distance	40 feet/12,20 meters
Life Expectancy	> 10 years

Mix-and-match versatility. Space and cost savings. That's what the new SP-252 is all about. It can be matched up with standard displays. And shows a mix of numeric and alphanumeric characters.

Specifically, the SP-252 can accommodate a set of approximately 60 characters. It can include all the letters in the alphabet, the numbers 0 to 9, plus some special symbols.

The SP-252 features a 0.55" (14.09) character height and the same character style as the Beckman SP-350 Series of numeric displays. Consequently, you can stack the SP-252 within the same series, as well as with the numeric displays, forming any desired field.

The modularity of the new SP-252 suggests a wide spectrum of applications, such as point-of-sale and terminal displays, showing status, monitoring, text and diagnostic information.

Notes:

(Apply to SP-300, SP-252, SP-101 and SP-102 Series Displays)

1. The minimum recommended supply voltage required to ionize the display is 160 volts DC. After the display has ionized, the voltage drop is approximately 135 volts at Typical cathode current.
2. Display supply voltage (including ripple) should not exceed 200 Vdc when display is used with DD-700 or decoder/driver. Higher display supply voltages are acceptable when the drive device breakdown exceeds 80 volts DC.
3. A segment currents are ratioed to b segment.

a,d,f and g Current Ratio	1.00
c Current Ratio	1.25
e Current Ratio	1.20

4. The minimum current is required for even segment glow. Currents up to 1.5 times the typical current may be used; however, life expectancy may be reduced by operation at excessively higher currents. For multiplexed (time shared) operation segment, currents may be increased to four times typical current with 0.25 or smaller duty cycle.
5. To ensure uniform operation of the two colon cathodes, it is recommended that each cathode have its own current limiting device (resistor or current sink). The current listed is the current required for each colon segment.
6. Keep-alive is recommended in all multiplexed applications. Three (3) milliseconds is maximum refresh period without keep-alive. Ten (10) milliseconds is typical with keep-alive.
7. No anode or cathode blanking is required for the display to perform properly, however, some blanking may be advantageous to eliminate time overlap of signals due to circuit characters.
8. Under specific conditions, Cathode Voltage Swings of as low as 10 volts are acceptable.
9. The combination of Cathode Bias Voltage and Cathode Voltage Swing must be within recommended display supply voltage.
10. Lighted cathodes on all digits with independent current limiting. For bussed cathodes (multiplexed operation), 90 volts is permissible.
11. Anode On Time assumes typical keep-alive current and typical anode supply voltage.
12. Specified blanking time assumes 520 μA typical segment current for the SP-330 Series and 900 μA typical segment current for the SP-350 Series with 180 Vdc supply voltage. Blanking requirements are strongly dependent upon the mode of multiplex operation and upon the segment current used.
13. The colons must have same blanking as any other cathode, and are only enabled during their respective digit times.

The SP-101 and 102 are planar, neon gas discharge displays similar to the Beckman SP-300 Series alphanumeric product family. They are intended to fill the need for display readability at distances greater than 40 feet/12 meters.

Both are recommended for either dc or multiplexed applications, with or without suppressed zeros. The displays can be quickly and easily read even in direct sunlight. Continuous, "no gap" characters made the displays most attractive to users.

A keep-alive cathode provides an internal ion source that reduces reionization time to less than 30 micro-seconds. This enhances dynamic response and improves multiplex, low temperature, and dark ambient performance. The units may be evenly or randomly spaced to build any display field desired.

The SP-101 contains a colon, and a comma and/or decimal points as shown below. The SP-102 has a plus and minus sign, decimal point and over range numeric one.

BECKMAN®

SP-400 Series Screened Image Displays

Beckman SP-400 Series Screened Image Displays let you choose the font, and the numeric style. Put together symbols, outline pictures, words, numbers in any way necessary to make your point.

Screened Image Displays offer display areas of up to 10" (254mm) by 2" (50.8mm) with characters that range from 1/4" (6,35mm) to 2" (50.8mm) in height. In other words, you're no longer limited to a certain number of digits, or even character size and style. At your direction, we will develop a display to fit your product's personality and specific requirements.

SP-400 displays can be operated Multiplexed or pulsed DC, and require, nominally, 180 Volts dc with standard drives (our own DD-700 for example). Connections can be made with flying leads, or with our edgeboard connector. The SP 421, described below, is a standard product member of the SP-400 line of custom, Screened Image Displays.

Parameters	MIN	TYP	MAX
Anode Supply Voltage(1)	—	180 Vdc	Note 2
Anode-to-Cathode Voltage Drop(1)	—	145 Vdc	—
Anode Voltage Swing	—	50 Vdc	—
Cathode Current — Segment b(3)	2.2mA	2.7mA	3.3mA
Cathode Current — AM, PM	3.8mA	4.7mA	5.7mA
Cathode Current — Colon (both dots)	2.0mA	2.4mA	3.0mA
Cathode Current — Keep Alive	50μA	100μA	200μA
Turn on Delay	—	20μs	—
Initial Ionization Time	—	—	5s
Digit On-Time (Multiplexed)	100μs	500μs	1,000μs
Operating Temperature	0° C	—	+55°C

FEATURES	SP-421
Character Hieght	1.0 inch/25,4mm
Color	Orange (Neon Glow)
Brightness	150 foot lamberts (513cd/m^2) at nominal current
Viewing Angle	130 degrees
Viewing Distance	>40 feet/12,19m
Life expectancy	>10 years

Notes:

1. Cathode current (at segment b) of 2.7mA is assumed.
2. Display supply voltage (including ripple) should not exceed 200 Vdc when display is used with DD-700 Decoder/Driver. Higher display supply voltages may be used with devices having a higher breakdown voltage provided current is limited as specified.
3. The specified minimum value of current is the lowest which will produce an even glow on the reference segment, b. Derive min/typ/max values of other segment currents in proportion to segment b values as follows: segments a, d, f and g — 1.00; segment c — 1.25; and segment e — 1.20.

The SP-421 is a planar, neon-gas-discharge 12/24 hour time display designed for use in clocks whose style demands large numerals or in applications requiring readability beyond forty feet. Characters include four one-inch digits, AM and PM annunciators and colon. The SP-421 is designed to be driven by MOS/LSI chips and is recommended for use in pulsed dc or multiplexed applications.

The SM-800 Series modules provide the user with a modularly expandable display, complete electronics, and ready-to-mount convenience. The series is available in 1-½-, 2-, 2-½-, and 3-digit configurations that can be mounted individually or as multi-digit displays. These expanded displays are achieved by horizontally stacking two or more modules together. The maximum number of digits thus attainable is theoretically unlimited since each module contains its own drive and decode electronics. The SM-855, SM-856, SM-857 and SM-858 modules are supplied with counters in addition to the decoder/drivers and the latch provided in the SM-851, SM-852, SM-853 and SM-854.

The physical design of the package allows for easy mounting of the module(s). The ease of assembly and expansion make Beckman's SM-800 Series an ideal unit for inclusion in low and medium volume display products. Character height is 0.55 inch (14,09) for all modules.

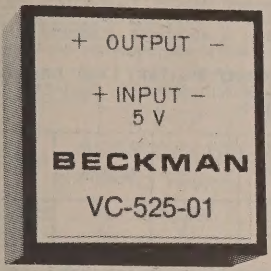
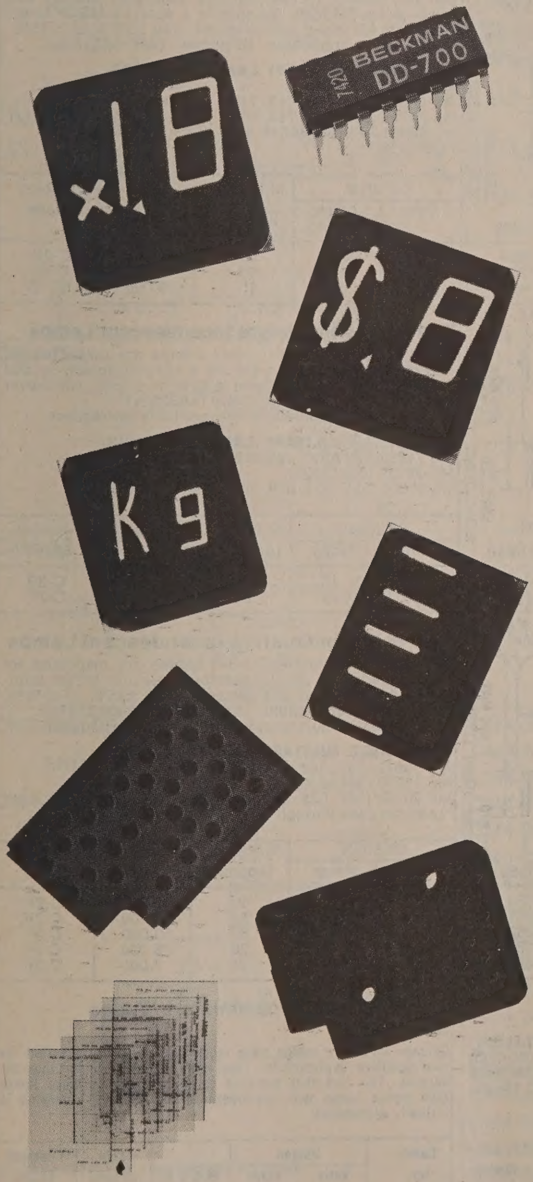
BECKMAN®

Display Accessories





Beckman provides a full line of related accessories, providing the design engineer with convenience of application and ease of implementation. These accessories include:

VC-525-01 Voltage Converters

For the display user who prefers to buy rather than build a power supply, Beckman offers economically priced dc/dc voltage converters designed specifically to operate with the Beckman Displays. These reliable voltage converters are of compact modular construction that provides an adjustable output: 170 to 210 Volts dc. 180 Volts is recommended for most dc and multiplexed applications. Unit operates from 5 Volt dc TTL/DTL logic supply.

Subassemblies

Beckman SP-300 Series Information Displays are available mounted on circuit boards. These circuit boards can be supplied in Custom configurations.

Subassemblies are available with either a lead frame or with the edge board connector. Both of these standard packages allow the user to mount the displays conveniently to a panel cutout and connect them directly into the electronic circuitry by means of standard off-the-shelf connectors. The lead frame configuration can also be connnected to the electronic circuitry by flow soldering.

Special Configurations

Beckman has the capability to design and produce displays for unique applications. Alpha readouts such as OHMS, VOLTS, AMPS, MPH, GPM and others can be combined with NUMERIC digits for special displays. You are invited to discuss your custom requirements with the local Beckman sales office.

CS-300 Connectors

Designed for use with the SP-300 Series. Units help simplify assembly; they may be attached with screws or soldered directly to a circuit board.

DD-700 Decoder/Driver with Current Regulated Outputs

This monolithic integrated circuit accepts TTL/DTL 8-4-2-1 binary coded decimal (BCD) information to direct drive the seven segment Beckman Display. A blanking input feature on the DD-700 provides unconditional blanking of all outputs while a ripple blanking feature allows suppression of unwanted leading and trailing zeros. The DD-700 has seven regulated, current programmable outputs capable of between 0.18 to 1.5 mA each. Regulation ensures constant brightness display operation under a changing supply voltage situation.

Pin Straighteners

Inexpensive pin straighteners are available for each display series. They are useful in realigning pins misaligned through handling, assuring ease of assembly.

Drafting Aids

Pin location drafting guides, Drafting Aids, are available for each display model. These handy mylar, transparent overlays provide the designer with a 4X enlargement, template like drafting guide for pin and circuit layout drawings.

T—1-3/4 (6mm) Subminiature Wedge Base Lamps

Chicago Miniature wedge base lamps are particularly suited for cost-sensitive applications. They can be designed for low-cost sockets. The fact that there is no metal base to these lamps also means lamps will not freeze in the sockets, corrosion is virtually eliminated.

6039-005-304

Chicago Miniature/Drake's high brightness LED lamps may be operated directly from low-level logic circuitry which makes them ideal for computer, numerical control, medical instruments and other sophisticated applications. Available in green, red and amber. Long life expectancy (years). Bright light can be seen from across average room. Overall size—17/64" dia.; 6" leads; other lead lengths on special order.

Mtg. hole dia. — .193"; max. panel thk. 3/16"; centers 11/32"; LED COLORS: green, red and yellow.

ELECTRICAL (25°C): Forward voltage: 2.1 VDC — Red. 2.6 VDC — Green & Yellow. Reverse voltage: 4.0 DC max. Forward current: (If) 15mA — Red. 40mA — Green & Amber. Power dissipation: 225 mw. max. Luminous intensity: Red @ 15mA=2.4 MCD. Green & Amber @ 40mA=4.5 MCD.

CM/Drake No.	Lens Dia.	Bezel Dia.	Projection	
			Front	Rear
6039-005-304	13/64"	17/64"	17/64"	13/32"

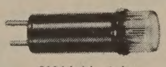
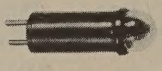
LED CARTRIDGE CM44 SERIES



CM44-11 style

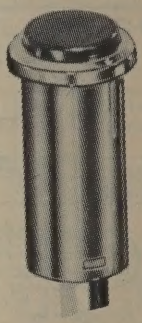


CM44-21 style

Now available, two transparent cap-styled LED cartridges, interchangeable with MIL-L-3661 cartridges operating on DC. Internal fresnel ring pattern on round or short cylindrical caps provide optimum 180° visibility for these high brightness long life LEDs. Solid state reliability and IC compatibility are advanced operating features. Built-in resistor; polarized stainless steel pins — anode is marked "A"; cathode pin is "B". LED colors: red (GaAsP type), amber and green (GaP type). Blk. anodized alum. housing; nylon insulator same size as incandescent cartridges. Standard voltages range from 1.6V to 28V; other voltages available upon request.

CM/Drake No.	DC Operating Characteristics			LED & LENS COLORS
	Rated Volts	Current mA	Operating Volts DC	
CM44-11-0021	5	20	2.5 — 7	Red
CM44-11-0123	5	20	2.5 — 7	Amber
CM44-21-0212	5	20	2.5 — 7	Green
CM44-21-0101	28	20	10 — 30	Red

"ULTRALITE"—.40" ROUND INDICATOR



FEATURES
- Unequaled brightness and spot size—up to 13 mcd with .40 in. diameter spot.
- Wide effective field of indication—up to 140°.
- Solid State—low power, long life, shock resistant, reliable.
- Push-in mounting.
- Current limiting resistors included.
- Available in red, amber and green.
- Choice of 6-inch leads or solder/faston terminals.
- Appealing chrome bezel.

TYPICAL APPLICATIONS
- Front panel indicator.
- Low power circuits.
- High shock and vibration environments.
- Extremely long life indication.

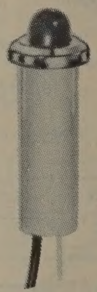
OPTIONS
- Other voltages and currents available.
- A.C. versions available.
- Legends hot stamped on face of lens.
- Clear lens.
- Speed nuts for added mounting security.

MECHANICAL
Mounting: Mounts in ½" dia. hole. Panel thickness 1" max. Mounting centers ⅝" min.
Polarity: White lead indicates cathode; (+) on base indicates anode.
Materials: Body Material: Nylon; Leads: 22 GA. topcoated.

Same Voltage and Current and part number as on Data Sheet 7703 but the "4" changes to "3." Example:

Wire Term. Red
Ultralite .40 = 6340-302-505R
Ultralite .30 = 6330-302-505R

"ULTRALITES"—.20" ROUND INDICATORS



FEATURES
- Solid State—low power, long life, shock resistant, reliable.
- Push-in mounting.
- Current limiting resistors included.
- Available in standard red and hi-efficiency red, yellow, and green.
- Standard with 6-inch insulated leads.
- Appealing chrome bezel.
- Wide effective field of indication—up to 160°.

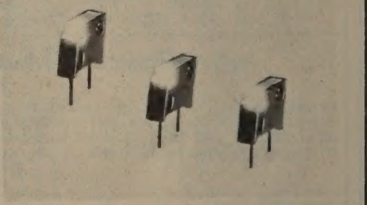
TYPICAL APPLICATIONS
- Front panel indicator.
- Low power circuits.
- High shock and vibration environments.
- Extremely long life indication.

OPTIONS
- Other voltage and currents available.
- Other lead lengths available.
- Speed nuts for added mounting security.

MECHANICAL
Mounting: Mounts in .277" hole. Panel thickness ¾" max. Mounting centers ⅜" min.
Polarity: White lead indicates cathode.
Materials: Body Material Nylon; Leads tinned, 24 GA., stranded.

STATUS/FAULT INDICATOR

FEATURES
- Solid State—low power, long life, shock resistant, reliable.
- Wide effective field of indication.
- Readily visible from **above** as well as **forward.**
- Current limiting resistor included.
- Pin Spacing—.300 inch—compatible with standard DIP pin spacing.
- Compatible with solid state driving circuits, DTL and TTL.



TYPICAL APPLICATIONS
- PC board status indication.
- Back panel status indication.
- Circuit fault indicator.
- DIP switch status indicator.

OPTIONS
- Other voltages and currents available.

MECHANICAL
Leads: Tinned copper base alloy.
Body: Polycarbonate.
Mounting Centers: .100"

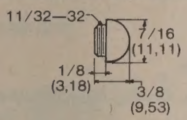
INDICATOR LIGHTS

CHICAGO MINIATURE LAMP WORKS
GENERAL INSTRUMENT CORPORATION

121A—SERIES LENS CAPS FOR 5120-SERIES TINYLITE INDICATORS

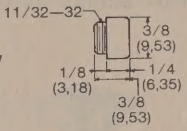
TRANSLUCENT DOME LENSES



121A-204	Red
121A-204	Yellow
121A-204	White
121A-207	Green

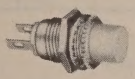
TRANSLUCENT CYLINDRICAL LENSES

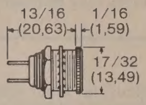
121A-604	Red
121A-604	Yellow
121A-604	White
121A-607	Green



Red, Yellow and White Lenses Are Nylon.
Green Lenses Are Polycarbonate.

5120—SERIES TINYLITES





TINYLITES Are Supplied with Choice of Three Low Voltage Incandescent Lamps Installed, 7 Volts, 14 Volts or 28 Volts. Applications Include Alarm Systems, Medical Equipment, Control and Instrument Panels.

Housing: Nickel Plated Brass
Hardware: Zinc Plated Steel
Insulation: Glass Filled Nylon
Current-carrying Parts Are All Nonferrous Metals
Terminals: Solder Dipped Brass
Mounting Hole: 7/16″ Dia.; Max Panel Thickness: 1/4″

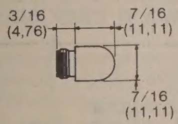
HOW TO ORDER

51xx — 022 — xxx (Specify Color)
26 for 7.0V, .065 Amp Lamp
27 for 14.0V, .065 Amp Lamp
28 for 28.0V .040 Amp Lamp
Use Last Three Digits from 121A Series Lens Caps

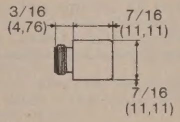
Example: 5127-022-607 Green is a Tinylite with a 14.0 Volt Lamp installed and having a Green Cylindrical Lens Cap.

To order body only (including Lamp) omit last three digits.

131A—SERIES LENS CAPS FOR 5131-038 MIDGET FLANGE INDICATORS



Part No.	QPL Recog. as
131A-304 Red	**LC12RT2**
131A-304 Green	**LC12GT2**
131A-304 Yellow	**LC12YT2**

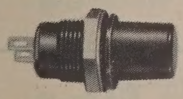


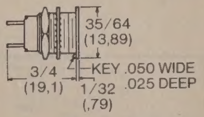
Part No.	QPL Recog. as
131A-604 Red	**LC29RT2**
131A-604 Green	**LC29GT2**
131A-604 Yellow	**LC29YT2**

Built to conform to MIL-L-3661B
Lens: Butyrate
Lens Shank: Nickel Plated Brass

5131-038 MIDGET FLANGE INDICATOR

QPL RECOGNIZED AS LH73/1





Accepts T-1¾ Midget Flange Lamps

These Indicators Are for Military and Commercial Applications.
Built to Conform to MIL-L-3661B

Housing: Black Anodized Aluminum
Hardware: Cadmium Plus Cronak Over Steel
Insulation: Fiberglass Base Thermoplastic Liner
Current-carrying Parts: Nonferrous Metal Except Center Contact Spring Which Is Stainless Steel
Mounting Hole: 15/32″
Max. Panel Thickness: 3/32″

HOW TO ORDER

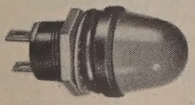
5131-038-xxx (Specify Color)
Last Three Digits from 131A-Series Lens Caps

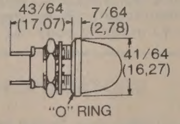
Example: "5131-038-304 Yellow" is a midget flange indicator with a 131A-304 yellow dome style lens cap installed.

Body only 5131-038 less lens

5139-038 MILITARY WATERPROOF MIDGET FLANGE INDICATOR

QPL RECOGNIZED AS LH89/1 AND LC35 - T2





Accepts T-1¾ Midget Flange Lamp

Built to Conform to MIIL-L-3661B, These Indicators Have Neoprene "O" Rings for Waterproofing on Both Lens and Body.

Housing: Black Anodized Aluminum
Hardware: Cadmium Plus Cronak Over Steel
Insulation: Fiberglass Base, Thermoplastic Liner
Current-carrying Parts: Nonferrous Metal Except Center Contact Spring Which Is Stainless Steel
Lens: Butyrate
Lens Shank: Nickel Plated Brass
Mounting Hole: 15/32″
Max. Panel Thickness: 3/16″

HOW TO ORDER

Body and Lens	Lens Only	Mil. No. of Lens
5139-038-404 Red	**139A-404** Red	**LC35RT2**
5139-038-404 Green	**139A-404** Green	**LC35GT2**
5139-038-404 Yellow	**139A-404** Yellow	**LC35YT2**

Body Only: 5139-038 Less Lens
MIL No. of Body Only LH89/1

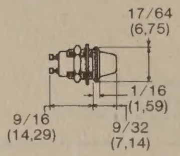
INDICATOR LIGHTS

5160—SERIES GEMLITES



Accepts T-1 Submidget Flange Lamp

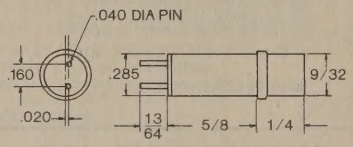
GEMLITES Are a High Quality, Reliable Indicator Used in Military and Commercial Applications Where Size and Ease of Lamp Replacement Are Prime Considerations.

Available in Red, Green, Amber and White
Housing: Black Nickel Plated Brass
Hex Nut: Brass
Lockwasher: Bronze
Terminations: Brass Turret Lugs Gold Plated Center Contact. Silver Plated Shell Contact
Lens: Translucent Butyrate, Red, Green, Amber and White
Mounting Hole: 5⁄16″ diameter
Max. Panel Thickness: 7⁄32″

HOW TO ORDER

Part Number: 5160-458-604 (Specify Color)
Body Only Number: 5160-458
Lens Only Number: 160A-604 (Specify Color)

CARTRIDGE INDICATOR LAMPS



- Long life
- Built to meet MIL-L-3661
- High temperature polycarbonate lenses
- Three voltages: 6.3V; 14.0V; 28.0V
- Three colors: red, green and amber
- Hi Rel Look—Used on military and commercial instruments and in panels.

Housing: Clear Anodized Aluminum
Pins: Stainless Steel
Insulator: Nylon, Glass Filled
Lens: Translucent Polycarbonate

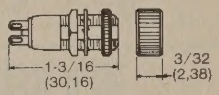
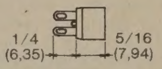
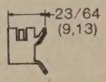
CARTRIDGE HARDWARE



CML 10204-1 CARTRIDGE HOLDER
FOR CML SERIES CARTRIDGE LAMPS
Body, Facing Nut and Collar: Black Anodized Aluminum
Lockwasher and Hex Nut: Cadmium Plated Steel
Solder Lugs: Cadmium Plated Spring Brass
Insulation: Phenolic
Mounting Hole: 3⁄8″ dia.
Max. Panel Thickness: 7⁄32″

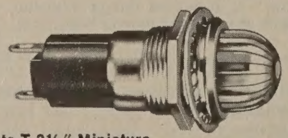


CM 21-3 CONNECTOR
Low Cost Connector Mates with Cartridge Lamps.
Body: Phenolic
Solder Lugs: Cadmium Plated Spring Brass



CML 10380 MOUNTING CLIP
Low Cost Clip for Mounting Cartridge Lamps Directly into Panels. Squeez Tabs and Push Over Back of Cartridge.
Material: Spring Tempered Steel Black Rust Preventative Finish.

5201—SERIES DELUXE INDICATOR



Accepts T-3¼″ Miniature Bayonet Lamp.
DELUXE INDICATOR: Chrome Bezel for Quality Appearance. U.L. and CSA Listed.
Use with 25 P-Series Lenses.
Mounting Bushing: Chrome Plated Brass
Housing: Molded Phenolic

Max. Panel Thicknes: 13⁄32″

HOW TO ORDER

5201 — xxx — xxx (Specify Color)

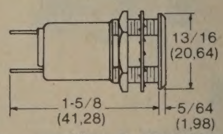
222 for Incandescent Lamps
*232 for B2A Neon Lamp
*242 for B1A Neon Lamp
*For 125V Operation

Use Last Three Digits from 25P-Series Lens Caps

Example: "5201-232-326 Amber" is part number for Deluxe Indicator requiring B2A Lamp and with Amber Fluted Dome Lens.
Units requiring B2A Lamps have built-in 22K ohm resistor.
Units requiring B1A Lamps have built-in 100K ohm resistor.
When ordering body only, omit last three digits.

5100—SERIES STANDARD INDICATOR

Accepts T-3¼ Miniature Bayonet Lamp
STANDARD INDICATOR: Attractive Nickel Plated Bezel. U.L. and CSA Listed.
Use with 25 P-Series Lenses.
Housing: Glass Filled Polyester
Bezel: Nickel Plated Steel
Terminals: Brass



Hardware: Zinc Plated Steel
Mounting Hole: 11⁄16″
Max. Panel Thickness: 13⁄32″

HOW TO ORDER

5100 — xxx — xxx (Specify Color Here)

822 for Incandescent Lamps
*832 for B2A Neon Lamps
*842 for B1A Neon Lamps
*For 125V Operation

Use Last Three Digits from 25P Series Lens Caps

Example: 5100-822-607 red is part number for standard indicator requiring an incandescent lamp and having a 25P-607 Red Lens.
Units requiring B2A Lamps have built-in 22K ohm resistors.
Units requiring B1A Lamps have built-in 100K ohm resistors.
When ordering body only, omit last three digits.

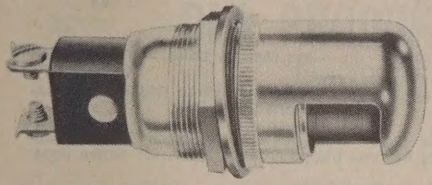
GENERAL INSTRUMENT CORPORATION

900—SERIES INSTRUMENT LITES

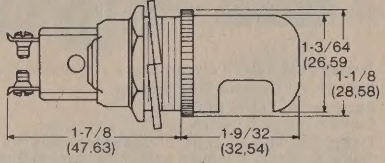
THE 900-SERIES INSTRUMENT LITES PROVIDE LOCALIZED LIGHT FOR ILLUMINATION OF PANELS, SWITCHES, METERS AND LEGEND PLATES

900-006

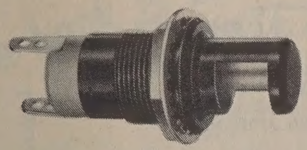


Accepts Both S-6 and C-7 Candelabra Screw Base Lamps

Hood and Face Nut: Chrome Plated Brass
Mounting Bushing: Nickel Plated Brass
Hardware: Cadmium and Cronak Plated Steel
Contacts, Terminals and Screws: Nonferrous Metal
Mounting Hole: 1″
Max. Panel Thickness: ½″
Max. Electrical Ratings: 250V, 1A, 75W
Insulation: Phenolic



900-200



Accepts T-3¼ Miniature Bayonet Lamps

Screw-in Hood
Hood: Aluminum Black Outside, Clear Anodized Inside
Mounting Bushing: Black Anodized Aluminum
Current-carrying Parts: Nonferrous Metals
Hardware: Cadmium and Cronak Plated Over Steel
Insulation: Phenolic, Volcoid and Nylon
Mounting Hole: 11/16″
Max. Panel Thickness: 13/32″
Max. Electrical Ratings: 120V, 3W

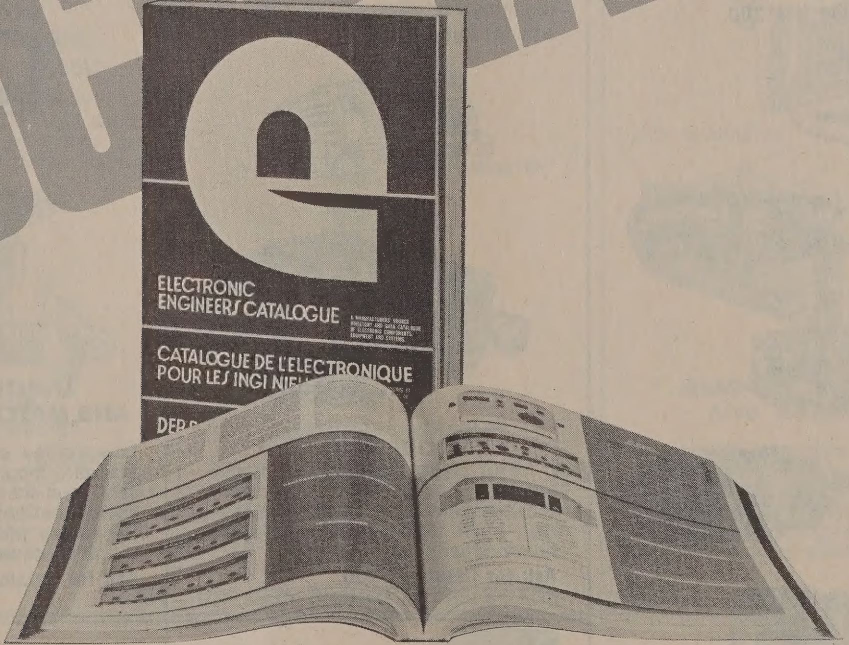
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

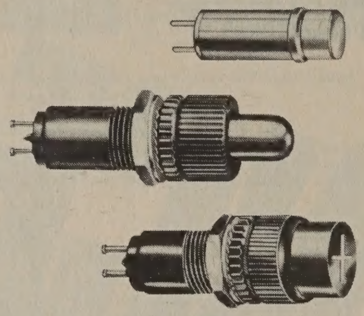
It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Avenue, Garden City, New York 11530 / 516 222-2500

1,500,000 VISUAL INDICATORS

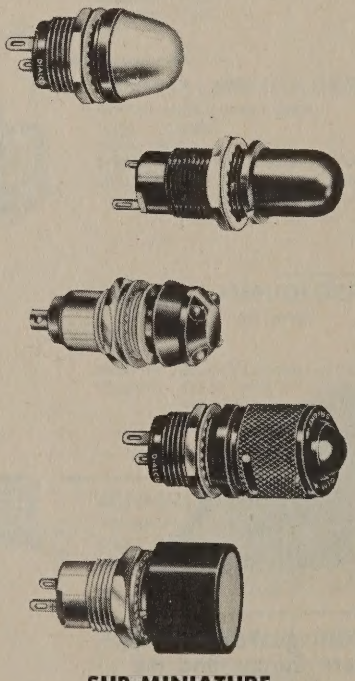
INDICATOR LIGHTS, ILLUMINATED SWITCHES, READOUT DISPLAYS



ULTRA-MINIATURE INDICATORS

Meet requirements of MIL-L-3661B. Incandescent, neon and LED. Mount in 3/8″ clearance hole.

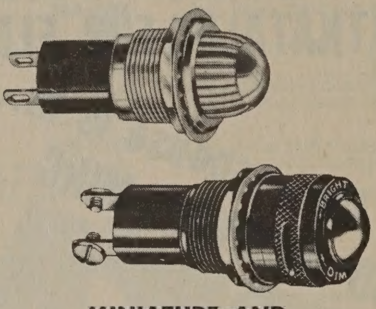
Ask for Catalog UM1200.



SUB-MINIATURE INDICATORS

Incandescent and neon. Mount in 13/32″ to 17/32″ clearance holes. Meet or exceed environmental requirements of MIL-L-6723 and MIL-L-3661B.

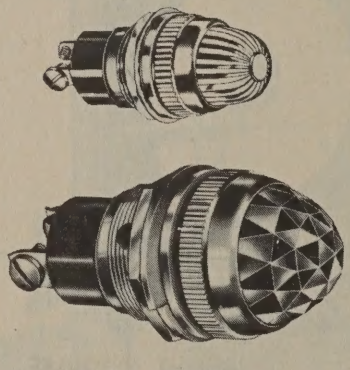
Ask for Catalogs L-157, L-158, L-178.



MINIATURE AND LARGE INDICATORS

Incandescent and neon. Miniature units mount in 9/16″ or 11/16″ clearance holes, large units in 1″ or 1 3/16″ hole. Wide choice of cap shapes and colors, also caps with mechanical dimming feature.

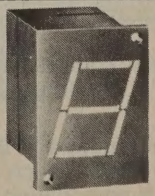
Ask for Catalog L-161.



OIL-TIGHT INDICATORS

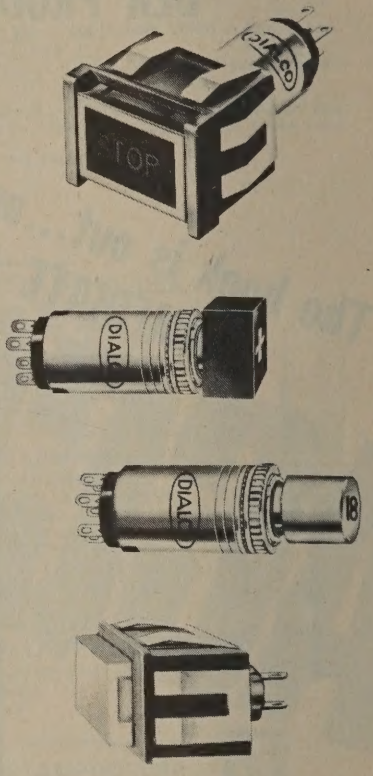
Incandescent and neon. Mount in 11/16″, 1″ or 1 3/16″ clearance holes. For heavy duty.

Ask for Catalog L-200.



SINGLE-PLANE READOUTS

Incandescent and neon — 5 to 170 volts. 3/4″ or 1″ characters. Display 10 numbers and 10 letters. Compatible caption models.



LIGHTED SWITCHES AND MATCHING INDICATORS

Low-profile snap-in switches and standard mounting switches. Momentary non-snap, snap or alternate switch actions. Ratings up to 5 A. Cap sizes include 1/2″ 5/8″ and 3/4″ round or square; 3/4″ x 1″ rectangle.

Ask for Catalog L-210.

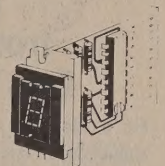
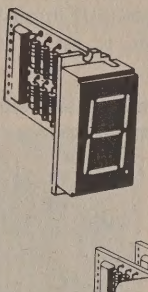
.270″ HEXADECIMAL

READOUT MODULES

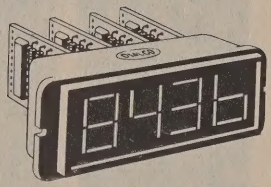
Character heights from .270″ to .625″. Dot, dot matrix and segmented formats for both numeric and full alpha-numeric displays. Wide angle (140°) viewing. IC compatible.



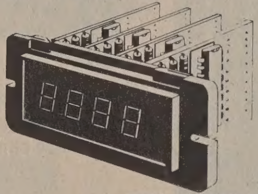
.270″ CHARACTER



.625″ CHARACTER



.625″ CHARACTER



.270″ or .300″ CHARACTERS

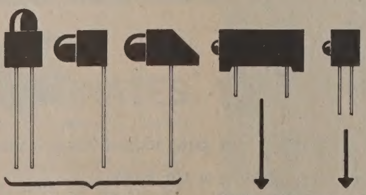
READOUT PACKAGES AND ASSEMBLIES

Single-digit packages in character heights from .270″ to .625″ include decoder/driver and resistors mounted on PC board. Bezel assemblies ready for panel mounting available with up to 10 display packages.

ASK FOR LED PRODUCT SELECTOR GUIDE

LED LOGIC-STATE FAULT INDICATORS

RED • GREEN • YELLOW



Series 550 Series 547 Series 555

550 series indicators, with/without built-in series resistors. For use as electronic circuit fault finders, as indicators or in binary data displays.

547 series indicators, with built-in series resistor, permit dense packaging — 10 units to the inch. Pin spacing is compatible with DIP sockets.

555 series indicators have built-in series resistor, are IC compatible, and can be p-c board mounted 10 units to the inch.

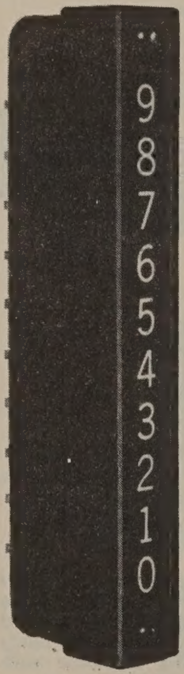
d² display devices

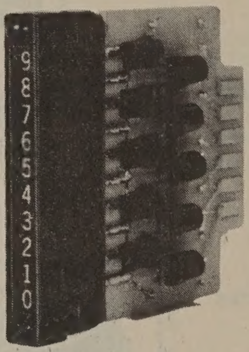
DIGISTRIP front relampable DIGITAL DISPLAYS

For a wide range of console and instrument display applications. Can be mounted horizontally or vertically, directly on p.c. boards, or ganged for high-density readout.

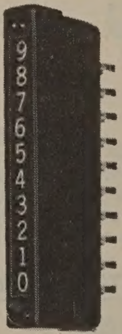
All Digistrip models are available with standard 0-9 legend, or with custom read-out information.



Digistrip II
3″ legend area.



Digistrip I with high-gain transistor drivers on integral printed circuit board.



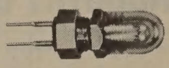
Digistrip I
1½″ legend area.

MINIATURE T-1 INDICATOR LIGHTS

Designed to provide the brightest light in the least space.
Available off-the-shelf, or designed to your application.

QUICK-LENS

Front-relampable miniature indicator light with built in light reflector for maximum brightness, even in high ambient light.

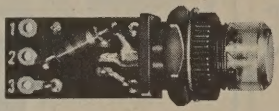


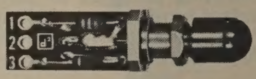
MINI-LENS

Front relampable, micro-miniature indicator light, featuring minimum panel spacing. Can be RFI shielded. Threaded body can mount directly to panel.

FLUSH-LENS

For panel mounting without protrusion. Available with RFI shield. Unit is relampable from rear of panel. No solder connections required.

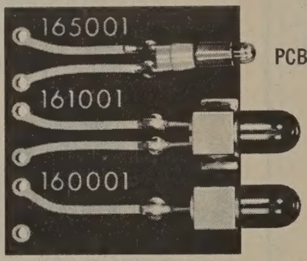




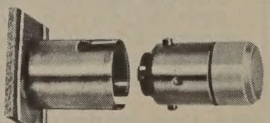
TRANS-LENS **TDML**

Each front relampable, with high-gain transistor driver on compact, integral p.c. board. Minimum depth behind panel. Both available in "bare board" configuration for customer to install own components. Trans-Lens is transistor-driven version of Quick-Lens; TDML is transistor-driven version of Mini-Lens.

P.C. BOARD INDICATORS

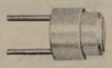


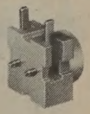
ADAPTER LENS AND SOCKET



Midget T-1¾ flanged base lamp adaptor used with T-3¼ printed circuit mounted socket. Furnished with or without integral color filter.

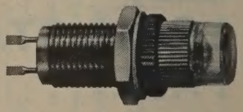
T-1 UNBASED





------------------ T-1¾ BI-PIN ------------------

Basic sockets for custom designed lamp holders or p.c. board mounting used as lighting chassis for back lighted display.
Also available in side mounting.



TWIST-LENS

Quick-change lens, available in clear or colors. Waterproof and RFI shielded units available. Uses T-1¾ Bi-Pin base lamp for high brightness.

POLYESTER DEAD FRONT LAMINATES

Used in conjunction with backlighted panels, or provided separately, are DF991 legend screen laminates. Except for permanently visible graphics that may be desired all nomenclature is invisible until backlighted. Standard background is black, but colored dead front laminates are also available. .010″ and double .010″ thickness are used.

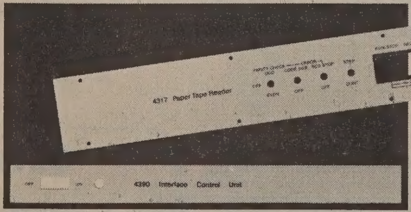
POLYCARBONATE AND ACRYLIC LAMINATES

Offered in dead front as noted above for polyester laminates. Thickness ranges from .020″ to .250″. Used for LED devices as well as incandescent lamps. All laminates are provided with or without pressure sensitive adhesive backing, depending upon application. All laminates feature color matching to FED STD 595, Pantone, or customer supplied color chips.



4317 Paper Tape Reader
4380 Interface Control Unit

NON-ILLUMINATED LAMINATES

Supplied on .010″ adhesive backed polyester film non-illuminated laminates are used to replace conventional painting and printing of metal panels. Screen printing of graphics is sub-surface to protect markings from being scratched off. Holes for switches, knobs, etc. are steel rule die cut. Background color is matched to customer requirements.

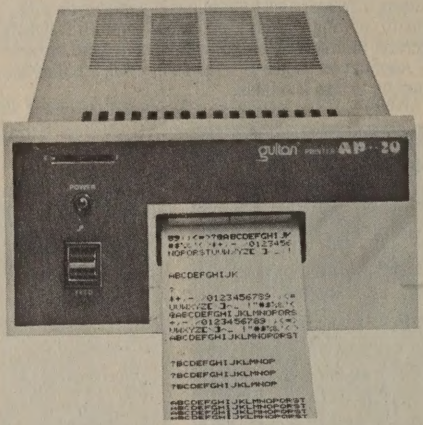
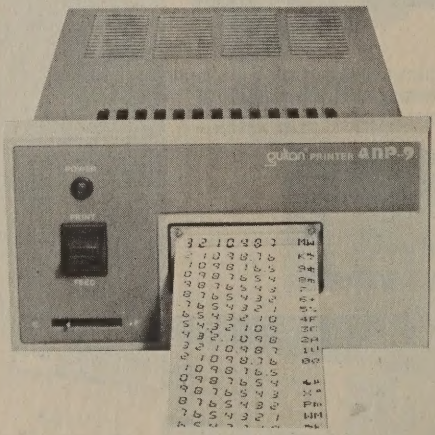
Gulton's Non-Impact Thermal Printers

Printers don't have to use complex clicking and banging mechanical devices as their print mechanisms. Gulton proves it with a line of printers that provides totally quiet operation. With the Gulton non-impact thermal technique, only one moving part is required, the tape drive motor. The tape glides silently beneath the thermal print head at up to 4 line/sec. print rate to produce clear, readable characters. Three basic printer models are yours to choose from — each with distinctive characteristics that sets it apart from any other printer.



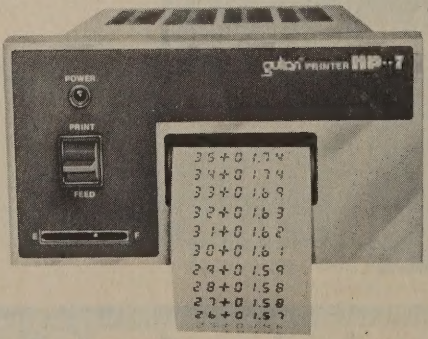
20 Column Full Alphanumeric Printer AP-20

Twenty columns. Full upper case 64 character ASCII subset. Panel mounting. Quiet reliable thermal printing. Complete with all electronics including power supply. Simple parallel interface. Print rate is 2.5 lines/second. **The most significant advance in printers yet!**



Seven Column Numeric Printer With Data Identification ANP-9

Seven columns of numbers with left hand decimal point in each column, or six with a plus/minus sign . . . and two columns of data identification numbers, letters and symbols. Eliminates transcription errors and unidentified numbers. Data identification characters can be specified to the left or right of the number columns. A standard 32 character set of data identification characters is provided. However, any special characters that can be formed by a 5 x 7 dot matrix are available.



Seven Column Numeric Printer NP-7

Seven columns of printing. Four print head styles to choose from: either seven columns of numbers, or six columns of numbers with plus/minus sign in first, second or third column. Character type is standard seven segment with left hand decimal point in each column. Panel mounting configuration. Fast, simple tape loading. Complete with electronics for easy interface to all popular digital panel meters.

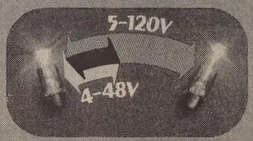
THE SYLVANIA Mix 'n Match SYSTEM EXPLAINED

Sylvania Mix 'n Match. The only system that offers you the universal parts flexibility built around two series of T-2 slide base lamps. The first is our Pilot Lamp series spanning 5 to 120 volts. The second is our Indicator Lamp series from 4 to 48 volts.

All the lamps in each series are physically identical. So sockets and lenses are fully compatible.



And in a number of instances, lenses and caps are even interchangeable between series.

As you can see, our system is calculated to make life a lot easier for everyone.

From the guy who builds the prototypes, to the guy who does the purchasing, to the guy who controls production inventory.

LIQUID CRYSTAL DISPLAYS

Hamlin field effect LCD's are available in Dual in-line or edge board connector packaging. Digits may be black or clear with a choice of transmissive, transflective or reflective background. Thermoplastic bonding provides maximum seal integrity.

Complete design/production services are available to provide custom displays with special format, electrical or environmental requirements. Contact our applications engineering department directly or through your nearest Hamlin sales representative.

Indicators

INDICATOR LIGHTS

This Indicator Light section of the catalog has been compiled to provide the necessary specification information as concisely as possible, so the design or packaging engineer may readily select the unit which best meets his needs. In particular, the Indicator Selection Guide presents a speedy method of narrowing down the total number of indicators in this catalog to a small group for more detailed consideration.

As more and more indicators became available, the old system of requiring the customer to construct his own part number became more and more cumbersome. In this catalog, for the first time, complete assembly part numbers are tabulated for each indicator/cap combination. Very simple substitutions in these numbers allow changes in color, substitution of translucent for transparent lenses, etc. As in the past, the desired lamp number is added as a suffix to the part number. This new method in no way represents a change in the previous numbering system; it is only a faster method for determining the proper number.

These panel indicators embody the best of military and commercial materials and performance features. Materials, finishes, and workmanship, are more than adequate for conformance to Military, Federal, or industry specifications. In particular, pages 32 and 33 presents a cross reference listing of IPI indicators which are on the MIL-L-3661B Qualified Products List, and also those which may be ordered against MS (Military Standard) designations.

Because of the wide variety of items in the Illuminated Products Indicator Light line, it is possible in most cases to select a standard, off-the-shelf unit to meet a precise requirement. Innumerable variations can also be furnished, such as caps in special color combinations, lettered to meet your needs, either hot stamped, or engraved and filled.

The Illuminated Products sales staff is always at your service whenever additional information or assistance is required.

sub-miniature

99-33180 SERIES

Notes:

1. **Material and Finishes:** Mounting tube, black glass filled nylon per MIL-M-19887. Mtg. nut aluminum, black anodized per MIL-A-8625A. Lockwasher, stainless steel or steel, nickel plate. Terminals, brass, tin plated per MIL-T-10727A.
2. **Cap Assembly:** Lens is high impact-resistant plastic per L-P-349a.
3. **Lamp:** T-1 sub-midget flange base. See lamp selection guide. Choose from Group M.
4. **Mounting:** Assembly mounts from front of panel. All mounting hardware supplied. Recommended mounting hole .328 + .015 — .000 diameter.
5. **Weight:** Approx. .12 oz less lamp.

99-33080 SERIES
99-33081 SERIES

Notes:

1. **Materials and Finishes:** Housing and lamp base, gray glass filled nylon. Terminals, beryllium copper, gold flashed. Retainer clip, stainless steel.

2. **Lens Cap:** High impact resistant plastic per L-P-393. (polycarbonate)

3. **Lamp:** Assembly accepts IPI based T-1 lamp, see lamp selection below. Lamp is replaced by removing snap-on cap.

4. **Mounting:** Two types optional.

A. Press-in; Assembly press fits into .189 dia. hole. No mounting hardware required.

B. Retainer clip; For mounting assembly into .200 ±.005 dia. hole or panels less than .06 thick. Order clip 067003000 separately.

Notes:

1. **Materials and Finishes:** Mounting tube and nut are stainless steel, passivated per MIL-S-5002. Wire leads #26 GA silver coated, stranded copper with TFE-flurocarbon insulation.
2. **Lens Assembly:** Lens is high impact-resistant plastic per L-P-393 (polycarbonate).
3. **Lamp:** (non-replaceable) MS 24367-683 subminiature T-1 with 5.0V @ .060 AMP rating.
4. **Weight:** Approx. 0.005 lbs. maximum.
5. **Mounting:** Assembly mounts from front of panel. All mounting hardware supplied. E.M.I. suppressed assemblies require paint free area on back side of mounting hole for E.M.I. conductivity.

Notes:

1. Materials and Finishes: Housing and lamp base, gray glass filled nylon. Terminals, beryllium copper, gold flashed. Retainer clip, spring steel.

2. Lens Cap: High impact resistant plastic per L-P-393. (polycarbonate)

3. Lamp: Assembly accepts IPI based T-1¾ lamp, see lamp selection below. Lamp is replaced by removing snap-on cap.

4. Mounting: Two types optional.

A. Press-in; Assembly press fits into .281 dia. hole. No mounting hardware required.

B. Retainer clip; For mounting assembly into .200 ±.005 dia. hole or panels less than .06 thick. Order clip 067003000 separately.

Description: Dual lamp lighted legend indicator assembly.

SPECIFICATIONS

LEGEND: Legend plate is replaceable from front of panel. Legend area may be imprinted with any letter or numeral combination, space permitting. For style and color, refer to page 31.

LAMPS: Two lamps are required per assembly and are replaceable from front of panel. Lamps are not included in part number shown. For lamp selection, refer to page 34, and ordering instructions.

OPTIONS: If vertical stacking is desirable, a second dash number is added. This number indicates the number of units required. Example: 42-26291-6-8 designates 8 units with red, Style A legend plates or 42-26291-66-4, designates 4 units with red, Style B legend plates. Example 2: 42-27291-6-3, designates 3 units with red, Style A legend plates; or 42-27291-66-4, designates 4 units with red, Style B legend plates. Refer to page 29 for dimensions of single or stacked assemblies. For horizontal or combined horizontal and vertical arrangements, please contact our sales department for part numbers, part dimensions, and cutout dimensions.

Note: If a second dash number does not appear on the part number, a single unit will be furnished.

MOUNTING: Single units are furnished with universal mounting brackets which enables the assembly to be secured at either top and bottom or at each side. Unless otherwise specified, multiple units will be supplied with mounting brackets at top and bottom only.

PANEL CUTOUTS: For panel cutout dimensions refer to page 29.

WEIGHT: Approximately 1.7 oz., less lamps per single unit.

LAMPS: Two lamps are required per assembly and are replaceable from front of panel. Lamps are not included in part number shown. For lamp selection, refer to page 34, and ordering instructions.

OPTIONS: If vertical stacking is desired, a second dash number is added. This number indicates the number of units required. Example: 41-29191-6-8, designates 8 units with Red, style A Legend Plates: or 42-29191-56-4, designates 4 units with Red, style B Legend Plates. Refer to page 29 for dimensions of single or stacked assemblies. 42-29391 and 42-29491 available with up to 5 units in vertical array.

NOTE: If a second dash number does not appear on the part number, a single unit will be furnished.

MOUNTING: Units are stud mounted top and bottom.

PANEL CUTOUTS: For panel cutout dimensions refer to page 29.

WEIGHT: Approximately 1.2 oz. less lamps per single unit.

MISSILITE Assembly

BEST FOR YOUR APPLICATIONS IPI INDICATOR LIGHTS

LEGEND PLATE SELECTION GUIDE

Part numbers are included for specific assemblies having legend plate Styles A & B. Part numbers are available upon request for assemblies requiring legend styles and colors other than those listed on Missilite catalog pages.

UNLIGHTED	LIGHTED			
INVERTER OFF	INVERTER OFF	SOLID COLOR	LEGEND PLATE STYLE **A**	Visible opaque markings on translucent background. Standard markings will be black characters on white and yellow backgrounds, and white characters on backgrounds of all other colors.
POWER ON	POWER ON		LEGEND PLATE STYLE **B**	Visible black opaque markings on white translucent background. When lighted, the background changes to desired color.
	STOP	HIDDEN MARKINGS—LIGHTED BACKGROUND	LEGEND PLATE STYLE **C**	When unlighted, markings are obscured for minimum visibility. When lighted, the markings appear black against a lighted background of desired color.
	FUEL TANK 95% FULL	HIDDEN MARKINGS—OPAQUE BACKGROUND	LEGEND PLATE STYLE **D**	When unlighted, markings are obscured for minimum visibility. When lighted, the markings appear in the desired color, the background remains opaque.
DENSE	DENSE	SEMI-HIDDEN MARKINGS	LEGEND PLATE STYLE **E**	When unlighted, the markings are semi-visible on an opaque background. When lighted, the characters are clearly visible in desired color, background remains opaque.
TAKEOFF	TAKEOFF	SEMI-HIDDEN MARKINGS	LEGEND PLATE STYLE **F**	Semi-visible markings on background of color specified. When lighted opaque markings are sharply outlined.

HOW TO ORDER IPI MISSILITES

Simply write or call the IPI representative in your area or the factory.

The following information must be included on the purchase order:

Specify the IPI part number with appropriate dash number (see individual pages).

Specify color and style of legend if requirements are for other than those parts listed herein.

Specify the desired legend plate markings. THE LEGEND PLATE WILL BE MARKED EXACTLY THE WAY IT APPEARS ON THE CUSTOMER'S DRAWING OR PURCHASE ORDER.

Specify lamp number in accordance with the lamp selection guide on page 34. Use lamp number as a suffix dash number to unit reference. Example: 42-26291-6-327.

Specify any requirements that deviate from standard i.e., side mounting for 42-46191 series, horizontal stacks of 42-47291, etc.

IPI will prepare individual customer specification control drawings for special configurations not covered by catalog part number.

These will be distinguished by a three digit dash number affixed to basic part number. Example: 42-26291-147.

NEON GLOW TYPE

	LAMP NO.	RATED VOLTAGE	STARTING VOLTAGE	RECOMMENDED SERIES RESISTOR	NOTES
Size T-2  **Group C**	A1G	105-125 AC OR DC	65 VAC 95 VDC	68KΩ	
	A1H (High Brightness)	105-120 VAC 150 VDC	95 VAC	27KΩ	
Size T-2  **Group D**	C7A	105-125 AC OR DC	65 VAC 90 VDC	68KΩ	MS25252-C7A
	C9A (High Brightness)	105-125 AC OR DC	105 VAC	27KΩ	MS25252-C9A
Size T-3¼ **Group E**	NE51	105-125 AC OR DC	65 VAC 90 VDC	100KΩ	
	NE51H (High Brightness)	105-125 AC OR DC	105 VAC	27KΩ	

Notes:

1. Candlepower values indicated are approximate initial mean spherical candlepower at rated voltage.
2. Service conditions such as voltage surges, temperature, shock, and vibration may contribute to a shorter average life.

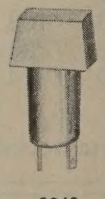
MINI-SLIDE PILOT LIGHT ASSEMBLIES

Model 3040 Series—Model 3060 Series—Two lens shapes, round and square; for either model series.—Sockets for "Pilot" lamps including 120 volt lamp and "indicator" lamps.



3040

3060

MODEL 2800 SERIES

—Screw-in design for easy relamping from front of panel. —Unique torque-limiting, self-locking nylon mounting nut.

INDUSTRIAL DEVICES, INC.

The Bright Spot for Your Product

Red, Green or Yellow Emitting Diodes

New! Super Bright LEDs —

Light on your budget, heavy on performance SOLID STATE GLO-DOT 2191U SERIES HEMISPHERICAL LENS — Red, Green or Yellow

Approximately 100,000 hour life. Low voltage, low power drain — ideal for solid state and battery operations. Built-in current-limiting resistor and rectifier diode permit unit use in AC and DC applications, and protect against damage from incorrect polarity connection. Highly reliable, shock and vibration resistant. Requires 5/16″ diameter hole for mounting (speednut supplied).

Lens Color	6V	12V	24V

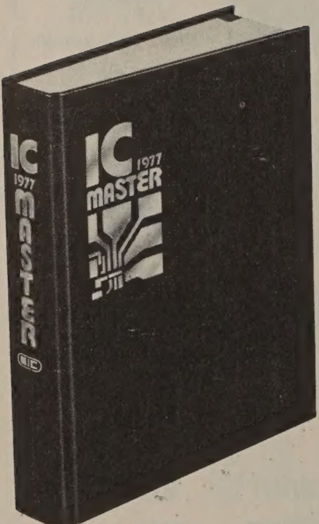
WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

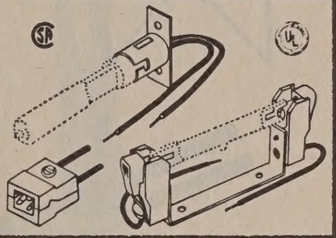
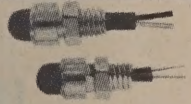
QUARTZ IODINE

2600 Series for Double Ended Quartz type lamps. 2200 Series for double contact Quartz lamps. Metal tabs or wire leads.

21 Series for T2 1/4 Quartz Halogen wedge base lamps.





LED SERIES L58

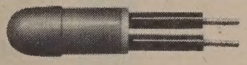
High brightness LED's, micro size. Unaffected by shock and vibration. Wide viewing angle. Red, green, yellow. Square Bezel available. Mounting hole .191".

LED SERIES L 45

High brightness LED's. Available with internal dropping resistor and a variety of lens/Bezels. 5/16" mounting hole.

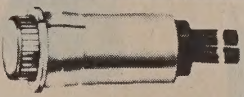
TINEON SERIES 36

Long life neon or incandescent lamps. Press fit into 5/16" hole. Built-in resistor. A variety of lens/bezels.



WATER PROOF SERIES 56

Available 6-14-28 Volts incandescent. Also for 115 or 220 Volts with external resistor. One piece Lexan construction in all colors. Mounts in 5/16" hole.

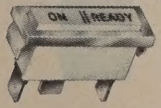


SNAPLITE SERIES 32

Available in full range of voltages. Lamps and terminations. Flush, square, High Hat lenses and bezels. Snap fits 1/2" hole.

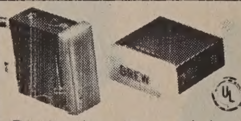
TINEON SERIES 65

Ultra compact for minimum back panel projection. Stranded leads or tab terminals. Built in resistor for neon lamp. Mounting ears for snap fit in 5/16" hole.



RECTANGULAR INDICATOR SERIES 31D

Dual message indicator with neon or incandescent lamps. All lens colors. Chrome or plastic bezel available. Snap fit in 1.281" x .395" hole.



RECTANGULAR TRIM-LINE SERIES 4800

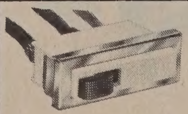
Distinctive tapered lens enhances front panel styling. One piece hi-impact plastic construction snaps securely in .325" x .860" hole.

MIDGET SCREW SERIES 49

Available with flat or dome lens. Front panel replaceable incandescent lamps. Lens available in all colors with or without hot stamped legend. 7/16" mounting hole.

ROCK-A-LITE SERIES 7100

Lighted rocker switch and indicator combination. Available in low and line voltage. Contacts rated at 15 Amps 125V AC. All colors. 1.281" x .395" mounting hole.



SLIDELITE SERIES 51

Lighted slide switch and indicator combination. Available in low and line voltages. Contacts rated at 6 Amps., 125V AC. 1.281" x .395" mounting hole.

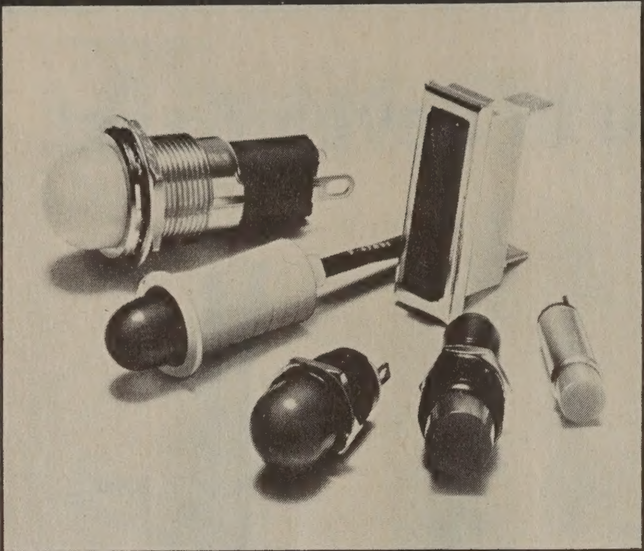
LITTELITES

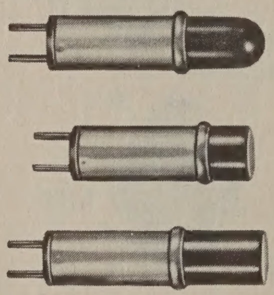
INDICATOR LIGHTS. . .



- **Broad line** . . . Littelites include Cartridge Lamps and Lampholders, Subminiature Lampholders, Miniature Lampholders, and Snap-Mount Plastic Lites . . . we offer a wider selection among these four product groups than any other single manufacturer.
- **UL/CSA** . . . All Littelites are UL Recognized or Listed and CSA Certified. New tools and molds assure you of the finest quality lights on the market today.
- **Fast** turn-around on large volume orders.
- **Off-the-shelf** availability from a nationwide network of Littelites distributors.
- **Special** requirements? Just give us a call (312) 824-1188.

CARTRIDGE LAMPS/LAMPHOLDERS

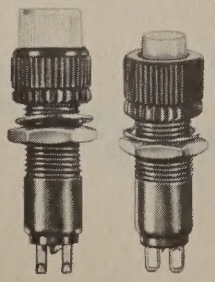
SEND FOR CATALOG LL-C574



UL RECOGNIZED
CSA CERTIFIED
MEET MIL-L-3661 REQUIREMENTS

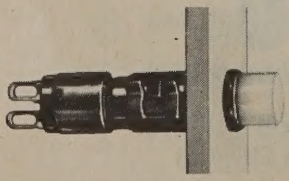
Cartridge Lamps

Incandescent, neon, or solid state. Solid state units supplied with green, red, yellow, or amber LEDs. All cartridge lamps offer a wide choice of lens styles and colors. Mate with cartridge lampholders shown below.



Cartridge Lampholders

Designed for rear mounting into 3/8" clearance hole. Turret pin, solder lug, or solder cup terminals. Available with flat for "D" hole mounting. Supplied separately or as complete assembly, which includes lens cap (smooth or fluted) or lens collar (.284" or .230" wide).

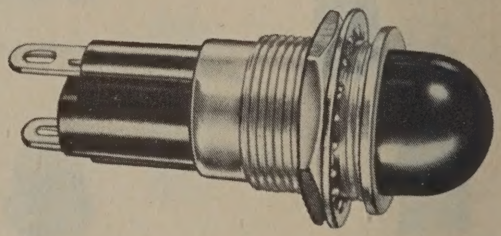


Clips and Sockets

Provides inexpensive means of mounting cartridge lamps directly to the panel. Solder lug or solder cup terminals. Clip secures cartridge lamp in 9/32" mounting hole.

MINIATURE LAMPHOLDERS

SEND FOR CATALOG LL-M574



- For front mounting into 11/16" clearance hole.
- Accommodate T3-1/4 or T2 bayonet based incandescent lamps and T3-1/4 bayonet based neon lamps.
- Screw or solder lug terminals
- Drip proof and "D" hole mounting available.
- Neon lampholders feature built-in resistor.
- Six basic lens styles available in wide choice of colors.
- **UL Listed, CSA Certified** (Solder Lug Terminals)

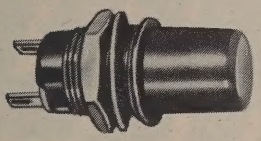
  UL Recognized, CSA Certified (Screw Type Terminals)

. . . FROM LITTELFUSE

SUBMINIATURE LAMPHOLDERS

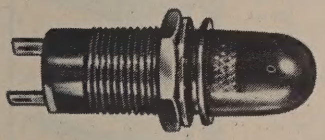
SEND FOR CATALOG LL-S574

Subminiature lampholders accommodate T1-3/4 incandescent or T2 neon midget flanged base lamps. All lampholders allow easy installation and replacement of the lamp and lens from the panel front. **UL Recognized. CSA Certified.**



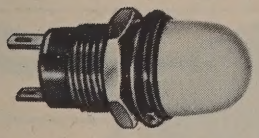
920 Series

For front mounting into 15/32" clearance hole. Accept a T1-3/4 incandescent midget flanged base lamp (1.35-28V). Choice of four different lens styles. Meet requirements of MIL-L-3661.



921 Series

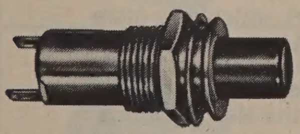
Front mounting into 15/32" clearance hole. Accommodate replaceable T2 neon midget flanged base lamps (C7A—105-125V AC-DC or C9A—110-125VAC). Built-in resistor limits lamp current. Meet requirements of MIL-L-3661.



922 Series

Three different mounting configurations: **922 Series**—front mount—15/32" clearance hole; **923 Series**—front mount—17/32" clearance hole; **924 Series**—front or rear mount—15/32" clearance hole.

Accept a T1-3/4 incandescent midget flanged base lamp (1.35-28V). Choice of four lens styles.



925, 926, 927 Series

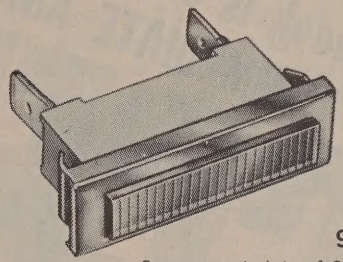
Three different mounting configurations: **925 & 926 Series**—rear mount—3/8" hole; **927 Series**—front mount—15/32" hole.

Accommodate either T1-3/4 incandescent or T2 neon midget flanged base lamps. Three different lens styles in smooth face or fresnel. Lampholders and lenses can be furnished with gaskets for drip proof applications.

SNAP-MOUNT PLASTIC LITES

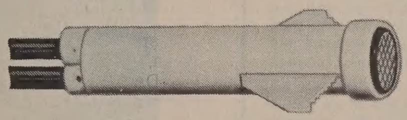
SEND FOR CATALOG LL-P574

Designed to snap into mounting hole without the use of auxiliary hardware. The 970 and 980 Series feature a pair of flex arms which ensure positive retention and protection against shock and vibration. **UL Listed. CSA Certified:** All units with wire leads.
UL Recognized. CSA Certified: Units with Q.C. Terminals.



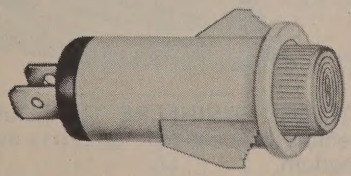
960 Series

Snap-mount into 1.281" x .395" mounting hole. Available with neon (125-250V) or incandescent (6-28V) lamps. Can be supplied with 6" wire leads, 1/4" or 3/16" Q.C. terminals. Choice of fluted or smooth face lens.



970 Series

Snap-mount into .312/.318" diameter hole. Available with neon (125-250V), incandescent (6-28V) or solid state (1.8-28V) lamps. Solid state units supplied with red, yellow, amber, or green LEDs. Terminations include 6" wire leads or .125" Q.C. terminals. Choice of eight lens styles.



980 Series

Snap-mount into .500/.510" diameter hole. Available with neon (125-250V) or incandescent (6-28V) lamps. 6" wire leads or .187" Q.C. terminals. Fresnel lenses in six different styles.

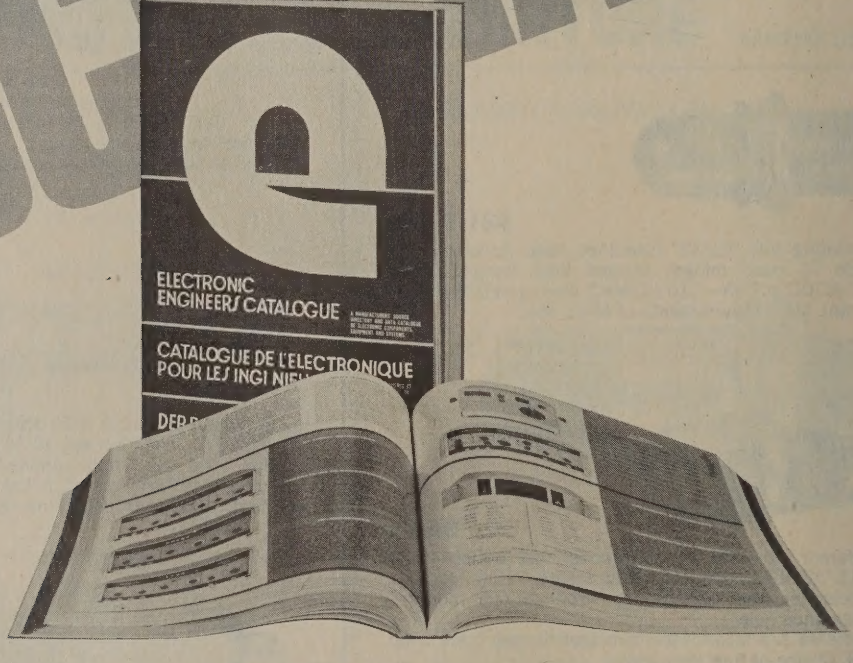
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

- MINELCO SWITCHES
- MINELCO ELAPSED TIME INDICATORS
- MINELCO LED INDICATORS

Miniature BITE* Indicators

*Built In Test Equipment

BALL INDICATORS

(see Page 3 for Dome Lens suitable for all Indicators below except BHGM)

Minelco Ball Indicators are electro-magnetic displays; electrical pulse to unit rotates two-color ball to display the opposite color. Magnetic latching models retain color after pulse is removed. Self-restoring models change back to Power-Off or unenergized display color when power is removed. Model BHGM resets by push button. Ideal for use as fault location and Power-Off applications.

—Front panel, rear panel, sleeve, threaded mountings available. Mounting hardware provided.

—No filaments, springs, hinges or bearings. When used within limits, will not burn out. Power drain negligible.

—*Display colors:* red, white, black, orange, blue, green, or yellow.

—*Standard coil voltages:* 1.5, 3, 5, 6, 12, 24, 28.

—*Operating temperature range:* -65°C to +125°C.

—Withstand over 30 G's vibration, 100 G's shock, and retain accurate display.

—Sleeve mounting tool, T-21, and external magnetic reset tool, RT22, available: consult factory for details.

—*Special modifications available:* radiused dome lens, edge-lit lens, non-glare glass, O-Ring panel seal, square case, RFI shielding, lead wire terminals. For more information, contact sales representative or factory.

†indicates models meet MIL-I-81663/1 and MIL-I-83287/3

SINGLE COIL, LATCHING

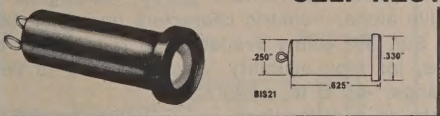
BHGD21T Front panel; 5/16''-32 thread
BHGD27T Rear panel; 5/16''-32 thread
BHGD37T Rear panel; 3/8''-32 thread

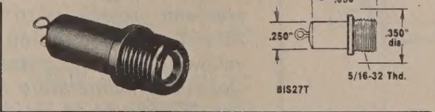
Two discreet coils provide for SET and RESET. By far the most popular of FAULT indicators. Retains reading in either mode magnetically with no power required. May be manually reset with RT-22 reset tool.
See Bulletin B-11B for specifications.

Patent No. 3,425,055
†

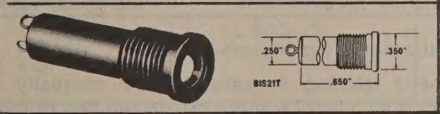
SELF RESTORING



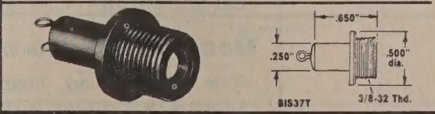
BIS21



BIS27T



BIS21T



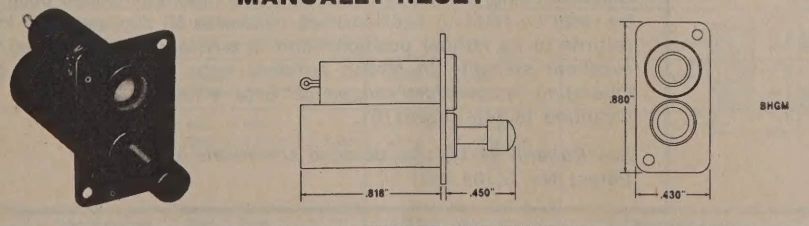
BIS37T

BIS21 Front Panel Sleeve mount
BIS21T Front panel; 5/16''-32 thread
BIS27T Rear panel; 5/16''-32 thread
BIS37T Rear panel; 3/8''-32 thread

Ideal for use as Power-Off indicators. Small, reliable, the BIS display ball is magnetically biased to return and magnetically latch to its unenergized color when power to the system it is monitoring fails.
See Bulletin B-12B for specifications.

Patent No. 3,487,403

MANUALLY RESET



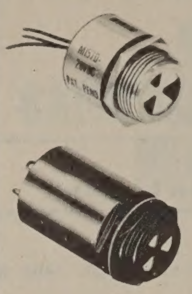
BHGM

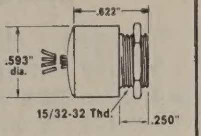
BHGM

Single coil BHGM display is electrically SET to display Fault. Unit may be manually RESET by depressing push button, releasing reverse magnetic polarity to display ball. No electrical switching or mechanical interlocking required for RESET.
See Bulletin B-13B for specifications.

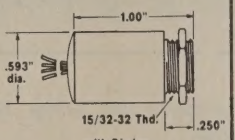
Patent No. 3,425,055

Minelco Miniature BITE Indicators





without Diodes



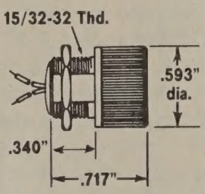
with Diodes

Model MI57D (Dual coil. Electrical reset.)

An internal-flag indicator requiring only pulse power to change color. No-Fault display can be ordered all white or all black. 25 ms pulse changes flag position to show segmented Fault color. Retains display after pulse by magnetically latching in position with no further power requirement. Reset is electrical. Features low power drain, positive indication, excellent visibility, high sensitivity, and fast response. Unit sealed and impervious to humidity, dust and salt spray. *Standard display colors:* black, white and red. Available in 6 to 28v dc. *Operating temperature range:* -65°C to +125°C. Available with or without arc suppression and/or steering diodes. Qualified to Mil-I-83287/02.

See Bulletin M-11A for detailed specifications.

Patent No. 3,406,388



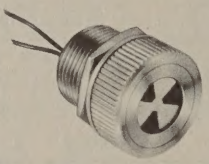
Model MI51LP (Low power. Manual reset.)

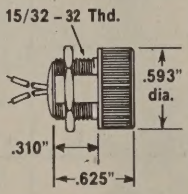
A manually resettable magnetic latching indicator requiring only 50 milliwatts pulse power to operate. Ideal for direct interface with TTL logic. Indicator displays red or white color upon application of a pulse width of 25 milliseconds. Display magnetically latches and holds pulse color until knurled knob is rotated 60 degrees clockwise, resetting indicator to all-black display color. Available in 1.5 to 28v dc. *Operating temperature range:* -65°C to +125°C.

Qualified to Mil-I-83287/04.

See Bulletin M-12B for detailed specifications.

Patent No. 3,465,333



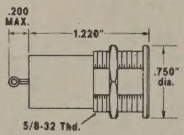


Model MI51SMS (Flag indicator. Manual reset.)

When a fault occurs, a triggered electrical pulse causes the internal flag of this indicator to rotate to a position where it is positively held in a magnetic-locked position. It can be manually reset by rotating knob 60°. Can be special ordered for both electrical and manual reset. Indicator provides positive indication under shock and vibration, and offers excellent visibility in strong incident light. Available in 6 to 28v dc. *Operating temperature range:* -65°C to +125°C.

See Bulletin M-13 for detailed specifications.

Patent No. 3,406,388

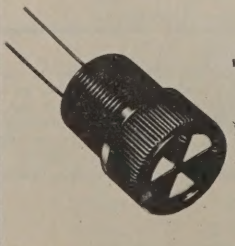


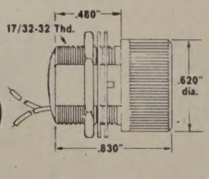
Model MI61 Series (Drum Indicators)

MI61M — self-restoring, power off indicator.
MI61L — single coil, magnetic latching indicator.
Reset is accomplished by polarity reversal.
MI61LD — dual coil, magnetic latching indicator.
Separate set and reset coil.

These are environmentally sealed indicators for use in aircraft, avionic instrumentation, and control panel applications. Large, rectangular drum area can provide up to five alpha, numeric characters on either SET or RESET. Day-Glo or Mil. Std. 595 colors available are red, white, black, yellow, green and orange, for high visibility. Available in 3 to 28v dc. *Operating temperature range:* -65°C to +125°C.

See Bulletin M-14 for detailed specifications. Patent No. 3,634,857





Model MI61S (Manual reset. Flag Indicator)

This internal flag, magnetic latching indicator can be manually reset. When a fault occurs, a triggered electrical pulse causes the flag to rotate to a position where it is positively held in a magnetic-locked position. It may be reset by rotating knurled knob clockwise 60 degrees. The knob spring returns to its normal position. Unit is environmentally sealed and offers excellent visibility in strong ambient light. Available in 3 to 28v dc. *Operating temperature range:* -65°C to +125°C. Qualified to Mil-I-83287/01.

See Bulletin M-17A for detailed specifications.

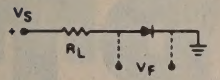
DTL & TTL DRIVE CIRCUITS

RTL DRIVE CIRCUIT



$R_L = (V_S - V_F)/I_F$
CHOOSE I_F FOR
DESIRED BRIGHTNESS

DC OPERATION

Include diode only if transient voltages present exceed V_R specified.

AC OPERATION

Diode required. Total circuit current doubled as it consumes the same current as LED.

Voltage (V)	Value of RL 20mA	Value of RL 40mA
5	180Ω	100Ω
6	220Ω	120Ω
10	470Ω	220Ω
12	680Ω	270Ω
14	820Ω	390Ω
18	1KΩ	470Ω
24	1.5KΩ	680Ω
30	1.8KΩ	820Ω

Typical values of R are specified for 20mA and 40mA total circuit current. Diode and Resistor shown are not supplied.

LEDs (Gallium Phosphide)	Types M	Type MM	Type LM
Forward Volts	R=2.1V, G/Y=2.6V	R=2.1V, G/Y=2.6V	2V (RG) 1.9V (YA)
Reverse Current V_R=4V	1µA	1µA	
Reverse Current V_R=3V			1µA (10µA Max.)
Capacitance V=0, 1MHz	R=100pf, G/Y=50pf	R=100pf, G/Y=50pf	100pf
Temperature Range	-50°C to +100°C	-55°C to +100°C	-20°C to +100°C

Pinlite® Incandescent Displays

- Directly-viewed incandescent design makes Pinlite displays ideal for high ambient light situations.
- Simple voltage reduction allows dimming for night use.
- High contrast ratio insures clear character definitions in a 10,000 ft.-candle incident light condition.
- 120° viewing angle.
- Patented cross-over filament arrangement eliminates "open corners" characteristic of other display types.
- Directly compatible with standard TTL driving networks.
- Easily multiplexed.
- "White" light allows filtering to a wide range of colors.

Pinlite displays are particularly desirable for applications requiring brightness and high reliability over a wide range of environmental conditions. Popular uses include aircraft cockpits, marine navigation, computer peripheral equipment, taxi meters and gas pump readouts.

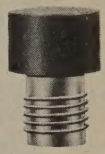
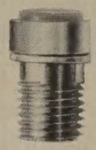
LENS STYLE

DS



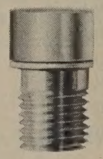
Matte black anodized bezel prevents sidelight emission. Blends with dark colored panels; contrasts with light colored panels. BI-COLOR has the added feature, white when unlighted and colored lighted.

Q



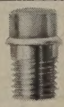
Aluminum anodized bezel (matte silver appearing) allows 180° visibility, blends with light colored panels; contrasts with dark colored panels. BI-COLOR has the added feature, white when unlighted and colored when lighted.

DSC



Aluminum anodized bezel (matte silver appearing) prevents sidelight emission. Blends with light colored panels, contrasts with dark colored panels. BI-COLOR has the added feature, white when unlighted and colored when lighted.

STD



Flat, slightly projected lens gives 180° visibility.

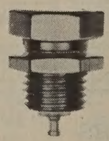
Lens differs on 855 — see drawing.

SE

Edgelight for plastic panels. Small diameter light gasket minimizes wasted panel space. Can be relamped with gloved hands.

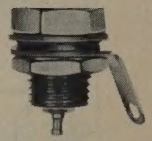
BODY TYPES

S



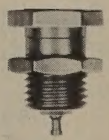
Presents bright metal Hex extending in front of the panel or in front of the shoulder washer on the SI model.

SI



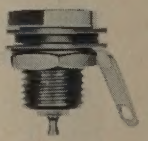
Presents bright metal Hex extending in front of the panel or in front of the shoulder washer.

SS



Presents 5/16" bright metal Hex extends very little in front of the panel or in front of the shoulder washer on the SSI model.

SSI



Presents 5/16" bright metal Hex extends very little in front of the panel or in front of the shoulder washer.

SUN VALLEY, CALIFORNIA 91353 PHONE: (213) 875-1123 TWX: 910-498-2250

LENS STYLE

QB		Matte black anodized bezel. Allows 180° visibility. Blends with dark colored panels; contrasts with light colored panels. BI-COLOR has the added feature, white when unlighted and colored when lighted.
D		Skirted lens covers metal parts for neat panel appearance. Large lighted surface assures positive indication. BI-COLOR has the added feature, white when unlighted and colored when lighted.
MB		Offers the same features as Type M. Black metal trim. Both accommodate T-1¾ based lamp or T-2 based neon lamp (NE2J or AIH types).
M		Large lens for maximum visibility from all angles. Engineered to offer the most uniform light distribution. Full 180° visibility.

BODY TYPES

SK  Presents small knurled flange in front of the panel or in front of the shoulder washer on the SKI model.	**SKI**  Presents small knurled flange in front of the panel or in front of the shoulder washer.
SR  Presents a small flange in front of the panel or in front of the shoulder washer on the SRI model.	**SRI**  Presents a small flange in front of the panel or in front of the shoulder washer.

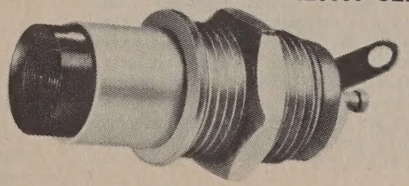
SERIES 121000 AND 123000
TWO TERMINAL, FRONT RELAMPABLE

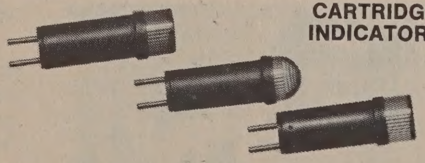
121000 SERIES
123000 SERIES



- Designed to use T-1 size flange based incandescent or LED light sources.
- 9/32″ Diam. Mtg. Hole (Series 121000). Center to Center spacing 3/8″.
- 5/16″ Diam. Mtg. Hole (Series 123000). Center to Center spacing 1/2″.
- Three lens styles available for either series in translucent or transparent material, plain or with fresnel rings.
- A variety of lens colors available.
- Terminals accept two (2) #22 AWG wires each and are isolated from case and panel.
- Body and lens bezels can be furnished in black or clear anodized finish.
- Hot stamping of lenses can be furnished upon request.
- Both Series are available in waterproof versions.
- RFI shielding can be provided on both Series.

SLOAN CARTRIDGE INDICATORS

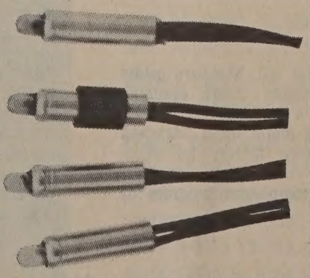
CARTRIDGE INDICATORS



- Designed to provide low cost, front panel light indication with a variety of light sources and multi-optional mounting features.
- Extremely rugged in construction, Sloan Cartridge units consist of an aluminum body incorporating Solid State, Incandescent or Neon light sources. Termination is by .040 diam. stainless steel pins.
- Lens styles are flat or domed in transparent or translucent material. All lenses incorporate Fresnel rings for maximum distribution of light output. A wide variety of lens colors are available.

New

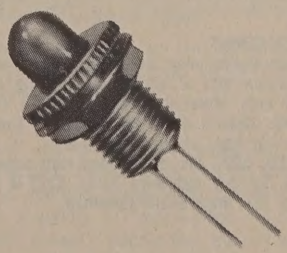
5L3 SERIES (T-1 LED)



- Red, Green or Amber
- 1/8″ body diameter
- No lens required
- Non relampable
- Termination by color coded wire leads
- Voltages up to 14 VDC

New

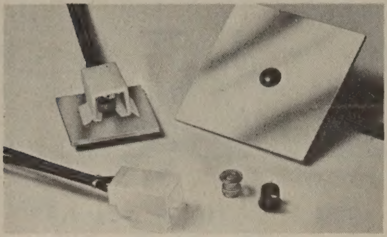
1L3 SERIES (T-1¾ HI-BRITE LED)



- Red, Green or Amber
- 1/4″diam threaded metal body
- No lens required
- Non-relampable
- Voltages up to 14 VDC

SoLiCo *PILOT AND INDICATOR LIGHTS*

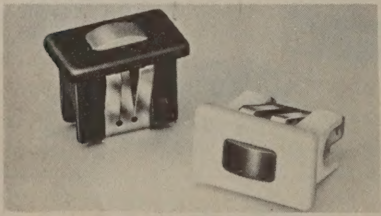
A COMPLETE RANGE OF MULTI-FUNCTION INDICATOR LIGHTS



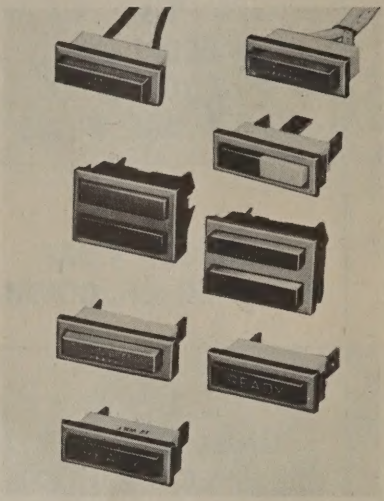
1K14 SERIES
Rear mounts in panel not more than .085" thick. Mounting hole .310" — .320"
LAMP: High brightness neon is standard with complete range of attached resistors available. Miniature incandescent in T-1¾ size available in range of 1.3 volt thru 28 volt.
COLORS: Lens colors are available in complete spectrum both in transparent and translucent material.
Recognized under the component program of U/L and CSA approved.

SoLiCo 110V
SoLiCo 28V

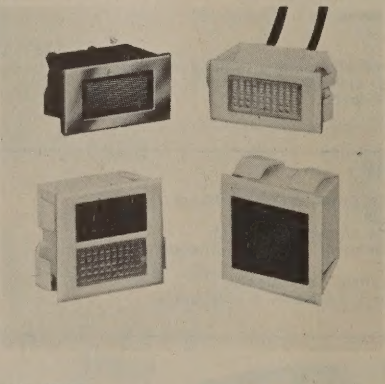
3L SERIES (with built-in resistor)
3S SERIES (resistor in lead)
These compact lights snapfit in a 5/16" hole. No additional hardware is necessary. Extended portion is .350 diameter by .110 inch high, while body length below shoulder is 1.420" long on 3L and .940" long on 3S.
Recognized under the component program of U/L and CSA approved. High brightness neon lamps with appropriate resistors to assure long life while achieving desired brightness. Complete range of incandescent lamps also available.
LENS: F4 and F5* lens is offered in a variety of colors and available in nylon or lexan. Decorative bezel with various finishes upon request. Chrome is standard.
BODY COLORS: White is standard although body can be molded in any color.
LEADS: Same as 5S.



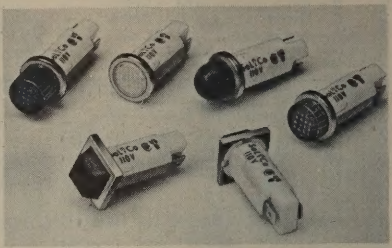
S222 SERIES
These lights snap securely without additional hardware into a rectangular opening 1.200 by .640 inch. Material thickness .045 to .065 inch.
LENS: Choice of colors available (nylon and acrylic). Red, white, amber, clear.
LEADS: S222 Series provided with screw terminals, S222-A with wire leads. S222-B provided with .250 male spade terminals.



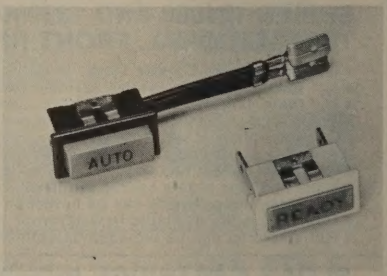
"R" SERIES
These rectangular lights snap in securely (without additional hardware) into 1.312 or 1.280 by .375 inch opening. Material thickness range .030/.080 inch. 2R requires 1.280" by .812 inch mounting hole.
Recognized under the component program of U/L and CSA approved. High brightness neon lamps with appropriate built-in resistors to assure long life while achieving desired brightness. Complete range of incandescent lamps also available.
LENS: Ideal for vertical or horizontal hot stamp legends. These 1.150 by .250 inch lenses are offered in a variety of colors (nylon or lexan). Split lens variations also available (2R and 4R Series).
BEZEL: Decorative bezel in various finishes available (black, bright brass, etc.) Chrome plate is standard.
LEADS: Same as M SERIES.



"L" SERIES
Molded from DuPont Zytel 101. Standard colors are black or white, custom colors available upon request.
Optional: When ordering metal bezel, stainless steel is standard. Consult factory for other finishes.
Recognized under the component program of U/L and CSA approved.



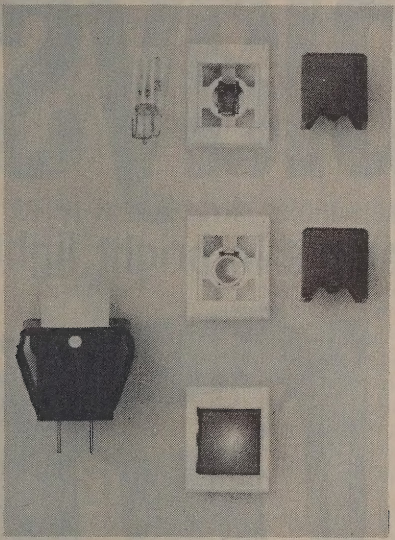
5T SERIES
HOUSING: Zytel 101, White is standard. However, Black, Red and other colors are available. Fits in ½" mounting hole (snap fit).
RATING: Same as 5S — 5L SERIES
LAMP: High brightness neon is standard with complete range of attached resistors available. Miniature incandescent in T-1¾ size available in range of 1.3 volt thru 28 volt.
LENS: Various styles with internal facets for maximum light refraction. Available in Lexan and Nylon.
COLORS: Lens colors are available in complete spectrum both in transparent and translucent material.
BEZEL: Optional, available in chrome or other finishes. Square or round depending on lens style.



"M" SERIES
These compact units snap securely without additional hardware into .940 by .440 inch opening. Material thickness .031" — .093".
LENS: M Series with "H" lens features a .855 by .315 inch lens face — .170" high offering excellent raised lighting characteristics with a choice of colors. (Imprinting available).
M Series with "F" lens affords a full .860 by .315 inch lighting face ideal for hot stamping legends, even two lines if desired.
BODY COLORS: white or black available.
LEADS: Black plastic 105°C leads 6" long ends stripped ½" and tinned are standard. Any desired length and colored leads can be readily supplied. In addition, these leads can be provided with a variety of terminations — ring, female flag, etc. M series can be supplied with .250" or .187" male spades.

SORENSON LIGHTED CONTROLS, INC. 530 Oakwood Avenue, West Hartford, Ct. 06110

SoLiCo PILOT AND INDICATOR LIGHTS



1000 SERIES FEATURES REPLACEABLE LAMP

Snap-out lens and wedge base lamp (6-28 volt range) permits relamping from front of panel without tools.

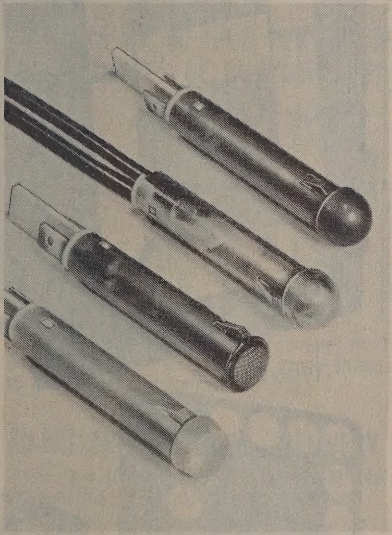
MOUNTING INFORMATION: Unit has self-locking ears; snaps into conventional .515″ x .625″ hole in panel .02″ to .156″ thick. Measures .750″ behind panel.

RATING: 6-28 volt and 125-250 volt. Recognized under the component program of Underwriters Laboratories, Inc. and CSA approved.

LENS: Full range of colors. .430″ x .460″ x .300″ high.

HOUSING: DuPont Zytel 101 available in white, red or black.

TERMINATION: Solder Lugs.



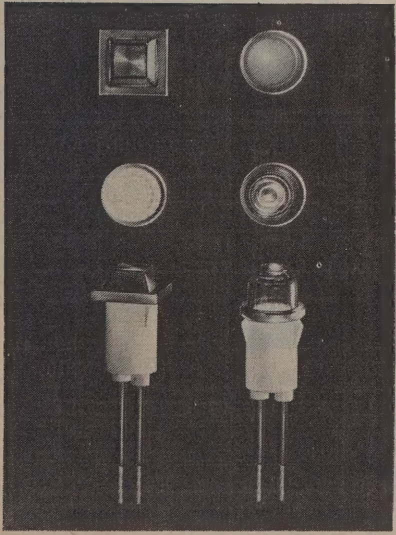
3W AND 3T SERIES

MOUNTING INFORMATION: Snap-in feature with self-locking ears. Fast assembly, no additional hardware necessary.

BODY COLORS: Lens and body one piece design. Available in all colors.

TERMINATION: 6″ wire leads standard on 3W, .187″ male tabs on 3T.

LENS: 3 configurations: dome, semi-dome, cylindrical flat top.



5S AND 5L SERIES

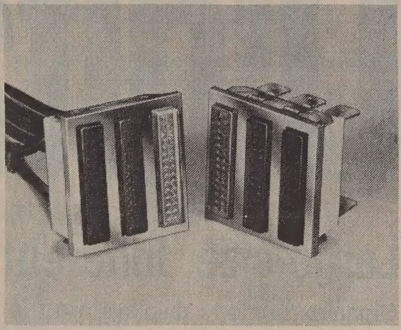
These stylish round body lights with chrome plated bezel mount into ½″ hole and are secured by self-locking "barbs." The overall body length below the bezel is .900″ on the 5S and 1.120″ on the 5L.

Recognized under the component program of U/L and CSA approved. High brightness neon lamps with appropriate resistors to assure long life while achieving desired brightness. Complete range of incandescent lamps also available.

LENS: A choice of lens styles and colors available. Nylon or Lexan material.

BEZEL: Decorative bezels in various finishes available (chrome plated is standard).

LEADS: Black plastic 105°C leads 6″ long, ends stripped ½″ and tinned are standard. Any desired length and color leads can readily be supplied. In addition, these leads can be provided with a variety of terminals, ring, female quick connect, male spade, etc.



RT SERIES

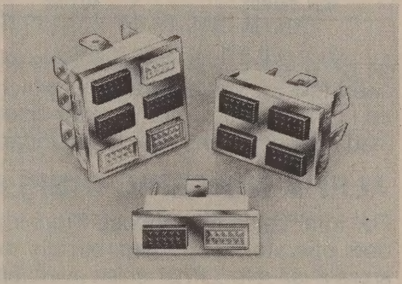
MOUNTING INFORMATION: These multiple function lights snap-fit into a 1.28″ x 1.234″ mounting hole in panels from .09″ to .30″ thick. No additional hardware is necessary.

RATING: Recognized under the component program of Underwriters Laboratories, Inc. and CSA approved at 125-250 volts.

LENS: Ideal for vertical or horizontal hot stamp legends. These 1.150″ x .250″ lenses are offered in a variety of colors (nylon or lexan).

BEZEL: Decorative bezel in various finishes available (black, bright brass, etc.). Chrome plate is standard.

LEADS: Black plastic 105°C leads 6″ long, ends stripped ½″ and tinned are standard. Any desired length and colored leads can be readily supplied. In addition, these leads can be supplied with a variety of terminations — ring, female quick connect, female flag, etc., or with .250″ male spades attached to the body.



SR, 4R AND 6R SERIES

MOUNTING INFORMATION: These multiple function lights snap-fit into panels from .09″ to .30″ thick. No additional hardware is necessary.

RATING: Recognized under the component program of Underwriters Laboratories, Inc. and CSA approved at 125-250 volts.

LENS: Ideal for vertical or horizontal hot stamp legends. .485″ x .250″ lenses are offered in a variety of colors (nylon or lexan).

BEZEL: Decorative bezel in various finishes available (black, bright brass, etc.). Chrome plate is standard.

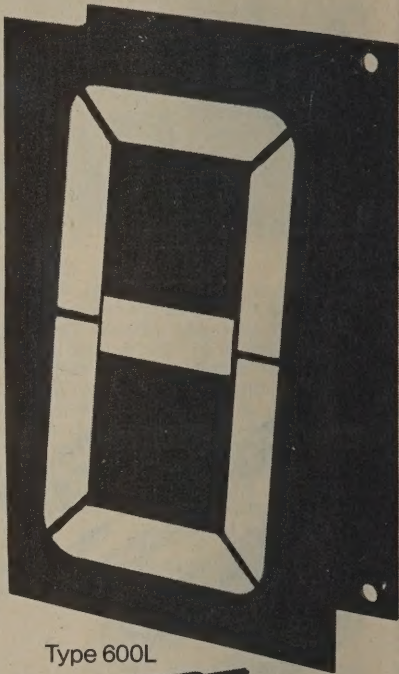
LEADS: Black plastic 105°C leads 6″ long, ends stripped ½″ and tinned are standard. Any desired length and colored leads can be readily supplied. In addition, these leads can be supplied with a variety of terminations — ring, female quick connect, female flag, etc., or with .250″ male spades attached to the body.

Signalex™

Digital Displays

Large size. Inherent memory. Long lasting. Legible in bright light.

Signalex numeric displays are the simple solution to problem display requirements. Actuated electromagnetically, they are virtually maintenance-free, last almost indefinitely. No power required except when numbers are being changed. And the big, bold, light-reflecting characters (up to 12" high) can be seen under any ambients...even bright sunlight, or in the dark when illuminated. Standard colors are white on black, with customized colors on special order.



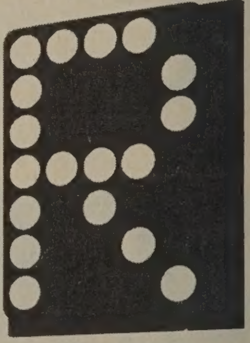
Type 600L

NUMERIC DISPLAYS

DISPLAY SIZE	1½"	4"	6"	9"	12"
SIGNALEX MODEL	150L	400L	600L	900L	1200L
Character Size H x W	1-9/16" x 15/16"	4-1/16" x 2-5/16"	6-1/16" x 3-9/16"	9" x 6"	12" x 8"
Vane Width	5/32"	7/16"	11/16"	1-1/8"	1-1/2"
Frame Size H x W	1-7/8" x 1-5/16"	5" x 3-1/4"	7-1/4" x 5-1/4"	11" x 8-1/4"	14" x 11"
Min. Pulse Length	30 ms	50 ms	90 ms	150 ms	190 ms
Pulse Power, Each Vane	0.35 W	0.93 W	1.1 W	2.0 W	2.5 W
Max. Viewing	40 Feet	100 Feet	250 Feet	500 Feet	800 Feet

U.S. Patent No. 3,886,545; other patents pending.

All sizes are 7 segment readouts with bi-stable magnetic circuits that are pulse operated. Except for the 150L, which has 3 terminal pins per segment for connection to PC boards, all the other sizes are customarily supplied with three 8 inch leads per segment. 12v. DC standard. Other voltages on special order.



Type 1235L

ALPHA-NUMERIC DISPLAYS

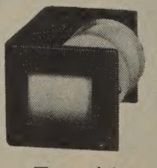
For total versatility choose Signalex dot matrix displays. Thirty-five bright white dots operate electromagnetically to display any letter or number. Big 9" and 12" sizes available. Other sizes available on special order. (Pat. Pending)

2-STATE INDICATORS

Type A1 is a single window model. Strips may be ordered with as many windows as required. Each window has two alternating display faces. The signal, letter or number at each display position snaps into view with an electric pulse and remains until a pulse activates alternate circuit. Available in multiple segments. The segments are bi-stable magnetic circuits and pulse operated. 12 v. DC and white-on-black are standard. Custom voltages and colors available.

Window size • 3/8" H x 1/2" W	Window to Window Spacing • 3/4"	No. Connections • 3/window
Pulse Length, Min. 30 ms either display	Pulse Power Required • 1.1 watts	

U.S. Patent No. 3,936,818



Type A1

Type A6

Note:
In addition to standard models, economical Signalex display devices can be modified to your requirements.

AD-MU AD-VANCE MAGNETICS SHIELDING

MAGNETIC SHIELD COSTS REDUCED

Ad-Vance Magnetics, Inc. already owns tooling for just about every type of magnetic shield used during the past 20 years. Such existing tooling could cut your shielding costs substantially. Or, our Magnetic Shielding Specialists will design and fabricate an AD-MU shield to your precise performance requirements.

AD-MU FOILS PROVIDE ECONOMICAL SHIELDING

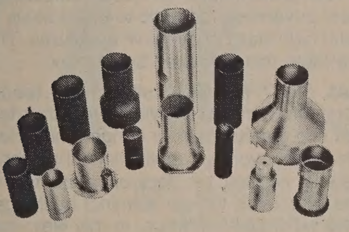
1. Cut and contour in minutes to exact desired shape.
2. Can eliminate costs of designing and manufacturing pre-fabricated shields in many instances.
3. Excellent for hard-to-get-at places.
4. Ideal for experimental applications to quickly determine exact amount of shielding required.
5. Useful in many production applications. Permit placing magnetically reacting components closer, compacting assemblies.

Heat treated; ready for instant use. Delivery from stock.

Widths: 4″, 15″.

Thicknesses: For AD-MU-78, .002″ (4″ width only), .004″, .006″, .010″. For AD-MU-00, .004″ only.

AD-MU-78 OR 80 HIGH PERMEABILITY SHIELDS FIT 334 TYPES OF PHOTOMULTIPLIER TUBES



For your special application or specific magnetic environment, our engineers can either modify a stock shield or custom design a shield to your exact requirement.

AD-MU SHEET STOCK — DELIVERY FROM STOCK

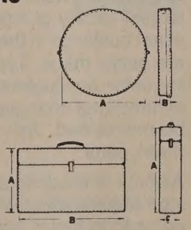
Order Low (AD-MU-00), Medium (AD-MU-48), and/or High (AD-MU-80) Permeability Stock as Required.

For the convenience of those preferring to design and manufacture magnetic shields in-house. Easy to work: bend, stamp, draw, finish, etc. on ordinary sheet metal working equipment. SHIELDS MUST BE HEAT TREATED before finishing by plating, MIL spec painting, etc.

Sheet dimensions: 30″ x 120″.

Thicknesses: .014″, .020″, .025″, .031″, .040″, .050″ and .062″.

STURDY AD-MU TAPE DATA PROTECTORS



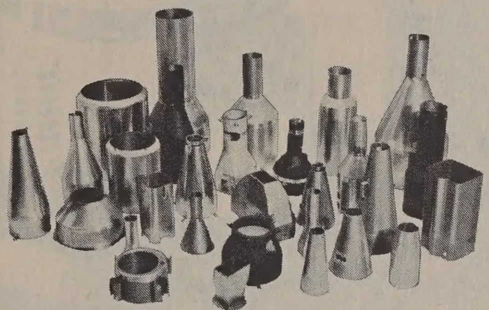
1. Assure fidelity by keeping vital recorded data on magnetic tapes free from distortions caused by unforeseen external magnetic fields.
2. Minimize erasure accidents during safekeeping or transport.
3. Deter the covert saboteur or vandal.
4. Invaluable insurance against possible expensive or irreplaceable losses.

AD-MU CRT SHIELDS

Eliminate the reactive effects of external magnetic fields on the electron beam. Contact our Engineering Department for help in designing and manufacturing the best shield for your application.

Ad-Vance Magnetics, the Problem Solving Magnetic Shielding Specialists, is the industry's largest, oldest and most experienced firm specializing in magnetic shielding. Our shielding is everywhere: off-planet in spacecraft and satellites, and planet-wide in exacting industrial, military, laboratory and consumer applications.

AD-MU CUSTOM FABRICATED SHIELDS FOR COMPONENTS AND SYSTEMS



From the simplest component to the most complex system, Ad-Vance Magnetics can design and make the shields you need . . . for magnetic isolation test chambers, for low field research, magnetic shielding components required in systems (such as CRTs), transformers, motors, tachometers, reed relays and computers, dewars for cryogenic or geophysical research, video cameras, scan converters, etc.

COMPLETE FACILITIES IN 2 LARGE MODERN PLANTS

Up-to-date equipment for all types of metal forming, heliarc and spot welding, processing control of heat treating and finishing . . . complete in-house tool room . . . in-house quality control . . . experienced engineering and design services unequalled in the industry.

PHYSICAL CHARACTERISTICS OF AD-MU ALLOYS

(FORMING QUALITY — NOT ANNEALED)

	AD-MU-80	AD-MU-78	AD-MU-48	AD-MU-00
density (grams/cm^3)	8.74	8.21	8.20	7.80
coefficient of expansion per degree C (20°/100°)	12.30 x 10^{-6}	12.42 x 10^{-6}	9.38 x 10^{-6}	13.10 x 10^{-6}
tensile, strength (lbs/in^2 x 10^3)	99.0	85.0	73.0	45.0
yield point (lbs/in^2 x 10^3)	35.0	32.5	29.5	28.0
hardness (rockwell B)	65/80	65/75	65/75	20/40
modulus of elasticity (lbs/in^2 x 10^6)	32.0	30.0	24.0	29.5
melting point degrees C	1450	1470	1425	1525
shear point (x 10^3 psi)	—	42.75	—	35.00
elongation (% in 2″ section)	32	35	33	—

AD-MU ALLOYS PROTECT PERMANENTLY

• Will not saturate when properly used • No excessive loss of permeability from shock • Relatively stable permeability characteristics after final anneal, avoiding the expense and inconvenience of regularly repeated annealings • Minimum retentivity for any alloy of a given permeability.

Ad-Vance engineers are magnetic shielding specialists. Contact our Engineering Department for help with your current magnetic shielding problems. Request Ad-Vance's complete 44-page catalog featuring advanced shielding techniques and components.

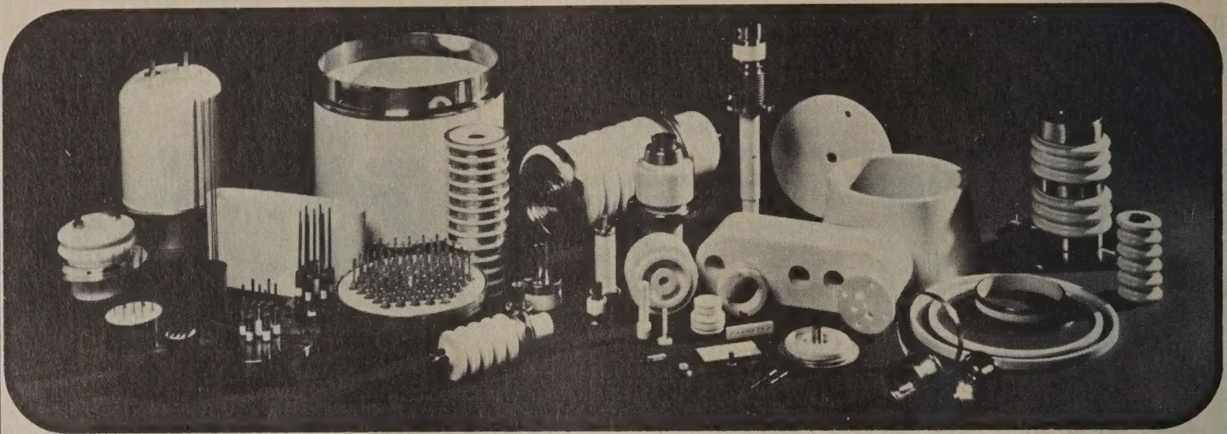
AD-VANCE MAGNETICS, INC., 226 E. SEVENTH ST. / ROCHESTER, IND. 46975 / (219) 223-3158 / TWX 810-290-0294

ALBEROX ... *For outstanding performance in high temperature, hermetic terminals.*

We're SPECIALISTS in brazing METAL parts to high alumina CERAMICS for demanding HIGH TEMPERATURE, HERMETIC applications.

CUSTOM HERMETIC CONNECTORS Multipin hermetic connectors for demanding vacuum and space applications requiring 400°C. bakeout — conditions where glass connectors won't stand up — are being produced in a variety of configurations. To save cost, Alberox can also provide connector sub-assemblies such as pin decks to be brazed or welded into shells or flanges by the customer.

MINIATURE TUBE AND PIN SEALS Many high temperature applications require insulated pin or tube feedthrus. These are available with weldable or brazeable metal parts, and can be added to covers or flanges, etc. All Alberox feedthrus are suitable for cryogenic environments.



Since 1961, we have designed and produced a wide variety of seals for custom applications in diverse components such as . . .

- VACUUM FEEDTHRU TERMINALS
- CERAMIC ELECTRON TUBE AND VACUUM SWITCH ENVELOPES
- NUCLEAR REACTOR PENETRATOR FEEDTHRU TERMINALS and INSULATORS
- SQUIBB and DETONATOR CONNECTORS
- POWER SEMICONDUCTOR HOUSINGS
- SPACE FLIGHT HERMETIC CONNECTORS
- JET ENGINE THERMOCOUPLE COMPONENTS
- HIGH PRESSURE OIL WELL LOGGING FEEDTHRUS
- CAPACITORS and TRANSFORMER TERMINALS

In addition to the above, Alberox has designed and produced state-of-the-art components for critical nuclear devices.

The Alberox plant was designed and built specifically for the efficient production of ceramic-to-metal seals. We manufacture our own A-950 high alumina ceramic, which enables us to optimize on the best metalizing process for this ceramic; thus we can provide superior seals. By making our own ceramic, our customers benefit by fast delivery on custom designs.

Another important feature of Alberox is that all of the plating requirements are met "in-house", including nickel, gold, copper, silver, bright tin and solder plating!

We have several types of BRAZING FURNACES for brazing ceramic-to-metal and metal-to-metal parts in HIGH VACUUM, or HYDROGEN, ARGON or any other specified atmosphere! The standard operating procedure is to custom program the brazing cycle, taking into account the ceramic, the types of metals, braze materials and the atmosphere.

Alberox exercises complete control, from the design stage right through all manufacturing operations — to meet or exceed the highest quality standards and maintain the fastest delivery in the industry. Products made by Alberox are assured to outperform all design parameters set for them!

HIGH PRESSURE FEEDTHRUS *Alberox A-950 Alumina* has extraordinarily high compressive strength (350,000 psi). By using this strength to its best advantage, ceramic-to-metal seals can be produced to withstand high static or dynamic pressures. Thousands of these seals have been manufactured by Alberox.

MULTITERMINAL FEEDTHRUS Multiterminal feedthrus differ from multipin connectors in that individual feedthru terminals are brazed or welded into a metal deck or flange. These feedthrus are generally used for higher voltage applications than can be accommodated by a regular ceramic pin deck or connector. Alberox has an extensive line of catalog tubular terminal bushings which are often used for the individual feedthrus. In this way, custom multiterminal feedthrus can be delivered quickly.

POWER FEEDTHRUS Copper, or just about any other type of metal, from ⅛ inch to over 1 inch in diameter can be provided in power feedthrus. Modifications of our standard catalog tubular and fluted terminal bushings are often perfectly suited, and custom ceramic-to-metal seal designs can be easily accommodated. Weldable or brazeable flanges also can be added to the feedthrus to allow easy installation on existing flanges or bulkheads.

INSULATORS AND STANDOFFS Insulators and standoffs can be supplied in tubular or fluted shapes, bare or glazed, with or without metal adapters or studs. Alberox manufactures plain ceramic parts for use as spacers, insulators, supports, isolators, decks, or washers. Metalized and glazed cylinders are also available for envelopes of high power electron tubes such as Thyratrons or for vacuum switches.

CATALOG HIGH VOLTAGE BUSHINGS Alberox stocks the largest variety of high voltage tubular and fluted high alumina terminal bushings in the industry. Modifications to these catalog items are easily made. Typical modifications are: special studs, brazed-in-center conductors, different metal parts, finishes and ceramic dimensional changes. Fast delivery at reasonable prices can still be maintained. Ask for Catalog #472 which illustrates details of these parts.

Alberox is ready to assist you with your ceramic-to-metal seal design requirements. When you need FAST DELIVERY of SUPERB ceramic-to-metal seals, at realistic prices — contact ALBEROX.

Big shielding problem?

How's this for size?

This magnetic shield was built by Amuneal for a critical military radar application. Even though the shield is pretty large, it's the size of the *problem* that we're talking about. The specifications called for extremely tight dimensional tolerances and the most stringent electrical performance characteristics we have ever encountered. All this, plus the fact that we had only six weeks to design it, determine the best method of fabrication, tool up, build it, perform complete analytical testing, and deliver. This is just one example of Amuneal's performance in designing and manufacturing magnetic shields to meet all kinds of tough specifications. If you have a shielding problem, big or little, talk it over with us. A phone call is all it takes.

Ferrite Cores for the Electronics Industry.

FAIR-RITE

Where innovation is an everyday event.

The better-known characteristics of ferrites have been exploited for three decades: high permeability, low losses at high frequencies, high volume resistivity; reasonable cost....

IF transformers; antennas; high frequency, high Q inductors; high voltage transformers; deflection components; TV balun transformers and a host of other devices have been designed around ferrite cores.

Yet the lesser-known properties of ferrites offer the potential for still more innovative applications.

Want to know about the solutions our ferrite cores can offer?

Ask for our application notes on the wide variety of shield beads we produce, and see how the uncommon attenuation characteristics of ferrites can help solve EMI/RFI suppression problems.

Ask for our notes on broadband matching transformers, and discover how 98% efficiency can be achieved in handling kilowatts of power.

Investigate the use of ferrite toroids and beads in high frequency linear amplifiers, and shrink the size and voltage requirements for output stages of HF transmitters.

Switch-mode power supplies; saturable reactors... let us help you innovate. Write, phone or TWX us.

Send for our latest catalog on your letterhead.

A smaller size Sticky-Fingers beryllium copper contact strip, providing high RFI/EMI shielding effectiveness in less space.

Series 97-520* measures just 3/8" wide, and 1/2" at maximum deflection. Yet, it provides shielding effectiveness greater than 92 dB at 1 MHz magnetic and 92 dB at 10 GHz plane wave, and has a dynamic range of 0.10".

It is ideal as an all-purpose contact strip for metal cabinets and electronic enclosures where space is critical. Series 97-520 is especially recommended where variations exist in the space to be shielded and in applica-

These standard beryllium copper contact strips offer ideal RFI/EMI shielding of doors and movable components in electronic screen rooms, trailers, computers and communication equipment.

They have been scientifically designed for wiping closures, but are also useable in compression. Moreover, these contact strips feature extremely good endurance life as well as a high dynamic range. In tests, attenuation up to 100 dB has been measured at 400 MHz and 10 GHz. Fastening of strip is usually accomplished using screws or rivets. Soldering is optional.

For pricing, please advise catalog number, total footage and surface finish required.

Other finishes available on special order.

geometry of the strip design, continually compressed, further assists in strengthening the bond. Soldering or mechanical fastenings are completely eliminated. Shielding effectiveness of 97-500 has been proved greater than 46 dB at 14 kHz magnetic and 108 dB at 10 GHz plane wave.

STICKY FINGERS are unaffected in temperature ranges from —65 F. to 225 F. The adhesive meets salt spray, shock and humidity cycle tests, and complies with MIL-D-8634, MIL-N-25076 and MIL-P-19834A.

Furnished in approximately 24" lengths, cut to the center of nearest slot.

Typical Performance Capabilities

Frequency	Field	Shielding Effectiveness At 1/16" Gap 97-500	At 1/8" Gap 97-500
60 Hz	Magnetic	12dB	–
400 Hz		14	–
14 kHz		46	38dB
200 kHz		70	63
1 MHz		≥90	≥90
1 MHz	Electric	≥120dB	≥120dB
18 MHz		≥145	≥145
400 MHz	Plane Wave	117	109
1 GHz		104	100
10 GHz		≥108	100

Approx. Pressure Required in Pounds/Linear Foot

At 1/16" Gap: 36 lb/ft

At 1/8" Gap: 16 lb/ft

sticky fingers

Twist Series

Self-adhesive beryllium copper contact strips with scientific twist design offer narrower-than-ever electronic gaskets for general shielding applications where space is at a premium.

Series 97-555 single edge contact strip measures only ⅜" wide, yet shielding effectiveness is 71 dB at 14 kHz magnetic and 102 dB at 10 GHz plane wave. Ideal for all types of panels or electronic enclosures.

Series 97-560 strips for cabinets with panel-divider bars. Unique double edge design, ½" wide, permits panels to be easily removed and replaced without damage to the installed strip.

Typical Performance Capabilities

Frequency	Field	Shielding Effectiveness (Fully Deflected) 97-555	97-560
14 kHz	Magnetic	71dB	≥75dB
200 kHz		96	≥97
1 MHz	Electric	≥120	≥120
18 MHz		≥120	≥120
400 MHz	Plane Wave	≥115	≥115
1 GHz		≥106	≥106
10 GHz		102	≥126

Approx. Pressure Required in Pounds/Linear Foot

	97-555	97-560
Deflected to .030" height	30 lbs./ft.	48 lbs./ft.
.015" height	67 lbs./ft.	72 lbs./ft.

Balanced Finger Strips offer 90° corners and quick spring clip fastening.

When contact strips are required for rectangular openings or structural joints, they can be quickly and easily installed in field or factory.

Matching 90° corners provide a perfect fit and spring clips hold the strips firmly in place. (No special tools or soldering required.) Result: More simplified design and construction of cabinets and enclosures.

These strips feature a mechanically balanced design to provide high dynamic range, long endurance life and multiple lines of contact under relatively light pressure. Attenuation of more than 100 dB at 200 kHz, 400 MHz and 10 GHz has been measured for a single, rectangular enclosure using Series 97-436 gaskets.

Spring Clip Fastener

Designed for use with Series 97-436 and Series 97-435 finger strips. Permits full strip compression, yet is easily installed without special tools. Fastener also permits temporary lifting of gaskets for cleaning of contact surfaces.

finger contact strips

of MICRO-PROCESSED ***beryllium copper, alloy 25***

for grounding and shielding in high-frequency equipment . . . for forming large-diameter contact rings

A wide variety of beryllium copper finger contact strips provides engineers and designers with flexibility in the solution of grounding and shielding problems. Various lengths, widths, contours and hole locations are possible for many of the standard catalog items shown here.

Engineering Design Kit Available

An Engineering Design Kit is available to permit the engineer the utmost latitude in his search for the exact strip configuration to effectively meet his needs. Each assortment contains at least 34 items.

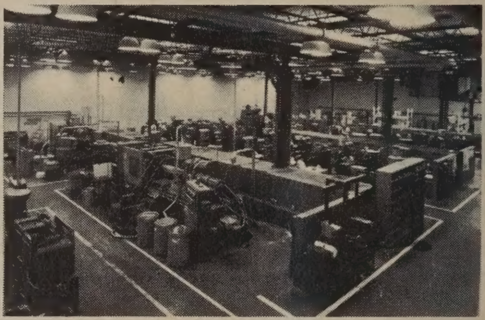
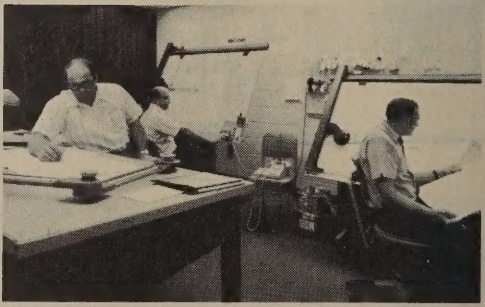
People make the big difference at ITT THERMOTECH

QUALITY CONTROL—Constant attention and adherence to strict quality control assures consistent part characteristics from run to re-run, press to press and within each lot.



MANUFACTURING—Over 200 injection, compression and transfer presses, from one ounce to 25 ounces and as large as 450 tons, offer a wide latitude for short and long runs.

COMPUTER FACILITIES—In-plant computer facilities are used for work order analysis, raw material control and production scheduling to insure fast, on time delivery of orders.



MOLD DESIGN—Skilled mold designers translate customer specifications into mold designs that meet customer's exact part cost, tolerances and quality requirements.

ITT THERMOTECH—The Full Service Molder—For a quarter of a century ITT Thermotech has served the nation's industrial and military markets with high quality custom and stock precision moldings. Employing close to 500 employees, Thermotech offers customers complete molding facilities for thermoplastic, thermoset and fluorocarbons plus secondary operations.

All tool room, manufacturing and inspection facilities have been approved by government agencies.

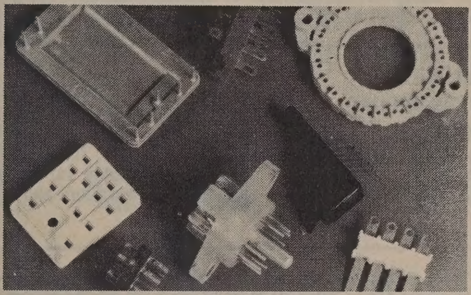
ITT Thermotech now encompasses these former subsidiaries and divisions:

- Booker Wallestad
- Thermotech Plastics
- Florida Division
- Wilcox Products
- Thermotech Coil Forms and Components

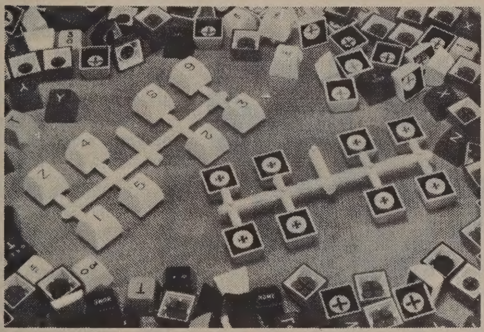
Other secondary services available:

- Silk Screening
- Hot Stamping
- Secondary Finishing
- Heat Sealing
- Sonic Welding
- Mold Maintenance

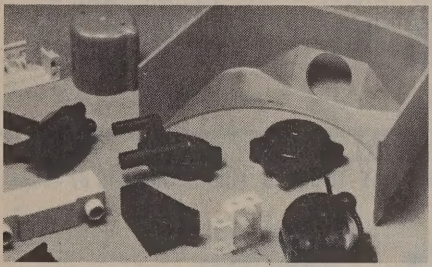
Precision makes the big difference at ITT THERMOTECH



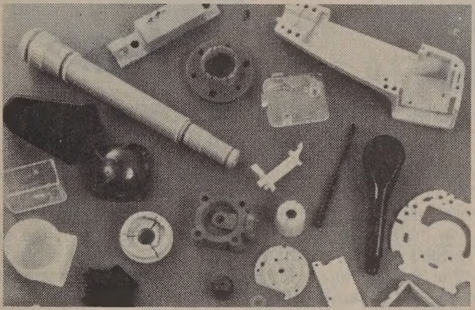
INSERTS—Highly automated equipment in both primary and secondary operations produce low-cost, precision parts with inserts for electrical/electronic components.



TWO COLOR KEYTOPS—An extensive library of stock and custom designed legends are available to meet all but the most unusual of alphanumeric and conventional control keytop needs.



CASES AND HOUSING—Miniature or large cases and housings of thermoset, thermoplastic or fluorocarbons materials with a wide variety of characteristics and configurations are available in both short and long runs.



INTRICATE PARTS—Intricate configurations and shapes in a wide variety of plastics are commonplace challenges to design and production personnel.

COILS AND BOBBINS—Years of experience bring superior technical know-how to the design and manufacture of simple or intricate shapes and sizes, thin or heavy walled coil forms and bobbins.

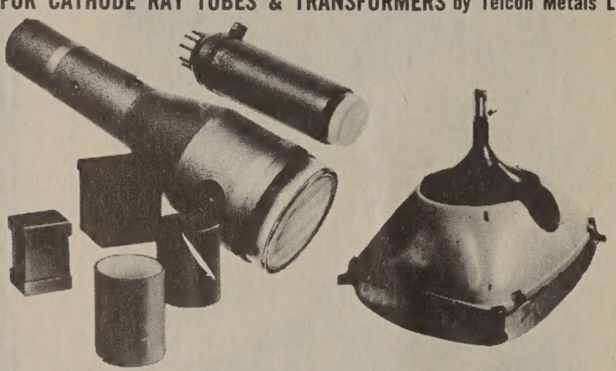
TELCON METALS LTD. is one of the largest manufacturers of nickel-iron and cobalt alloys for magnetic applications. Their fully integrated facilities provide raw materials and fabricated components covering the whole range of commonly used soft magnetic materials.

SOFT MAGNETIC ALLOYS SUPPLIED IN STRIP—ROD—BAR—WIRE—FOIL

NICKEL-IRON	COBALT-IRON	THERMOSTATIC BIMETALS
76% Nickel 50% Nickel 36% Nickel	PERMENDUR 49 PERMENDUR 24 SUPERMENDUR	We offer a complete selection of Telcon thermostatic bimetals for various temperature ranges and environments. Their varied mechanical properties, hardnesses, thermal activities, and thermal and electrical conductivities make it easy for the user to select the right one for his particular requirements. Available in thicknesses from .004″ to .125″ and widths as small as 1/16″ in coils and flat lengths.

MAGNETIC SHIELDS UP TO 30″ DIAMETER FOR CATHODE RAY TUBES & TRANSFORMERS by Telcon Metals Ltd.



MELTING, ROLLING, FABRICATING, ANNEALING FROM START TO FINISH IN ONE FACILITY

Telcon Metals, Ltd., has its own in-plant facilities to handle every phase of the magnetic shield manufacturing process from start to finish. This means 100% Telcon supervision all the way — from the melting and rolling of the raw material to the fabrication and annealing of the magnetic shield. Telcon's total production method is based on a century of experience in the manufacture of alloys. All these factors are your assurance that you get a sensibly priced, high quality product.

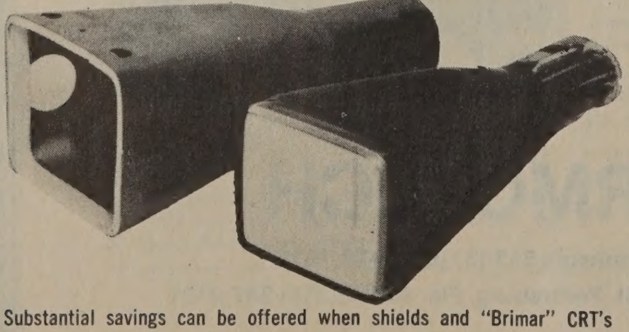
A NEW CONCEPT IN MAGNETIC SHIELD CONSTRUCTION

Specially developed for quantity production of high efficiency complex shields, new TELFORM construction utilizes precision drawn segments to drastically reduce welded seams. The result is extra close fitting shields with improved shielding characteristics. This new technique is applicable for CRT tubes up to approximately 20″ long. No premium charge even though dimensions, finish and appearance are far more uniform throughout batches than conventionally fabricated shields. Rapid delivery after initial tooling. Available in 80%, 50% and 36% nickel-iron alloys.

Extremely Competitive Prices on Custom Shields.
Send for Illustrated Catalog and Ask for a Quotation.

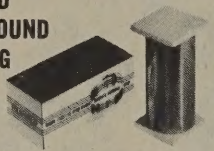
OTHER TELCON PRODUCTS

- Thermostatic Bimetals
- High Permeability Strip, Rod & Wire for Component Manufacturing
- Glass to Metal Seal Alloys



Substantial savings can be offered when shields and "Brimar" CRT's are purchased as assemblies.

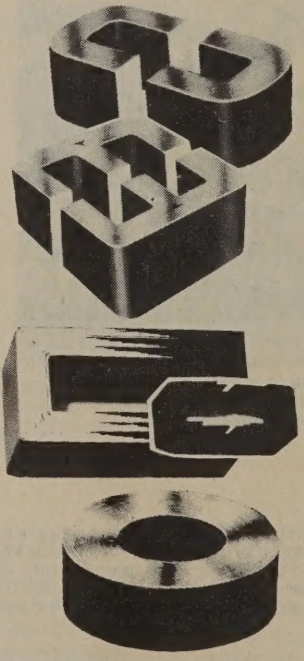
TELSHIELD WRAP-AROUND SHIELDING FOIL



Shield components efficiently, simply, from unwanted signals with easy-to-use Telshield. Available in 0.001 in.-0.010 in. thickness tape, in widths of 3/32 in-6 in. Special handy packs for laboratory and R & D use.

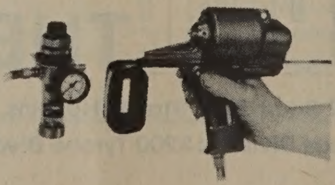
ALL ALLOYS AVAILABLE AS COMPONENTS FABRICATED IN HOUSE.

E, C AND TOROIDAL TAPE WOUND CORES BY TELCON MAGNETIC CORES, LTD.



- Grain oriented Silicon Steel Cores.
- Made to EIA Spec. RS217 and trade specifications by our British assosiate TELCON MAGNETIC CORES LTD. . . . one of the largest manufacturers of grain oriented silicon steel components.
- Available in all American standard or special sizes to American core numbers. Popular types available from New York warehouse for immediate delivery.
- Sold at prices that help you solve your constantly rising cost level problem.
- Produced by one of the largest manufacturing facilities in the world.
- Now, also available, LL distributed gap cores for small transformers where temperature and/or gap VA may be problems. Can replace 4 to 6 mil cut cores, 6 mil laminations, and sometimes Ni-Fe laminations.
- Toroidal cores available in 2, 4, 6 and 12/13 mil tape thickness. Cores can be supplied impregnated or edge bonded for improved rigidity. Also available gapped or cut.

"C" CORE COMPRESSED AIR BANDING TOOL by TELMAG



Manufacturing rejects caused by variations in banding of "C" transformer cores can now be eliminated. The new "C" core Compressed Air Banding Tool provides consistent banding stresses in assembly-line operation. By making cores useful which were formerly rejected, the tool soon pays for itself.

LINEAR FERRITE CORES

Krystinel manufactures a complete line of standard and custom made ferrites. We maintain a large inventory of standard sizes and shapes as detailed in our catalog. Additionally, special ferrites can be made to your electrical and mechanical specifications if our standard parts do not satisfy your requirements.

Copies of our catalog, as well as samples and technical information, may be obtained by contacting us at our Port Chester office.

Please write to request information on our newly developed K-950 Series of ferrite materials which have been designed especially for pulse applications.

TOUGH ANSWERS TO TOUGH PROBLEMS

FREE...New EMI/RFI Shielding Handbook & Catalog

This abundantly illustrated 124-page handbook presents...a thorough treatment of electromagnetic shielding...practical applications of shielding techniques...a complete guide to EMI/RFI gasket design...a glossary of EMI/RFI terms...and a catalog of products. Edited by the Metex Electronic Shielding Group, leading manufacturer of EMI/RFI shielding materials, components, subsystems. Phone, wire or write us on company letterhead to request your free copy of this new handbook, or to obtain more information on our other free technical services.

emi/rfi
METEX ELECTRONIC SHIELDING GROUP

PLUS
Three more technical services

1 FREE Videotape Presentations
See and hear practical solutions to the problems associated with EMI/RFI shielding.

2 FREE Shielding Seminars
For small groups. Interface with EMI/RFI gasketing experts. Presentations oriented to the group interest. Color slides...videotapes...samples... question-and-answer sessions.

3 FREE Applications Engineering
Get concise, meaningful, technical assistance...technical briefs...personal consultation.

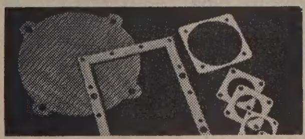
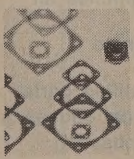
EMI/RFI shielding materials...components... sub-systems

The beginning of any answer to your EMI/RFI problems is right here.

GASKETS AND GASKET MATERIALS

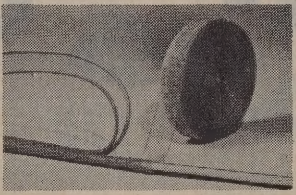
- Strip Gasketing...with and without environmental seal
- Sheet Gasketing...with pressure seal
- Standard Gaskets...including connector and waveguide gaskets...environmental or pressure seal optional
- Custom Gaskets...designed and factory-fabricated to customer specifications

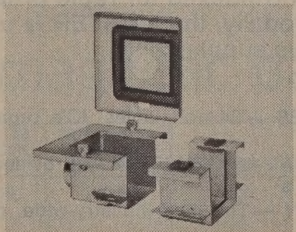


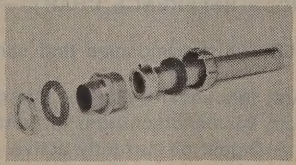


SHIELDING AND CONDUCTIVE COMPONENTS

- Static Discharge Buttons
- Grounding Components
- Cable Shielding Tapes
- Flexible Cable-Shielding Covers
- Shielded Raceways
- Shielded Conduit Fittings

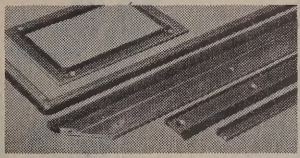


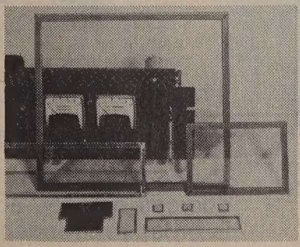


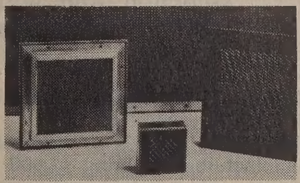


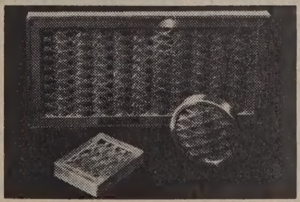
SHIELDING FRAMES AND ASSEMBLIES

- Shielded Frames...ready-to-mount...pressure or weather seal optional
- Custom-Fabricated Frame Lengths...ready for customer assembly
- Bulk Frame-Strip Gasketing
- Shielded Windows...ready to install...custom-fabricated
- Shielded Ventilating Panels
- Shielded Air Filters









CONDUCTIVE-ELASTOMER EMI/RFI XECON® GASKETS AND COMPOUNDS*

- Composite EMI/Pressure-Seal Gasketing...7 durometer ratings...sheets, strips, custom die-cut gaskets, molded gaskets
- Armored Xecon™ High-Tensile-Strength Gasketing
- Vulcanized Xecon™ Pressure-Seal Gaskets
- O-Ring Gaskets for Waveguides
- Standard Connector Gaskets
- Conductive Adhesive
- Conductive Compounds...for EMI/RFI shield coating, caulking, cementing

*Xecon gasketing compounds are homogenous conductive elastomers consisting of high-grade silicone in which are suspended microscopic silver-coated glass particles that provide the conductive path through the gasket.

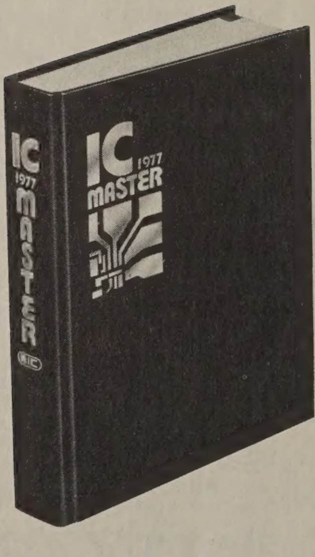
WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

United Technical Publications, 645 Stewart Ave., Garden City, NY 11530

CO-NETIC & NETIC EMI shielding material

MAGNETIC SHIELD DIVISION

MAGNETIC SHIELD DIV. CO-NETIC NETIC PERFECTION MICA CO.

A complete stock of CO-NETIC (high permeability) and NETIC (high saturation) shielding alloys is available in foil and sheet form. Our engineering department will gladly assist you in the development of shield designs to meet your prototype or production requirements.

Perfection Mica Company
750 North Thomas Drive
Bensenville, Illinois 60106
(312) 766-7800 TWX (910) 256-4815

sheet stock: (standard—30″ x 120″) Shipped immediately from stock.

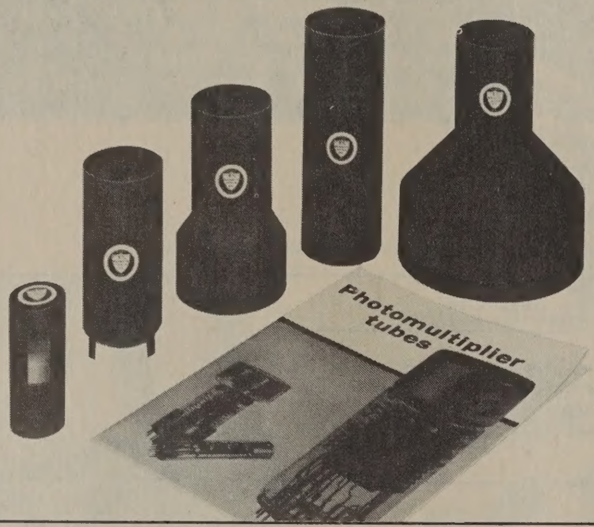
photomultiplier tube shields...

MAGNETIC SHIELD DIVISION

Precision shields shipped from stock for 90% of photomultiplier tubes.



Perfection Mica Company
750 North Thomas Drive
Bensenville, Illinois 60106
(312) 766-7800 TWX (910) 256-4815

CO-NETIC magnetic shields improve the amplification characteristics of photomultiplier tubes by providing significant attenuation of magnetic fields. Effective shielding is ensured over a wide range of field intensities. When grounded, the shields provide protection against electrostatic interference.

CO-NETIC shields are highly resistant to shock and vibration. The shields have minimal retentivity and do not require periodic re-annealing.

Custom engineered shields are available in any quantity. Call for design assistance or send print for prompt quotation.

NOTES:

Unless otherwise noted:

Dimensions — All ID

Material — .040″ Thick Co-Netic AA

Finish — Black baked enamel; texture outside, flat inside.

- **a** — Upper end closed.
- **b** — Dimensions D & E are measured from the outside of the outer shell. Dimension G is the maximum OD. Material — Three layers, separable; outer .049 Netic S3-6, two inner .031 Co-Netic AA Finish — Netic S3-6, black oxide; Co-Netic AA, none.
- **c** — Has three tabs, spaced 120° apart, to grip the metal collar of the PM tube.
- **d** — Material — .031″ Co-Netic AA.

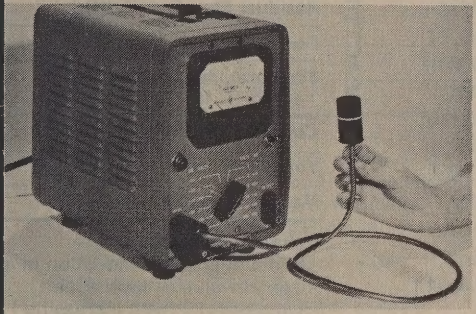
complete magnetic shielding accessories & mica

MAGNETIC SHIELD DIVISION

Perfection Mica Company
750 North Thomas Drive
Bensenville, Illinois 60106
(312) 766-7800 TWX (910) 256-4815

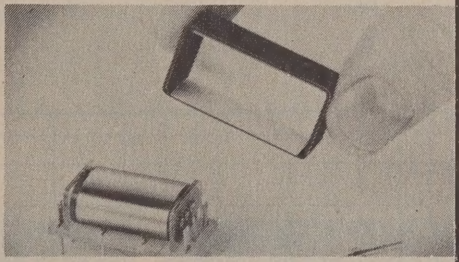


LAB KITS & PROBES

Lab Kit contains assorted CO-NETIC and NETIC shielding materials, double-faced pressure sensitive tape for shield construction and 20 millivolts/gauss A.C. magnetic pickup probe .... all for	$99.50
Probe only, 20 mV/gauss	$49.50
Ultra sensitive probe only, 60 mV/gauss	$79.50

COMPONENT SHIELDS

Standard enclosures for transformers, CRT's, small motors, relays and reed switches are available from stock. Magnetic Shield Division is also the preferred source for custom shields to your specifications. Extensive standard and special tooling provide fast shipment. Call for design assistance or send print for prompt quotation.

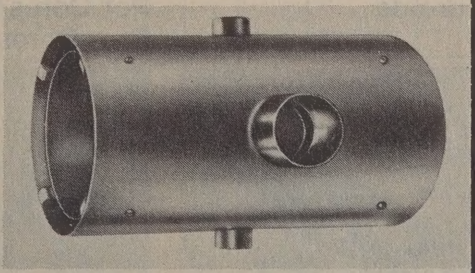


INTER-8 WEAVE CABLE

Our patented, woven configuration of four signal leads provides superior attenuation over a twisted pair. Attenuation improvement of unshielded INTER-8 WEAVE cable is −20 db for radiation and −12 db for pickup. An additional −20 db is obtained with our braided CO-NETIC jacket. Available in solid/plain or multiple/tinned AWG 24 wire.

ZERO GAUSS CHAMBERS

Zero gauss chambers provide the ultimate in magnetic shielding. Magnetic Shield Division's general-purpose zero gauss chamber offers a significant reduction in both static and time varying fields found in laboratory and research environments. Degaussing coils can be furnished, and a Helmholtz coil system can be incorporated to generate known fields. Three concentrically spaced CO-NETIC chambers with closed ends and removable covers are provided. Placement of openings is optional. Attenuation in excess of −60 db is typical.



MICA INSULATORS

Available in sheet, wafer, flakes and ground form. Clear, natural and built-up sheet stock thicknesses from .002″ to .062″. Save tooling expense on a wide variety of fabricated parts, including semi-conductor insulators in .002″ to .003″ thickness with .002″ hole tolerances. Excellent heat resistance and high dielectric strength provide improved breakdown protection and increased efficiency of electronic components.

Stackpole CERAMAG® Ferrites:

Stackpole has pioneered since 1947 in the large-scale production of soft ferrite components—products that have set the standard for uniformity and dependability in the electronics industry.

CERAMAG is Stackpole's trademark for its family of soft spinel ferrite compositions. Each material is usable over a portion of the frequency range of 1 kHz to over 200 MHz.

The large selection of CERAMAG materials and tooling that Stackpole offers makes possible new designs heretofore impractical or impossible.

As each CERAMAG material has a unique set of characteristics, the design engineer should carefully choose the precise ferrite needed to achieve an optimum system design.

Our expertise lies in designing the best core material and providing it in a usable configuration at the most reasonable cost. We will work with your design engineer and support him with our expertise.

For information on The Right Ferrites, write for Bulletin 59-103, to: Stackpole Carbon Company, Electronic Components Division, St. Marys, Pa. 15857. Telephone: (814) 781-1234. TWX: 510-693-4511.

	MATERIAL GENERIC TYPE
CHARACTERISTICS	**Initial Permeability (μ_o)**
	Saturation Flux Density (B_s)
	(@ H oersteds)
	Residual Flux Density (B_r)
	Coercive Force (H)
	Temperature Coefficient of μ_o (25°C to 100°C) (T.C.)
	Curie Temperature (T_c)
	Volume Resistivity @ 25°C (ρ)
	Max. Usable Frequency (F)

Saturation Induction, B_s— Maximum possible induction in a material; value is approached asymptotically (with increasing H) by the normal magnetization curve and the hysteresis loop.

Coercive Force, H_c— The demagnetizing force necessary to reduce the Residual Induction to zero.

Residual Induction, B_r—
The magnetic induction corresponding to zero magnetizing force in a magnetic material which is in a symmetrically, cyclically magnetized condition.

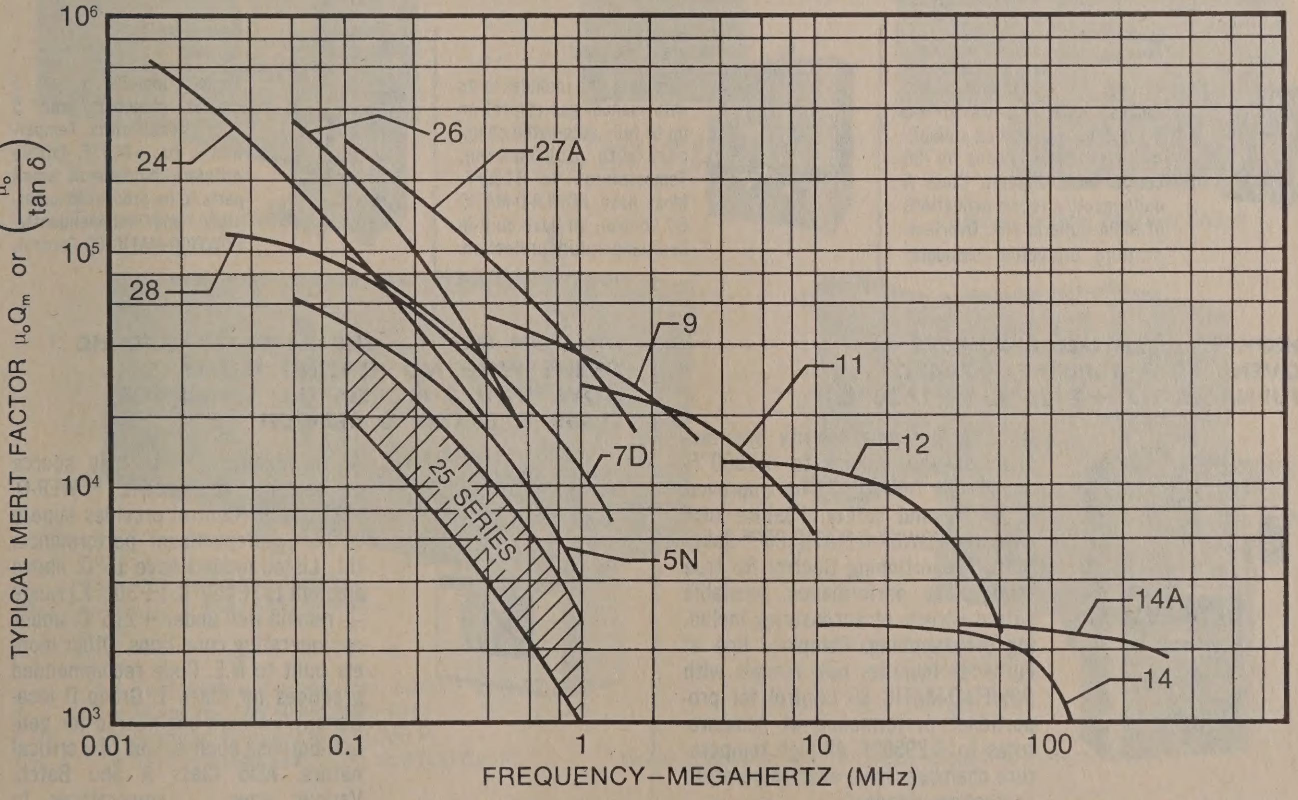
Temperature Coefficient of Initial Permeability, T.C.—
The relative change of initial permeability per degree centigrade, in percent.

Curie Temperature, T_c—
Stackpole Carbon Company defines Curie Temperature as that temperature, in degrees centigrade, at which the μ_o of a material becomes 1/10 the maximum value of μ_o.

Volume Resistivity, ρ—
The resistance of a one-cm cube of material.

General Tolerances on Characteristics
These will vary depending upon configuration and application.

μ_o	±20%
μ_m, B_s, B_r, H_c	±25%
T.C.	±50%
T_c, ρ, D.F., K	Typical
B_u	+15%



CERAMAG is a family of materials capable of operating over the frequency range of 1k Hz to over 200 MHz.

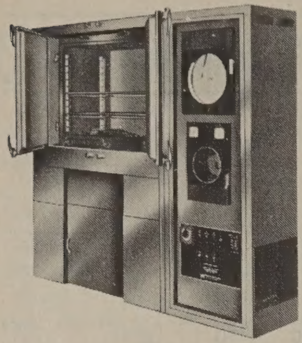
The $\mu_o Q_m$ product may be regarded as a figure of merit for a given ferrite, since it provides a measure of the useful frequency response. Q_m is the material quality factor, and μ_o is the toroidal initial permeability.

The section of the $\mu_o Q_m$ curve shown indicates the most suitable area of operation for each material in the ungapped (toroid) configuration.

STACKPOLE®

BLUE M

TEMPERATURE CONTROLLED EQUIPMENT FOR CRITICAL RESEARCH/PRODUCTION WORK



FULL-RANGE TEMP./HUMIDITY CHAMBERS

Maximum capability cabinets to perform all current MIL humidity tests. Dual wet and dry bulb POWER-O-MATIC 60® Proportioning Control Systems assure absolute stability and reliability. Horizontal mechanical convection units feature programming, separate monitoring recorder, and built-in overtemperature protection. Range: −18°C. to +93°C. (±½°C.). Meets MIL-202D, Method 106C, Step 7A; automatically performs −10°C. dip without changing cams. Maintains R.H. ±½%. Chamber sizes: 5.8, 11, 27 and 64 cu. ft.

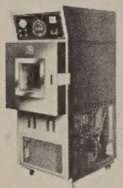
ALSO . . .

Full-Range Single Steady State Chambers

HUMID-FLOW™ Air-Cooled Chambers

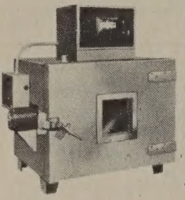
New −40°C. Extended Range Cabinets

New +150°C. Steady State Cabinets



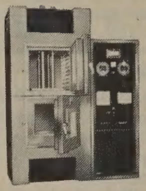
VERSA-RANGE® REFRIGERATED TEST CHAMBERS

Two versatile ranges: −100°F. to +400°F. and −40°F. to +200°F. Five chamber sizes — 3 to 64 cu. ft. Patented POWER-O-MATIC 60 Control for incomparably reliable performance. Also −40°F., −120°F. chest type units. Overtemperature protection.



STABIL-THERM® LN$_2$ CHAMBERS

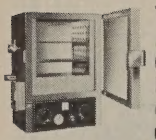
Front or top opening models. −185°C. to +200°C. with solid-state instrumentation. Similar units with CO$_2$ as coolant have −73°C. to +300°C. range. Quality construction throughout, including overtemperature protection.



THERMAL SHOCK TEST CHAMBERS

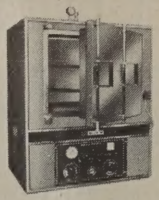
Dual Cabinets for MIL-STD-202 and 883; Versa-Whirl Baths for MIL-STD. 883, Method 1011, Conditions A to F. Latter available as an integrated, automated facility.

TYPICAL EXAMPLES OF AMERICA'S FINEST, MOST COMPLETE LINES OF OVENS AND FURNACES



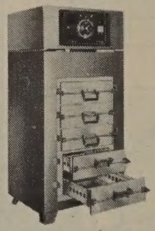
LIFE-TEST OVENS

Variety of types, sizes and ranges. POWER-O-MATIC 60 Control for unequalled reliability. Also Batch Ovens to 96 cu. ft. including new Class A units meeting recommendations of NFPA Bulletin 86A. Overtemperature protection standard.



INERT GAS OVENS

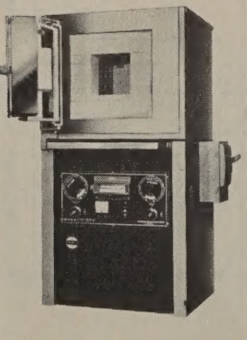
Complete line includes units with manual gas control on up to fully automated chambers with programming. Temperatures to 1100°F. Most have POWER-O-MATIC 60 Control; all have built-in overtemperature protection.



DRAWER OVENS

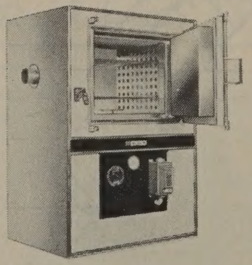
Models include 3 and 5 drawer chambers and 5 door, 5 shelf units. Temperatures to +600°F. Enable different batches of small parts to be processed separately and independently. POWER-O-MATIC 60 Control.

HIGH TEMPERATURE CHAMBERS — OVENS TO +1300°F. (+704°C.) . . . FURNACES TO +2950°F. (+1620°C.)



Ultra-Temp Ovens, gravity and mechanical, with ranges to +1300°F. Completely redesigned for improved efficiency and safety. Feature new patented POWER-O-MATIC 80™ Solid-State Proportioning Control for true straight-line performance. Available with a variety of accessories including programming. Complete line of Furnaces includes new models with POWER-O-MATIC 80 Control for proportional performance at temperatures to +2950°F. All high temperature chambers have overtemperature protection standard.

FRICTION-AIRE™ — THE PATENTED ELECTRIC OVENS WITH NO HEATING ELEMENTS . . . NOW WITH 3 MODELS U.L. LISTED FOR CLASS 1, GROUP D SERVICE!



Air turbulence is the only source of heat . . . non-electric POWER-O-MATIC 90™ Control provides superb ±0.5°C. proportional performance. U.L. Listed models have 15°C. above ambient to +150°C. (+302°F.) range — remain well under +215°C. under any operating conditions. Other models built to N.E. Code recommended practices for Class 1, Group D locations . . . others engineered for general-purpose applications of a critical nature. Also Class A and Batch. Various sizes . . . temperatures to +260°C. (+500°F.). You can't buy a safer chamber!

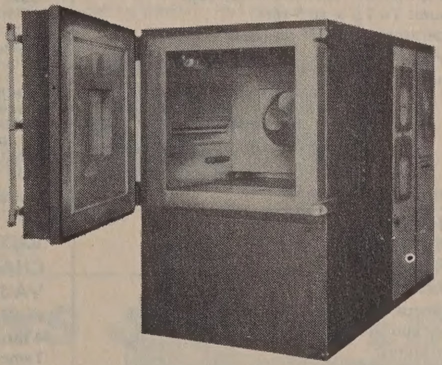
Fluid Conditioner



Temperature/Altitude
(300,000 Ft.)

- Temperature ranges from —300°F to +1200°F
- Humidity: 5% RH to 95% RH
- Altitude: Ambient to 300,000 Ft.
- Test volumes: 0.4 Cu. Ft. to 5,000 Cu. Ft.

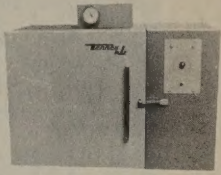
BENCH TOP TEMPERATURE CHAMBERS

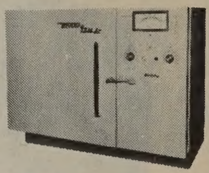
Work space:
1½ & 5 cubic feet.
Temperatures:
−112°F to +350°F
±¼°F
(−80°C to +177°C)



Bulletins 108 and 123.

BENCH MODEL TEMPERATURE-HUMIDITY CHAMBERS

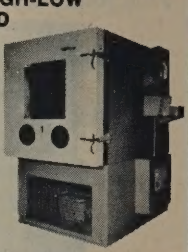
Work space:
3 & 5 cubic feet.
Temperatures:
−100°F to +350°F
(−73°C to +93°C)
Humidity capabilities:
20% RH to 98% RH.



Bulletins 101 and 123.

TENNEY SERIES HIGH-LOW TEMPERATURE AND TEMPERATURE HUMIDITY TEST CHAMBERS

Work Space:
5 cubic feet to
64 cubic feet.
Temperatures:
−112°F to +350°F.
(−80°C to +177°C)



Bulletins 103, 104, 106, 126 and 127.

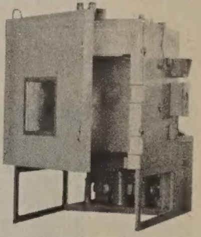
TH & T SERIES MODERATE RANGE TEMPERATURE-HUMIDITY CHAMBERS

10 cubic feet thru
65 cubic feet.
Temperatures:
Low to 0°F (−17°C)
High to 200°F (+93°C)
Humidity:
optional

Bulletins 109 and 111.

MIL-STD-781 AGREE TEMPERATURE-VIBRATION CHAMBERS

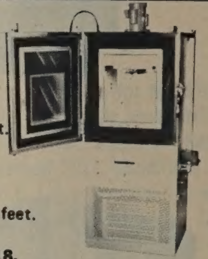
Sizes:
Available in sizes for mating with vibrator units having table tops from 2 square feet to 40 square feet.



Bulletin 105.

TENNEYZPHERE ALTITUDE-TEMPERATURE CHAMBERS

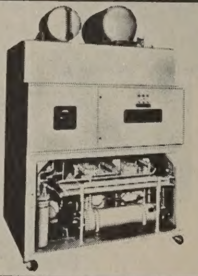
Work space: 5 cubic feet thru 64 cubic feet.
Temperatures:
−100°F to +350°F
(−73°C to +177°C)
Altitude: To 200,000 feet.
Humidity: Optional



Bulletins 117 and 118.

KOLD-PAK PACKAGED REFRIGERATION SYSTEMS

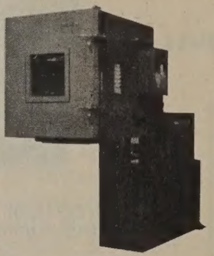
Temperatures:
Low to −100°F
(−73°C)
High to +250°F
(+121°C)



Bulletin 114.

VIBRATION TEMPERATURE CHAMBERS

Sizes: Standard from
5 cubic feet
to 64 cubic feet.
Temperatures:
−100°F to +350°F
(−73°C to +177°C)
Humidity: Optional



Bulletin 102.

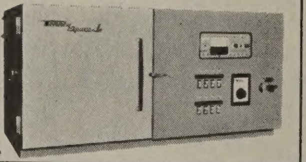
MULTI-RANGE PRECISION TEMPERATURE BATHS

Work space:
One gallon &
9 gallon.
Temperatures:
−100°F to +248°F
(−73°C to +120°C)

Bulletins 107 and 125.

SPACE JR. THERMAL VACUUM SPACE SIMULATORS

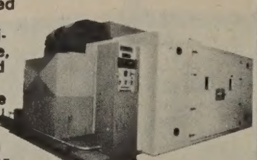
Work space: 14" diameter x 12" deep
Vacuum: To 7.5 x 10^{-8} torr.
Temperatures: −100°F to +350°F
(−73°C to
+177°C)



Bulletin 112.

WALK-IN ENVIRONMENTAL CHAMBERS AND ROOMS

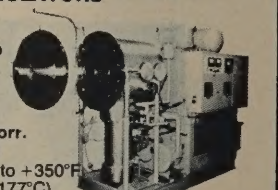
Used for controlled environmental parameters of altitude, temperature, rain, humidity and other conditions. Available as single piece unitized or semi-unitized packages. Also, in modular panels for field construction.



Bulletins 113

THERMAL VACUUM SPACE SIMULATORS

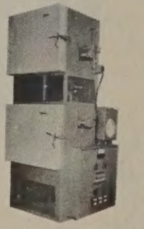
Sizes:
Standard,
1½ feet to
6 feet
diameters.
Vacuum
capability:
To 1 x 10^{-9} torr.
Temperatures:
From −320°F to +350°F
(−196°C to +177°C)



Bulletin 120.

MECHANICALLY REFRIGERATED THERMAL SHOCK CHAMBERS

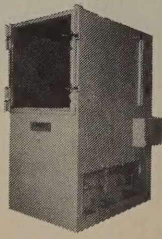
Work Space:
3, 5 & 8 cubic feet
Temperatures:
Top compartment
to +350°F (+177°C)
Lower compartment
to −100°F (−73°C)
Center compartment
ambient optional.



Bulletin 121.

VACUUM CHAMBERS AND VACUUM OVENS

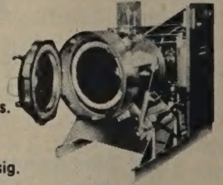
Work space:
4 thru 27 cubic feet.
Temperatures:
To +300°F (+150°C)
Vacuum:
To 148 microns
(200,000 feet)



Bulletin 110.

AUTOCLAVE SYSTEMS

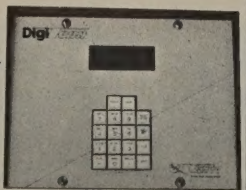
Sizes:
Small laboratory
models to large
production units.
Temperatures:
+500°F (260°C)
Pressure: to 1000 psig.
Vacuum : Optional



Bulletin 122.

DIGITENN

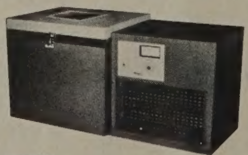
Microprocessor based programmer for new and existing chambers.



Bulletin 131

TENNEY SUB-ARCTIC INDUSTRIAL CABINETS AND COLD STORAGE CHESTS

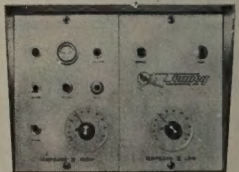
Work space:
6 thru
12 cubic feet.
Temperature ranges:
Low to −120°F)
(−84°C)
High to +350°F (+177°C)



Bulletin 115.

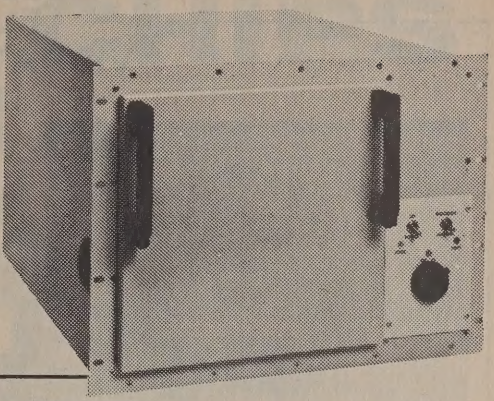
TEMPGARD® II ALARMS

Hi only or
Hi Low
Temperatures:
−125°F to
+425°F
(−87°C to
+218°C)



Bulletin 124.

TEMPERATURE CHAMBERS EXPENDABLE GAS COOLED



Resettable to .02°—No RFI—No overshoot. No triple point problems (valve freeze ups) with 300 psi CO_2.* Low gradients—Low energy & coolant consumption—Staged heating. Utmost reliability, efficiency and convenience. Programable. Controller—Sigma's Model C Precision, described below. Range: Standard -75° to 199°C, extendable on order.

PARTIAL LIST OF STANDARD MODELS

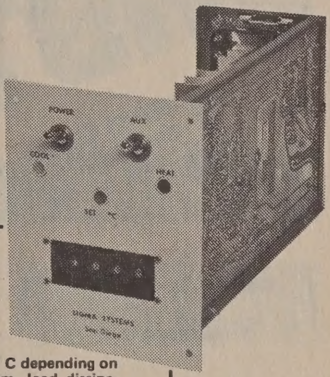
Model	Volume liters	Cm. dims. H x W x D	Volume Cubic feet	Inch dims. H x W x D	Door	Type of chamber
18	18	27x25.4x26x4	.64	10.63x10.0x10.4	Pull out	Portable
18R	18	27x25.4x26.4	.64	10.63x10.0x10.4	Pull out	Rack mount
26	26	27x36.8x26.4	.92	10.63x14.5x10.4	Pull out	Bench–45 cm. wide
52	52	63.5x26.7x30.7	1.83	25.13x10.5x12.08	Hinged	Adjustable shelves
100	100	63.5x52.0x30.7	3.50	25.13x20.5x12.08	Hinged	Bench - shallow
170	170	63.5x52.0x51	5.96	25.13x20.5x20.08	Hinged	Bench - deep
600	600	88x89x76.5	21.1	34.6x35.0x30.12	Hinged	Floor

ASK FOR DETAILED SPECIFICATIONS AND CHAMBER SELECTION GUIDE

When the optional N/C "Manual Program" switch is not requested, an auxilliary switch and circuit is provided to power an interior light, AC jack, etc. (customer installed). All chambers have a 38 mm. (1.5 inch) port in lower left side.

***All low pressure CO_2 chambers equipped with Sigma's special valve (Patent applied for).**

CHAMBER CONTROLLERS FOR RETROFIT



An economical cure for problems of reliability or temperature drift & inaccuracy in older chambers. Worthwhile provided the chamber has acceptable air flow dynamics, insulation, door seals and response characteristics.

MODEL C PRECISION TEMPERATURE CONTROLLER SPECIFICATIONS & OPTIONS

(SUPPLIED ON ALL SIGMA CHAMBERS UNLESS OTHERWISE SPECIFIED)

TYPE: Automatic mode selecting, solid state, electronic chopper stabilized, time proportioning, zero switching (R.F.I. free) integral cycling, opto coupler isolated, with lead proportional lag damping and provision for two stage heating.

AMBIENT TEMPERATURE COMPENSATION: ±.01% (±.0001°C/°C) nominal.

TEMPERATURE EFFECT DUE TO LINE VOLTAGE INSTABILITY: Internal regulated power supplies render this negligible (not measurable) for voltage excursions of ± 20%.

TEMPERATURE ACCURACY (ABSOLUTE) AT SENSOR: ± .7°C at -78.89 C; ± .5°C at 260°C and as affected by ± .25% linearity of set point pot between these points. Linearity to ± .05% is available as an option.

DEAD BAND: .04°C Nominal (Dependent on gain setting).

SET POINT STABILITY: Typically ± .01° to .02° C depending on chamber size, circulation, cooling medium, load dissipation, etc.

STAGE HEATING (PROPORTIONAL BAND): Full on cooling to full power, .15°C (gain dependent).

POWER HANDLING CAPABILITY, STANDARD: 30 amps at 240 volts (7.2 Kilowatts). Optionally to 900 amps at 600 volts (higher powers made to specifications).

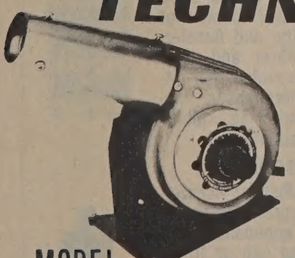
STABILIZATION TIME: Nominally 30 to 60 seconds after reaching proportional band depending on chamber characteristics.

NULL INDICATION BAND: ± .7°C nominal.

PROGRAMABILITY: Optional—No Charge.

AVAILABLE WITH VERNIER DIAL FOR ADJUSTMENT TO .02°

TECHNICAL HEAT GUNS & BLOWERS



Continuous stepless adjustability; Ambient to 900°F with locking dial for quality controlled processing. Durable, dependable. Sigma's heat guns eliminate the need for operator skill. Give the correct temperature for any requirement—Locked in. They are easily calibrated and certified for specific applications.

NO NOZZLE DEFLECTORS NEEDED. The air is mixed to acceptable temperature uniformity in the gun by a specially designed nozzle (patented). The standard heat source of hundreds of manufacturers & laboratories.

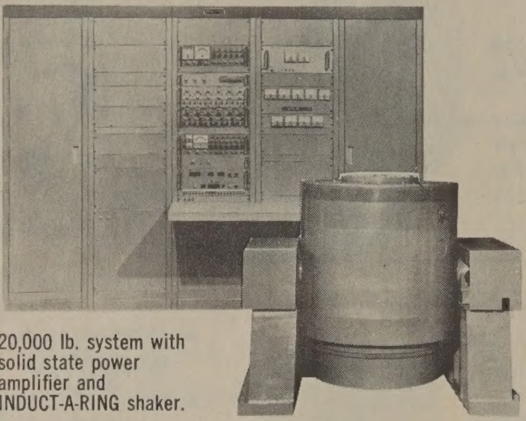
MODEL B900

$130.00

SIGMA SYSTEMS CORPORATION (FORMERLY DELTA DESIGN ENGINEERS, INC.)

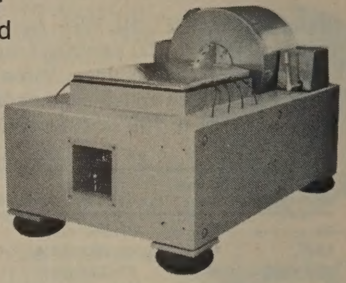
3163 Adams Avenue San Diego, CA 92116 Area Code (714) 283-3193

ELECTRODYNAMIC VIBRATION TEST SYSTEMS



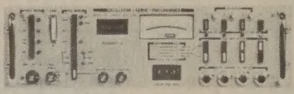
20,000 lb. system with solid state power amplifier and INDUCT-A-RING shaker.

- 50 to 36,000 lb. force systems for sine and random vibration
- Systems powered by solid state amplifiers to 256 kVA
- INDUCT-A-RING shakers for unmatched performance and reliability
- Control instruments for MIL-STD-810 testing
- Multiple shaker systems
- 6 inch stroke electrodynamic force generators
- PERMALINE Slip Table on combined seismic base



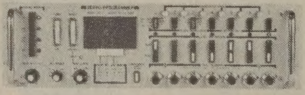
Shaker and slip table on PERMALINE combined seismic base.

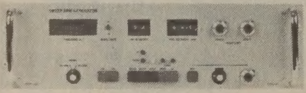
CONTROL INSTRUMENTATION



BASIC SINE CONTROL

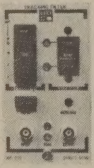
The OSP-4 is our most economical, compact sine control system. Provides sine sweep and servo control for test programs of up to four levels. Input charge amplifier is standard.





DELUXE SINE CONTROL

The OSC-1S and SPA-7 comprise our most comprehensive sine control system. Sine sweep and programmable servo control are provided for tests of up to seven levels. Both frequency and vibration level are digitally displayed. Sweep rate and test duration may be preselected to provide automatic shutdown. Automatic or manual modes for selecting crossover frequencies are provided. Input charge amplifier is standard.

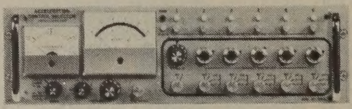


TRACKING FILTER

Model TF22 Tracking Filter features fixed or constant 10% bandwidth which varies between 2 and 200 Hz. Log DC output is standard. Modular construction allows six channels per 19″ rack.

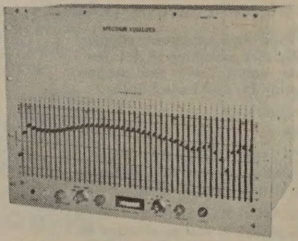
SIGNAL AVERAGER

Model MAC-8 Averaging Control features eight individually selectable data channels for control to the average signal level. Can be used for sine or random testing.



SIGNAL SELECTOR

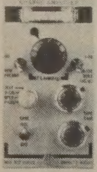
Model ACS-6 automatically selects the highest (or lowest) acceleration input. Accepts six sine acceleration signals, and gates to the output whichever signal reaches its preset limit.



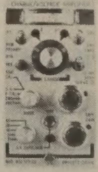
SPECTRUM EQUALIZER

Model E109B Spectrum Equalizer features 45 active, four-pole filters with individual gain controls. Convenient equalization can be performed using this unit in conjunction with tracking filter analyzer or real time analyzer.

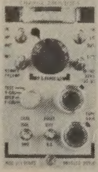
SIGNAL CONDITIONERS



Model D22PM Basic Charge Amp



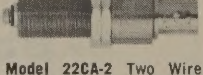
Model D22PMH Differential Charge Input Switchable Filters



Model D22PMR Charge/Strain Gage Amp

Model D22PMB Bridge Conditioner

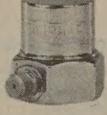
Model 1610M Vibration Monitor provides readout of acceleration, velocity or displacement on 1% log scale meter.



Model 22CA-2 Two Wire Remote Charge Preamp. Operates with any Model 22 instrument.

Model 11PA-2 Two Wire Remote Voltage Preamp. Operates with any Model 22 instrument.

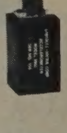
The D22 Series Signal Conditioners are offered for use with piezoelectric and strain gage transducers. Integrated circuit design provides superior low noise characteristics in a rugged modular construction. Units shown here are only a few examples of a complete family of signal conditioners that permit a wide variety of dynamic and static measurements.



A full line of piezoelectric accelerometers are offered for general purpose vibration testing and for many special applications.

INDUSTRIAL VIBRATION MONITORS

The Series 800 Vibration Alarm Module is used with the Series 8800 Industrial Accelerometer to monitor Displacement, Velocity, and Acceleration. Adjustable alarm and time delay circuits are provided, permitting low cost, comprehensive machinery health monitoring. Multi-channel systems available.



INDUSTRIAL ACCELEROMETERS

The Series 8800 Industrial Accelerometer features integral electronics giving low output impedance, and rugged cable. Bearing cap or frame mounted accelerometer technique utilizes the total vibration spectrum, compared to limited response of proximity probes or velocity pickups.

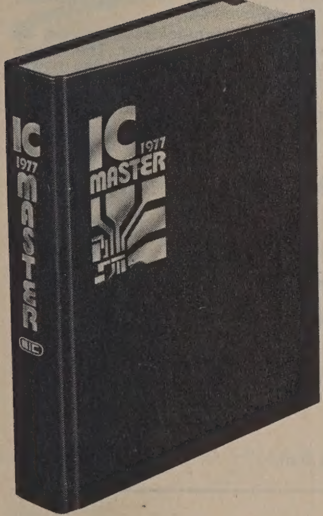
WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

THERMOELECTRIC COOLERS

INTRODUCTION TO THERMOELECTRIC PRODUCTS

Thermoelectric cooling units have many unique advantages over other types of coolers in their application area.

SIZE

They can be tailored to fit the application by easy addition or subtraction of modules to fill the need accurately and avoid waste.

POWER INPUT

Due to tailored modular construction, power requirements can be reduced to a minimum. Power is provided through a single pair of leads.

RELIABILITY

There are no parts that wear or clog, and no delicate moving parts. Gases, corrosive liquids or chemicals that will leak or dissipate with age are also eliminated. These features result in greatly reduced maintenance requirements.

LOGISTICS

There are no requirements at the load for pumping refrigerant or for a source of coolant such as liquid nitrogen to be added during operation of the system.

REMOTE CONTROL

The unit and heat sink are required in the cooling area; the power supply and most other control equipment can be mounted and operated remotely.

COOLING RANGE

Thermoelectric coolers are capable of operating from any heat-sink temperature from +100°C to −100°C.

TEMPERATURE CONTROL

Simple electronic control schemes allow control within a fraction of a degree of desired load temperatures above or below ambient.

HEAT SINKS

The design of the heat sink or heat exchanger is a very important aspect of a good thermoelectric system.

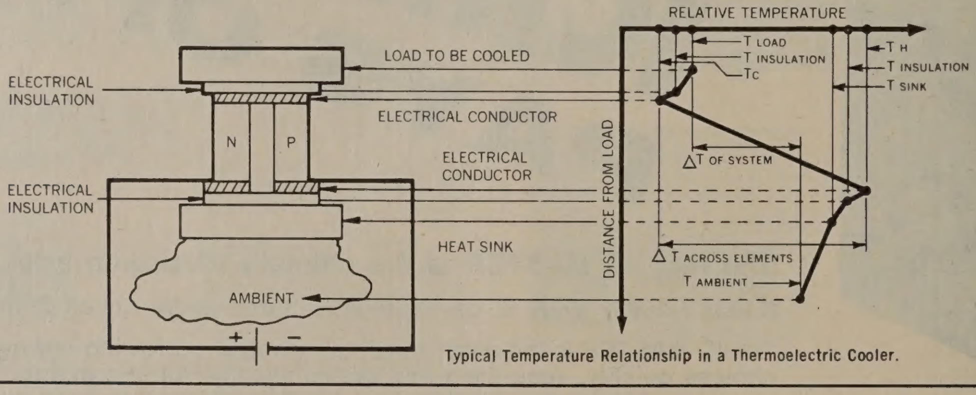
The figure below illustrates the steady-state temperature profile across a typical thermoelectric device from the load side to the ambient.

The total steady-state heat which must be rejected by the heat sink to the ambient may be expressed as follows:

heat rejected (Q_s) = heat absorbed from load (Q_e) + power input (V•I) + heat leakage (Q_l)

If the heat sink is not capable of rejecting the required Q_s from a given system, the temperature of the entire system will rise and the load temperature will increase. If the thermoelectric current is increased to maintain the load temperature, the COP tends to decrease. Thus, a good heat sink contributes to improved COP.

Energy may be transferred to or from the thermoelectric system by three basic modes: conduction, convection, and radiation. The values Q_e and Q_l may easily be estimated; their total along with the power input gives Q_s, the energy the hot-junction must dissipate.



Typical Temperature Relationship in a Thermoelectric Cooler.

TIME TO COOL OR HEAT VARIOUS MATERIALS

The figure below shows the heat transfer required to cool or heat a given weight of known material in one hour without a change of state. When a change of state occurs (freezing, melting or vaporizing) the additional heating or cooling capacity required can be estimated by multiplying the weight of the given material by the appropriate latent heat. The equation plotted in the Figure at the right is:

$$Q \ \Delta t = m \ C_p \ \Delta T \qquad (2)$$

- ΔT — required temperature change (°F)
- C_p — average specific heat (BTU/lb-°F)
- m — weight of material (lbs)
- Δt — time interval
- Q — heat removed or supplied (BTU/hr)

Using this formula, it is easy to design a photographic bath for processing film rapidly. The bath consists of 2 lbs of water in a 1 lb stainless steel container. The bath must be cooled from 110°F to 60°F in 1 hour. How much heat must be removed?

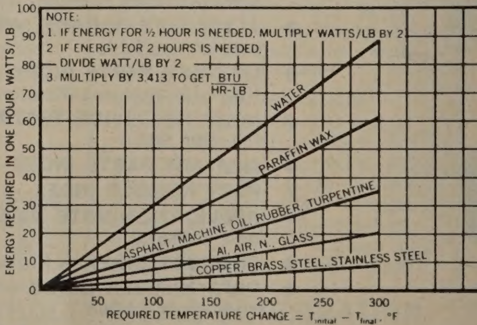
The temperature change is (110-60) = 50°F.

Enter Figure below on the horizontal axis at 50°F. Move vertically to the stainless steel and water curves and read on the vertical axis:

15 watts/lb × 2 lbs of water = 30 watts
1.6 watts/lb × 1 lb of stainless = 1.6 watts

Thus, for 1 hr, 31.6 watts are required.

The time provided by this graph is based on a constant heat transfer during the one hour period. Actually, a thermoelectric cooler would not pump heat at a constant level due to change in ΔT and this should be taken into account in a design. An effective heat pumping capacity of a thermoelectric cooler can be estimated as the heat pumping capacity at a temperature difference equal to one-half of the final operating ΔT (usually, initial ΔT = 0). Borg-Warner can provide assistance in more accurate transient design.



Energy to be Added or Removed Thermoelectrically in One Hour for Various Materials.

The Where and the Why of Cooling Thermoelectrically

...WITH UNITS FROM

The principles, applications, and design possibilities of thermoelectric cooling are discussed in this booklet.

STANDARD

2 - 5 Stages
From T_H 27°C
To T_C 180°K

Over 7000 Optimized Cascade Designs Using Partial Standard Borg-Warner Thermoelectric Modules.

- Customer Design at Standard Cooler Prices
- Lowest Price Per Watt of Heat Pumped
- Quick Delivery, Usually one Week ARO

HIGH PERFORMANCE

2 - 14 Stages
From T_H 27°C
To T_C 130°K

Individual Computer Aided Cascade Design Using Standard or High Performance Thermoelectronic Materials.

- Higest Heat Pumping Capability
- Lowest Temperatures
- Lowest Power Input

FOR RAPID QUOTATIONS CALL THE FACTORY

Specify: Q_C — Active Heat Load to be Pumped
T_H — Ambient or Hot Side Temperature
T_C — Cold Side Temperature Required
V — Operating Voltage Desired
P — Maximum Power Available
Environment — Vacuum or Dry Air
Size Requirements

Cascaded Thermoelectric Coolers are available at premium prices that will withstand ambients or bake-out temperatures of 150°C.

CUSTOM DESIGN

Engineering back-up is available for designs to meet customer specifications.

APPLICATION OF THERMOELECTRIC PRODUCTS

Cold traps for vacuum chambers
Crystals
Discrete silicon components
Inertial guidance systems
Infrared detectors
Integrated circuits
Lasers
Masers
Nuclear radiation detectors
Parametric amplifiers
Constant temperature chambers
Environment chambers
Integrated circuit test chembers
Temperature baths
Display cabinets
Ice cube makers
Photo developing solution coolers
Photomultiplier tubes
Vidicon tubes
Cold probes
Dew point hygrometers
Microscope cold plates
Mobile drug coolers
Surgical instrument-coolers
Test tube coolers

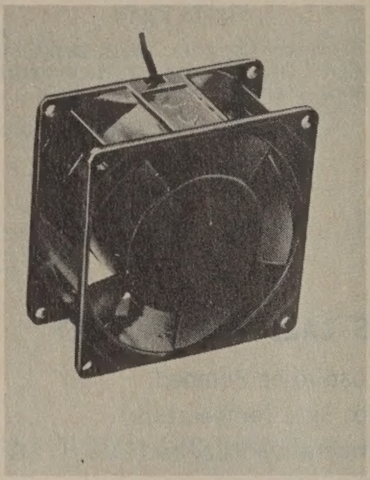
AXIAL FAN MODEL 126



- Popular 3⅛ x 1½ inch size
- 2¹³⁄₁₆ inch mounting centers
- 22 CFM at .1 inch of water, 32 CFM at Free Flow
- 50% quieter than competitive fans
- U.L. recognized file 64887
- Reduced flow versions for very quiet applications
- Sleeve or ball bearing

Part Number	Volt	Current	Delivery

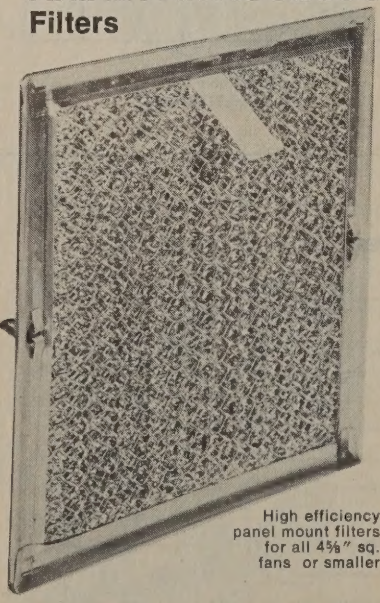
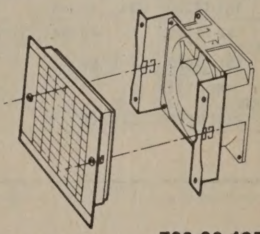
AXIAL FAN ACCESSORIES

Filters



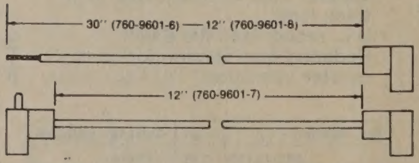
High efficiency panel mount filters for all 4⅝″ sq. fans or smaller

Filter P/N	Size	Mounting Hole Centers
760-100-45	5¹¹⁄₁₆ x 5¹¹⁄₁₆ x ¼	5³⁄₁₆±¹⁄₁₆



760-96-125

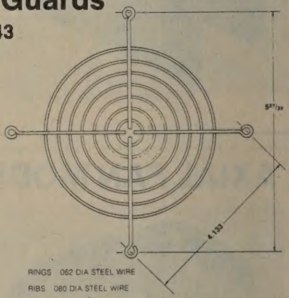
For all 4½ inch square fans; prevents coarse materials from entering unit. Filter mounts easily to the body of the fan by use of attached spring clips. Wire mesh screen is held in place by a pair of quick-release screws.



UL approved #18GA wire molded terminal ⅜ inch end stripped.
760-9601-6 — 30″ long
760-9601-7 — 12″ jumper for multiple connection
760-9601-8 — 12″ long

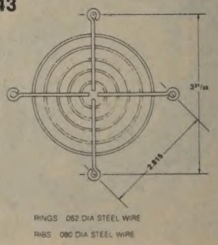
Finger Guards

760-9601-43



Fits all 4½ inch square fans. Meets UL spacing requirements.
Bright zinc finish over steel wire.

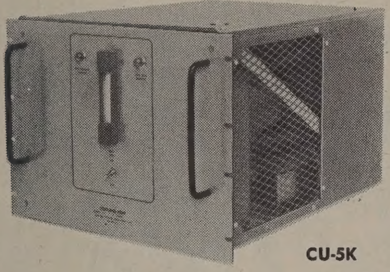
760-12601-43



Fits all 3⅛ inch square fans. Meets UL spacing requirements.
Bright zinc finish over steel wire.

COOLING UNITS
HEAT EXCHANGE-REFRIGERATING

Electro
IMPULSE, INC.



CU-5K

Heat exchange cooling units are useful whenever it is desirable to prevent runaway heat conditions. Heat is absorbed by a circulating coolant liquid, then exhausted into the ambient by forced air passing through a radiator.

Use this series when coolant temperature can be allowed to rise above ambient.

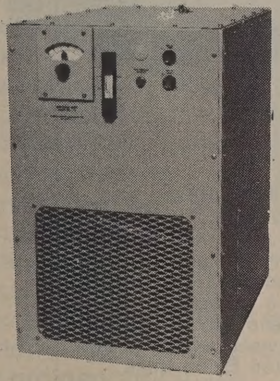
CU SERIES
WATER TO AIR HEAT EXCHANGERS

Model	Cap Watts (BTU/Hr)	(1) Temp. Rise (Water)	Coolant Flow	Max. Press.	Std. Op Volt	Size LxWxH	Wt.
CU-500	500 (1700 BTU)	10/500 w	.5	30	115-1-60	10x14x20	60
CU-5000	5000 (17,000 BTU)	5/KW	1	50	115-1-60	23x17⁷⁄₁₆x14	75
CU-10,000	10,000 (34100)	4/KW	2	50	115-1-60	22x17½x18	95
CU-20K	20,000 (68,000 BTU)	1.25/KW	5	60	208/230 1-60	33½x21½x30	175
CU-50K	50,000 (170,000 BTU)	0.5/KW	12	60	208/230-3-60	40x40x40	250
CU-100K	100,000 (341,000 BTU)	0.3/KW	20	60	208/230-3-60	64x96x68	400

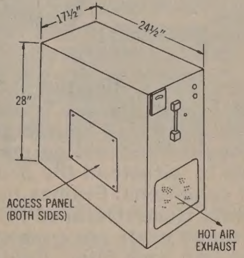
(1) Measured coolant rise above ambient per °F per unit watts indicated at rated flow using water.

Optional Equipment Available: Flow switch, Thermometers, Thermostat, Flowmeter, Heater and Water De-ionizer.

RU SERIES



RU-75



Models from this series are required when coolant temperatures must be below ambient. Using refrigeration, they can provide temperatures to 0 degrees C and below, while removing up to 11,000 watts of heat.

These units are ideal for remote applications. Coolant temperatures are low, flow rate is steady, and the final heat sink can be in a location which will not cause overloading of air-conditioning equipment.

Special options can provide temperature control of ±0.15 degree F, while combinations of refrigeration and heating can hold temperatures at any point above ambient.

Model	Amb. 70°F Capacity Watts Water @ 65°F	Amb.90°F Capacity Watts Water @ 65°F	(1) Coolant Flow	Max. Press.	Std. Op Voltage	Size LxWxH	Wt.

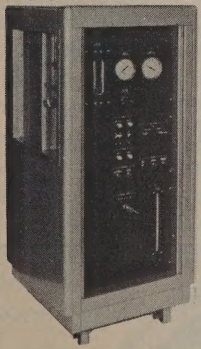
RU-12.5	900	780	.5	35	115-1-60	34x18x14	150
RU-25	1180	1050	1	50	115-1-60	23x13½x22	200
RU-50	1780	1560	1	50	115-1-60	17x17x15½	220
RU-75	2600	2300	1	50	115-1-60	24⅝x17¾x28¼	230
RU-100	3350	2900	3	60	208/220-1-60	24⅝x17¾x28¼	230
RU-200	4630	4130	3	60	208/220-1-60	26⅛x18¾x36¾	240
RU-300	7100	6100	4	60	208/230-3-60	32x18x36	300
RU-400	11,000	9000	5	60	208/230-3-60	32½x18x36⅜	390

(1) Recommended min. flows — other flow rates available.

Optional Equipment Available: Thermometer, Thermostat, Flow Meter, Heater.

CUSTOM UNITS AVAILABLE



If your cooling requirements are not satisfied by any of our standard units, we invite you to contact us for a quotation on a special unit. We can provide units for almost any cooling requirement. Military units are our specialty. The unit shown at the left is a Military heat exchanger designed to circulate and cool Monsanto coolanol 25. For qualification, it underwent rigorous environmental testing. We have in-house facilities and test chambers for vibration, temperature, humidity, altitude, etc. Ground support units to circulate and cool water in accordance with MIL-W-21965 are also available. Our quality control system conforms to MIL-I-45208A and MIL-Q-9858A.

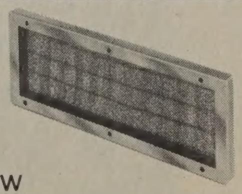
EVANS air filters

for Electronic Cabinet Application

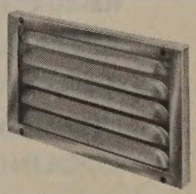
. . . used on Computers . . . Card Readers . . . Tape Transports . . . Transceivers . . . Power Supply Units . . . both large and small cabinetry. Evans Air filters are permanent. Rigid. Aluminum. Made to withstand the brutal abuse of military field conditions. Frames have mitered corners for smooth, close tolerance fit. Die cut, expanded aluminum grids are criss crossed and precision fitted into each filter. Patented Brillo Lock design gives more air delivery with positive cleaning results.

Tolerance:	± 1/32″
Velocity:	200 to 900 FPM
Efficiency:	75% AFI Test
Finishes:	Available in chemical film finish to meet requirements of MIL-C-5541 . . . MIL-F-14072 . . . MIL-A-8625
Sizes:	Filter of 1/2″ or 3/4″ dimension. Made to a maximum area 400 sq. inches . . . with maximum length 25″ on one side without special bracing. For complete information write or call.



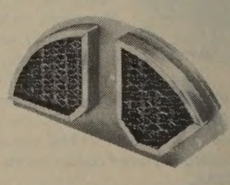
LOW
RESISTANCE FILTER

Special serts permit fastening solidly to blower unit. Made for air drop equipment.



LOUVERED FILTERS

For outside application. Louvers protect filter media from water, ice, snow.



HEAVY DUTY UNIT

For rugged military use. Extra rigid frame made from .063 aluminum.

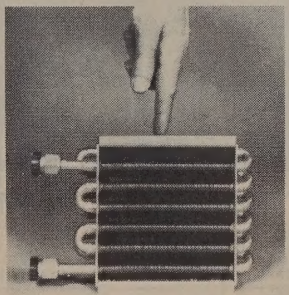
Heat exchangers that fit where others won't.



Compact Lytron heat exchangers fit tight spaces...pump heat out, efficiently.
Solve heat buildup problems with these compact, space-saving Lytron heat exchangers. Choose from 24 standard models, aluminum or copper. Exclusive INNER-FIN® construction increases internal cooling surface and saves up to 50% of ordinary coil space.

Ideal for cooling electronic cabinets, lasers, machine tools, computer systems, X-ray machines, space vehicles, airborne and mobile equipment...and a variety of electronic or mechanical equipment where unwanted heat builds up in tight quarters.

Compact Lytron heat exchangers—they fit where others won't. Special designs for special problems also available. As well as applications engineering assistance.

For compact size, minimum weight, proven reliability, prompt service and delivery at low cost, contact Lytron Incorporated, 2 Dragon Court, Woburn, Massachusetts 01801.
Phone: (617) 933-7300.

Thermoelectric heat pumps are now being used in industrial and military equipment that requires small, efficient, vibration free, cooling systems. Marlow Industries Standard heat pumps are available from stock for off-the-shelf delivery. The smaller heat pumps can be mounted on TO-37 or TO-8 headers. The larger modules can be mounted to a Flat Plate for ease of installation into a system. Related products such as temperature controllers/power supplies, and heat sinks are also available.

To assist you in selecting a thermoelectric heat pump for your next requirement, write for our "Guide To Thermoelectric Heat Pumps."

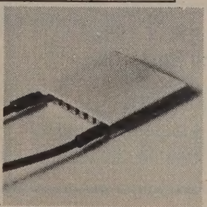
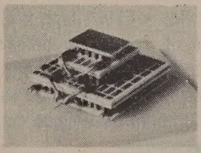
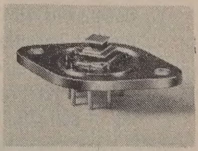
Oriented polycrystalline thermoelectric elements, ceramic faced. Temperature range −150°C to +110°C. For solder interfacing (hot side), specify type TL. Non-ceramic series MC (not tabulated) available in 15, 30, and 60 amperes. Most sizes available from stock. Special modules, assemblies and multi-stage cascades available on special order. Complete catalog available on request.







THERMOELECTRIC HEAT PUMPS

Multi-stage cascades (2 and 3 stage pictured) available in standard and custom configurations. Temperature differentials to 105°C (4 stage). Beryllia ceramic construction with solder interfacing between stages.

Complete line of single stage modules available in 56 models from 2.1 mm x 4.1 mm (67°C max ΔT, 0.30 watts heat pumped, 1.1 amps, 0.48 volts max) to 55 mm x 55 mm (67°C max ΔT, 135 watts heat pumped, 115 amps, 2.1 volts max).

Modules, cascades, assemblies supplied in O.E.M. quantities.

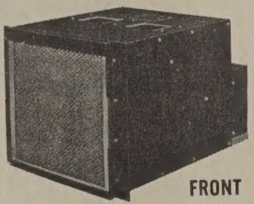
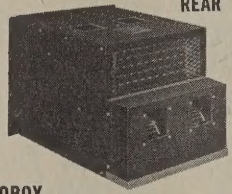
SLIMBOY



FRONT



REAR

LOBOY

AIR CONDITIONERS

- FOR COMPUTER-CONTROLLED MACHINE TOOL SYSTEMS
- ELECTRONICS
- COMPUTERS
- 6000 TO 10,000 BTU

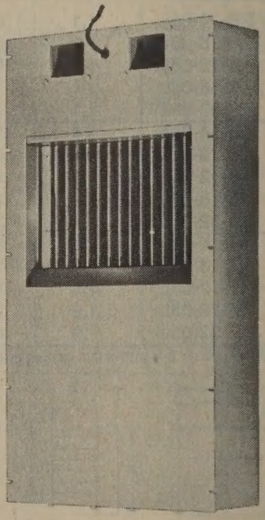
SLIMBOY — For longer life and greater reliability for solid state components and controls packaged door-mounted or rack-mounted units in 115 or 220 volts. Easy to install. Dimensions 19″ wide x 51¼″ high x 17″ deep. Sealed to prevent induction of ambient or polluted air. Centrifugal blowers deliver cool air at high velocity to heat producing components. Pressure-sensing by-pass valve prevents freezing of coil. 20,000 hours continuous duty assured.

LOBOY — All the performance characteristics of the SLIMBOY in a compact 6000 BTU package, 19″ x 15$\frac{23}{32}$″ high x 25$\frac{1}{16}$″ deep. Operates on 115 volts, 60 Hz; 135 lbs; draws 12 amps.

HEAT EXCHANGERS

These water-cooled heat exchangers are designed for mounting in the front panel of a 19″ electronic cabinet and for removing the heat from the air being recirculated within the cabinet. The system does not use room ambient air nor does it exhaust warm inside cabinet air into the atmosphere. An interior cabinet temperature of 80°F (max.) with a 1 KW heat dissipation can be maintained. The unit employs 66°F to 70°F chilled inlet water.

Substantially more cooling may be obtained by using refrigerated water or direct expansion of a refrigerant.



HEAT PIPE HEAT EXCHANGERS

The business end of these McLean cooling systems consists of a bank of heat pipes and two dual centrifugal blowers. A highly efficient method of cooling and recirculating electronic cabinet air without introducing ambient, contaminated, or polluted air into the enclosure.

Hot cabinet air is drawn through the bottom half of the heat pipe bank, thus cooling it, and discharging this cool air into the cabinet at 350 CFM at 0″ SP. A blower draws ambient air through the top half of the heat pipe bank, cooling the heat pipes and discharging heated air into the atmosphere.

A stable interior temperature 16°F above ambient is maintained. The unit mounts on the door or mounting rails of the rack and does not take up interior space.

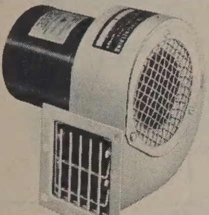
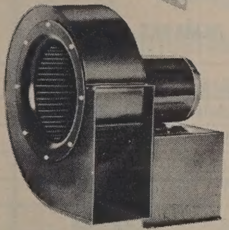
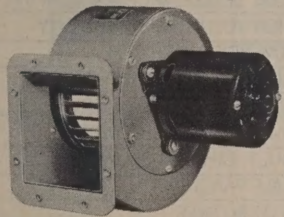
SINGLE & DUAL CENTRIFUGAL BLOWERS FILTER GRILLE PANELS





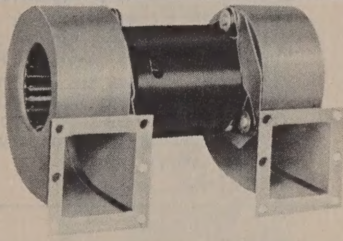


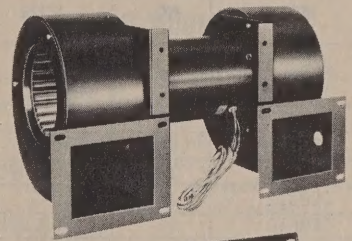
SINGLE CENTRIFUGAL BLOWERS—McLean does have a large selection of single centrifugal blowers engineered to meet a wide variety of CFM output and pressure characteristics. Inlet duct flanges, exhaust outlet flanges and protective screens are available. CW and CCW rotations can be supplied. Each motor has been specifically designed for the application, bearings are properly loaded, double shielded and permanently lubricated. Motor and wheels are balanced to precision tolerances assuring vibration-free operation. All motors are UL approved. These blowers may be operated in any shaft position.

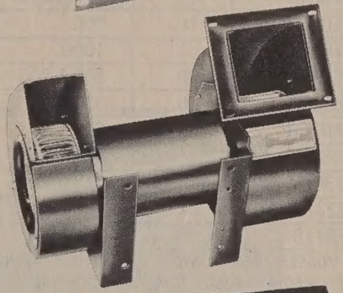
CFM output ranges from 50 to 2000 CFM with static pressures from 0″ to 3.0″ SP. Motors can be supplied for any AC frequency or power.

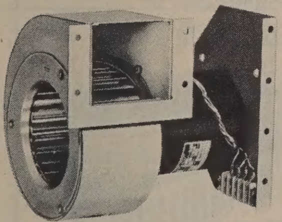
DUAL CENTRIFUGAL BLOWERS—There is an extensive variety of McLean Dual Centrifugal Blowers offering a wide choice of static pressure and output characteristics. Wheel diameters range from 3″ to 12″. Motors can be supplied for any AC frequency or power, single or three phase. Each motor has been specifically designed for the application, bearings are properly loaded, double shielded and permanently lubricated. Motors and wheels are balanced to precision tolerances assuring vibration-free operation. All motors are UL approved.

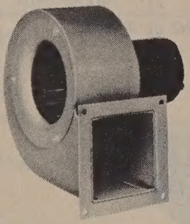
Exhaust outlet flanges, inlet duct flanges, protective screens and various types of mounting flanges and supports are available.

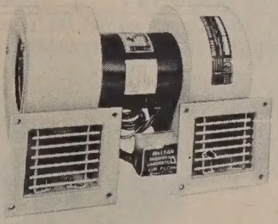


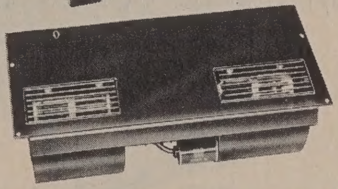




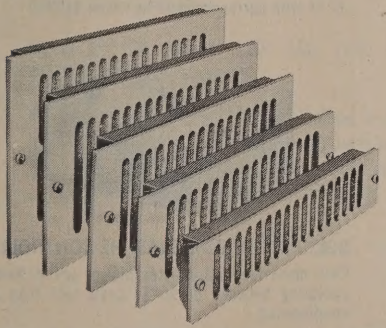








FILTER GRILLE PANELS



Filter Grille Panels are for use in electronic cabinets where louvered area is needed to permit adequate ventilation. These panels may be used as an air inlet or air outlet. They are available with two different grille designs as shown herewith and are complete with dust filters. Can be supplied in standard EAI cabinet heights from 3½″ x 10½″ and widths 9½″, 19″. 24″ and 30″.

PACKAGED COOLING EQUIPMENT

RACK–MOUNTED BLOWERS

Over 100 models available in any panel width. Heights from 3½" to 12¼". Airflows to 1000 CFM. Pressurize systems with cool, filtered air. Prevent dust from entering systems. Standard EIA notching. Quick, easy mounting. No cutting. No filing. Also Packaged Fans for pressurizing or evacuating. Four sizes. Airflows from 275 to 120 CFM. All units available to Commercial, Military or EMI Shielded Specifications.

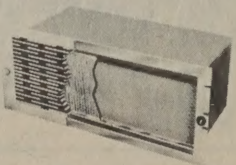
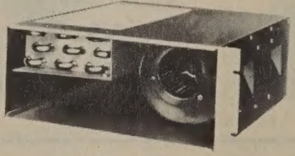
*ALL MODELS ARE 19" WIDTH EXCEPT ID300M (HALF PANEL) **ALL MOTORS ARE 115V 50/60 NZ UL APPROVED
UNITS ALSO AVAILABLE TO OTHER RACK WIDTHS AND FOR RECESSED INSTALLATION



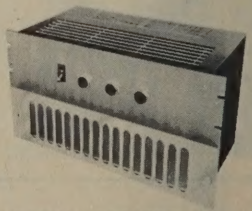
EMI—SHIELDED UNITS

All packaged blowers available with an EMI shield and wave guide media built into the airstream. Cuts signal leakage inward or outward.



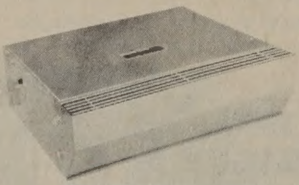
HEAT EXCHANGERS

Maintain cabinet temperature at 80°F maximum with 1 KW heat dissipation. Air recirculates in rack and is cooled by exchanger in blower case.



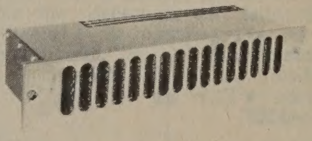
HEATER—COOLERS

For unheated field installations. Maintains an even 65°F with surrounding air as low as 10°F.



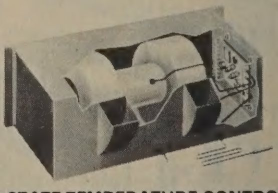
SIDEWINDER BLOWERS

More air. More pressure. Less space. Delivers 180, 350 or 515 CFM in a 17" wide airstream.



SLOT BLOWERS

Ideal for jam-packed circuitry. Delivers 150 CFM from a 3½" panel. Quiet.



SOLID STATE TEMPERATURE CONTROLLERS

Cuts noise level. Modulates blower speed. Keeps operating between 80-90°F. Costs less than air conditioning.

Also a broad line of accessory equipment including grilles, controls, etc.

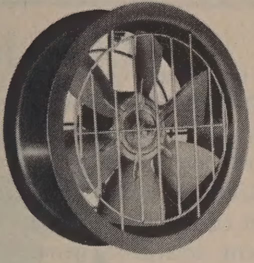
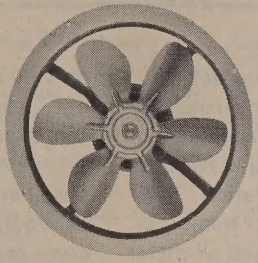
FANS—Venturi, Orifice, Panel, Reversible

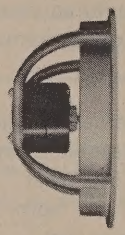


VENTURI-MOUNTED

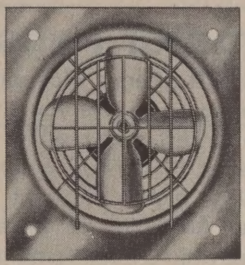
MODEL 1VB80 Push or pull airflow. 420 cfm. Mounts easily on top, bottom, or side. Black anodized aluminum 3⅞″ deep, 1600 rpm, 60 watt, 115 volt, 50/60 Hz, shaded pole, stainless steel shaft, double-shielded ball bearings, permanent lube.



ORIFICE-MOUNTED



SERIES 1NB65-80 Push or pull airflow. 275,300, or 395 cfm. Dimensions 4″ x 8½″ or 4¾″ x 10¼″. Strong, light axial flow aluminum for maximum pressure. Mounts top, bottom, or side. Quiet, vibrationless. 115 volts, 50/60 Hz, 1600 rpm or 3000 rpm.



PANEL-MOUNTED

SERIES 1PB65 Low cost, long life, ready-to-mount, shaft in any position: Easy to install. Propeller side and motor side protected with heavy wire guards. 280 cfm, 3100 rpm, 70 watt, 115 volt, 50/60 Hz, permanent lube. 10″ square panel on 9″ centers, 4 23/32″ deep.

REVERSIBLE FILTER BOX PROPELLER FANS

Mechanically reversible. Wide range of airflows. Flexible mounting. Efficient, versatile, compact.

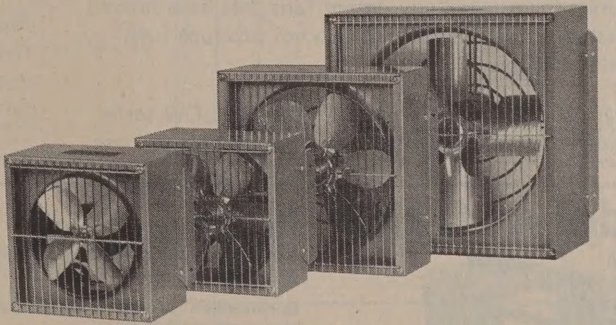
Model 1RB65 delivers 275 cfm, 3100 rpm 4½″ deep x 8⅞″ square

Model 1RB80 delivers 450 cfm, 1650 rpm 4½″ deep x 8⅞″ square

Model 1RB100 delivers 725 cfm, 1600 rpm 4½″ deep x 12⅛″ square

Model 1RB120 delivers 1200 cfm, 1450 rpm 4½″ deep x 15⅛″ square

Model LA120 Back Draft Damper is used in conjunction with Model 1RB120. Louvers automatically open when power is applied and close when power is off. May be used in horizontal or vertical positions.



MODEL 1RB65 MODEL 1RB80 MODEL 1RB100 MODEL 1RB120

Pentaflow™ Premium Grade Fans

PAMOTOR
ONE OF THE **PURDY** GROUP OF COMPANIES

770 AIRPORT BLVD., BURLINGAME, CA. 94010 • (415) 347-1203 • TWX 910-374-2353 • TELEX 34-9373

Pamotor Fans

PAMOTOR offers a wide selection of cooling devices, each designed to give you a maximum performance at minimum cost. As a result of many years of engineering excellence, PAMOTOR fans have earned a reputation for reliability, high quality and low-noise operation. The unique PAMOTOR design has been awarded numerous patents, which, when combined with its rugged all-metal construction, is ounce-for-ounce the best investment for your cooling dollar. PAMOTOR fans are designed to outlast the equipment they cool.

All PAMOTOR fans are warranted to be free of defects in materials and workmanship for a period of one year. The PAMOTOR PENTAFLOW™ premium grade series are warranted for five years.

PAMOTOR fans are ideal for EDP systems and peripheral equipment, electronic test equipment, medical equipment, broadcast equipment, high-power lamps, color processing equipment, emergency generators, color TV/hi-fi amplifiers, electrical controls, telephone equipment, vending machines, airborne equipment, mobile radio equipment, shipboard computers and communications systems.

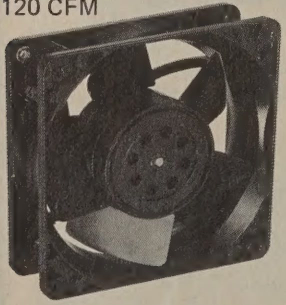
Perhaps the two most important fields of applications for PENTAFLOW fans are: (1) in limited-production deluxe equipment, in professional-grade instrumentation, in few-of-a-kind, custom-designed and permanently-installed systems requiring optimum performance and absolute dependability for many years; (2) as field replacements or retrofit units for original-equipment fans that have proved to be unreliable, are too noisy, or do not produce sufficient cooling airflow.

Every model in the premium PENTAFLOW series incorporates the seven basic points of superiority that are so designed into all standard PAMOTOR fans: lightweight, durable all-metal construction . . . high reliability . . . low noise level . . . low operation temperature . . . optimized shape factor . . . minimum electromagnetic field . . . low true cost.

In addition, PENTAFLOW models possess other important proprietary design features for extended long life, optimized performance, and highest reliability; accordingly, they carry a full 5-year warranty against defects in materials and workmanship.

Model 4600XP

120 CFM



Size: 4½" Square x 1½" Deep

Advantages: Extra high airflow at maximum back pressures.

Construction: All-metal, shaded-pole motor, terminal block.

Life: 100,000 hours continuous at 25° C without maintenance.

Max. Operating Temp.: +55° C.

Safety Codes: UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

Accessories: 5501, 5502, 5503, 5504, 5505.

Fan Drawing: See figure 2, page 15.

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level dB (A)	Noise Level dB (SIL)

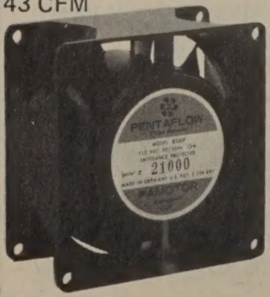
Model 8500P

43 CFM



Size: 3-1/8" Square x 1½" Deep

Advantages: Compact, high airflow, low noise.

Construction: All-metal, shaded-pole motor, 12" leads.

Life: 100,000 hours continuous at 25° C without maintenance.

Max. Operating Temp.: +55° C.

Safety Codes: UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

Accessories: 5508.

Fan Drawing: See figure 7, page 15.

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level dB (A)	Noise Level dB (SIL)

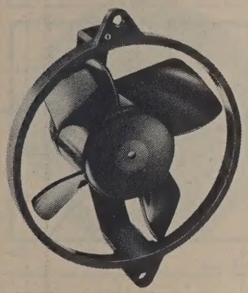
Model 900

34 CFM (variable)



Size: 3-1/8" Diameter x 1½" Deep

Advantages: Ultra compact - little mounting space required, very quiet, variable airflow, extremely low stray field, axial and radial air entry.

Construction: Special polyamid, induction motor, 6" leads.

Life: 100,000 hours continuous at 25° C without maintenance.

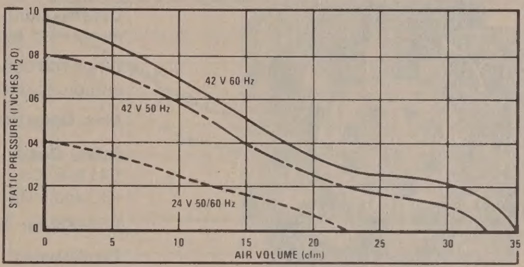
Max. Operating Temp.: +55° C.

Safety Codes: Conforms to UL, CSA, IEC and VDE standards.

Capacitor Required: 5.6 mfd.

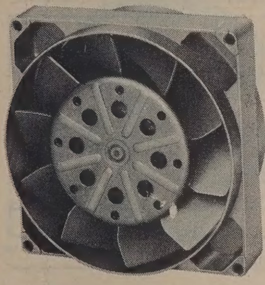
Fan Drawing: See figure 9, page 15.

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
900	X		24 - 42	50/60	2 - 3 W	34	1700	4	22	16.8



Model 1300

120 CFM



Size: 4½" Square x 2" Deep

Advantages: Compact, stable airflow and back pressures, ideal for tube mounting.

Construction: All-metal, induction motor, 3" leads.

Life: 100,000 hours continuous at 25° C without maintenance.

Max. Operating Temp.: +55° C.

Safety Codes: Conforms to UL, CSA, IEC and VDE standards.

Accessories: 5507

Capacitor Required: 2 mfd

Fan Drawing: See figure 10, page 15.

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)

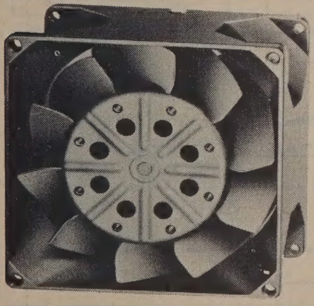
Model 2110

125 CFM



Size: 4½" Square x 2" Deep

Advantages: 400 Hz operation, high airflow, maximum back pressures.

Construction: All-metal, induction motor, 6" leads.

Life: 100,000 hours continuous at 25° C without maintenance.

Max. Operating Temp.: +55° C.

Safety Codes: Conforms to UL, CSA, IEC and VDE standards.

Accessories: 5501, 5502, 5503, 5504.

Capacitor Required: .5 mfd.

Fan Drawing: See figure 1, page 15.

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level

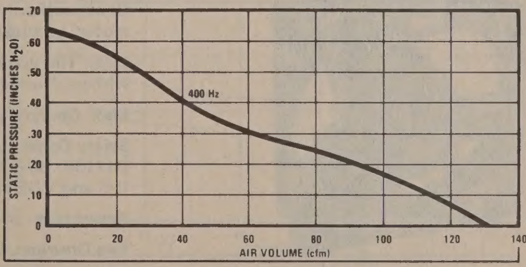
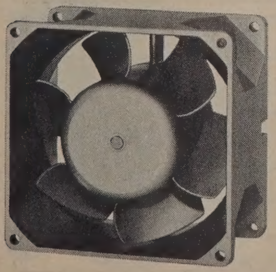
2110		X	115	400	30 W	125	3720	32	61	44.9



3000 Series

65 CFM



Size: 3½" Square x 2"

Advantages: Highest airflow for size, low noise.

Construction: All-metal, induction motor, 6" leads.

Life: 100,000 hours continuous at 25° C without maintenance.

Max. Operating Temp.: +55° C.

Safety Codes: UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

Capacitor Required: 4 mfd.

Fan Drawing: See figure 11, page 15

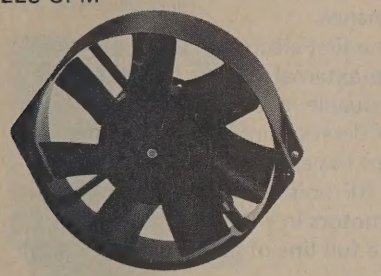
7900 Series

225 CFM



Size: 6″ Diameter x 1½″ Deep

Advantages: Minimum depth, high airflow, low noise in operating modes.

Construction: All-metal, shaded-pole motor, 12″ leads.

Life: 100,000 hours continuous at 25° C without maintenance.

Max. Operating Temp.: +55° C.

Safety Codes: UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

Accessories: 5506.

Fan Drawing: See figure 6, page 15.

8500 Series

43 CFM

SYSTEM PAPST
MODEL 8500
PAMOTOR
SAN FRANCISCO USA

Size: 3-1/8″ Square x 1½″ Deep

Advantages: Compact, high airflow, low noise.

Construction: All-metal, shaded-pole motor, 12″ leads.

Life: 100,000 hours continuous at 25° C without maintenance.

Max. Operating Temp.: +55° C (*+85° C).

Safety Codes: UL recognized, Yellow Card E41168. CSA certified. Also conforms to IEC and VDE standards.

Accessories: 5508.

Fan Drawing: See figure 7, page 15.

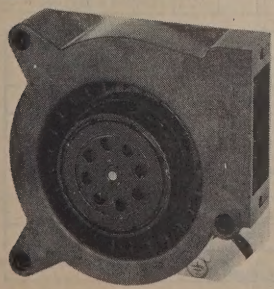
RL90-18 Series

29 CFM



Size: 4-3/4″ Square x 1½″ Deep

Advantages: High concentrated airflow at maximum pressures, low acoustical disturbance, perfect for spot cooling.

Construction: Makrolon housing, ultramid wheel, shaded-pole motor, 12″ leads.

Life: 100,000 hours continuous at 25° C without maintenance.

Max. Operating Temp.: +55° C.

Safety Codes: UL recognized, Yellow Card E41168. Also conforms to CSA, IEC and VDE standards.

Fan Drawing: See figure 8, page 15.

DC Fans

PAMOTOR
ONE OF THE PURDY GROUP OF COMPANIES

770 AIRPORT BLVD., BURLINGAME, CA. 94010 • (415) 347-1203 • TWX 910-374-2353 • TELEX 34-9373

PAMOTOR has an all new series of self-contained solid state brushless DC fans for you to choose from. Through their new design, these fans have been engineered to tackle those specialized applications which require highly reliable DC performance. Common uses include mobile radio equipment, medical electronics, shipboard computers, airborne applications, communications systems, automotive applications, marine use and telecommunications; wherever DC voltage is normally available. They are also finding wide acceptance for use in power stand-by modes to prevent memory loss in the event of AC power failure.

These fans are especially efficient and will outperform any similar sized fans at normal operating back pressure. Typically, they offer greater air volume (cfm), reduced noise levels and reduced power drain. For example, the power drain at maximum back pressure is approximately 20% of that required in conventional AC units. These fans also achieve a new low in magnetic radiation and RF noise, thereby assuring the pure signals necessary for critical airborne and shipboard use.

These fans work well at all rated voltages, and are extremely quiet. They can be adjusted for performance and noise level by altering the voltage desired for your particular application.

The new DC fan line offers a wide range of models and sizes. Each has solid state electronics and conforms to UL, CSA, IEC and VDE standards. They feature a single phase brushless motor with all electronics mounted on a PC card within the motor frame. Drive amplifiers for the motor are controlled by a patented Hall-effect generator circuit which is coupled by small pole pieces to the motor's field magnet (Patent No. 3-873-897). Available voltage ranges include 9.5 to 14 VDC (12 VDC nominal), 19 to 28 VDC (24 VDC nominal), and 38 to 56 VDC (48 VDC nominal).

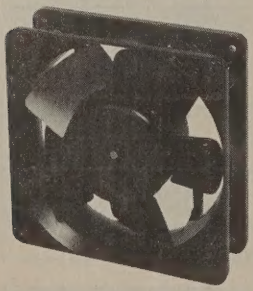
The brushless DC motor is polarity protected to avoid accidental damage and costly down time. If the input polarity is accidentally reversed, integral diodes block all circuits and the motor simply stops. Even in a locked rotor condition, the motor goes into a neutral state to avoid damage. Precision high temperature ball bearings and high temperature lubricants help to achieve a life expectancy of 100,000 hours of continuous operation at 25° C without maintenance.

These fans are the first electronic DC cooling fans that do not require an external voltage inverter. This means that you save valuable mounting space and weight because the only consideration in mounting is the fan itself. This new concept has eliminated many of the inherent reliability and RF noise problems generally associated with using AC motors in a DC environment.

PAMOTOR has a full line of accessory items available for their fans.

Model 4112X

122 CFM (variable)



Size: 4½" Square x 1½" Deep

Advantages: Solid state integral electronics, no external inverter required, low input power, high variable airflow, locked rotor and polarity protected.

Construction: All-metal, brushless electronic motor, terminal block.

Life: 100,000 hours continuous at 25° C without maintenance.

Max. Operating Temp.: +80° C.

Safety Codes: Conforms to UL, CSA, IEC and VDE standards.

Accessories: 5501, 5502, 5503, 5504, 5505.

Fan Drawing: See figure 2, page 15.

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (dc)	Input Current	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)

Rotron Fans and Blowers

ROTRON INC. Woodstock, N. Y. 12498 ☐ 914 • 679-2401 ☐ TWX 510-247-9033

Muffin® Fan

The dependable, low cost, largest selling fan for commercial cooling applications.

- 105 cfm free air delivery
- 4.71″ sq. x 1.50″ depth
- weight 17 oz.
- acoustical rating as low as NC-43
- more than 10 years continuous duty at 20°C
- impedance protected
- operates in ambients of −18°C to +70°C
- UL yellow card recognized and CSA certified

Spartan Fan

The MIL SPEC version of the famous MUFFIN

- 113 cfm free air delivery (132 cfm for 400 Hz model)
- unusually high pressure characteristics (up to .5″ hg)
- dimensionally interchangeable with Muffin fan (4.68″ square x 1.50″)
- Double shielded stainless steel ball bearings
- lubricated for life
- highly efficient multi-slot motor
- withstands ambients from −60°F (−54°C) to +212°F (+100°C)
- venturi, spiders, and hub are single aluminum casting for shock and vibration resistance
- meets all applicable mil specs for ground and shipboard

*Free delivery airflow when used in a recommended housing.

Airflow Interlock Switches

Model 2A Airflow Switch detects loss of airflow to protect equipment.

- rated at 5 amps 250 VDC
- SPDT actuation
- interchangeable vanes available for 8 sensitivity ranges
- mounts to round or flat duct with single screw

Determinator Kit available with complete set of 8 vanes and Model 2A Switch in plastic box.

Catalog Sheet MIS 010

Saucer® Fan

High volume and high pressure both, from a minimum of fan space.

- 275 cfm free air delivery
- generates pressures up to .5″ H_2O
- driving motor entirely within hub for minimum depth - 2.50″, dia. 7″
- pre-lubricated stainless steel ball bearings
- for ambients from −60°F (−54°C) to +257°F (+125°C)
- clamping rings at venturi ends for easy mounting
- meets all applicable military specifications

Motor Series	Volts	Hz	Watts	CFM

Rotron Fans and Blowers

ROTRON INC. Woodstock, N. Y. 12498 ☐ 914 • 679-2401 ☐ TWX 510-247-9033

Aximax® - 1, 2, & 3

Family of miniature, high-performance air movers for air-borne and other critical space/weight/performance applications.

- free air delivery from 11 cfm to 160 cfm
- optional Altivar® motors automatically increase speed with altitude
- life expectancies from 10,000 hours up at 72°C
- withstand ambients up to 257°F (125°C)
- sizes: 1½″ x 1½″, 2″ x 1½″, and 3″ x 2 5/16″
- weight 4 oz., 4½ oz., and 14 oz. respectively
- meet all applicable military specifications

Models for 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; and 115 VAC 1 phase, 60 Hz (except Aximax 1)

Catalog Sheets MIL 020, 030, 040

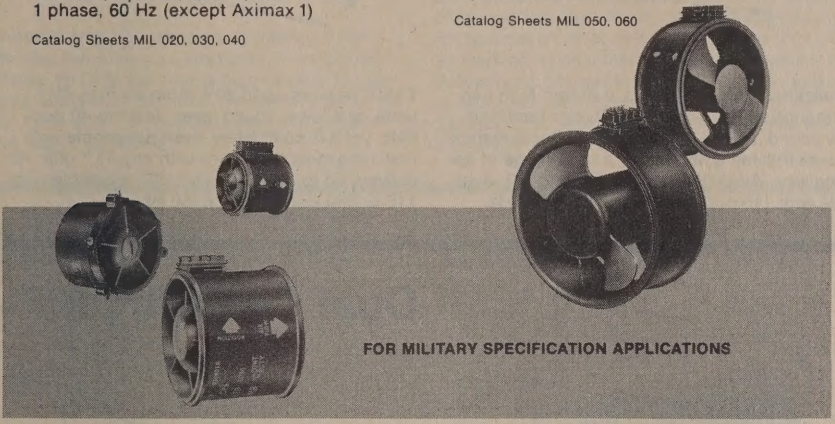
Propimax® 2, 3, & 3B

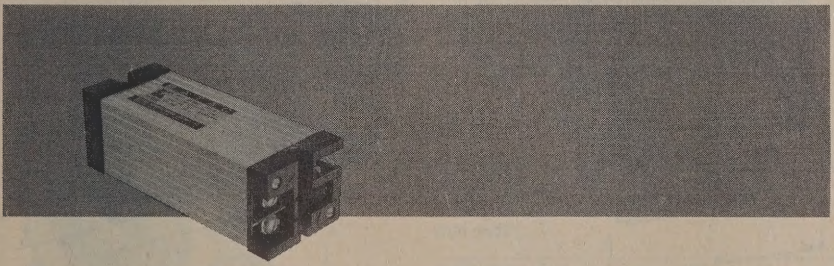
Large-volume and high-pressure air movers for airborne equipment.

- free air delivery from 22 cfm to 225 cfm
- offer pressures as high as 7″ H_2O at cut-off
- optional Altivar® motors automatically increase speed with altitude
- life expectancies of 10,000 hours at 14.7 psia and 72°C
- withstand ambients up to 257°F (125°C)
- size/weight: 3½″ x 1½″ and 6.5 oz. for Propimax 2 3¾″ x 2″ and 16 oz. for Propimax 3 and 3B
- meet all applicable military specifications

Models for 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; 115 VAC, 1 phase, 60 Hz

Catalog Sheets MIL 050, 060

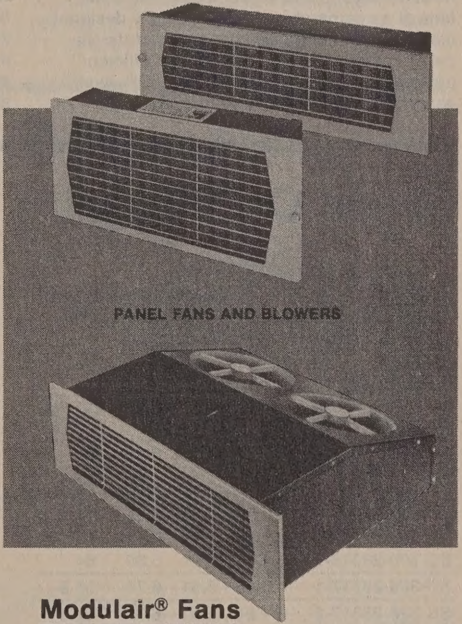




Batac®

Solid state inverters and converters that allow use of Rotron air movers with DC and non-standard power sources.

- enclosed in solder sealed or resin-filled cases
- compact sizes: from 1.29″ x .97″ x 1.09″ to 2½″ x 3½″ x 5 1/16″
- for ambients −40°C to +71°C
- allows Rotron fan reliability from DC power sources
- available with protection for accidental reversal of input voltage
- every design tailored to a specific fan load



Modulair® Fans

Special air moving packages incorporate proven Rotron fans to maximize air flow and simplify installation.

- fit standard 19″ relay racks and cabinets
- incorporate washable filters, and grilles for attractive appearance

MB-9100

- uses three Muffin Fans to provide 240 cfm free air delivery
- 5¼″ high, 19″ wide, 3½″ deep

MB-9200

- uses two Feather Fans to provide 400 cfm free air delivery
- 8¾″ high, 19″ wide, 3½″ deep

MB-5100

- uses two Feather Fans to provide 400 cfm
- special angle allows base mounting, minimizes eddying
- 5¼″ high, 19″ wide, 13 21/32″ deep, 13 lbs.

Catalog Sheets CAB 020, 030

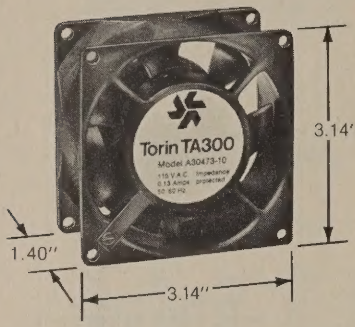
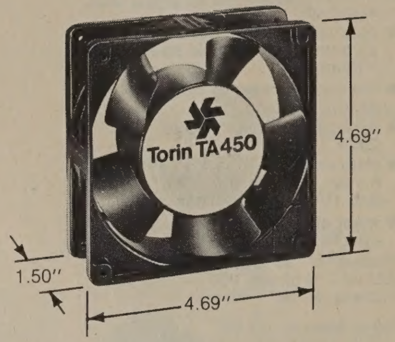
These are Torin thumbnails–

TA300



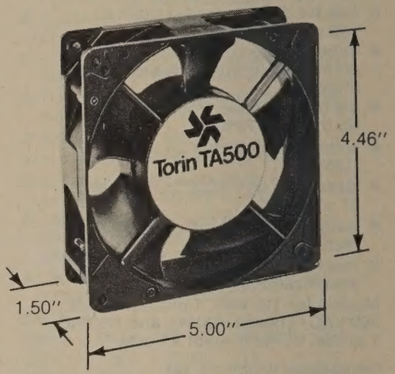
TA300 offers strong performance with lower noise levels and less power input than other fans of a comparable size. A specially designed motor and improved aerodynamics of the impeller combine to make this a most efficient package. Air delivery 36 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

TA450



Available in two versions, a standard high performance series, and an "S" series featuring low sound, as low as 32 decibels. Performance makes this fan a natural for a wide range of applications. Air delivery 106 CFM at 0″ SP. Available with 115 or 230 volt motors, 50/60 Hz.

TA500



TA500 delivers up to 20% more air than 4½″ units, at a lower sound level, down to 40 decibels, yet it is completely interchangeable with matching mounting holes with any 4½″ unit. Air delivery up to 126 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

Single Centrifugal

Largest selection of any maker. All motors have Class A insulation, ball bearings, thermal overload protection.

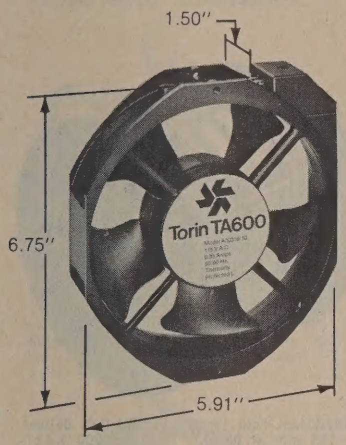
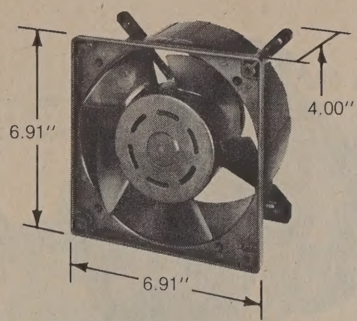
TA600



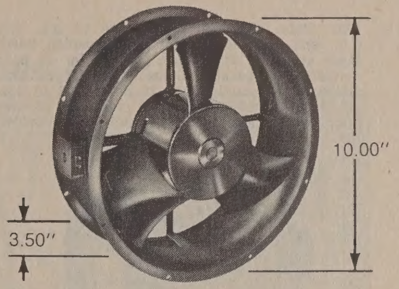
TA600 is only 1½ inches thick, making it the thinnest fan of its size produced in the United States. Its CFM per watt is high relative to other units of these dimensions. Air delivery up to 251 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

TA700



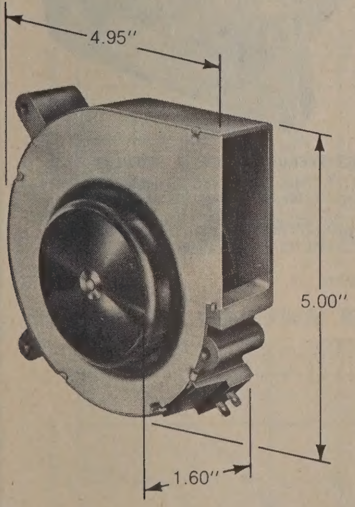
The TA700 is a tube-axial unit developed to produce greater air delivery than any other blower of its size and type. It was designed specifically for applications that demand a large volume of air working against moderate static pressure. It outperforms competitive units in air flow, power consumption and quietness of operation. Air delivery up to 380 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

TA1000



TA1000 tube axial has the lowest power and noise for equivalent air delivery of any unit of its type. TA1000 is especially effective in applications where a large volume of air is required, and where moderate system resistance exists. Examples would be cabinet flushing of relay rack and communications packages and printed circuit card chassis in computers. Air delivery up to 530 CFM at 0″ SP. Available with 115 or 230 volt motor, 50/60 Hz.

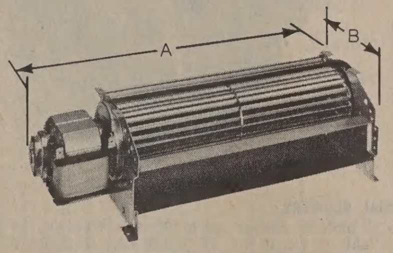
SC382—Pancake Centrifugal



SC382-2966 features an extremely thin profile, 1⅝″ deep. Its housing is all metal in construction, and the impeller is polysulfone plastic. The integral motor has a proven bearing design presently in use on most sleeve bearing motors.

The SC382 produces high velocity air at good static pressure. Air delivery 26 CFM at 0″ SP. 115 volt motor, 50/60 Hz.

Transverse Flow



Transverse Flow Blowers utilize the entire width of the impeller blades, they take air in across the entire width of impeller and discharge it at that width.

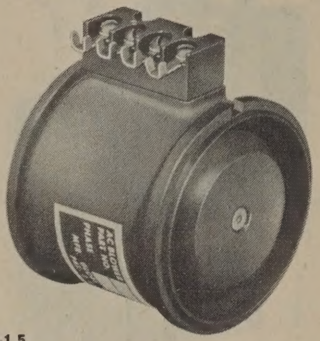
TRW GLOBE MOTORS

FANS AND BLOWERS

TRW Globe offers a wide range of a.c. and d.c. fans and blowers for every cooling need. Many standard models are stocked for 48 hour delivery. And because Globe is the largest precision motor source, we can move fast to provide engineered specials in prototype or production quantities. Check your needs below. Hundreds of other units are available.

VAX-1

1⅛″ VANEAXIAL A.C. or D.C. VAX-1-AC delivers 10 cfm @ .6″ H_2O. 26 v.a.c., single phase, 400 Hz. 1.5 oz. VAX-1-DC delivers 8.5 cfm @ .5″ H_2O. 26 v.d.c. 1.4 oz.

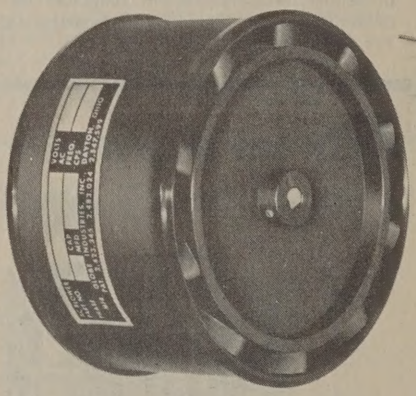


VAX-1.5

1¾″ VANEAXIAL A.C. or D.C. VAX-1.5-AC delivers 12.0 cfm @ 1.9″ H_2O. 115 v.a.c., single phase, 400 Hz. 4.0 oz. VAX-1.5-DC delivers 15 cfm @ 1.3″ H_2O. 27 or 50 v.d.c. 5.0 oz.

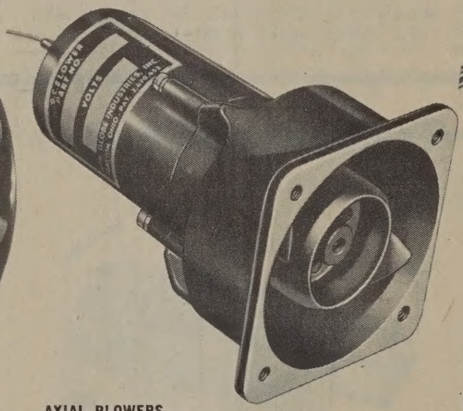
VAX-3

3″ VANEAXIAL. Four types A.C. and D.C. deliver 85 to 165 cfm at 0″ H_2O. 115 and 200 v.a.c.; 12 and 28 v.d.c. 14 to 17 oz.



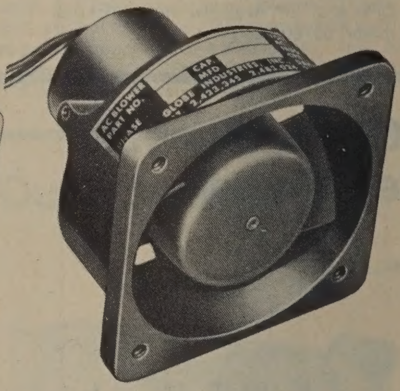
VAX-4-FC

4″ HIGH ALTITUDE VANEAXIAL A.C. delivers 170 cfm @ 0″ H_2O, 140 cfm @ 2.1″ H_2O at 25,000 ft. or 95 cfm @ 2.5″ H_2O at sea level. 200 v.a.c., 3-phase, 400 Hz. 2 lbs.



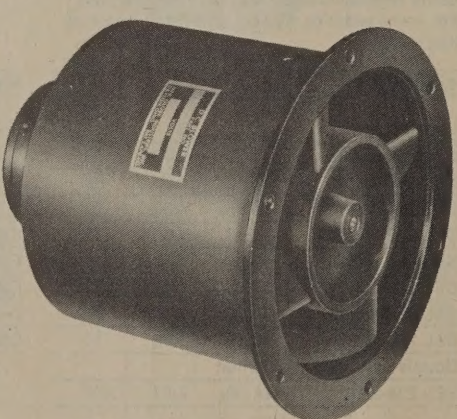
AXIAL BLOWERS

Axial blowers deliver up to 62 cfm free air, available in a.c. or d.c. 27 to 200 v.a.c. 1, 2 or 3-phase, 60 and 400 Hz. 4 to 70 v.d.c. 5 to 9½ oz.



VARIABLE FREQUENCY FANS & BLOWERS

Consist of Type MC or SC variable frequency motors powering a wide range of axial or centrifugal blowers and fans. Max. output 85 cfm @ 0″ H_2O. 27 to 200 v.a.c., 1, 2 and 3-phase, 320 to 1,200 Hz. 2.7 to 10 oz.



VAX-4.5-GR

4½″ VANEAXIAL A.C./D.C. delivers 315 cfm @ 0″ H_2O or 220 cfm @ 1.75″ H_2O. UNIVERSAL 115 v.a.c., single phase, 60 Hz. or 115 v.d.c. 4½ lbs.

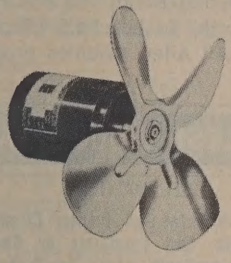
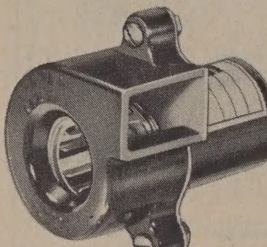
TRW GLOBE MOTORS

FANS AND BLOWERS



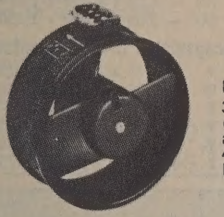
OPEN FANS

Fans deliver up to 195 cfm @ 0″ H_2O, a.c., d.c. or a.c./d.c. 4 to 120 v.d.c. 200 v.a.c., 1, 2 or 3-phase, 60 and 400 Hz. 2.3 oz. min.



CENTRIFUGAL BLOWERS

1″ to 2½″ RH or LH scroll models, a.c. or d.c., round or rectangular outlet, produce up to 50 cfm free air. 115 to 200 v.a.c., 60 and 400 Hz. D.C. versions 27 v.d.c. 4 to 18 oz.



PAX-3

3¼″ PROPAXIAL A.C. delivers 120 cfm @ 0″ H_2O with Type MCS 2 pole motor, and 62 cfm @ 0″ H_2O with Type MCS 4 pole motor. 200 v.a.c., 3-phase, 400 Hz. D.C. versions available.

CUSTOM-BUILT L-C FILTERS

Allen Avionics is staffed and organized to provide precision L-C Filters and Delay Lines with fast delivery. Your most difficult engineering problems are solved by our high level engineering staff in conjunction with sophisticated computer programs, enabling rapid filter design determination.

Allen Avionics computer designs are generated for the four basic filter types: Lowpass, Highpass, Bandpass, and Bandstop. These are built-in Butterworth, Tchebycheff, Elliptical, Gaussian, and Bessel functions. All Allen Avionics products are manufactured in the U.S.A.

BANDPASS

PROTOTYPES OFTEN DELIVERED IN LESS THAN 3 DAYS

Types: Butterworth, Tchebycheff, and Elliptic Function.

Frequency Range: 400 Hz to 30 MHz.

Impedance Range: 50 ohms to 10K ohms.

Construction: Epoxy encapsulated or sealed in metal can.

Order any center frequency required. Interpolation between frequencies listed below is valid.

Shape Factor	20 db BW / 3 db BW	40 db BW / 3 db BW

CUSTOM-BUILT L-C FILTERS LINEAR PHASE LOWPASS

LINEAR PHASE LOWPASS FILTERS

Types:
Bessel, Gaussian, Equal Phase Ripple and Transitional (Gaussian to 6 db).

Frequency Range:
400Hz to 50MHz.

Impedance Range:
50 ohms to 20K ohms.

Low Delay and Phase Distortion in Passband.

Very Low Pulse Distortion (Low Overshoot).

Construction:
Epoxy encapsulated or sealed in metal can.

DELIVERY: PROTOTYPES CAN OFTEN BE DELIVERED IN LESS THAN 3 DAYS

The lowpass filters listed below are typical units that we build. We do manufacture linear phase lowpass filters with any cut-off frequency between 1KHz and 50MHz.

SIZE (INCHES)

Sealed in Metal Can. Printed Circuit Terminals, End Terminals or Connectors available where applicable:

K — 1.50 x 1.000 x .800
L — 2.00 x 1.625 x 1.125
M — 3.00 x 1.625 x 1.125
N — 4.00 x 1.500 x 1.250

Encapsulated in Epoxy Container:

U — 2.00 x 1.125 x .750
W — 2.50 x 1.125 x .750
X — 3.00 x 1.500 x 1.000
Y — 4.00 x 1.500 x 1.125
Z — 4.50 x 2.500 x 1.375

The graph at right illustrates ideal delay characteristics.
Consult table below for typical realizable values.

Shape Factor	Max. Phase Distortion	Maximum Overshoot	Typical Delay Variation
A	±2°	1.5%	3%
B	±2°	1.5%	3%
C	±2°	1.5%	3%
D	±3°	3%	8%
E	±7°	6%	13%
F	±12°	9%	17%

	20 db	40 db
A	3.10 Fc	6.90 Fc
B	2.70 Fc	4.30 Fc
C	2.50 Fc	3.50 Fc
D	2.20 Fc	3.10 Fc
E	1.85 Fc	2.30 Fc
F	1.70 Fc	1.90 Fc

SHARP DELAY EQUALIZED LOWPASS FILTERS

By the utilization of delay equalization techniques, Allen Avionics now designs and manufactures a complete line of sharper cut-off, flat delay lowpass filters than shown above. We offer these with 40db to 3db ratios as small as 1.22 and delay distortion of less than 10%.

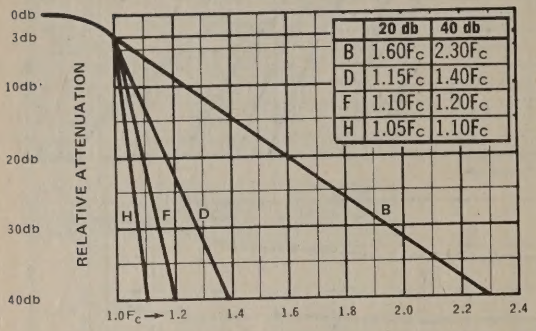
CUSTOM-BUILT LOWPASS & HIGHPASS L-C FILTERS

PROTOTYPES CAN OFTEN BE DELIVERED IN LESS THAN 3 DAYS

Types: Butterworth, Tchebycheff, Gaussian, Bessel and Elliptic Function.
Frequency Range: 200 Hz to 200 MHz.
Construction: Epoxy encapsulated or sealed in metal can.

The Lowpass and Highpass Filters listed below are typical units that we build. We do manufacture units with shape factors and cut-off frequencies in-between those listed.

LOW PASS FILTERS



SIZE (INCHES)

Sealed in Metal Can with B.N.C. Connectors:

L — 2.00 x 1.625 x 1.125
M — 3.00 x 1.625 x 1.125
N — 4.00 x 1.500 x 1.250
O — 5.00 x 1.500 x 1.250

Encapsulated in Epoxy Container:

S — 1.25 x .875 x .625
U — 2.00 x 1.125 x .750
W — 2.50 x 1.125 x .750
X — 3.00 x 1.500 x 1.000
Y — 4.00 x 1.500 x 1.125
Z — 4.50 x 2.500 x 1.375

Must You Meet MIL-STD 461?

Here's where EXPERIENCE counts!

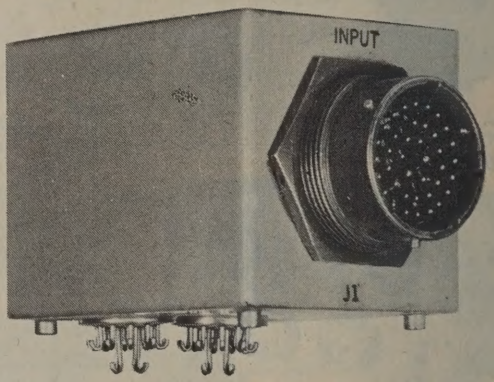
AXEL computer-aided designed filters will enable your system to meet the exacting requirements of MIL-STD 461 and MIL-F-15733.

Initial system analysis is our specialty.

AXEL ELECTRONICS is a highly experienced organization specializing in the design and production of standard and custom built filters.

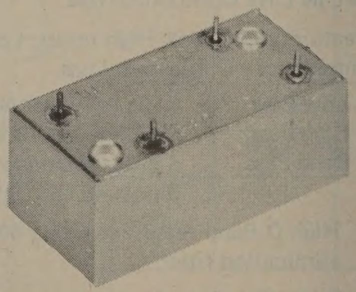
We offer a complete line of high quality, long life, high performance filters from low signal level devices to very high power line filters including special multi-circuit packages.

A total filter design service is available backed by a complete QC monitored manufacturing facility to meet your most stringent requirements.



OUR EXPERIENCE INCLUDES:

- Active and Passive Electric Wave Filters (MIL-F-18327)
- Low Pass - High Pass - Band Pass - Band Reject Filters
- Constant Delay Filters
- Delay Equalizers
- Signal Line Filters
- Transmission Line Filters



Ask for our complete catalog and Look to the Leader in Filter Technology . . .

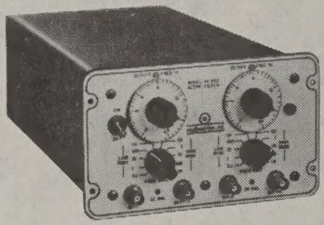
COMSTRON·SEG MULTIMETRICS DIVISION ACTIVE FILTERS

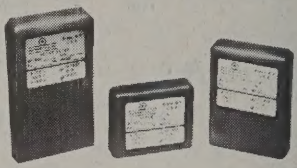
TUNABLE & FIXED 0.001Hz to 2MHz

- Top performance and versatility
- Individual channels are independent High or Low Pass Butterworth Filters
- Interconnected channels are Band Pass, Band Reject or have sharpened attenuation slopes
- Selectable Time Domain response for optimum transient (pulse) behavior
- All units rack mountable
- Quick delivery!

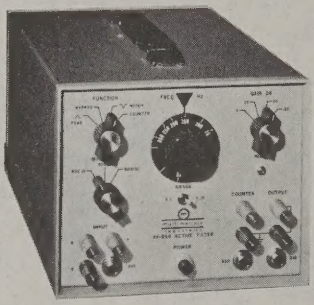


SERIES AF-100, AF-200

20Hz to 2MHz, 0.2Hz to 20kHz; tunable; ruggedly built, low cost package. Designed for a wide range of applications.

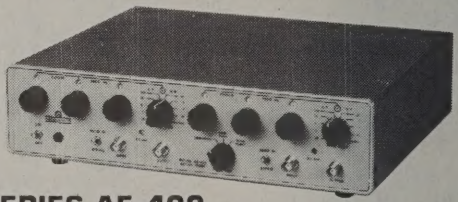


Fixed frequency, mini-sized modules. Low, high, band pass, band reject and notch functions, Butterworth, Chebyschev and elliptic responses. Frequencies from 0.001Hz to 100kHz. Other frequencies, response characteristics and pole configurations available.



SERIES AF-850A

35Hz to 3500Hz; ±1% accuracy; tunable; ideal for notched noise measurements and waveform analysis. Fully compatible with telephone channel transmission measuring techniques and equipment.



SERIES AF-400

0.001Hz to 99.9kHz; digital switch tuning; superb accuracy and stability. 115/230VAC or battery operated.

RFI Power Line Filters

S, V & W SERIES* These filters combine line-to-ground RFI filters with additional circuitry to reduce low frequency line-to-line noise. They are designed to protect equipment from malfunctions due to conducted line interference coming into the equipment from the line (susceptibility). They also provide needed noise suppression to allow most equipment to meet VDE, CISPR and CSA specifications for conducted emission. They are particularly effective when applied in equipment using switching type power supplies, SCR and T²L circuits.

H SERIES* These filters are designed for use in health care equipment and are recognized under UL 544 specification. Model 6H1 is suited for patient care equipment. Models 6H4 & 6H9 are suited for non-patient equipment (equipment that is intended for use where contact with the patient is unlikely).

B SERIES* These filters are general purpose types—effectively providing RFI control of line to ground noise in a small size at lowest cost. They are available in a broad selection of current ratings and termination styles.

EF SERIES* Now VDE approved. These filters incorporate the special IEC (International Electrotechnical Commission) power line connector. This connector has 4 mm minimum pin spacing and complies with all current and proposed requirements for use with industrial and test equipment in the European market where a detachable power cord is part of the equipment design. The EF series features extremely low leakage current; meets IEC, BSI, VDE, CSA and ASA requirements for data processing equipment. Minimum insertion loss 2.0 MHz to 5.0 MHz 50 DB.

K SERIES* These filters are similar to the B Series but have the added feature of being extremely effective in the control of line to line as well as line to ground RFI interference. The K Series is particularly suited where pulsed, continuous and/or intermittent RFI interference is present and should be used where line to line interference protection is required.

R SERIES* These filters are dual T section RFI powerline filters and provide premium performance at moderate cost. They are well suited for low impedance loads where noisy RFI environments are present. At frequencies as low as 150 KHz, the R Series has an insertion loss as high as 45 DB. They control pulsed, continuous and/or intermittent interference. The R Series provides extremely low leakage current without deterioration of insertion loss characteristics.

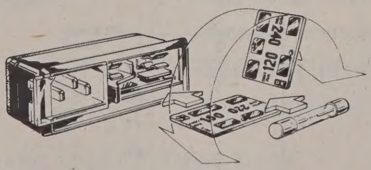
THE VS & F VOLTAGE SELECTING & FUSED CONNECTOR



Available to the industry for the first time in one unit a voltage selector switch, a connector and a fuse. The VS & F allows equipment to operate anywhere in the world. FOUR OPERATING VOLTAGES — The VS & F and a simple transformer modification allows the equipment to operate at 100, 120, 220 or 240 volts 50-400 Hz. Voltage selection is made with a unique voltage selector card. EASY INSTALLATION — Only one rectangular cut-out is required for easy snap in mounting. BUILT-IN SAFETY — The fuse and voltage selector card are enclosed behind a see-thru cover which cannot be moved until the power cord is removed from the equipment. UL & IEC — The VS & F has an IEC approved connector, UL SE-01 fire retardant polyester housing and complies with UL and IEC requirements. RFI FILTER — Available with RFI filter (see EF Series specifications for electrical data.) Minimum insertion loss at .5 MHz is 24 DB, at 2.0 MHz to 5.0 MHz 50 DB.

SPECIFICATIONS

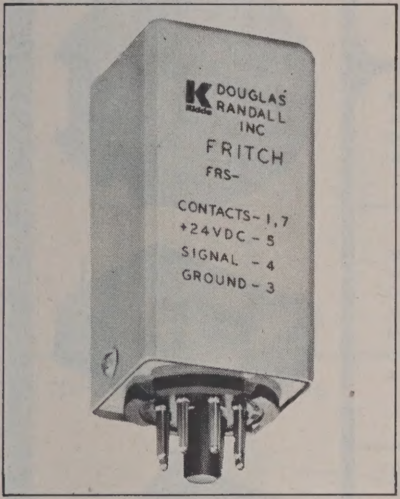
- **Center frequency** – See table below (others on request).
- **Bandwidth (3db)** – ±1.5% to ±3% of fc.
- **Bandwidth (20db)** – ±10.5% of fc.
- **Gain** – 10db ±1db.
- **Gain variation** – ±.4db from 0°c. to 70°c.
- **Input impedance** – 10 K (Ω)
- **Output load** – ≥ 600 (Ω).
- **Temperature range** – -0°c to 70°c.
- **Power supply** – ±15 Vdc.

Douglas Randall TONE CONTROLS KIDDE

DIVISION OF WALTER KIDDE & COMPANY, INC. • 6 PAWCATUCK AVE., PAWCATUCK, CONN. 02891 • (203) 599-1750

FRITCH® — Frequency Responsive Switch



The FRITCH® is a sensitive, rapid tone detector combining solid state circuitry with a Reed Relay output. Two basic types are made:

- Type I — Used where only one frequency is present.
- Type II — Used where several frequencies are present.

DOUBLE TONE FRITCHes detect two frequencies. They are prefiltered to operate in the presence of several frequencies and can incorporate optional time delays to minimize the effect of spurious signals. They are ideal for detecting touch tone pairs over telephone lines.

Specifications

FREQUENCY RANGE: 7 Hz to 100 KHz.

BANDWIDTH: Must Operate: ±2% fo. May Operate ±5% fo.

NORMAL CHANNEL SPACING: 11%.

INPUT SIGNAL LEVEL: 5 VRMS, 1 VRMS or 0.7 VRMS (odbm). Special to .050 V.

INPUT IMPEDANCE: 25,000 ohms typical.

RESPONSE TIME: To 75 pulses per second depending on frequency.

DC POWER INPUT: 12 V or 24 VDC ±10% (other voltages available).

OUTPUT CONTACTS: Form 1A, 2A, 1B, 2B, 1C or 1A1B. Solid state output optional.

CONTACT RATING: Form A or B — 10 W, 0.5 A or 250 VDC Max. Form C — 3 W, 0.25 A or 28 VDC Max.

ENVIRONMENTAL LIMITS: Shock: 50 g; Vibration: 35 g; Temperature: −0°C to +50°C.

STANDARD OCTAL TUBE BASE

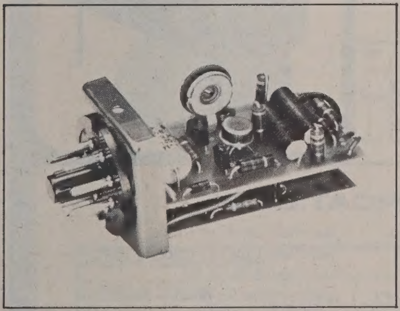
® Registered trademark of Douglas Randall Frequency Responsive switch. (Patent 3584275)

Oscillators



Douglas Randall Oscillators are solid state RC devices. The oscillator circuit operates continuously. The output stage is gated to a low impedance driver circuit, insuring extremely rapid signal response and freedom from frequency shift due to keying. Keying is accomplished by connecting the proper terminal to the power supply common (see schematic). The oscillators have reverse polarity protection incorporated in the unit to protect them if improperly connected. Single, double and triple tone versions are available in standard octal plug housings. They are also available for P.C. Mounting.

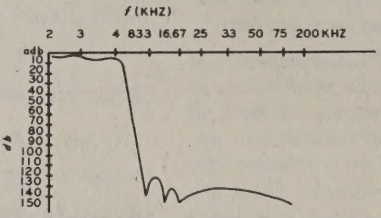
SONAR FILTERS IN PHASE AND AMPLITUDE MATCHED SETS

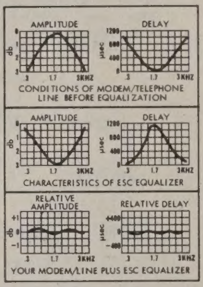
Linear phase bandpass and lowpass filters, with phase and amplitude matched passbands. Matching can be accomplished for any number of channels; generally three filters made a set, but as many as 900 have been phase and amplitude matched. ESC produces filters for Sonobuoys and audio comb analyzers.

HIGH ATTENUATION 140 db AIRCRAFT RADIO LOW PASS FILTERS



ESC is the leading manufacturer of high attenuation filters. These filters provide more than 140 db attenuation of harmonic frequencies in the audio band and have controlled minimum phase shift. Size is only 1.2 x 1.0 x .58.

ESC EQUALIZERS



ESC produces custom designed equalizers for group delay and amplitude distortion. In particular, ESC produces custom designed compromise equalizers for modem manufacturers to correct for transmission line and modem produced amplitude and phase (delay) distortion. Equalization allows modem sets to be used at highest possible rates with minimum distortion. Contact ESC for your specific requirement.

ESC TELEPHONE LINE SIMULATORS

They provide voice-band data systems users with nominal worst case conditions of amplitude and envelope delay of Bell Telephone voice bandwidth data channel 3002 and C1, C2 and C4 conditioning.

FILTERS FOR THE TELEPHONE INDUSTRY

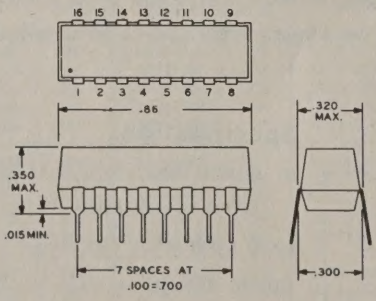
ESC has a full line of 1010 Hz Band reject filters. Low profile versions for standard telephone testing production equipment. Available in 600 Ω and 900 Ω balanced and unbalanced versions to "Western Electric" specifications.

2600 Hz Band reject filters available to standard "Bell" specifications or in miniaturized version with height approximately ½". Low cost for standard "SF" Signalling equipment.

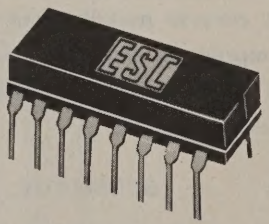
ULTRA SHARP HIGH SPEED DATA MODEM FILTERS

ESC produces a series of lowpass, bandpass and band suppression filters in 60 Khz to 108 Khz range for use in high speed (150 Kbps) data modems. Filters have very sharp attenuation characteristics, low group delay distortion and more than 60 db intermodulation distortion and are made in compact sizes for PC board capability.

DIP LOW PASS FILTER SERIES



PIN 1 — IN
PIN 8 — OUT
PINS 9 & 16 — GND



SPECIFICATIONS:

- Insertion Loss: less than .5 db at .1 Fc
- Ripple: less than 1 db in Passband to Fc
- Attenuation: less than 3 db to Fc
  greater than 50 db at 3 Fc
- Operating Temp: − 55°C to + 125°C
- Built to conform to applicable portions of MIL-F-18327
- Mounting: Standard 16 Pin configuration
- For other filter types in DIP configuration contact plant

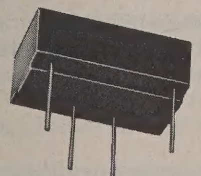
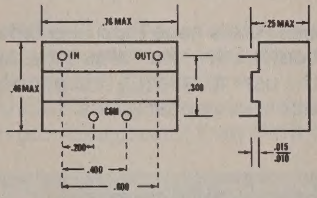
ESC DUAL-IN-LINE DIF® FILTERS





Five series of filters, three lowpass and two highpass. As example DIF-L39 lowpass series is listed below. Also available is linear phase series DIF-LP, lowpass series DIF-L20, highpass series DIF-H20 and DIF-H39. Full specifications for attenuation and typical characteristics such as phase shift, group delay and pulse response are presented in catalog. A bandpass filter can be formed by tandem connection of a lowpass and highpass (minimum bandwidth is one octave).

SPECIFICATIONS:

INSERTION LOSS	**<.5 db at .1Fc**
RIPPLE	**<±1 db in Passband (to Fc)**
ATTENUATION	**<3 db to Fc** **>39 db at 2.5 Fc & higher frequencies**

Frequency Devices INC.

active filters AND sinewave oscillators

FROM Frequency Devices INC.

FIXED FREQUENCY ACTIVE FILTERS - SERIES 700

700 SERIES Active Filters offer Bessel, Butterworth, and Tchebyscheff transfer functions in 2, 4, 6, and 8-pole designs. Lowpass, highpass, bandpass, and band reject with f_o and f_c on the frequency range from 0.001 Hz to 20 kHz.

RESISTIVE TUNEABLE ACTIVE FILTERS - SERIES 730, 740, 760, 770, 780

730 & 740 SERIES are 2, 4, and 6-pole lowpass filters with externally tuneable cutoff frequencies up to 50kHz. Various models are tuneable over 200:1 or 500:1 frequency ranges via external tuning resistors. Bessel and Butterworth response characteristics which pass signals from DC to f_c are available.

760 SERIES BANDPASS: Two pole-pair Butterworth characteristics with Q of 5 or 10 and 1000:1 tuning. Various models cover the range 0.05Hz to 20kHz.

770 SERIES are 2, and 4-pole highpass filters with externally tuneable cutoff frequencies. Models are available with f_c from 0.02Hz to 20kHz. All models feature 1000:1 frequency tuning and full power response to 50kHz.

780 SERIES BANDPASS/BAND REJECT: Provides adjustable Q of 0.5 to 100 with 1000:1 tuning. Notch depth is 50 to 60dB and is trimmable to 60 to 80dB.

VOLTAGE TUNEABLE ACTIVE FILTERS - SERIES 300

300 SERIES 2-pole active filters are tuneable over a 20:1 frequency range by application of a DC control voltage. Simultaneous lowpass, highpass, and bandpass outputs are provided. Gain or Q may be varied with a single resistor.

PROGRAMMABLE FILTERS - 744, 745 Series & FC 102, FC 103

744 & 745 SERIES Butterworth and Bessel Lowpass Filters have BCD and Binary programmable corner frequencies and 500:1 and 1000:1 tuning ranges. Five models cover the frequency range from 0.1Hz to 50kHz.

FC102: The almost instrument filter card permits the user to select f_c via pencil point switches. It is an excellent choice for breadboard and laboratory applications.

FC103: Digitally controllable lowpass filters.

SINEWAVE OSCILLATORS LOW COST — HIGH PERFORMANCE — LOW DISTORTION

400 SERIES FIXED FREQUENCY - 440 SERIES TUNEABLE

Modular fixed frequency and tuneable oscillators feature low distortion quadrature (90°±.1°) buffered outputs. Fixed frequency models are available from 1Hz to 20kHz (externally adjustable ±10%). Tuneable models have frequency tuning range of 1000:1 and amplitude adjustable from 2.5 to 20V p-p.

Amplitude control modules 664/665 which maintain amplitude stability to 100ppm are also available.

Frequency Devices INC.

450 SERIES - COMPACT - LOW COST

THE 450 SERIES features 0.1dB amplitude stability, 0.1% distortion, 1 to 20V p-p adjustable, 100Hz to 10kHz range, 1% accuracy (adj. ±5%) and 0.02%/°C stability.

Frequency Devices, Inc., Dept. EM, 25 Locust St., Haverhill, MA 01830 (617) 374-0761 TWX 710-347-0314

tone detectors AND communications products

FROM

Frequency Devices INC.

TONE DETECTORS FOR TOUCH TONE* APPLICATIONS

MODEL 550-1 [LOW GROUP] & MODEL 550-2 [HIGH GROUP] TONE DETECTOR MODULES
The Model 550-1 and Model 550-2 Tone Detector Modules are complete, easy to use, adjustment free, high performance tone detector modules. They detect standard Bell System Touch Tones* with relative amplitudes of 15dB and absolute amplitudes in the range from -30dBm to 0dBm. Detection and hold times have been set for non-ambiguous detection of 40ms on and 40ms off tone bursts. Outputs may be interfaced with CMOS or T^2L logic.

TONE ENCODERS FOR TOUCH TONE* APPLICATIONS

MODEL 510 TOUCH TONE* ENCODER is a complete T^2L Compatible Touch Tone* Encoder in a 2.4 cu. in. low profile (0.4″) module. Specifications include: Low distortion outputs (<1%) - Touch Tone* frequencies (±1%) (Osc 1 - 697Hz, 770Hz, 852Hz, 941Hz Osc. 2 - 1209Hz, 1336Hz, 1477Hz , 1633Hz). Gating isolation 60dB - 10Ω impedance output.

MODEL 511 TOUCH TONE* ENCODER is a complete T^2L Compatible Dual Tone Encoder having high tone signal amplitudes 3dB greater than the low tones.

FSK MODEM FILTERS — 530 SERIES

530 SERIES MODEM FILTERS are dual frequency 1170/2125 Hz bandpass filters. Their center frequencies can be selected by externally grounding a control input. Transistor switching can be used to originate and answer type modem applications.

Model 530 is a TRANSMIT filter with greater than 30dB of adjacent channel rejection and Model 531 is a RECEIVE filter which provides greater than 60dB of adjacent channel rejection.

WEIGHTING FILTERS — 580 SERIES

581 SERIES C-MESSAGE WEIGHTING FILTERS provide a frequency response characteristic which simulates the perceived response of the human ear to telephone noise.

585 SERIES NARROW BAND NOTCH FILTERS eliminate test or holding tones that interfere with the accuracy of noise measurements in telephone message circuits. Models 585-1 and 585-2 have −3dB and −50dB bandwidths that conform with Bell System specifications.

When a 581 is used in conjunction with a 585 they provide what is commonly called a "C-Notch" filter.

FREQUENCY DEVICES INC. ALSO CARRIES A BROAD LINE OF ACTIVE FIXED FREQUENCY, TUNEABLE AND PROGRAMMABLE FILTERS AND SINEWAVE OSCILLATORS.

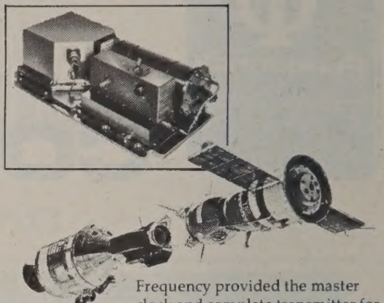
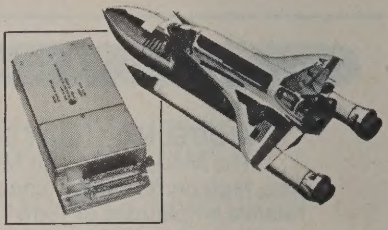
LOW PHASE-NOISE FREQUENCY SOURCES TO 10 GHz



Frequency provided the master clock and complete transmitter for an important Apollo-Soyuz experiment.



Scheduled for launch during 1979, NASA's Space Shuttle is designed to become America's manned reusable space transportation system. Frequency has delivered Oscillators for the Master Timing Unit Redundant Clock for the Space Shuttle Orbiter, built by Rockwell International Corporation's Space Division.

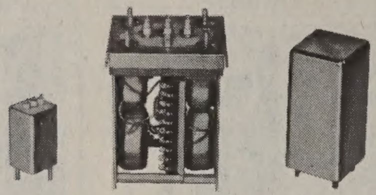
HERTZ FILTERS

BAND PASS FILTERS CUSTOM DESIGNED TO FILL YOUR NEEDS



Hertz Filter Corporations' engineering department is made up entirely of specialists in the field of custom design of band pass filters. They are all fully experienced and prepared to help you solve your filter problems. Call or write Hertz for reliable service and prompt delivery.

FEATURES

1. Filters, Band Pass, Passive
2. Center Frequencies — 50 Hz to 50 Meg Hz
3. Shape factors — better than 2.0 for ratios of 60 db to 3 db
4. Bandwidth to center frequency ratio — up to 10%
5. Phase linearity — within 10° through passband
6. Low passband insertion loss
7. Better than 80 db attenuation 50% above and below center frequency
8. Input and output impedances as required
9. Low input and output impedances in stop band
10. Low passband ripple
11. L, C, and R elements only

FACILITIES CAPABILITY

Hopkins Engineering Company is a leading manufacturer of RFI/EMI filters. It was founded in 1945 and offers engineering design and manufacturing expertise in solving electromagnetic interference problems.

MANUFACTURING

A wide variety of filter designs are manufactured in our modern fully equipped 30,000 square foot factory. Quality is built into every Hopkins filter by skilled production personnel and an efficient prototype department offers prompt delivery of new designs. Hopkins has manufactured products to the most exacting military programs for over 25 years.

ENGINEERING

Hopkins' engineers have developed thousands of filter designs to meet a variety of military and industrial RFI/EMI suppression requirements. This versatility coupled with the latest filter design techniques and use of computer assisted design programs allows our engineers to develop filters of optimized circuitry, performance, reliability, and cost.

QUALITY ASSURANCE

A policy of rigid quality control practices are employed. Quality materials and high workmanship standards insures a product that meets or exceeds specification requirements. Our quality assurance department maintains established procedures to control the quality and reliability objectives of the customer and Hopkins Engineering Company.

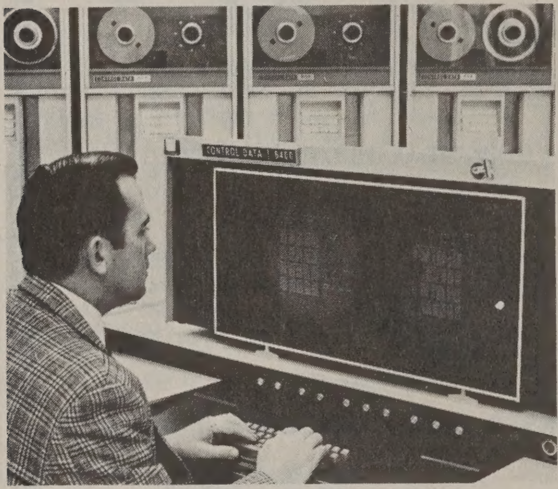
CUSTOM FILTERS

Low, band or high pass and band stop filters with optimum amplitude and/or delay characteristics can be supplied to your special requirements and MIL-F-18327 Construction utilizes precision inductors and high quality capacitors of special films or silvered mica, according to frequency and space requirements. Operating frequencies range to 100 MHZ. Temperature stabilization for both amplitude and frequency can be effected. Mechanical styles may be epoxy encapsulated or hermetically sealed metal in sizes from 0.2 to 200 cu. in.



To keep pace with the most sophisticated technologies of network design, Hisonic engineers have direct in-plant access to the tremendous capabilities of large late-generation computers. The Hisonic staff includes specialists with up to 25 years experience in precision inductor and filter network design. It also includes advanced mathematicians with backgrounds of program development, who are able to achieve design excellence not otherwise attainable.

STANDARD FILTERS

FOR HIGHEST SELECTIVITY

Standard filters are computer designed by modern network methods for minimum stop to pass band ratios. Applications are those requiring optimum utilization of frequency spectrum.

Technicians adjust critical response of special band pass filters utilizing adjustable ferrite core inductors. Modern precision test equipment is employed in association with MIL I 45208 Quality Control procedures.

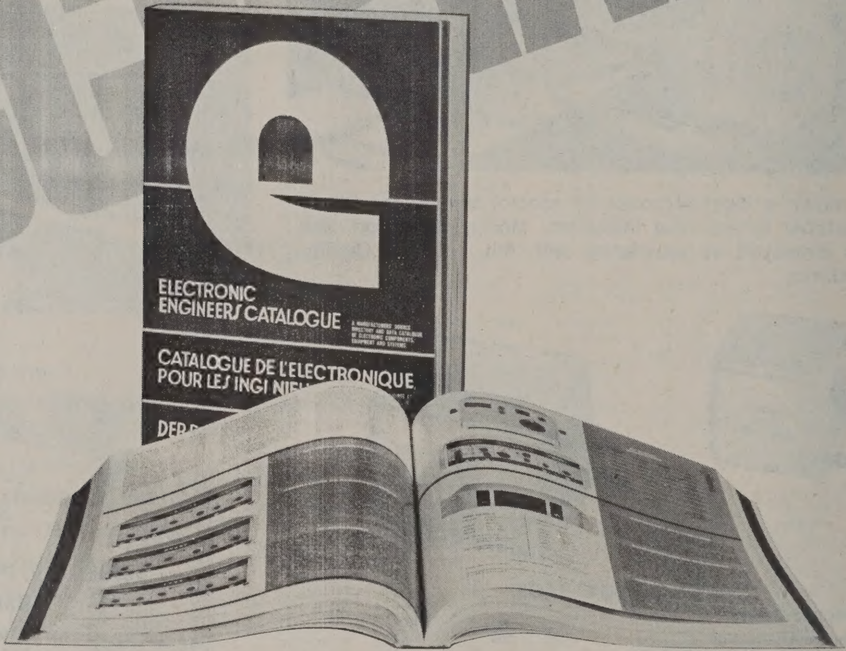
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

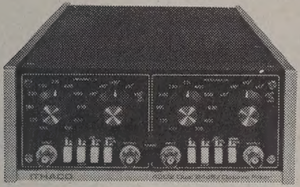
THE PREDICTABLE FILTERS

MODEL 4302 LABORATORY DUAL FILTER



ACCURACY/PHASE MATCH: ±3% of setting/±6°

FREQUENCY RANGE: 10 Hz – 1 MHz

ATTENUATION: 24 dB/octave all modes; 48 dB/octave series hi-or lo-pass, > 100 dB max attenuation

CHARACTERISTICS: selectable Butterworth or Bessel

HUM AND NOISE: <75μV rms X1 gain; <10μV rms X10 gain

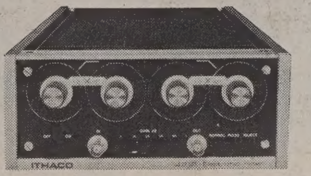
COUPLING: selectable AC or DC

GAIN: selectable X1 or X10 for each section

LOW DISTORTION: <.005% at 1 kHz X10 gain

LOW COST: $655

4210 SERIES CALIBRATED LAB FILTERS



ACCURACY/PHASE MATCH: ±1% of setting/±2°

FREQUENCY RANGE: .01 Hz – 1MHz in 3 models

ATTENUATION: 24 dB/octave all modes; >100 dB max.

CHARACTERISTICS: selectable Butterworth or Bessel

HUM AND NOISE: <70 μV rms

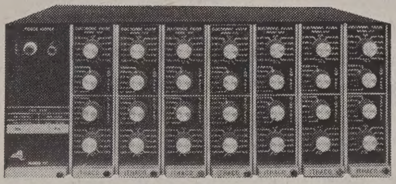
COUPLING: DC in lo-pass; AC all other modes

GAIN: optional selectable 0/10/20/30/40 dB

BATTERY POWER: available as option

THREE MODELS TO CHOOSE FROM AT $995

4110-SERIES MULTI CHANNEL FILTERS



ACCURACY/PHASE MATCH: ±1% of setting/±2°

FREQUENCY RANGE: ±.01 Hz – 1 MHz in 3 models

ATTENUATION: 24 dB/octave all modes; >90 dB max.

CHARACTERISTICS: Butterworth only

HUM AND NOISE: <70 μV rms

COUPLING: DC in lo-pass; AC all other modes

BANDPASS: characteristics completely predictable and repeatable ±1%/±0.1 dB all settings

THREE MODELS TO CHOOSE FROM, $820 to $870

THE ELECTRONIC DISTRIBUTORS MASTER CATALOG
FORMERLY: OFF-THE-SHELF CATALOG
THE ONLY NATIONAL CATALOG OF ELECTRONIC PARTS, INSTRUMENTS AND EQUIPMENT DESIGNED EXCLUSIVELY FOR DISTRIBUTORS AND THEIR CUSTOMERS.

YESTERDAY'S RADIO MASTER IS TODAY'S

ELECTRONIC DISTRIBUTORS MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

muRata CERAMIC FILTER
Type CFR455 A
muRata CERAMIC FILTER
Type CFR455 A

Murata ceramic ladder filters provide their oustanding performance and selectivity through the use of a piezoelectric effect on leadziroconate—titanate ceramics. Each filter consists of multiple ceramic elements coupled electrically in a ladder network. The various filters listed below differ only in selectivity characteristics and size, both of which depend upon the number of ceramic elements utilized in each type. Complete technical data is available from Murata Corporation of America.

SPECIFICATIONS

Center Frequency (center of 3 dB points):

D	10.64 ±0.03 MHz (Black)	C	10.73 ±0.03 MHz (Orange)
B	10.67 ±0.03 MHz (Blue)	E	10.76 ±0.03 MHz (White)
A	10.70 ±0.03 MHz (Red)		

The frequency of the production lots is dispersed between 10.64 ±0.03 MHz and 10.76 ±0.03 MHz. The filters are supplied in five respective groups, each group color coded and supplied as outlined above. Orders for only certain groups are unacceptable.

3 dB Band Width:	280 ±50 KHz
20 dB Band Width:	650 KHz Max.
Insertion Loss:	6 dB Max.
Spurious Response between 9-12 MHz:	30 dB Min.
Temperature Coefficient of Center Frequency:	$0 < \frac{f(max) - f(min)}{f(20°C) \times 100°C} \times 10^6$ less than 120ppm/°C
Temperature Range:	−20° to +80°C
Input and Output Impedance:	330 ohms

Panasonic

CERAMIC LADDER FILTERS

FEATURES

- High selectivity
- Low impedance and insertion loss
- Small in size and lightweight

NOTE: 1. Standard units are more recommendable than semi-standard ones from the viewpoints of space and price.
2. *1: Tolerance of center frequency A•B: ±1.0kHz, C•D•E: ±1.5kHz *2: In the range of the center frequency ±100kHz

HIGH Q AND HIGH SELECTIVITY REED FILTERS

FEATURES

- High Q and High Selectivity — The selectivity does not decrease even in case of high center frequency, permitting use of many signal frequency channels within a limited frequency range.
- Excellent Durability Against Vibration and Shock — Because the change of its characteristics caused by vibration or shock is very limited, it is suitable for pocketable wireless apparatus.
- Superior Stability Against Aging — The reed filter provides an extremely high degree of reliability, unlike conventional reed selectors with contact points, due to piezoelectric ceramic employed as an electromechanical conversion element.
- Small Size and Lightweight — With its compactness, it is recommendable for use in small communication equipment.

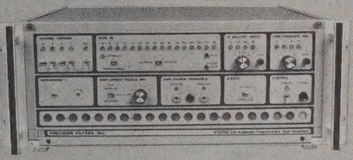
PROGRAMMABLE INSTRUMENTS

SYSTEM 216
PROGRAMMABLE-AUTOMATIC GAIN-RANGING AMPLIFIERS

In this 16-channel amplifier system each amplifier maintains its output to a level suitable for recording on magnetic tape while the status of all amplifiers is recorded on a separate tape track. During playback, one channel is displayed while all channels are read out, bit parallel, byte serial. The system consists of a 7" main-frame, a plug-in control card, and up to 16 plug-in amplifiers.



- **AUTOMATIC GAIN RANGING**
- **PROGRAMMABLE GAIN, LFRO, MODE, & TC**
- **GAIN: -12 dB to +78 dB**
- **LOW-NOISE DIFF. INPUT**
- **OVERLOAD DETECTORS**
- **PLUG-IN HIGH FREQ. ROLLOFF**
- **COMPUTER INTERFACES**
- **BANDWIDTH: 1 Hz-500 kHz**
- **1° PHASE ACCURACY**

PLUG-IN CONTROL MODULES

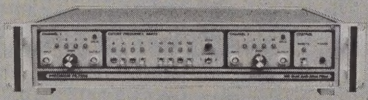
216-C-01	IEEE Bus (HP-IB)
216-C-02	Interface for TTY
216-C-03	Interface for Minicomputer's Buffered I/O
216-C-04	Manual Only
216-C-05	MUX/DEMUX and Interface for Computer

AMPLIFIER SPECIFICATIONS

INPUT	10 M ohm Differential
CMRR	90 dB, 50 Hz-400 Hz
GAIN	-12 dB to + 78 dB in 6 dB steps
LFRO	1, 10, 100, 1 k Hz (6 dB/octave)
HFRO	Plug-In Low-Pass Filter (12 dB/octave)
NOISE	5µV rms in 100 kHz BW

MODEL 602
DUAL-CHANNEL FILTER HP-LP-BP-BR

This two-channel filter has programmable gain & cutoff frequency and direct readout of channel overload. It is housed in a 3½" high rack-mounting cabinet and contains a control card to interface a mini-computer. Precisely controlled low-pass, high-pass or time-delay (linear-phase) filters are available which cover four decades of cutoff frequencies in the range .01 Hz to 150 kHz.



- **1° PHASE ACCURACY**
- **HP-LP-BP-BR**
- **-80 dB at 2 F_c**
- **ELLIPTIC FILTERS**
- **LINEAR-PHASE FILTERS**
- **PROGRAMMABLE GAIN & CUTOFF FREQUENCY**
- **OVERLOAD DETECTORS**
- **COMPUTER INTERFACES: IEEE, TTY, BUFFERED I/O**

CONTROL OPTIONS

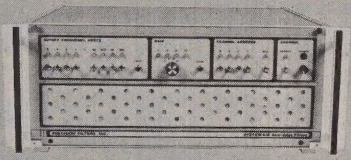
602-C-01	IEEE Bus (HP-IB)
602-C-02	Interface for TTY
602-C-03	Interface for Mini-computer's Buffered I/O
602-C-04	Manual Only

FILTERS

602-01-XXX	10 Hz - 150 kHz
602-02-XXX	1 Hz - 15 kHz
602-03-XXX	.1 Hz - 1.5 kHz
602-04-XXX	.01 Hz - 150 Hz
602-XX-LP1	6 pole, 6 zero LP
602-XX-HP1	6 pole, 6 zero HP
602-XX-TD1	6 pole, 4 zero TD

SYSTEM 616
MULTI-CHANNEL PROGRAMMABLE FILTERS

This 16-channel filter system with programmable gain and cutoff frequency consists of a 7" high rack-mounting main frame with power, connections, and controls for all channels; a plug-in control module for interfacing a minicomputer; and up to 16 plug-in filters. Precisely controlled low-pass, high-pass and time-delay (linear-phase) filters are available which cover four decades of cutoff frequencies in the range .01 Hz - 150 kHz.



- **1° PHASE ACCURACY**
- **HP-LP-BP-BR**
- **-80 dB at 2 F_c**
- **-90 dB at 1.56 F_c**
- **ELLIPTIC FILTERS**
- **LINEAR-PHASE FILTERS**
- **PROGRAMMABLE GAIN & CUTOFF FREQUENCIES**
- **COMPUTER INTERFACES: IEEE, TTY, BUFFERED I/O**

PLUG-IN CONTROL MODULES

616-C-01	IEEE Bus (HP-IB)
616-C-02	Interface for TTY
616-C-03	Interface for Mini-computer's Buffered I/O
616-C-04	Manual Only

PLUG-IN FILTER MODULES

616-01-XXX	10 Hz - 150 kHz
616-02-XXX	1 Hz - 15 kHz
616-03-XXX	.1 Hz - 1.5 kHz
616-04-XXX	.01 Hz - 150 Hz
616-XX-LP1	6 pole, 6 zero LP
616-XX-LP2	12 pole, 12 zero LP
616-XX-HP1	6 pole, 6 zero HP
616-XX-TD1	6 pole, 4 zero TD

OUR NEW 1977 CATALOG LISTS OVER 550 MILITARY AND UL LISTED RFI/EMC FILTER TYPES.

SEND FOR YOUR FREE COPY.

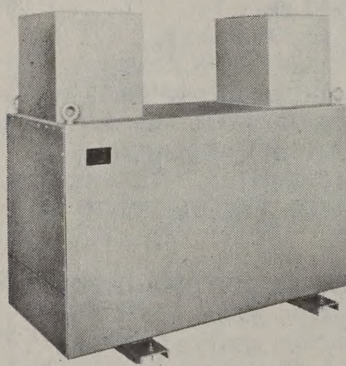
...the nation's leading filter supplier offers a complete range of RFI/EMC filters...

RFI offers the most complete range of products in the industry. Sophisticated, complex, multi-circuit filter assemblies, or simple feedthru capacitors—we make them all.

These are just a few of the more than 10,000 different filter designs by RF INTERONICS for specific customer requirements. For detailed information concerning standard and custom-engineered parts contact our sales department.

Multi-circuit filter packages

Designed to provide the equipment manufacturer with the most economical package from the standpoint of size, weight, and cost. Packages can include the input power connector and considerably simplify equipment construction and wiring.

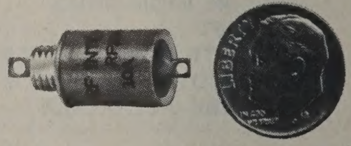


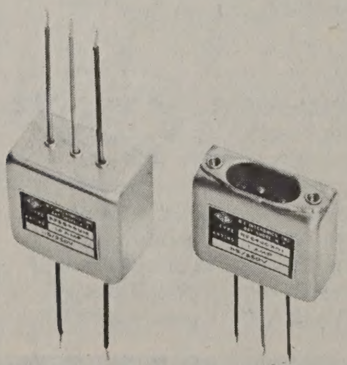
High Power Filter Units

Current and voltage ratings up to 2000 amperes and 20,000 volts. Designed to provide the performance required by high powered ground installations, such as computer facilities, shielded test laboratories, radar installations and similar, high performance applications.

Cylindrical filters to Mil-F-15733E

RF Interonics has more QPL listed parts than any other supplier in the industry — Now qualified on more than 180 different filters, including subminiature "MICRO-FILTER®" units corresponding to military styles FL10, 11, 12, 13 14 and 15, and standard cylindrical types, covered by requirements for styles FL22, 24, 81, 82, 83 and 84 of the military specification.



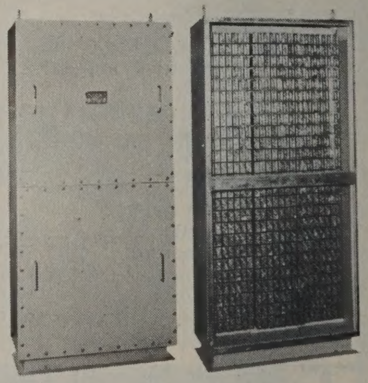


UL Listed Parts

RFI's line of filters includes parts recognized under the components listing program of Underwriters' Laboratories, Inc. These filters are designed for use in Data Processing Equipment, and similar applications.

Communications and Signal Line Filters

RF Interonics manufactures a wide range of filters with various pass band and impedance characteristics, suitable for use in communication, signal or telephone line applications. Filters are available as single or dual circuit units, or in multi-circuit shielded cabinets.



RF INTERONICS

100-E Pine Aire Drive, Bay Shore, Long Island, New York 11706 / (516) 231-6400 / TWX 510-227-6233

These precision analog filters enjoy a worldwide reputation for accuracy, stability, and wide-range flexibility. Highly price-competitive, they have become the first choice of the electronics industry for a broad spectrum of applications, including: anti-aliasing; band limiting in data-acquisition systems; signal-to-noise enhancement in low-level measurements and communications; signal reconstruction (smoothing) in A/D/A and digital-communications systems; and hundreds of test and development-laboratory uses.

Models 432 and 442
Budget Variable Analog Filters

- Two Independent Channels usable in Series, in Parallel, or Separately
- 24dB Rolloff/Octave/Channel
- Cutoff Frequency Ranges: 1Hz-110KHz (Model 432), 10Hz-1.1MHz (Model 442)
- Cutoff Frequency Accuracy: ±5%
- Resolutions: 1Hz to 10KHz (2 digits)
- High Pass, Low Pass, Band Pass, and Band Reject Functions
- 0dB/20dB Gain
- Flat Amplitude (Butterworth) and Flat Delay (Linear Phase) Responses
- Impedances: 1 Megohm Input, 50 Ohms Output
- 80dB Dynamic Range

Models 452 and 852 Dual Hi/Lo Variable Analog Filters

- Two Independent Channels usable in Series, in Parallel, or Separately
- Rolloff: 24dB/Octave (Model 452) or 48dB/Octave (Model 852)
- Cutoff Frequency Ranges: 0.1Hz to 111KHz; Option -01: 0.01Hz to 111KHz
- Cutoff Frequency Accuracy: ±2%
- Resolution: 0.01 to 100Hz (3 digits)
- High Pass, Low Pass, Band Pass, and Band Reject Functions
- Near-Ideal Flat Amplitude (Butterworth) and Flat Delay (Linear Phase) Responses
- 0dB/20dB Gain
- Impedances: Input 1 Megohm, Output 50 Ohms
- Dynamic Range: 90dB
- Negligible Noise and Drift.

System 816 Computer-Compatible Multi-channel Filter System

- Up to 16 Independent Channels
- Local, Remote, and On-card Programming; High Pass, Low Pass, Band Pass, and Band Reject Functions
- Cutoff Frequency Range: 0.1Hz to 150KHz
- Cutoff Frequency Accuracy: ±2%
- Butterworth and Bessel Responses
- 60 Cutoff Frequencies per 4-decade plug-in card
- 48dB/Octave Rolloff (96dB/Octave with 2 channels cascaded)
- Impedances: 1 Megohm Input, 50 Ohms Output
- Programming Delay 3msec (plus filter settling time)
- Negligible Insertion Loss
- Dynamic Range: 80dB

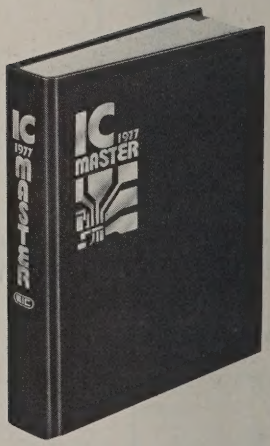
eem/ELECTRONIC ENGINEERS MASTER CATALOG —

The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS

ELECTRONIC ENGINEERS CATALOGUE —

The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.



IC 1977 MASTER
IC 1977 MASTER

IC MASTER AND THE UPDATES —

The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

ELECTRONIC DISTRIBUTORS MASTER CATALOG —

Formerly O-T-S Catalog) The only national catalog designed exclusively or distributors and their customers eaturing electronic parts, instruments and equipment.

ELECTRONIC PRODUCTS MAGAZINE —

The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

eem FILE SYSTEM —

The only filing system designed specially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

SPECTRUM CONTROL INC.

SPECTRUM CONTROL . . . The company was founded upon the basic philosophy of encompassing literally the spectrum of services in the EMI/EMC technology . . . services offered within reasonable cost structures.

Today, Spectrum Control facilities must rate among the most efficient in the industry. Advanced test equipment, shielded test rooms and a fully experienced engineering staff combined with a broad range of electronic components qualifies Spectrum as a unique source for total program management of electromagnetic interference.

Your EMI/EMC problem in electronic or electromechanical equipment can be assumed in total by Spectrum engineers . . . including testing, planning and control, from the initial stages to final resolution of the problem. At the outset an EMC control plan is formulated. This involves in-depth analysis of engineering drawings, circuitry, specifications and the equipment. Next, Spectrum provides consulting service to assist compliance with the control plan. EMI testing to the latest applicable specifications are conducted at your plant site by a team of experienced Spectrum engineers; or, if more convenient, specific equipment and apparatus can be brought directly to our test facilities.

As the problem is pinpointed, Spectrum Control has the total facilities to affect satisfactory, economical solution. Corrective action may involve circuit changes, packaging changes . . . or require EMI Filters, gaskets, metal shields or other types of hardware. Whatever is required, Spectrum Control is equipped with qualified personnel, plant facilities and a broad range of reasonably priced components to help resolve your EMI/EMC problems.

INDUSTRIAL CONSUMER APPLICATIONS

A rapidly increasing number of industrial and consumer products, equipment and systems are potential sources of electromagnetic interference. Spectrum Control specializes in air navigation and avionics, microwave ovens, control circuits, power supplies, electrical instruments, electric motor noise suppression . . . just about any application where EMI impairs optimum performance.

MILITARY APPLICATIONS

Today's powerful communications systems, radar systems and other high performance systems demand the ultimate in electromagnetic compatibility. Spectrum Control offers one of the best equipped, independent test facilities in the United States. Spectrum is capable of performing to the following applicable specifications:

MIL-STD-461/462
MIL-STD-826
MIL-I-6181
MIL-I-26600
MIL-I-16910
FCC-Part 15
FCC-Part 18

EMC Planning, Control and Testing . . . a total approach to electromagnetic compatibility!

EMI/RFI SUPPRESSION FILTERS

MIL-F-15733

Listed below are the decodings from Mil-F-15733 to Spectrum part number. These filters can be ordered by the Spectrum or Mil number. A copy of this Mil specification and the slash sheets are available through normal channels at Naval Publications, 5801 Tabor Avenue, Philadelphia, Pennsylvania 19120. Spectrum Control is QPL'd on all dash numbers under slash sheets shown and will become qualified under all new slash sheets.

STERLING
TRANSFORMER

STANDARD INTERSTAGE AND LINE TRANSISTOR AND TUBE APPLICATIONS *filters*

Hermetically Sealed — Manufactured to MIL-F-18327B Available in Other Frequencies

LOW PASS

INTERSTAGE

LI units have a loss of approximately 3 db at cutoff frequency, and an attenuation of 35 db at 1.5 cutoff frequency. Input and output 10,000 ohms. LI units are MIL type FR4RX11YY.

Part No.	Frequency	Case Size	Net Price
LI-60	60 cps	A	$79.20
LI-100	100 cps	A	79.20
LI-200	200 cps	B	79.20
LI-400	400 cps	B	79.20
LI-500	500 cps	B	79.20
LI-800	800 cps	B	79.20
LI-1,000	1,000 cps	B	79.20
LI-1,500	1,500 cps	B	79.20
LI-2,000	2,000 cps	B	79.20
LI-2,500	2,500 cps	B	79.20
LI-3,000	3,000 cps	B	79.20
LI-4,000	4,000 cps	B	79.20
LI-5,000	5,000 cps	B	79.20
LI-10,000	10,000 cps	B	79.20

LINE

LL units have a loss of approximately 3 db at cutoff frequency, and an attenuation of 35 db at 1.5 cutoff frequency. Input and output 500/600 ohms. LL units are MIL type FR4RX11YY.

Part No.	Frequency	Case Size	Net Price
LL-600	600 cps	A	$79.20
LL-1,000	1,000 cps	A	79.20
LL-1,500	1,500 cps	A	79.20
LL-2,000	2,000 cps	A	79.20
LL-2,500	2,500 cps	A	79.20
LL-4,000	4,000 cps	A	79.20
LL-8,000	8,000 cps	A	79.20
LL-10,000	10,000 cps	A	79.20
LL-12,000	12,000 cps	A	79.20

HIGH PASS

INTERSTAGE

HI units have a loss of less than 6 db at cutoff frequency, and an attenuation of 35 db at .67 cutoff frequency. Input and output 10,000 ohms. HI units are MIL type FR4RX33YY.

Part No.	Frequency	Case Size	Net Price
HI-100	100 cps	A	$79.20
HI-200	200 cps	A	79.20
HI-300	300 cps	A	79.20
HI-400	400 cps	A	79.20
HI-500	500 cps	A	79.20
HI-800	800 cps	A	79.20
HI-1,000	1,000 cps	A	79.20
HI-2,000	2,000 cps	A	79.20
HI-3,000	3,000 cps	A	79.20

LINE

HL units have a loss of less than 6 db at cutoff frequency, and an attenuation of 35 db at .67 cutoff frequency. Input and output 500/600 ohms. HL units are MIL type FR4RX33YY.

Part No.	Frequency	Case Size	Net Price
HL-200	200 cps	A	$88.00
HL-300	300 cps	A	88.00
HL-500	500 cps	A	88.00
HL-1,000	1,000 cps	A	88.00

FOR WIDE BAND PASS FILTERS THE LI & HI OR LL & HL MAY BE CONNECTED IN SERIES.

BAND PASS

INTERSTAGE

BI units have 2:1 voltage gain. They are sharply peaked, having approximately 2 db attenuation at plus or minus 3% from center frequency and attenuation greater than 40 db at 1/2 and twice center frequency. Input 10,000 ohms, output to grid. BI units are MIL type FR4RX22YY.

Part No.	Frequency	Case Size	Net Price
BI-50	50 cps	A	$79.20
BI-60	60 cps	A	79.20
BI-100	100 cps	A	79.20
BI-120	120 cps	B	79.20
BI-200	200 cps	B	79.20
BI-240	240 cps	B	79.20
BI-400	400 cps	B	79.20
BI-500	500 cps	B	79.20
BI-750	750 cps	B	79.20
BI-800	800 cps	B	79.20
BI-1,000	1,000 cps	B	79.20
BI-1,500	1,500 cps	B	79.20
BI-2,000	2,000 cps	B	79.20
BI-3,000	3,000 cps	B	79.20
BI-4,000	4,000 cps	B	79.20
BI-5,000	5,000 cps	B	79.20
BI-10,000	10,000 cps	B	79.20

LINE

BL units have 9:1 voltage gain. They are sharply peaked, having approximately 2 db attenuation at plus or minus 3% from center frequency and attenuation greater than 40 db at 1/2 and twice center frequency. Input 500/600 ohms, output to grid. BL units are MIL type FR4RX22YY.

Part No.	Frequency	Case Size	Net Price
BL-400	400 cps	B	$79.20
BL-1,000	1,000 cps	B	79.20

TRANSISTOR INTERSTAGE

They are sharply peaked, having approximately 2 db attenuation at plus or minus 3% from center frequency and attenuation greater than 40 db at 1/2 and twice center frequency. Input 10,000 ohms, output 10,000 ohms. BIT units are MIL type FR4RX22YY.

Part No.	Frequency	Case Size	Net Price
BIT-60	60 cps	A	$88.00
BIT-100	100 cps	A	88.00
BIT-120	120 cps	B	88.00

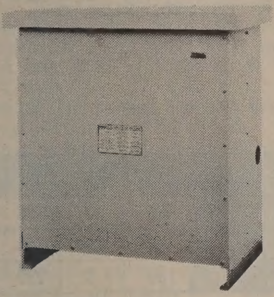
ULTRA-ISOLATION NOISE-SUPPRESSION TRANSFORMERS

125 VA to 130 kVA

PROTECT SENSITIVE EQUIPMENT FROM POWER LINE NOISE



ENCASED TYPE, available in 75 to 130 kVA ratings, three-phase

Featuring:

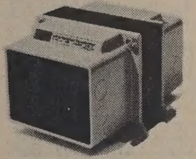
- **Clean, Noise-Free Power Output**
- **Unique Triple Box Shielded Design**
- **Low Coupling Capacitance**
- **Guaranteed Performance**
- **Topaz Quality**

Many of today's electronic equipment and systems are sensitive to line voltage transients and spikes caused by utility feeder switching, lightning, air conditioning and other sources of noise. Topaz Ultra-Isolation Transformers prevent these transients from reaching sensitive equipment. A unique box shielding technique reduces capacitive coupling from primary to secondary to less than 0.0005 picofarads. This low capacitive coupling provides a common-mode noise rejection ratio of over ten million to one.

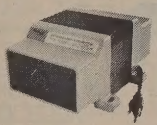
A full line of single-phase and three-phase models is available from 125 VA to 130 kVA. Topaz Ultra-Isolation Transformers may be used alone or in conjunction with Topaz AC Line Regulators.

TYPICAL EQUIPMENT AND SYSTEMS USING TOPAZ ULTRA-ISOLATION TRANSFORMERS

- Computers and Computer Peripherals
- Instrumentation
- Process Control
- Digital Communications
- Telemetry
- Audio and Video Recording



ENDBELL TYPE, available in ratings from 125 VA through 5 kVA single phase



LINE CORD/RECEPTACLE TYPE, available in ratings from 125 VA through 2.4 kVA

APPLICATIONS

- Isolating sensitive equipment from noisy power lines
- Isolating noisy equipment from sensitive equipment sharing the same power line
- Minimizing common-mode noise
- Minimizing transverse-mode noise resulting from common-mode noise at the input
- Complete electrostatic shielding

STANDARD ULTRA-ISOLATION TRANSFORMERS

SINGLE-PHASE MODELS—All Topaz standard endbell type and encased type Ultra-Isolation Transformers are manufactured with dual-voltage primary and secondary windings and are rated for operation at either 50 or 60 Hz. For maximum versatility, the dual-voltage windings permit hookup in any combination of the listed voltages—one to one, step-up or step-down. Single-phase transformers are available in three styles:

TERMINAL STYLE: Available in all power ratings. Transformers are supplied with terminals or lugs for direct-wired installations. Wiring instructions are included with each transformer.

LINE CORD/RECEPTACLE STYLE: Available on models with power ratings through 2.5 kVA. Transformers are supplied prewired in a 120 V-120 V configuration. There is a plug on the six foot input line cord and a standard 120V receptacle on the secondary.

125 VA through 500 VA models have a NEMA 5-15P plug attached to the input cord and a NEMA 5-15R output receptacle.

1 kVA models have a NEMA 5-15P input plug and a duplex NEMA 5-15R output receptacle.

2.4 kVA models are limited to 20 amperes input and have a NEMA L5.20P twist lock input plug and a duplex NEMA 5-15R output receptacle.

THREE-PHASE MODELS— Standards models are available prewired for specified operating voltages.

NON-STANDARD ULTRA-ISOLATION TRANSFORMERS—The following list includes all standard transformers. Transformers can be designed and manufactured to suit a full range of special requirements. Please contact Topaz for additional information.

Typical Specifications: Standard 50/60 Hz Single-Phase Models

Common-Mode Noise Attenuation: .005 pF—126 dB; .001 pF—140 dB; .0005 pF—146 dB

DC Isolation: 1000 megohms winding-to-winding and winding-to-ground

Dielectric Strength: 1000 VAC minimum

Electromagnetic Noise: Less than 0.11 Gauss (20 dB) at 18″ distance

Operating Voltages: To 110% of nominal

Operating Frequency: 50/60 Hz

Other Models Available: 400 Hz

TRW UTC TRANSFORMERS FILTERS

UTC "FLATS"* ELECTRIC WAVE FILTERS

DESIGNED, MANUFACTURED AND SUCCESSFULLY TESTED TO COMPLETE MIL-F-18327 SPECIFICATIONS

These filters meet today's need for flat component configurations, have excellent attenuation characteristics and are ruggedized to Grade 6, MIL-F-18327. Straight pin terminals and flat construction make these units ideally suited for printed circuit applications. These filters are hermetically sealed in flat metal cases shielded to reduce hum pickup. FP-A Case: 2″ x 2″ x ½″ h., 2.5 oz. FP-B Case: 2″ x 1½″ x ⅜″ h., 2 oz. FP-C Case: 2″ x 1½″ x ½″ h., 2.2 oz.

FHH-200: Flat package high pass filter, source and load 10K ohms. Units are within 1 db up to 300 Hz 3 db ±1 db at 200 Hz, and have an attenuation of at least 40 db at frequencies below 140 Hz. FP-A Case. Mil Type: FR6RX33YY1.

FLH-600: Flat package low pass filter, source and load 10K ohms. Units are within 1 db from DC to 450 Hz, 3 db ±1 db at 600 Hz, and have an attenuation of at least 40 db at frequencies above 800 Hz. FP-A Case. Mil Type: FR6RX11YY1.

FLH-5000: Flat package low pass filter, source and load 10K ohms. Units are within 1 db from DC to 4.2 kHz, 3 db ±1 db at 5 kHz, and have an attenuation of at least 43 db at frequencies above 6400 Hz. FP-B Case. Mil Type: FR6RX11YY1.

FLL-3500: Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 3 kHz, 3 db ±1 db at 3500 Hz, and have an attenuation of at least 40 db at frequencies above 4500 Hz. FP-A Case. Mil Type: FR6RX33YY1.

FLL-18000: Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 15 kHz, 3 db ±1 db at 18 kHz, and have an attenuation of at least 43 db at frequencies above 23 kHz. FP-A Case. Mil Type: FR6RX11YY1.

FLL-50000: Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 42 kHz, 3 db ±1 db at 50 kHz, and have an attenuation of at least 43 db above 64 kHz. FP-B Case. Mil Type: FR6RX11YY1.

FBH-1: Flat package Broad Band Pass Filter has a source and load of 10K ohms. Units are within 3 db from 1 kHz to 2 kHz, and have an attenuation of at least 36 db at frequencies below 500 cps and above 4 kHz. FP-C Case. Mil Type FR6RX22YY1.

FBH-10: Same as FBH-1, except less than 3 db from 10 kHz to 20 kHz, attenuation of at least 36 db below 5 kHz and above 40 kHz.

INTERSTAGE AND LINE FILTERS

Available in stock frequencies listed below (numerical part of type—number is center frequency in Hz on band pass or cutoff frequency in Hz on low and high pass filters). Compact shielded cases hermetically sealed to MIL-F-18327 specs. BMI, LMI, BML Cases: 1³⁄₁₆″ x 1¹¹⁄₁₆″ x 1⅝″ h.; wt., 6 oz. HMI, HML, LML Cases: 1³⁄₁₆″ x 1¹¹⁄₁₆″ x 2½″ h.; wt., 9 oz. The BMI filters are band pass interstage units designed to operate between 10,000 ohms and a grid. They provide a gain of 2 at center frequency. BTI units are same as BMI, but 10,000 ohms output. BML band pass filters, similarly, work into a grid, but have an input impedance of 500/600 ohms. They provide a gain of 9.

HMI filters are high pass interstage units.

LMI filters are low pass interstage units.

HML filters are high pass with input and output impedance of 500/600 ohms.

LML filters are low pass filters with input and output impedance of 500/600 ohms.

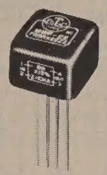
MNF/MWF BAND PASS TELE-MINIFILTER

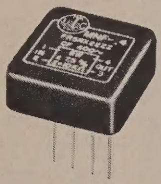
Both MNF and MWF types are designed for 10K source and load impedance. Low profile and pin terminals make these filters ideally suited for printed circuit applications. Mil-F-18327 Type FR7RX22ZZ1

MNF filters are down less than:
3 db. at ±7.5% of Center Frequency.
15 db. min at ±25% of Center Frequency.
Attenuation is greater than 40 db. beyond 1.75 x Center Frequency and .58 x Center Frequency.

MWF filters are down less than:
3 db. at ±15% of Center Frequency.
15 db. min. at ±50% of Center Frequency.
Attenuation is greater than 40 db. beyond 2.5 x Center Frequency and .4 x Center Frequency.



MNF-4 thru MNF-5.4
1³⁄₁₆″ sq. x ½″ high
Weight 1 oz.



MNF-7.35 thru MWF-70
²³⁄₃₂″ sq. x ½″ high
Weight ⅓ oz.

MINIFILTERS*

These units provide almost the same characteristics as the standard interstage units listed at the bottom left, although extremely miniaturized. Hermetically sealed to MIL-F-18327 specs. B Type Case: ¾″ x ¾″ x 1⅛″ h.; wt., 1 oz. H and L Cases: 1″ x 1″ x 1⅜″h; wt., 2¼ oz. Center frequency in Hz on band pass or cutoff frequency in Hz on low and high pass filters is indicated by type numbers."

BPM units (BAND PASS) have 2:1 gain. Attenuation is approximately 2 db ±3% from center frequency, and 35 db per octave as shown. source; 10,000 ohms, output to grid, tapped for 10,000 ohms.

BPM units (band pass) have a 2:1 gain grid output. Attenuation is less than 2 db ±3% from center frequency and 35 db per octave. Source 10,000 ohms, output to grid, tapped for 10,000 ohms. Can be connected for band reject response."

Source and load 10,000 ohms.

LPM units (LOW PASS) are down less than 6 db at cutoff frequency, and more than 30 db at 1.5 cutoff frequency, 40 db at 1.65 cutoff frequency. Source and load 10,000 ohms.

TRW UTC TRANSFORMERS FILTERS & INDUCTORS

FE, FI MINIATURE INDUCTORS

DESIGNED, MANUFACTURED AND TESTED TO COMPLETE MIL-T-27

SPECIFICATIONS

FE, FI miniature inductors are ideal for transistor and printed circuit applications, having both pin terminals and a molded flat construction. These units are symmetrical toroids providing maximum Q in minimum size. The FE and FI inductors are adjusted at 1V, 1 kHz. All units are adjusted to a tolerance of ±1%. The maDC max. shown is for approximately 5% drop in inductance. The temperature stability is unequalled from −55°C to +100°C. For AC level limitations, a general rule of thumb would be to consider the maximum AC current approximately equal to the maximum DC current rating. All units Mil Type: TF5R20ZZ.

VARIDUCTORS

These variable inductors are ideal for use in tuned circuits, equalizers, oscillators, etc.

HVC, TVC VARIABLE INDUCTORS

PACKAGING — Hermetically sealed. Metal encased. Inductance variation controlled by adjustment screw on top of case. Range is covered in 900° rotation. Setting is positive. TVC is tapped version of HVC, with taps at 30% and 50% of total turns.

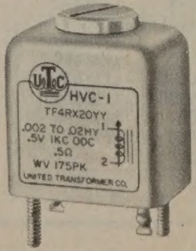
RANGE — HVC, TVC +200% −70% of nominal value.

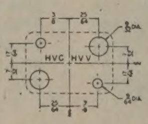
TEMPERATURE STABILITY — At mean inductance, from −55°C to +105°C. HVC & TVC: ±1.5%.

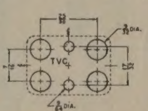
MIL TYPE TF4R20YY Size — 1⅛ x $\frac{25}{32}$ x 1$\frac{9}{32}$ h, Wt. 2 oz.

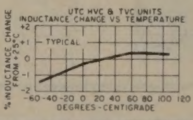
Type No.	Tapped Type No.	Min. Hys.	Mean Hys.	Max. Hys.	maDC	DCRΩ +20%
HVC-1	TVC-1	.002	.006	.02	100	.5
HVC-2	TVC-2	.005	.015	.05	60	1.4
HVC-3	TVC-3	.011	.040	.11	40	3.6
HVC-4	TVC-4	.03	.1	.3	30	8.6
HVC-5	TVC-5	.07	.25	.7	20	22
HVC-6	TVC-6	.2	6	2	15	55
HVC-7	TVC-7	.5	1.5	5	10	141
HVC-8	TVC-8	1.1	4	11	7	360
HVC-9	TVC-9	3	10	30	5	950
HVC-10	TVC-10	7	25	70	3.5	2220
HVC-11	TVC-11	20	60	200	2	5550
HVC-12	TVC-12	50	150	500	1.5	15.6K

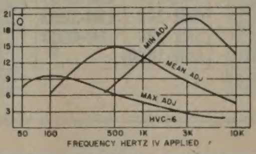
Choosing Type No.: If frequency is above 100 Hz, use type providing required inductance between mean and min. values.

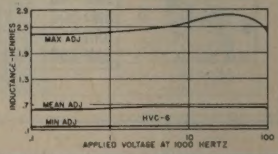












SR POWER INDUCTORS

SR power inductors are a new development, optimizing saturation characteristics with temperature rise. By special design, TRW/UTC has achieved higher LI^2 capability with lower DCR for a given size. Another way to see this improvement is to realize that these units produce less drop in inductance with DC for their size than comparable available units. See the curves below for typical capability in each size.

These inductors have low losses in the 3 to 100 kHz frequency range, making them ideal for switching regulator and AC filter choke applications.

The type numbers correspond to their inductance values in microhenries, which are measured at 1 V, 10 kHz, 0 DC with an inductance tolerance of +15%, −5%. Current listings I_1 are for approximately 10% drop in inductance with a typical 20°C temperature rise, and listings I_2 are for a 20% drop in inductance with a typical 40°C temperature rise.

Values of inductance other than listed in an existing size are available. Part number would be:

SR (A, B, or C)—(inductance in microhy at 0 DC)

Single-winding construction is assumed unless otherwise specified.

USE OF CURVES

EXAMPLE 1 Select an inductor to meet a requirement of 200 μhy at 3 amps with a maximum temperature rise of 20°C.

First, calculate LI^2, where L is in microhenries and I is in amperes. $LI^2 = 200 \times 3 \times 3 = 1800$.

Study the curves below to find the smallest coil that has a temperature rise less than 25°C. For $LI^2 = 1800$, SRA ≈ 30°C, which is too high for this requirement. However, the SRB curve shows an acceptable heat rise of 15°C and 92% of initial inductance at $LI^2 = 1800$. To meet the requirement of 200 μhy at 3 amps, inductance at 0 DC $\approx \frac{200}{.92} = 217$. Look in the itemized listing for an appropriate coil. Select SRB-220. Recalculate $LI^2 = 220 \times 3 \times 3 = 1950$. Check the curve to verify that the heat rise is still under 20°C for the new value of LI^2.

EXAMPLE 2 Select an inductor to meet a requirement of 750μhy minimum at 0 DC, with a maximum change in inductance of 15% at 1 amp and 25% at 1.5 amp. Looking at the itemized listing, select SRA-800. Calculate LI^2 as in Example 1. For 1 amp, $LI^2 = 800$; for 1.5 amp, $LI^2 = 1800$.

Check the SRA curve for the drop in inductance. It is less than 10% at 1 amp, and less than 20% at 1.5 amp, which is acceptable.

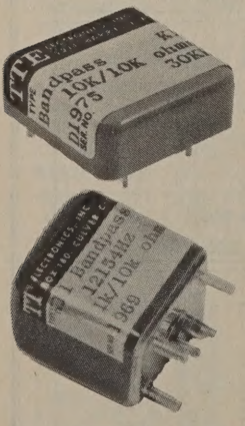
The bandwidth for any of the above filters can be increased or decreased to specification.



WIDE BAND FILTERS: Bandwidths of ±16% or greater can be obtained by ordering TTE standard High pass and Low pass filter sections as a composite network. Select numbers from the Series H and J listings on the next page which give the desired attenuation slopes and combine these numbers. For example to obtain a slope of 40db at 0.65 of the lower frequency cut-off, F_{c1}, (High pass section) and 40db at 1.6 of the upper frequency cut-off, F_{c2}, (Low pass section) use H6959. **THE HIGH PASS SERIES NUMBER IS FIRST, FOLLOWED BY THE LOW PASS NUMBER.** Types with dissymmetrical attenuation slopes can be combined. Also specify the 3db down cut-off frequencies F_{c1} and F_{c2} and impedance. The price is the sum of the HP and LP section prices.

INSERTION LOSSES for bandpass types between equal terminations are from 0.5 to 6db depending upon bandwidth, frequency and size. K10 and K11 types have about 10db, and K12 types about 5db flat loss. **SPECIALS** are available for center frequencies from 10Hz upward and 40db to 3db bandwidth ratios as sharp as 1.2:1. **TO ORDER** Specials, also specify (5) bandwidth and (6) stop band attenuation required.

TO ORDER BANDPASS FILTERS — Specify (1) TTE Series No., (2) minus 3db frequencies, (3) source impedance, (4) load impedance. **PRICES $39 to $174.**

TELEMETERING: Refer to Series K20, K21B, K30, K31B, Q20, Q21, Q30 or Q31.
TO ORDER specify IRIG Channel number, source and load impedances.

What can I use to keep all the manufacturers' product data I receive in order?
What system makes filing or retrieving manufacturers' catalogs fast and easy?
Which file system have thousands of engineers purchased because they know it works?

eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

CERAMOLITHIC®

Centralab/USCC's monolithic ceramic EMI/RFI filters have evolved in phase with solid state technology. Increasingly higher frequencies in tiny LSI environments make tough demands on designers: better attenuation, in state-of-the-art sizes and at affordable prices.

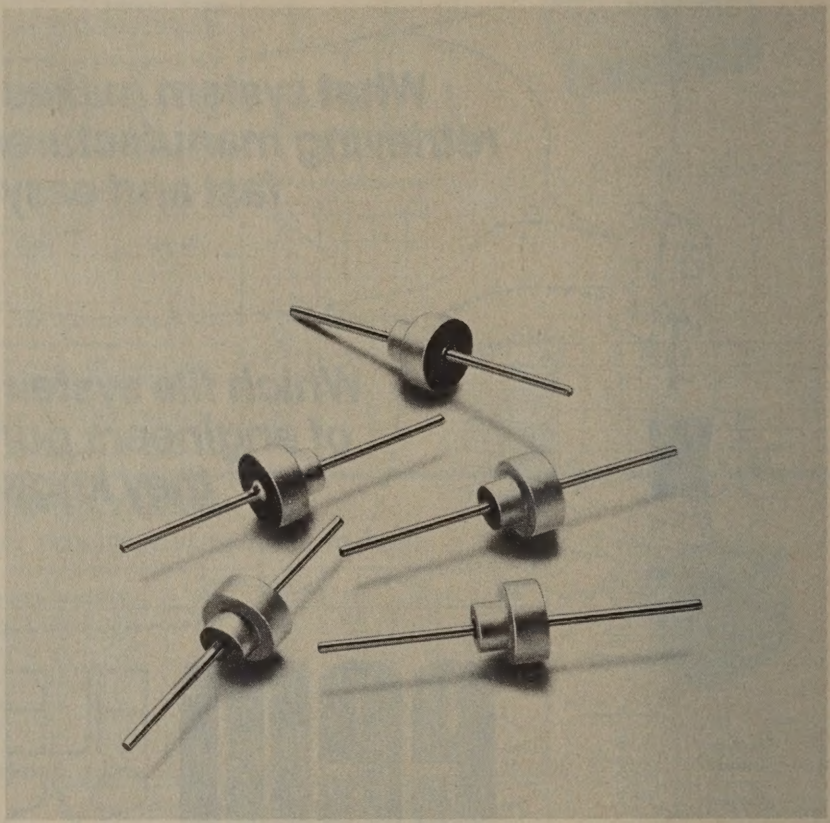
We've met these challenges at Centralab/USCC by accelerating the filter evolution through research in dielectrics and high-productivity manufacturing techniques.

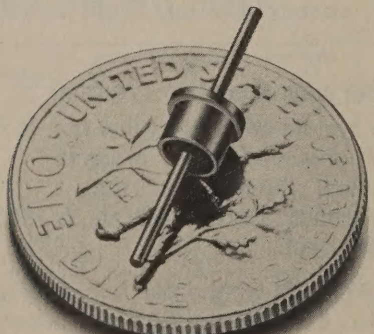
Here's what today and tomorrow look like.

The latest and smallest filters available from CRL/USCC — 9900 Series feed-throughs. Better than 70db insertion loss at 10 GHz. Used all the way from medical electronics to CATV.

MIL-STD-461 filters — the smallest ever offered for this use. For any relatively low source and load impedance job, the highest insertion loss at low frequencies.

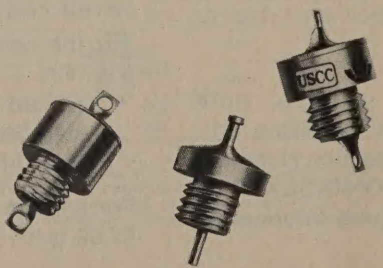
Also tomorrow's filters today— CASELESS. CRL/USCC now offers another step in CERAMOLITHIC® technology — a dielectric that serves as its own outer case — with obvious economics.





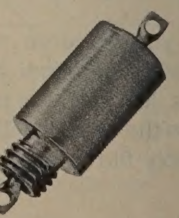
"BUTTON" SERIES

- Epoxy or hermetically sealed;
- 50, 100, 200, 300 VDC and 115 VAC 0-400 Hz;
- 15 amps DC; L section
- .187″ or .312″ thread lengths



MINIATURE 1000 and 2000 SERIES

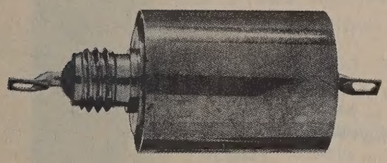
- 50, 100, 200, 300 VDC and 115 VAC 0-400 Hz;
- .06 to 10 amps DC; Pi, L and T sections;
- .187″ or .312″ thread lengths



EMI/RFI FILTERS

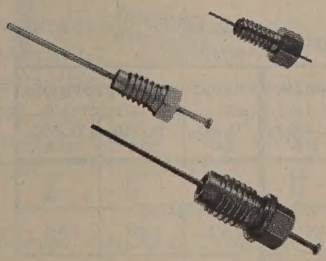
MINIATURE 1400 and 2400 SERIES

- 125 VAC and 230 VAC 0-40 Hz;
- .1 to 10 amps DC;
- Pi, L and T sections



SUBMINIATURE 3000 SERIES

- 3112: 100 VDC; 10 amps; L section
- 3223: 200 VDC; 10 amps; Pi section
- 3300: 50, 100 and 200 VDC; 10 amps;
- Pi and Multi-sections
- 3500: 100, 200 and 500 VDC; 25 amps; Pi section

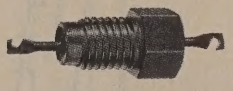


FEED-THRU CAPACITOR FILTERS 9900 SERIES

- 50, 100, 200 WVDC
- 10 amps DC
- 100 pF to 5000 pF

FEED-THRU CAPACITOR FILTER 9000 SERIES

- 50, 100, 200, 300, 500 VDC and 115 VAC 0-400 Hz;
- 10 and 25 amps DC;
- 100 pF to 1.5 Mfd.



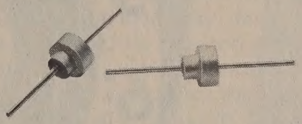
MIL-STD-461 FILTER MIL-F-15733*

- Designed for MIL-STD-461 applications;
- 50, 100, 300 VDC and 115 VAC 0-400 Hz;
- .1 to 10 amps DC;
- 5 element inductor fed.

CASELESS EMI/RFI FILTERS

UF and US Series Feed-Thru and Standoff Styles

- 50, 100, 200 WVDC
- 5 amps DC
- 1000 to 5000 pF; 0.01 to 0.05 Mfd.
- Square lead available for wire wrap.



CUSTOM DESIGN AND PROTOTYPES.

CRL/USCC offers you complete custom design assistance for non-standard filters, including prototype manufacturing and testing services. Call (213) 240-4880 for applications engineering support, or write for your EMI/RFI filters catalog.

*Under qualification.

SERIES 2700 FEEDTHRU/ ULTRA-HIGH RELIABILITY FILTER

The Series 2700 Feedthru/ultra-high reliability filter is a totally new concept in filtering, offering almost unlimited reliability where maintenance-free systems are mandatory. This new concept is based on utilizing a redundant capacitor system by using two capacitors in series, so that a failed capacitor results in improved filtering.

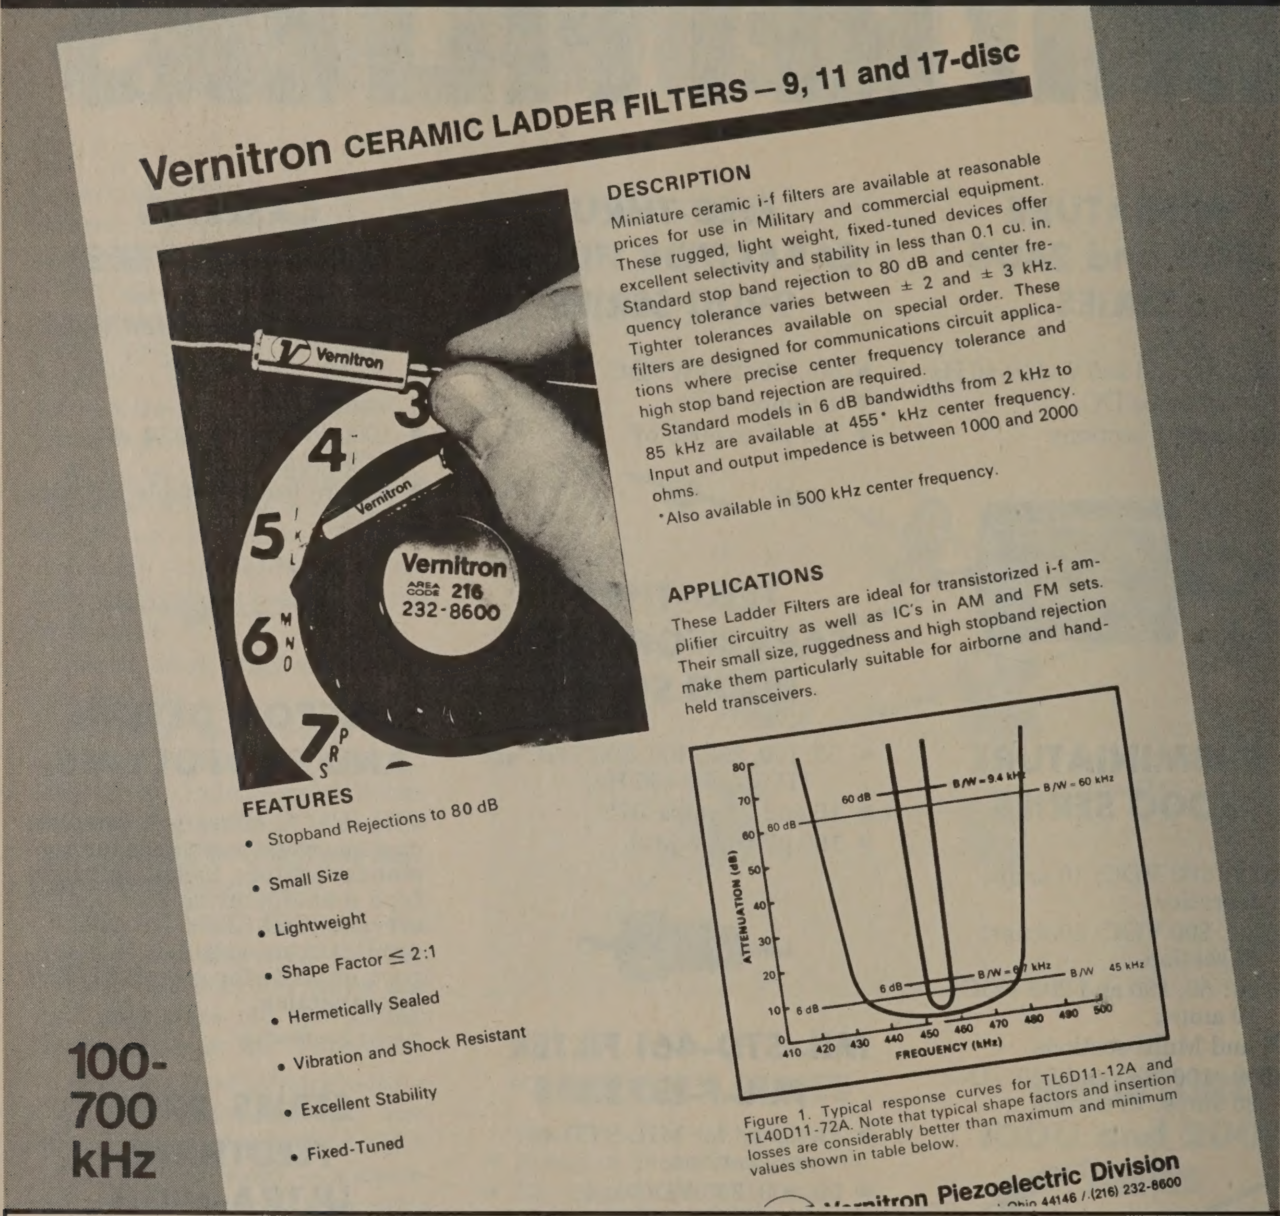
from **Vernitron** (the ceramic filters people)



Vernitron CERAMIC LADDER FILTERS — 9, 11 and 17-disc

DESCRIPTION

Miniature ceramic i-f filters are available at reasonable prices for use in Military and commercial equipment. These rugged, light weight, fixed-tuned devices offer excellent selectivity and stability in less than 0.1 cu. in. Standard stop band rejection to 80 dB and center frequency tolerance varies between ± 2 and ± 3 kHz. Tighter tolerances available on special order. These filters are designed for communications circuit applications where precise center frequency tolerance and high stop band rejection are required.

Standard models in 6 dB bandwidths from 2 kHz to 85 kHz are available at 455* kHz center frequency. Input and output impedence is between 1000 and 2000 ohms.

*Also available in 500 kHz center frequency.

APPLICATIONS

These Ladder Filters are ideal for transistorized i-f amplifier circuitry as well as IC's in AM and FM sets. Their small size, ruggedness and high stopband rejection make them particularly suitable for airborne and hand-held transceivers.

FEATURES

- Stopband Rejections to 80 dB
- Small Size
- Lightweight
- Shape Factor ≤ 2:1
- Hermetically Sealed
- Vibration and Shock Resistant
- Excellent Stability
- Fixed-Tuned

Figure 1. Typical response curves for TL6D11-12A and TL40D11-72A. Note that typical shape factors and insertion losses are considerably better than maximum and minimum values shown in table below.

LADDER FILTERS

Series LTL

100 to 270 kHz

Bandpass capabilities 1 to 10%

For the medium-frequency range, these rugged ceramic bandpass filters offer advantages in price and size over LC filters. Typical shape factors of 2.0 to 1 are achieved in this unique ladder design.

Ideal for navigation and instrumentation applications.

Any Operating Frequency Between 100 kHz and 270 kHz.

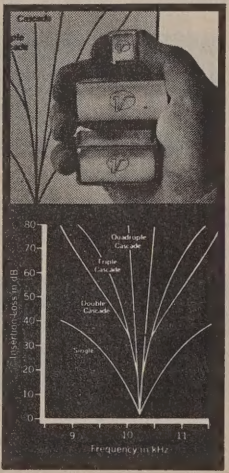
f_o–7.5 to 50 kHz

Designed for Omega Applications

LOW FREQUENCY FILTERS (LF)

Single Resonator
2, 3 or 4 Resonator
Cascades



High-performance miniature for LF communications or Omega systems—featuring selection of any f_o from 7.5 to 50 kHz. Single-resonator units have rejection to greater than 40 dB; cascaded units to above 90 dB. Standard Omega models at 10.2, 11.33 and 13.0 kHz, available in commercial or hermetically-sealed militarized versions.

FEATURES

- **Any f_o Between 7.5 and 50 kHz**
- **Phase Stability <1.5° Over 60 dB Range**
- **Temp. Stability Within 0.2%**
- **Low Insertion Loss**
- **Passive—No External Power Req'd**
- **Fixed-tuned**

APPLICATIONS

Low frequency receivers, specifically Omega series; selective calling, underwater sound, command-destruct; air or maritime navigation receivers.

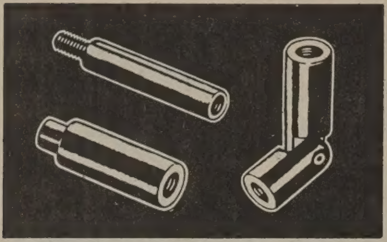
AMATOM ELECTRONIC HARDWARE

a Division of MITE Corporation • (203) 397-3311
446 Blake Street · New Haven · Conn. 06515 • Telex: 96-3419

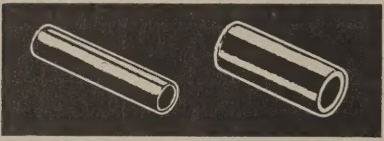
Manufacturer of Standard Hardware for the Electric and Electronic Industries

Largest Stock of "OFF THE SHELF" Items Available Anywhere



STANDOFFS

POST TYPE: Brass, Aluminum, Stainless Steel, Nylon, Phenolic, Tenite. 1/8 through 5/8 round, hex, square. **SWAGE TYPE:** Brass, Aluminum, Stainless Steel. 1/8 through 3/8 round or hex. Lengths: 1/8 through 2". **MALE–FEMALE:** Brass, Aluminum, Stainless Steel, Nylon. 3/16 through 3/8 round or hex. Lengths: 1/4 through 6". **HINGED:** Brass, Aluminum, Stainless Steel. 3/16 through 3/8 round. Lengths: 3/4 through 2".

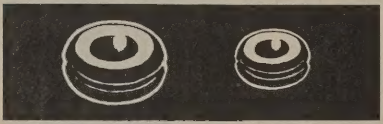


SPACERS

Brass, Aluminum, Stainless Steel, Nylon, Phenolic, Tenite. 1/8 through 1/2 OD; various ID. Lengths: up to 2".

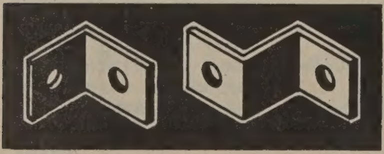
BUMPERS

Available types: machine screw, wood screw, knurled drive, recess and adhesive backed.



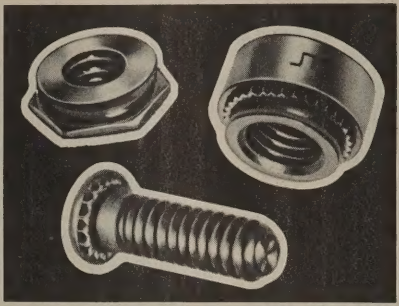
GROMMETS

Available in AN-MS and standard commercial line. 11/32 through 1-5/8 OD, 1/8 through 7/8 ID.



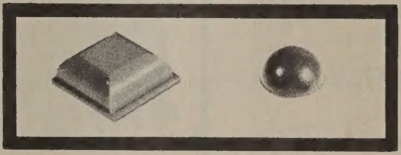
BRACKETS

"L" and "Z" brackets available with various combinations of holes – tapped or untapped.



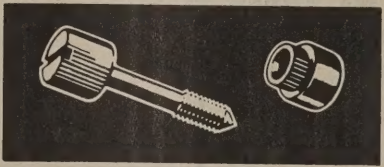
SELF CLINCH FASTENERS

■ Provide strong, load bearing threads in light gauge metal ■ Resist push out, pull out and torque out ■ Fast, easy, economical assembly with any standard mechanical, hydraulic or pneumatic press ■ In most popular sizes from 2-56 up ■



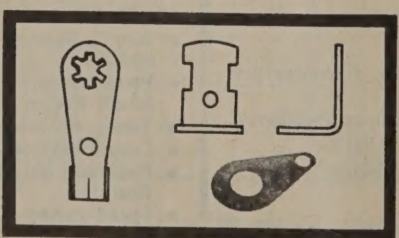
ADHESIVE BACKED POLYURETHANE BUMPERS

No costly screws, rivets or time-consuming mechanical fastener operation. Just "bump-it-on." High tack adhesive grabs immediately.



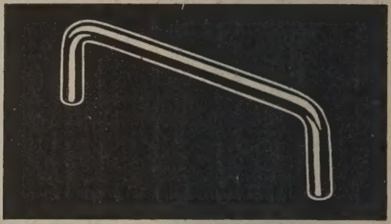
CAPTIVE PANEL HARDWARE

SCREWS: Brass and Stainless Steel. 7 types available with head diameters 1/8 through 3/4. Lengths: 1/4 through 2". Threads: 4-40 through 5/16-18. **RETAINERS:** Brass and Stainless Steel. 7 types available,



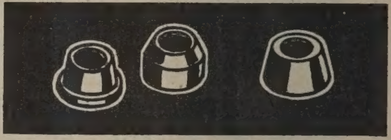
SOLDER LUGS

Wide variety of lugs, terminals, wire clips, brackets, jumpers etc.



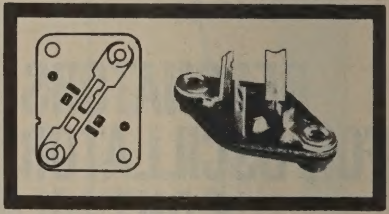
HANDLES

29 different styles available from standard round bow handles to 2 and 3 position folding handles. Rectangular, oval, extruded, tape insert, slanted, zinc die cast, circuit board, offset etc. External or internal threads. 1/8 through 3/8 round, 7/16 x 9/32 through 5/8 x 3/8 oval.



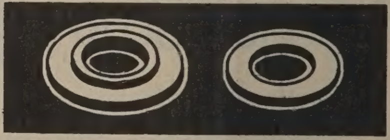
FERRULES

5 different styles available for 1/8 to 1/2 diameter handles in brass, aluminum and stainless steel.



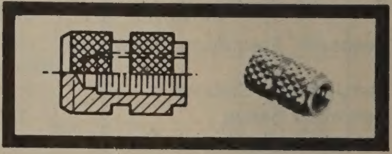
TRANSISTOR SOCKETS

Phenolic or Nylon sockets for TO-3 and TO-66 cases.



INSULATING WASHERS

Flat washers, Shoulder washers: Fibre, Nylon, Phenolic, Teflon, Tenite etc.



INSERTS

Brass or Stainless Steel inserts designed to provide metal threads in plastic materials. Available as a standard part in two lengths.

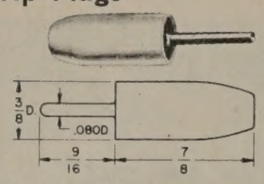
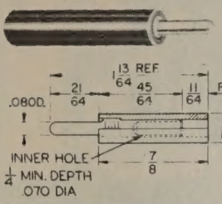
JOHNSON®

E. F. JOHNSON COMPANY, WASECA, MINNESOTA 56093

Hardware

Tip Plugs





Solderless Tip Plug

Completely insulated, molded sleeve. Recessed metal head prevents exposure of metal surfaces when engaged in any standard tip jack. All metal parts are nickel-plated brass. Designed for solderless connection of up to 16 gauge stranded wire. Fits all stand. tip jacks. Cur. Rating: 10A.

Cat. No. 105-0300-001

(See color chart under Tip Jacks)

Sub-miniature Tip Plug

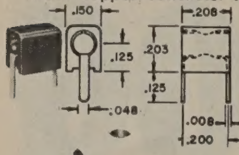
For use with miniature jack, .080″ dia. tip. Nickel-plated machined brass body, solder type lead connection.

Cat. No. 105-0770-001

(See color chart under Tip Jacks)

Printed Circuit Connectors

The sub-miniature Tip Jacks and Tip Plugs described below are rated at 5 amps maximum current capacity. Operating voltage is 1500 volts RMS at sea-level and 330 volts RMS at 50,000 feet. Contact resistance is less than 2 milliohms; capacitance between two adjacent jacks less than one pF at 1 MHz. Body material is made of tough, low-loss polyamide per MIL-M-20693A; able to stand extremely hard usage. Tip Plugs have a one-piece machined contact. Jacks equipped with beryllium copper contacts. Jack contacts and terminals are silver-plated.

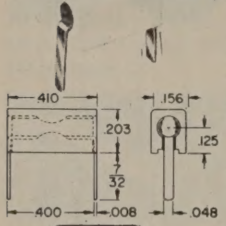


New Horizontal Jack

New design accepts 0.080″ diameter tip plug in either end. Silver-plated and Iridited beryllium-copper formed contacts. Two terminals. Approx. one-half size of standard Tip Jack.

Cat. No. 105-1100-001

(See color chart under Tip Jacks)



Horizontal Jack

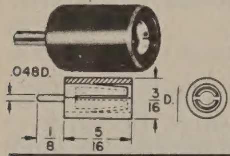
(U.S. Patent No. 3,208,027)

Unique design accepts .080″ diameter tip plug in either end, or from top or bottom! Silver-plated beryllium copper formed contact. Two terminals.

Note: Available as a special in production quantities without cross hole.

Cat. No. 105-0750-001

(See color chart under Tip Jacks)



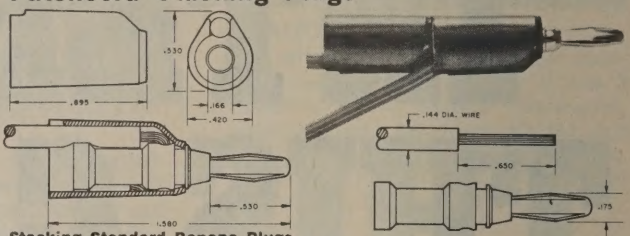
Vertical Jack

Mounts through single .052″ hole, requires minimum mounting area. Silver-plated, machined beryllium copper contact.

Cat. No. 105-0850-001

(See color chart under Tip Jacks)

Patchcord Stacking Plugs

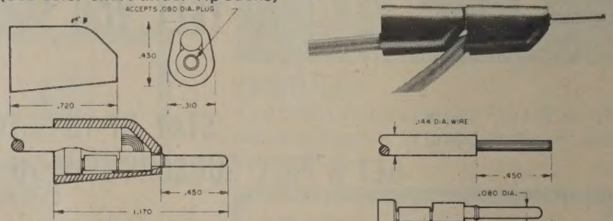


Stacking Standard Banana Plugs

Current Rating: 15 amps. Assembly with special tool and fixture is recommended. 6 colors.

Cat. No. 108-1080-001

(See color chart under Tip Jacks)



Stacking .080″ Standard Tip Plugs

Current Rating: 10 amps.

Cat. No. 105-1200-001 (See color chart under Tip Jacks)

Engineering Kits available containing material to assemble 30 patchcords in six colors from E. F. Johnson Company.

108-0754-001 C

Standard Banana Plugs

This group of standard banana plugs has accurately machined brass studs which extend the full length of the plugs, providing extra strength. Springs are nickel-silver — highly resistant to corrosion. Bodies and hardware .0001 nickel-plated. All banana plugs listed below are available with beryllium copper springs and nickel, cadmium, or silver plating, when desired. A wide selection of miniature solder-type plugs is also available on special order — however, quantities in special platings or plugs should be sufficiently large for economical production runs. Solder terminal and nut or screw furnished.

Cat. No.	Dwg.	S	P	D	H	Thread
108-0750-001	A	3/8″	17/32″	.175″	1 1/8″	6-32

108-0900-001

Miniature Banana Plugs

Extremely small insulated banana plugs with precision machined phosphor bronze body, nickel-plated. One-piece springs are beryllium copper, nickel-plated, .120″ dia. Polyamide sleeve. Current Rating: 5 amps.

Cat. No. 108-1000-001 (6 colors — see chart)

Standard Banana Jacks

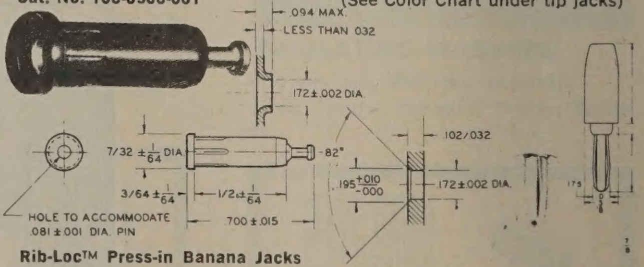
High quality, machined brass banana jack. Nickel-plated. Furnished complete with solder terminal and nut.

Cat. No.	F	D	S	H	Hole Dia.	Thread
108-0740-001	3/8″	1/4″	17/32″	5/8″	.166″	1/4″-28

Banana Jack

Completely insulated molded body with cadmium-plated insert. Accommodates banana plugs of nominal .175″ diameter. Voltage Breakdown: 10,000 volts DC. Capacity to 1/16″ Panel: 2.4 mmf nominal. Mounts in 21/64″ diameter circular, "D," or double flat hole (1/4″ across flats). Single nut furnished for mounting — no other mounting hardware needed.

Cat. No. 108-0900-001 (See Color Chart under tip jacks)



Rib-Loc™ Press-in Banana Jacks

Johnson Rib-Loc design permits substantial production line savings—no mounting hardware to handle and assemble. Rib-Loc banana jacks install by pressing into proper size chassis hole. Accept .120″ tip plug in recessed contact. Silver-plated brass contact. Brass solder terminal silver-plated and Iridited for good solderability. Insulating body molded of low-loss polyamide. Current Rating: 10 amps. Peak Withstanding Voltage: 5,000 volts. Capacity to 1/8″ Panel: 1.5 pf nominal.

Cat. No. 108-1100-001 (6 colors — see chart)

Solderless Banana Plugs

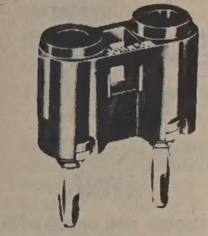
Compact, high voltage insulated plug for a wide variety of applications. Designed for fast, solderless connection of up to 16 gauge stranded wire. Body and pin are constructed of one-piece, nickel-plated brass with high grade nickel-silver springs. Sleeve is molded. Cur. Rating: 15A.

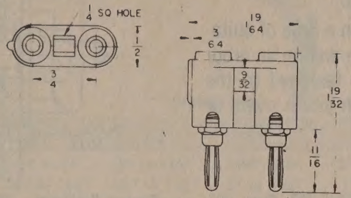
Cat. No. 108-0300-001 (See Color Chart under tip jacks)

JOHNSON®

E. F. JOHNSON COMPANY, WASECA, MINNESOTA 56093

Hardware

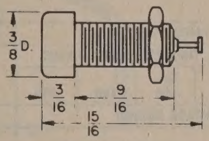




Dual Banana Plugs

Extremely versatile dual banana plug for solderless connection. Molded body incorporates polarity indication and strain relief hole for wire leads. Springs are high quality nickel-silver — bodies are nickel plated. Accurately machined brass studs extend full length of pins for extra strength. Voltage Breakdown: 10,000 volts DC. Capacity Plug to Plug: 1.3 pf. Current Rating: 15 amps.

Cat. No. 108-0200-001 (solderless) (See color chart under tip jacks)

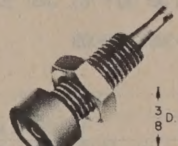


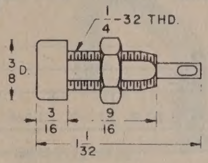
Deluxe Tip Jack

(U.S. Patent No. 2,704,357)

Molded body with recessed closed entry design contact. Silver-plated beryllium copper contact spring. Brass solder terminal is hot tin dipped. Current Rating: 10 amps. Voltage Breakdown: 11,000 VDC. Capacity to ⅛″ Panel: 2.0 pf. ¼″-32 nut furnished.

Cat. No. 105-0600-001
(See color chart below)

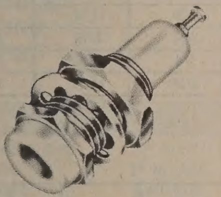


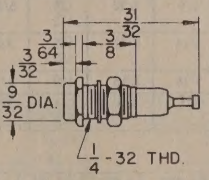


Standard Tip Jack

Molded body with recessed, cadmium-plated formed phosphor bronze contact. Current Rating: 10 amps. Voltage Breakdown: 9,000 volts DC. Capacity to ⅛″ Panels: 2.0 mmf. ¼″-32 nut furnished.

Cat. No. 105-0800-001
(See color chart below)





Metal-Clad Tip Jacks — Military

High reliability tip jack for military use or demanding industrial applications. Highest quality materials — withstand severe environmental temperature, vibration and salt spray conditions. Complies with MIL-C-39024/10. Closed entry contact design prohibits entry of tip plug .085″ or larger — prevents accidental contact damage by careless probe insertion. Heavy nickel-plated brass jacket. Gold-plated beryllium copper contact spring greatly exceeds minimum insertion/withdrawal cycle requirements. Current Rating: 5 amps. Voltage Breakdown: 8,000 volts DC. Capacity to ⅛″ Panel: 3.8 pf. ¼″-32 nut and lock washer furnished. Terminal Style: "A" (Terminal Style "C" available on special order in production quantities.) Brass solder term. in gold-plated.

Cat. No. 105-0200-200

Rib-Loc™ Press-in Tip Jacks

Johnson Rib-Loc design permits substantial production line savings — no mounting hardware to handle and assemble. Rib-Loc tip jacks install by pressing into proper size chassis hole. Accept .080″ tip plug in recessed, closed-entry type contact that rejects plugs .085″ or larger to prevent accidental contact damage. Silver-plated beryllium copper contact spring. Brass solder terminal silver-plated and iridited for good solderability. Insulating body molded of low-loss polyamide. Current Rating: 10 amps. Voltage Breakdown: 5,000 volts DC. Capacity to ⅛″ Panel: 1.4 pf nominal.

Cat. No. 105-1040-001
(See color chart below)

Color Chart

NOTE: Connectors, unless otherwise specified, are available in 6 molded colors to Federal Standard 595. Other colors listed are available as specials. Catalog number for color desired is determined by adding color numbers on chart below to 6th and 7th digits of catalog number listed for series. EXAMPLE: 105-0800-001 in Violet, add color number for Violet (12) to 6th and 7th digits of series number, and order 105-0812-001. To order 105-1040-001 in Violet, add 12 to 6th and 7th digits of series number and order 105-1052-001.

White*	01	Yellow*	07
Red*	02	Brown	08
Black*	03	Blue*	10
Green*	04	Violet	12
Orange	06	Grey	13

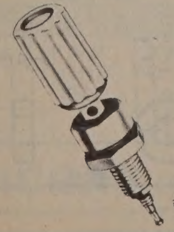
*Indicates colors available from stock. Other colors listed are, for some items, available as specials.

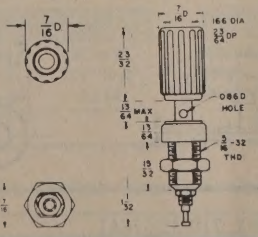
Binding Posts

Compact, insulated, pre-assembled binding posts with molded body and silver-plated shank. Fluted thumb nut self-captivated. Connection made at solder stud, or lug may be slipped over threaded portion and secured with a nut. Single tip plug fits hole in top of miniature binding post; banana plug accepted by two larger binding posts. Insulation resistance greater than 200 meg. after MIL-T-5422B humidity test. (U.S. Patent No. 2,806,999.)

New miniature binding post designed for compact test equipment applications. Rated at 15 amps thumb nut to terminal, 5 amps tip jack to terminal. Voltage Breakdown: 5,000 volts DC. Capacitance to ⅛″ panel; 3 pf. Mounts in ¹⁷⁄₆₄″ diameter circular hole; "D" or double flat hole — .219″ across flats. Equipped with single ¼″-32 nut for fast mounting — no time-consuming spacers or mounting hardware required. No. 111-0200 accepts .080″ dia. pin probe. No. 111-0400 accepts .120″ dia. banana plug. Avail. in 6 Colors: white, red, black, green, yellow, blue.

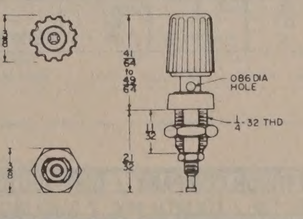
Cat. No. 111-0200-001 **Cat. No. 111-0400-001**





Rated at 15 amps. Current carrying capacity. Voltage Breakdown: 8,000 volts DC. Capacitance to ⅛″ panel: 3.3 pf. Mounts in ²³⁄₆₄″ diameter circular hole; "D" or double flat hole — ¼″ across flats. Single ⁵⁄₁₆″-32 mounting nut furnished — no other hardware required.

Cat. No. 111-0100-001 (10 colors available — see color chart)



RAYTHEON CAPTIVE HARDWARE

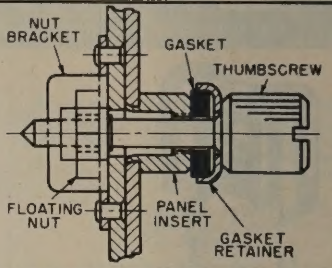
Opto-electronics—Section 3700
Switches—Section 5100
Knobs—Section 2400
Test Jacks—Section 2100

CAPTIVE HARDWARE

Raytheon captive hardware was designed to fill the need for a standard line of stainless steel fastening hardware which would meet government specifications. MIL-E-16400 (ships) and when painted or dull—MIL-E-5400 and MIL-P-11268 (sig C).

Available in a variety of sizes to handle almost any requirement, the complete captive assembly consists of a slotted-head thumb screw, an insert bushing for securing the thumb screw to the panel, a captive floating nut assembly which is fastened to the chassis member or rack, and a gasket retainer and rubber gasket for use when a dust proof, splash proof seal is required.

The panel insert is secured in a hole of suitable dimensions by flaring the end on an arbor press. The nut assembly is fastened to the chassis member or rack with either rivets or mounting hardware.



MATERIALS

Screw—303 stainless steel per QQ-S-763, Class 303, Cond. A passivated per MIL-F-14072
Insert—302 stainless steel per QQ-S-763, Class 302, Cond. A
Gasket—Rubber per MIL-R-3065, RN500B
Gasket Retainfer—302 stainless steel per QQ-S-766, Class 302
Nut Bracket Assembly—Cold rolled steel bracket per QQ-S-692, MIL-B-12128A. Cadmium plated per QQ-P-416, Type II, Class I with iridescent chromate film.

INSTALLED AND LOCKED

DESIGN FLEXIBILITY IN CONCEPT

The design principle of the P-Series Panel Fastener permits adaptability to single or multiple lead threads as well as to a variety of materials and their combinations.

MATERIALS

1. The Retainer, Bolt and Primary Standard Unisert are made from 4130 or 4140 alloy steel.
2. The Spring is made from beryllium copper while the cover is 302 stainless steel.
3. Other Panel Fasteners are available in 17-4PH stainless steel, A-286 alloy and titanium. Still other materials are available on request.

HEAT TREAT

Alloy steel configuration — 160,000-180,000 psi tensile.

FINISH

1. Alloy steel configuration — cadmium plated.
2. Other finishes are available on request.

THREADS

The P5282 configuration as shown is available in the single lead thread style. To reduce panel removal time, the P6292 series is offered which has a double lead thread style. The double lead thread reduces by half the number of revolutions required to engage or disengage the Panel Fastener's bolt.

COMPLETE SPECIFICATIONS

1. The above dimensions are for the P5282 configuration and should be considered for reference only, subject to change without notice.
2. For complete dimensions, specifications and how-to-order data, refer to UNICORP Standards pages: P5282 for the alloy steel, single lead thread Panel Fastener and P12 for the primary standard Unisert.

ADVANTAGES

UNICORP'S swage or rivet type standoffs are an inexpensive method of spacing or mounting electronic circuit boards and electronic components. After installation they are permanently affixed to the board and further assembly becomes simplified. These standoffs are available in both threaded and unthreaded types.
Full line catalog available upon request.

PRECISION STANDOFFS — THREADED AND UNTHREADED

UNICORP has arranged this Catalog to assist Engineers, Designers and Buyers select the correct part for all applications without resorting to a "Special Order".

UNICORP delivers these components to your plant inspected, plated and ready for installation.

UNICORP maintains stock in lengths of 1/64 of an inch increments.

SHAPES: Round, Square, Hex.

DIAMETERS: ⅛″ — 5/32″ — 3/16″ — ¼″ — 5/16″ — ⅜″ — ½″ — ⅝″.

MATERIALS: Brass, Aluminum, Stainless Steel, Carbon Steel, Nylon, Teflon, Linen Base Phenolic, 10% Glass Filled Lexan.

THREADS: External — Class UNC-2A; Internal — Class UNC-2B.

FINISHES: Refer to chart at left.

TOLERANCES: Length: Up to 4″ .005; 4″ to 6″ .008; Over 6″ .010.

Diameter: Standard commercial bar stock tolerances.

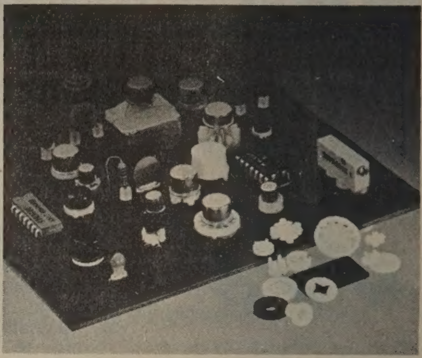
waldom / Bivar PERM-O-PAD®

(MFG. BY BIVAR INC.)

- IMPROVE RELIABILITY
- REDUCE PRODUCTION COSTS
- NYLON PER MIL-M-20693

FOR . . . PROTECTING, LOCATING, FIXTURING, SPACING, MOUNTING & REINFORCING . . . TRANSISTORS, INTEGRATED CIRCUITS & OTHER PRINTED CIRCUIT COMPONENTS.



PERMANENT MOUNTING SPACERS give protective support, shock mounting, added insulation, greater heat dissipation, cleanliness and improve neatness. PERM-O-PADs are molded from Nylon per MIL-M-20693 and are available from stock in a multitude of configurations. There are many unique designs to choose from in these economical mounts.

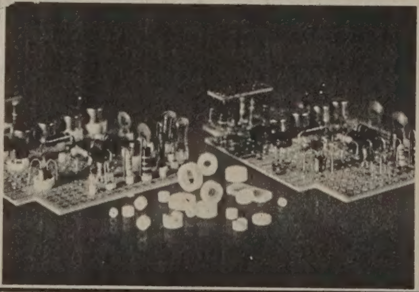
DISS-O-PAD®



- EVEN, ACCURATE POSITIONING
- REDUCE REJECTS & REWORK
- REDUCE LABOR COSTS
- STANDARD SHAPES TO FIT ALMOST ANY COMPONENT

SIMPLE AND EASY TO USE . . . WASH AWAY IN WARM OR HOT RUNNING WATER . . . NO RESIDUE.

WASH AWAY SPACERS provide accurate, uniform component spacing above PCB surfaces, protect components throughout the soldering cycle, then **WASH AWAY** completely in **WARM** or **HOT RUNNING WATER**, without a trace of residue. Over 400 sizes are available from stock. Low cost, versatile DISS-O-PADs substantially reduce rejects, inspection and rework costs.

SNAP-IN CARD GUIDES

ECON O GIDE®

- Rigid reinforced nylon
- 24 Standard lengths, 2½″ thru 14″ in ½″ increments
- Fast, easy installation
- Economical

SNAP-IN CARD GUIDES, available from stock in 24 Standard lengths, ECON-O-GIDEs provide a wide choice to meet your most challenging design needs. Molded from Reinforced Nylon for strength and rigidity, these inexpensive guides snap into sheet metal with minimum effort and maximum retention. Samples are immediately available upon your request.

NOTE: Slotting or elongating of 2nd and 3rd mounting holes is recommended to allow for length variations in molding.

PC CARD EJECTORS

With these convenient snap-in card guides, your board stacking or rack mounting options are greatly increased. Guides may be located to desired spacing; they add extra insulation between boards and rack or cabinet enclosures. For computers/systems, instrumentation and industrial applications. Constructed of rigid, reinforced nylon, black. Std. lengths, 2½″ thru 14″ in ½″ increments. Mounting: Snap-in metal plates, .047/.090″ thick. Hole size, .172″ dia.

Thickness: .060″. Width: ½″. Mounting hole: 13/64″, 7/32″ from end of clamp.

VINYL GROMMETS

- Exceptional Aging Qualities
- High Dielectric Properties
- Oil Resistant
- Durometer Hardness 45 1045
- Cost Less Than Rubber
- Will Not Stain Most Surfaces

ANALOG DIGITAL DATA SYSTEMS, INC.

DEPT. EM, P.O. BOX 9209 • ROCHESTER, N.Y. 14625 • PHONE (716) 334-9649

DATA ACQUISITION SYSTEMS

A. D. DATA SYSTEMS OFFERS A LOW COST APPROACH TO DATALOGGING THROUGH THE SERIES 14 & 15 MAINFRAMES WITH A WIDE RANGE OF EXPANSIONS AND OPTIONS. YOU CAN CHOOSE THE UNIT TO MEET YOUR EXACT REQUIREMENT WITH MINIMUM COST, HIGHER RELIABILITY AND SMALLER SIZE; AND STILL RETAIN FLEXIBILITY FOR FUTURE EXPANSION.

DATALOGGERS SERIES 14 & 15

ARE AVAILABLE WITH THE FOLLOWING FEATURES:

- Multiplexing from 10 to 1000 analog inputs.
- Expandable in 10 channel modules.
- Two wire differential input with high common mode rejection.
- Voltage measurements, autoranging, and thermocouple measurements.
- Digital clock in Days, Hours and Minutes.
- Scan interval selection.
- Visual display of time, channel and data.
- Printer output.
- Teletype 20 ma. neutral line output.
- RS232-C compatible output.
- IEEE 488 compatible interface.
- Remote keyboard control.

SERIES 14 DATALOGGERS

For voltage measurements only with autoranging thru ±.1999v, ±1.999v and ±19.99v with common mode rejection of 70db at 60Hz and common mode voltage ±100v. Multiplexing speeds up to 30 readings/second.

MODEL 14P

Basic unit has output of channel number and data on 9 column printer with speed of 3 readings/second.

Digital clock option available with interval selection and printout on 9 additional columns.

MODEL 14TY

Output is available with either TTY or RS232 compatibility for driving Teletypes, Terminals, Tape Cassettes on Modules making this unit ideal for data collection at remote locations.

Options include digital clocks, remote control by keyboard or teletype and parallel output onto paper tape or magnetic tape.

Speeds can be set to 110, 300, 1200 and 2400 baud.

SERIES 15 DATALOGGERS

This series of dataloggers has all the features of the 14TY but can be used for both voltage and temperature measurements, with linearization, reference junction compensation and open thermocouple indication.

Datalogging speed is one channel/second with dual slope integration and input filtering.

MODEL 15TS

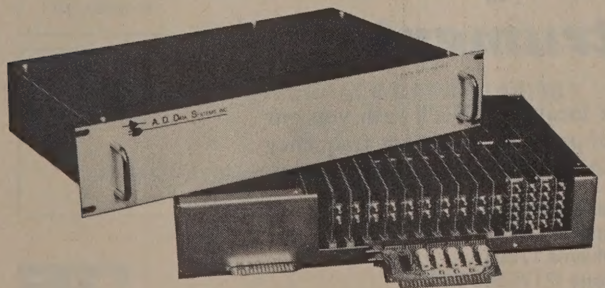
This basic datalogger is designed to measure temperatures using any one type of thermocouple input.

MODEL 15TP

This is a programmable datalogger which has a selection of any 4 types of thermocouples or 3 thermocouples and voltage.

SWITCHING SYSTEMS

A. D. DATA SYSTEMS OFFER A SERIES OF SWITCHING UNITS USING REED RELAYS FOR ALL TYPES OF SWITCHING FUNCTIONS. UNITS ARE AVAILABLE WITH MANUAL; COMPUTER I/O BUS; IEEE 488 INTERFACE BUS; OR RS232 SERIAL CONTROL. INTERNAL MEMORY OR LATCHING OF SWITCH SELECTION DATA REQUIRE ONLY MOMENTARY LOGIC LEVELS FROM COMPUTER CONTROL BUS.



SERIES 56 COAXIAL MATRIX

SERIES 12 MULTIPLEXERS

Available with 10 to 10,000 channels, expandable in 10 channel modules with 1, 2, 3 or 4 poles per channel. Basic unit has sequential or individual channel selection from remote or local control. Standard switching modules include isothermal, high common mode, switch guard and flying capacitor type switching.

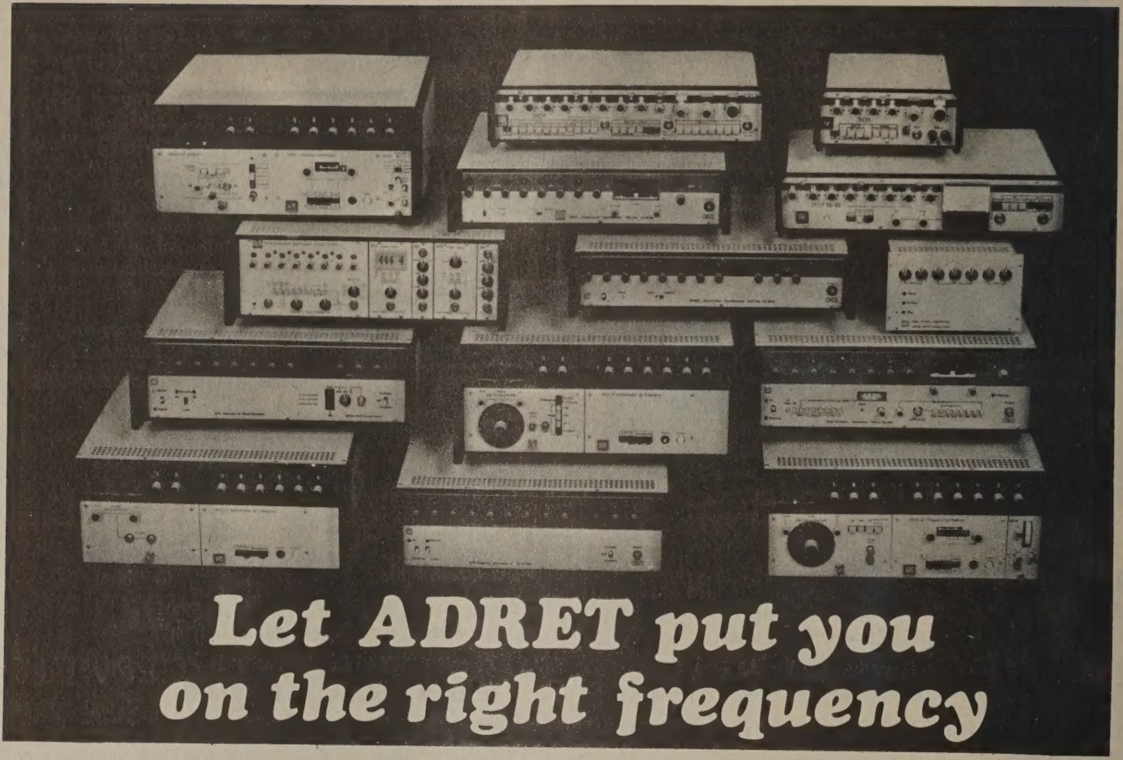
SERIES 56 COAXIAL MATRIX

Manual or Computer Controlled Switching of several inputs to several outputs by selection of individual latched crosspoints. Designed specifically for very high frequency signals with 50 ohm characteristic impedance for distortionless switching and low crosstalk.

Basic unit is 10 X 10 matrix, expandable to any size required.

SERIES 35 MATRICES

MANUAL OR COMPUTER CONTROLLED routing of signals in any input to any output format. Basic unit has controls for up to 1000 crosspoints, and matrix can be built up in required configuration by plug in modules of 10 or 20 crosspoints. The modules are available with either single pole or two pole switches configured for use as multiplexers, matrices or individual sets of contacts.



It's never easy to pick the right frequency synthesizer when you have to pore through a thick catalog of all kinds of instruments to make your choice.

Adret makes it easy. Frequency generators are our only business and you'll find more synthesizers in our new catalog than anywhere else. You're sure to find an Adret synthesizer that meets your needs at a very competitive price.

You see, we've been frequency-synthesizer specialists for 10 years now. You get a choice of 15 synthesizers in our 1977 catalog, not counting specials and OEM versions. The frequencies run as low as 0.01 Hz and as high as 600 MHz. But since we offer so many models, you don't end up paying for spectrum and features you don't need.

You get the most for your instrument dollar.

let ADRET guide you to the right instrument

Call us, or our representative in your local area. We'll rush you our new 1977 catalog. It gives you a lot of practical tips about frequency measurements as well as the details on our hardware.

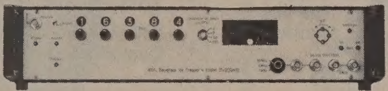
STANDARD RECEIVER



4101

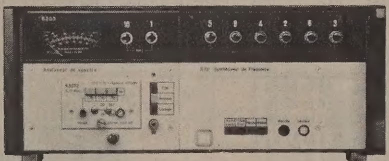
15 kHz/200 kHz with 20 Hz resolution. High stability built-in crystal pilot. **Reference frequencies availables :** 1 MHz, 5 MHz, 10 MHz.

FREQUENCY ERROR MULTIPLIER

4110

Input frequencies : any submultiple of 10 MHz down to 1 MHz. **Frequency error multiplied** by 10^n (n : 1 to 4) **ΔF/F measurement** with 10^{-12} resolution. Outputs : BCD coded and analog, digital display.

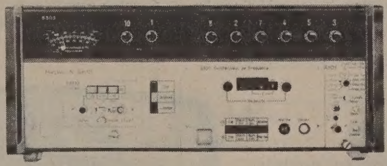
SELECTIVE dB METER



6101 + 6303

Analysis filter : 10 Hz or 100 Hz at – 3 dB.
Dynamic range : 120 dB. **Sensibility** : 0.1 µV measurement display on galvanometer.

SPECTRUM ANALYSER



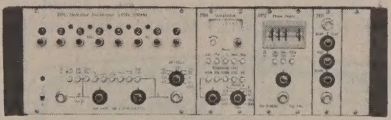
6100 + 6303

Same characteristics as for 6101 + 6303 plus **Deviation** ± 200 Hz to ± 100 kHz from the carrier. **XY output** for recorder.

IEEE 488 BUS INTERFACE CAPABILITIES WITH INTERFACE 414 ASCII/PARALLEL BCD

MODULAR SIGNAL GENERATOR

0.01 Hz/ 200 kHz

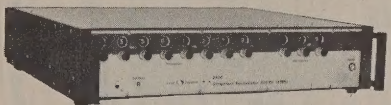


3100

Resolution 0.01 Hz. **Phase shifting** from 0° to 359.9° (resolution 0.1°)
Sweep with markers, **programmable attenuator.**

FREQUENCY AND LEVEL GENERATOR

300 Hz/
14 MHz

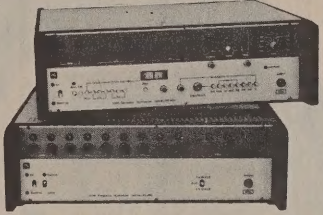


2400

Resolution : 1 Hz, **offset frequency** : Fo + 20 MHz
Output impedance 50/75 Ω and < 3 Ω **Programmable output level,** + 20 dB to – 80 dB **Level regulation,** ± 0.01 dB (resolution 0.1 dB).

GENERATOR SYNTHESIZER / FREQUENCY SYNTHESIZER

300 Hz to 60 MHz

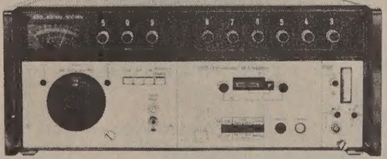


3300/3310

3300 : **AM/FM** modulation, **Search** function
3310 : **Frequency** and **level** programming

PLUG-IN MULTIFUNCTION GENERATOR

400 kHz/
600 MHz



6100 + 6315

AM-FM-PM modulations Frequency Search : ± 1 Hz to ± 1 MHz **Output level** : 1 V to 0.1 µV
Auxiliary plug-ins : Sweep with markers, 0.01 Hz resolution, internal modulating signals.

SPECIAL PRODUCTIONS MADE UNDER CUSTOMER'S REQUIREMENTS

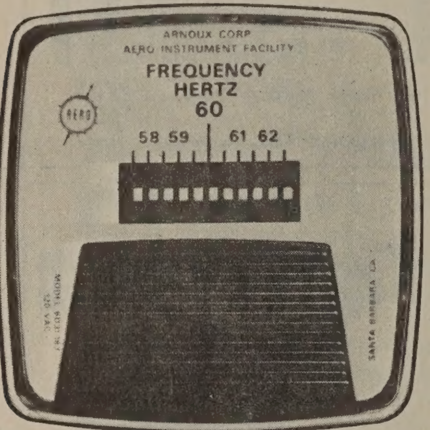
FREQUENCY METERS

OVER 25 YEARS OF CONTINUOUS PRODUCTION

VIBRATING REED METERS

The AERO Instrument Facility of Arnoux Corporation produces over 1000 different types and styles of Vibrating Reed Frequency Meters, with a proved history of usage spanning over 25 years. Unsurpassed for high performance and quality construction, all AERO Frequency Meters provide the inherent advantages of great accuracy (with 0.3% at 72°F, and within 0.1% on special order); long term stability (±75 ppm per degree F. from -60° to +180°); low power consumption; self-checking characteristics; high reliability; and extreme ruggedness. No adjustments are ever required on Vibrating Reed Frequency Meters. AERO meters are available with . . . . .

- **1.5 inch to 3.5 inch Round Cases**
- **Bakelite and Metal Construction**
- **Hermetic Sealing**
- **1 Reed to 11 Reeds**
- **Center Frequencies from 20 Hz to 400 Hz**
- **Voltages from 24 Vrms to 220 Vrms**
- **Running Time Indicators**
- **Combination Meters**



3.5 Inch Full View Meters

MODEL* NO.	CENTER FREQUENCY	FREQUENCY RANGE	NUMBER OF REEDS	REED INTERVAL	PRICE PER UNIT 1-24	25-49	50-99
2810.183	[50 Hz 60 Hz	48 to 52 Hz 58 to 62 Hz]	10	1 Cycle	$40.93	$27.42	$22.52

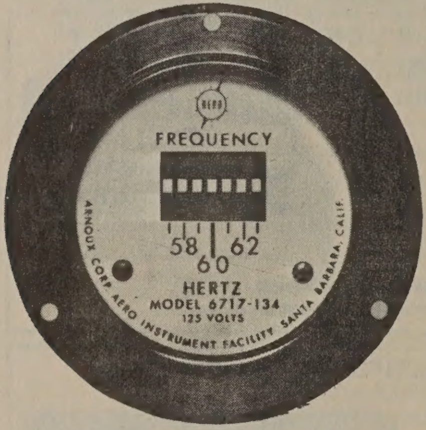
6815-183	60 Hz	58 to 62 Hz	5	1 Cycle	35.81	23.99	19.69

Mounting Data. Three equally-spaced mounting studs (No. 8-32) are permanently affixed to rear of meter face panel, on 3.16" diameter (single studs at top center). Meter case requires 2.18" diameter hole. Total depth from rear of face panel is 2.50", including two No. 10-32 electrical connection studs. Meter face panel is 3.50" square and approximately 0.4" deep.

*Model numbers specify non-hermetically sealed metal cases; 0.3% accuracy; standard voltage of 117 Vrms; and input resistance of 10,000 ohms.



3.5 Inch Round Meters

MODEL* NO.	CENTER FREQUENCY	FREQUENCY RANGE	NUMBER OF REEDS	REED INTERVAL	PRICE PER UNIT 1-24	25-49	50-99

6815-134	60 Hz	58 to 62 Hz	5	1 Cycle	31.81	21.32	17.50

Mounting Data. Three equally-spaced mounting holes are through meter face panel on 3.16" diameter (single hole at top center). Holes accept No. 8-32 mounting hardware (supplied). Meter case requires 2.69" diameter hole. Total depth from rear of face panel is 2.31", including two No. 6-32 electrical connection studs. Meter face panel is 3.50" diameter and approximately 0.2" deep.

*Model numbers specify non-hermetically sealed bakelite cases; 0.3% accuracy; standard voltage of 117 Vrms; and input resistance of 10,000 ohms.

POINTER TYPE METERS

AERO's new line of Pointer-Type Meters feature advanced microminiature circuits for performing frequency-to-DC conversion with remarkable linearity and stability. These circuit innovations have now made pointer-type meters both economical and practical for production. Pointer-Type Meters are presently available in three frequency ranges, with accuracy and stability as great as 0.3 Hz in the 45 to 65 Hz ranges. The input voltage for all units is 115 ±15Vac, with power consumption approximately 2 watts. Operating temperature range is 0° to 150°F.

MODEL NO.	FREQUENCY RANGE	ACCURACY & STABILITY	PRICE PER UNIT 1-24	25-49	50-99
557P-183	45-55 Hz	0.3 Hz	$64.56	$46.81	$40.34
657P-183	55-65 Hz	0.3 Hz	64.56	46.81	40.34
407P-183	380-420 Hz	2.0 Hz	64.56	46.81	40.34
257P-183	45-65 Hz	0.3 Hz	64.56	46.81	40.34

Mounting Data
(Same as for 3.5 Inch Full View Meters. See above.)

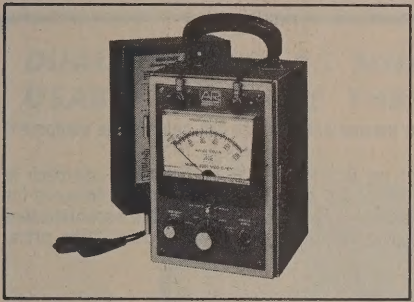
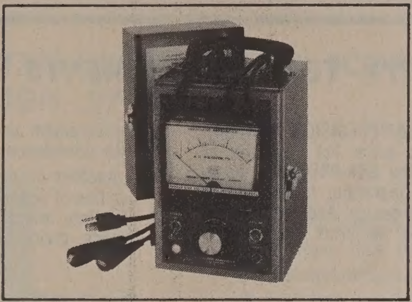
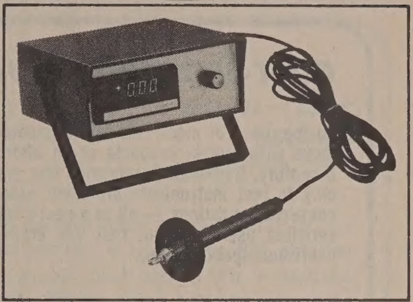
INSULATION TESTING EQUIPMENT for electronic equipment and systems



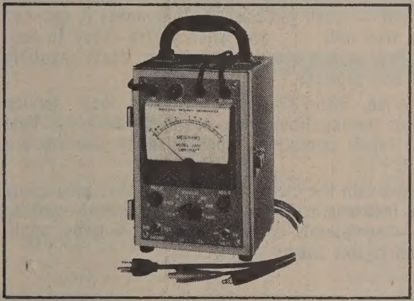
Meg-Chek® Megohmmeters for testing insulation resistance of motors, transformers, cables and generators. Models: 500V and 1000V DC.



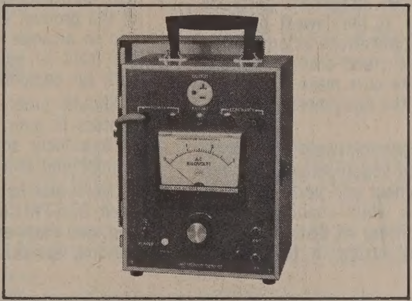
3KV AC Hypot for production line testing to meet UL and CSA approval.



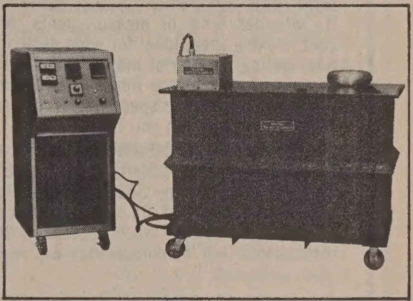
Kilovoltmeter for checking calibration of high voltage testers as specified by UL. Digital readout, compact, very portable.



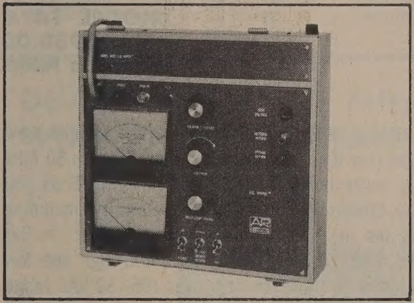
Vibrotest for resistance testing of printed circuits, transistors, cables and motors to 10 million megohm range.



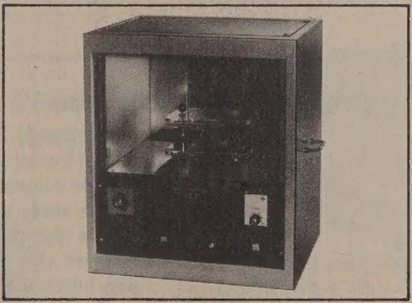
Automatic Hypot/Ground Continuity Tester for UL and CSA approval testing of production line items.



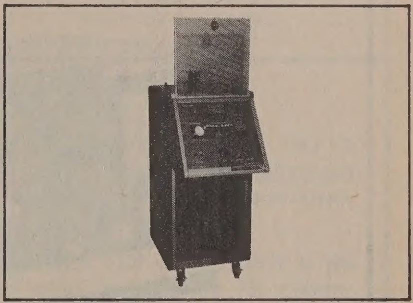
Series Resonant Test Sets for testing highly capacitive electrical insulation systems.



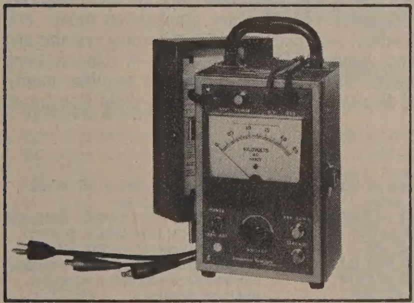
4KV AC Hypot for nondestructive testing. Has both current and volt meters.



Materials Testing Hypot for breakdown and dielectric strength tests to meet ASTM specifications. Has digital readout.

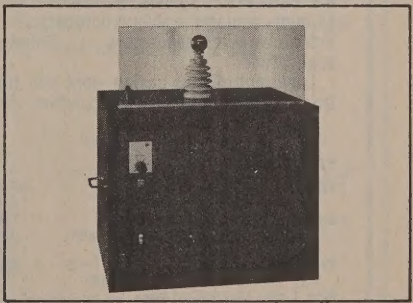


Corona Detection Equipment for detecting partial discharges in electrical insulation systems. Models: 10KV and up.



AC Hypot Jr. for testing small appliances, motors, tools. Models: limited current to 10KV.

Arc Resistance Tester for meeting ASTM and federal LP tests of resistance of solid electrical insulation materials to action of an arc close to the surface.



Bench-style AC Hypots for dielectric strength tests of rotating machinery, switchgear, cables, transformers. Also mobile models from 10 to 35KV. Console models: 300 KV at 250 KVA.

B+K PRECISION DYNASCAN CORPORATION

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

COST-EFFECTIVE, QUALITY TEST INSTRUMENTS

To the users of electronic test equipment, B&K-PRECISION is synonymous with quality products at an affordable price. For a quarter of a century, Dynascan Corporation has given the B&K-PRECISION name only to test instruments providing ease of operation, reliability and conservative ratings — all in a cost-effective design. And consistently satisfied users confirm that the entire line performs well beyond published specifications.

DESIGNED AND ENGINEERED FOR USER REQUIREMENTS

B&K-PRECISION conceives, designs and engineers test instruments to fulfill user requirements. Each B&K-PRECISION instrument performs its intended tests or measurements reliably at the lowest possible cost, making them ideal for such dedicated applications as production line testing, industrial maintenance and repair, and other situations involving known usage limits. Instruments like ours make it possible for you to avoid over-specifying. You buy all the equipment you need, but never more than you need.

Because B&K-PRECISION instruments are conservatively rated, their actual performance usually exceeds published specifications. You are thus assured that any B&K-PRECISION instrument will perform accurately and reliably at its rated specifications while enabling you to exceed those ratings when necessary. In addition, all B&K-PRECISION instruments are human-engineered, reducing errors in testing and measurement so even inexperienced users can operate the equipment with confidence.

Another example of the B&K-PRECISION cost-effective approach is our line of accessory items. Our probes, in particular, are designed for complete interchangeability with those of leading ultra-sophisticated brands, giving you compatible performance at about half the price.

B&K-PRECISION . . . LOCALLY STOCKED, LOCALLY SERVICED

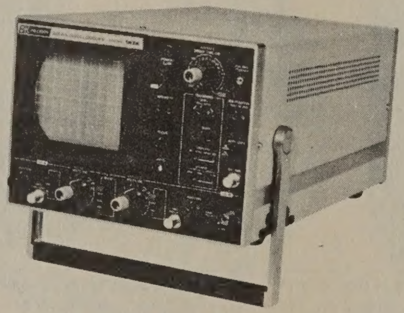
Your local electronic distributor carries the full line of B&K-PRECISION test instruments, and he can provide you with off-the-shelf delivery of the product you need — when you need it. This makes it easy for you to arrange for a trial unit . . . and when you're ready to buy, it's from an established source, one your company deals regularly with for components and supplies.

Should problems arise, B&K-PRECISION maintains local service centers in every major metropolitan area. Again, because you deal with a local source, repair operations, though rarely needed, are prompt and courteous.

You'll also be pleased with the instruction manuals that accompany each B&K-PRECISION instrument. These manuals — clearly written and well-illustrated — completely cover the test procedures, applications, operation and circuit theory of the unit.

DUAL-TRACE 5" 30 MHz TRIGGERED SWEEP SCOPE . . . LOWEST PRICE 30 MHz SCOPE WITH SIGNAL DELAY

MODEL 1474
$930.00
INCLUDING PROBES



FEATURES

• Rise time 11.7 nS or less • Built-in signal delay line permits view of high frequency pulse rise time • Triggers on signals up to 50 MHz • Mode automatically shifts between CHOP and ALTERNATE as you change sweep time • Checks most digital logic circuitry, including ECL • High accuracy ten position vertical input attenuator • Flat response with smooth rolloff past 30 MHz • Built-in high and low pass filters • Maintains calibration accuracy over 105-130 VAC range • 20 calibrated sweeps — 0.2 μS/cm-0.5 S/cm.

APPLICATIONS

Microprocessors system development . . . Analysis and troubleshooting of mini-computer and microprocessors . . . Computer terminals . . . Video character generators . . . Video games . . . Broadcast studio application.

Logic and digital design work and troubleshooting, including electronic organs, counters, calculators, phase-locked-loops, DMM's and synthesizers . . . Check the divider network of any system using TTL, DTL, RTL and most ECL logic . . . Measure propagation delays and phase shifts . . . Troubleshoot and maintain video recording systems and equipment . . . Set sync, video and color burst levels in video systems with extreme accuracy . . . Use A-B mode to compare amplifier input/output waveforms and display algebraic difference as distortion curve.

SPECIFICATIONS

VERTICAL AMPLIFIER (Channel A and Channel B.)
Deflection Factor: 5 mV/cm to 5 V/cm, ±3% in 10 ranges, each with fine adjustment.
Freq. Response: DC, DC-30 MHz (−3 dB); AC, 10 Hz-30 MHz (−3 dB).
Rise Time: 11.7 nS or less.
Overshoot: 3% or less.
Input Impedance: 1 MΩ ±2%, 22 pF (±3;F)
Tilt: Less than 5%.
Maximum Input Voltage: 300V DC + AC peak or 600V p-p.
Operating Modes: CH-A, CH-B, Dual, Add.
ALT 0.2 μS/cm-0.5 mS/cm.
CHOP 1 mS/cm-0.5 S/cm.
Chop Frequency: 200 kHz ±20%.
Signal Delay: Fixed.
CH B Polarity: NORM; INV.

SWEEP SYSTEM (Common to Channel A and Channel B.)
Type: Automatic and triggered
(NORM) Mode (X-Y operation) CH A = Y, CH B = X.
Sweep Time: 0.2 μS/cm-0.5 S/cm ±3% in 20 calibrated steps in a 1-2-5 sequence with vernier adjustment.
Horizontal Position Control: Pull for 5X magnification.
Sweep Magnification: x5 (five times) ±5%.
Linearity: 3% or better.

TRIGGERING
Source: INT CH-A, CH-B and EXT; X1 and X.1.
Slope: Positive or negative, continuously variable level control; pull for AUTO.
Range: INT DC-5 MHz, .3 cm or less. 5 MHz-30 MHz, 1 cm or less.
EXT DC-10 MHz, 100 mV p-p or better.
DC-30 MHz, 500 mV p-p or better.
Coupling: AC, DC, LF reject, HF reject. (AC) 30 Hz — 30 MHz (LF reject) signals below 10 kHz are attenuated. (HF reject) signals higher than 30 kHz are attenuated.
Non-Distorted Maximum Amplitude: More than 40 mm at 30 MHz; more than 80 mm at 10 MHz.

HORIZONTAL AMPLIFIER (Input through Channel B vertical input).
Deflection Factor: 5 mV/cm to 5 V/cm, ±5%, in ten ranges, each with fine adjustment.
Freq. Response: DC-1 MHz (−3 dB).
Input Impedance: 1 megohm (nominal), shunted by 22 pF (±3 pF).
Input Protection: 300 V DC + AC peak, or 600 V p-p.
X-Y Operation: With SWEEP TIME/CM switch in CH.B position, the CH.B input becomes the X input (horizontal) and the CH.B position control becomes the horizontal position control.

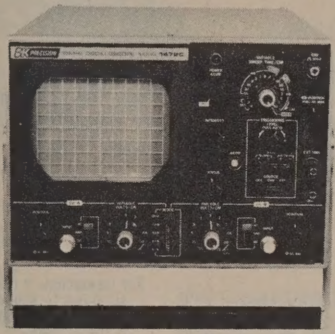
OTHER SPECIFICATIONS
Calibration: 0.5V p-p ±1% (squarewave at 1 kHz ±10%).
Intensity Modulation: More than +5V. DC-5 MHz.
Probes: Two PR-36 probes supplied.
Power Requirements: 115/230VAC, 50/60 Hz, 25 W.
Size (HxWxD): 18.4 x 25.3 x 36.9 cm (7⅜ x 10⅛ x 14¾").
Weight: 8.8 kg. (19.6 lbs.).

B+K PRECISION DYNASCAN CORPORATION / OSCILLOSCOPES

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

DUAL-TRACE 5" 15 MHz TRIGGERED SWEEP SCOPE USABLE RESPONSE THROUGH 27 MHz

MODEL 1472C
$660.00
INCLUDING PROBES



FEATURES

• Mode automatically shifts between CHOP and ALTERNATE as you change sweep time for fast set up • Bright Blue P31 phosphor • Flat in-band response with smooth rolloff past 15 MHz • Maintains calibration accuracy over 105-130 VAC range • Check most digital logic circuitry, including CMOS • Front-panel X-Y operation using matched vertical amps • Algebraic addition and subtraction • Differential input capability • 19 calibrated sweeps — .5 μsec/cm to .5 sec/cm • Sweep to .1 μsec/cm with 5x; 1.5 sec/cm with uncalibrated vernier • Monitor CB AM and SSB • Adjust color video to close tolerances in TV broadcast studies • TV sync separators.

SPECIFICATIONS

VERTICAL AMPLIFIER

Deflection Factor: 0.01 V/cm to 20V/cm, ±5%, in 11 ranges, each with fine adjustment.

Frequency Response: DC, DC-15 MHz (−3 dB); AC, 2 Hz-15 MHz (−3 dB).

Risetime: 24 nsec.

Input Impedance: 1 megohm (approx.) shunted by 27 pF (±3 pF).

Maximum Input Voltage: 300V, DC + AC peak or 600V p-p.

Operating Modes: Channel A only; Channel B only; Dual Trace (A and B) — trace automatically chopped at all sweep times of 1 msec/cm and slower, alternate mode automatically selected for all faster sweep times; A + B (single-trace algebraic sum of Channels A and B); A-B (single-trace algebraic difference of Channels A-B).

SWEEP

Auto and triggered. 0.5 μsec/cm to 0.5 sec/cm in 19 overlapping ranges.

Sweep Magnification: 5x at all speeds.

TRIGGERING

Source: CH A and CH B, 1cm deflection minimum. EXT, 1V p-p sensitivity.

Slope: Positive and negative, continuously variable level control; pull for AUTO.

Range: 20 Hz guaranteed (minimum 1cm deflection as measured on CRT); 20 Hz-27 MHz typical.

TV Sync: Vertical and horizontal sync separator.

Low Pass Filters: TV sync separators function as 100 Hz-3 kHz (TV-V) and 100 Hz-1 MHz (TV-H) filters.

HORIZONTAL AMPLIFIER

(Input through Channel B vertical input).

Deflection Factor: 0.01 V/cm to 20 V/cm, ±5%, in 11 ranges, each with fine adjustment.

Frequency Response: DC-1 MHz (−3 dB).

Input Protection: 300V, DC + AC peak, or 600V p-p.

OTHER

Calibration Voltage: 1 kHz square wave.

Intensity (Z-Axis) Modulation: 30V p-p minimum.

Probes: Two PR-34's supplied.

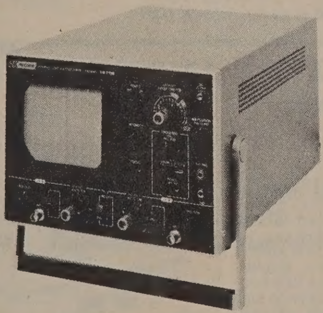
Power Required: 115/230 VAC, 50/60 Hz, 23W; CSA-approved three-wire line cord.

Size (HxWxD): 18.4 x 25.3 x 36.9 cm (7⅜ x 10⅛ x 14¾").

Weight: 8.8 kg. (19.6 lbs.).

DUAL-TRACE 5" 10 MHz TRIGGERED SWEEP SCOPE WITH TTL COMPATIBLE Z AXIS

MODEL 1471B
$570.00
INCLUDING PROBES



FEATURES

• Mode automatically shifts between CHOP and ALTERNATE as you change sweep time for fast set-up • Bright blue P31 phosphor • 18 calibrated sweeps — 1 μsec/cm to .5 sec/cm • Sweep to 200 nsec/cm with 5X magnification • Maintains calibration accuracy over 105-130 VAC range • Front panel X-Y operation using matched vertical amps • Input grounding switches • TV sync separators • Check most digital logic circuitry including CMOS • Character display applications using TTL Z-axis intensity modulation.

SPECIFICATIONS

VERTICAL AMPLIFIER

Deflection Factor: 0.01 V/cm to 20 V/cm, ±5%, in 11 ranges.

Frequency Response: DC, DC-10 MHz (−3 dB); AC, 10 Hz-10 MHz (−3 dB).

Risetime: 35 nsec.

Overshoot: 3% or less at 100 kHz.

Input Impedance: 1 megohm (approx.) shunted by 25 pF (±3 pF).

Tilt: Less than 5%.

Maximum Input Voltage: 300V, DC + AC peak or 600V p-p.

Operating Modes: Channel A only; Channel B only; Channels A and B (dual).

Dual Trace: Trace automatically chopped at all sweep times of 1 msec/cm and slower, alternate mode automatically selected for all faster sweep times.

Chop Frequency: 200 kHz approx.

Channel Separation: Better than 60 dB at 1 kHz.

SWEEP SYSTEM

(Common to Chan. A and Chan. B.)

Type: Automatic and triggered; in automatic mode, sweep is obtained without input signal.

Sweep Time: 1 μsec/cm to 0.5 sec/cm (±5%) in 18 ranges, in 1-2-5 sequence.

Sweep Magnification: 5x at all speeds for maximum sweep speed of 200 nsec/cm.

Linearity: 3% or less.

TRIGGERING

Source: CH A and CH B; triggers at or less than 1 cm deflection. EXT 1V p-p sensitivity.

Slope: Positive and negative, continuously variable level control; pull for AUTO.

Range: 20 Hz to 10 MHz min. (at or less than 1 cm deflection); triggers to 15 MHz.

TV Sync: Vertical and horizontal sync separator circuitry allows any portion of complex TV video waveform to be synchronized and expanded for viewing. TV-H (line) and TV-V (frame) sync switched automatically by SWEEP TIME/CM switch. TV-V, 0.5 sec/cm to 0.1 msec/cm. TV-H, 50 μsec/cm to 1 μsec/cm.

Low Pass Filters: The TV sync separator circuits also function as 100 Hz-3 kHz (TV-V) and 100 Hz-1 MHz (TV-H) filters.

HORIZONTAL AMPLIFIER

(Input through Chan. B vertical input.)

Deflection Factor: 0.01 V/cm to 20 V/cm, ±5%, 11 ranges.

Frequency Response: DC-1 MHz (−3 dB).

Input Impedance: 1 megohm (nom.) shunted by 25 pF (±3 pF).

Input Protection: 300V, DC + AC peak, or 600V p-p.

X-Y Operation: With SWEEP TIME/CM switch in CH B position, the CH B input becomes the X input (horizontal) and the CH B position control becomes the horizontal position control.

OTHER SPECIFICATIONS

Calibration Voltage: Line frequency square wave, 1V p-p (±5%).

Intensity (Z-Axis) Modulation: 5V p-p nominal; 470K nominal input resistance.

Probes: Two PR-31's supplied.

Power Required: 115/230V, 50/60 Hz, 20W; CSA-approved three-wire line cord.

Size (HxWxD): 18.4 x 25.3 x 36.9 cm (7⅜ x 10⅛ x 14¾").

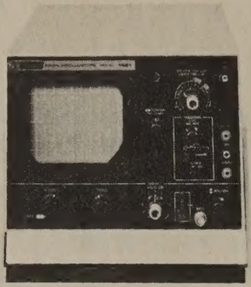
Weight: 8.8 kg. (19.6 lbs.).

B+K PRECISION DYNASCAN CORPORATION / OSCILLOSCOPES

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

10 MHz TRIGGERED SWEEP 5" OSCILLOSCOPE

MODEL 1461
$470.00
INCLUDING PROBE



FEATURES

• 18 sweep range selections • DC-10 mV/cm sensitivity • Fully regulated . . . Calibration is accurate from 105-130V line • Automatic selection of horizontal or vertical TV signals • Built-in calibration signal • Triggered and automatic sweep • Built-in TV vertical and horizontal sync separation circuits.

This is one scope that's equally at home in an R&D lab or on a technician's bench. Top styling and performance form a blend uncommon in this price category.

The Model 1461 offers all the advantages of triggered sweep with automatic sync plus very high 10 mV/cm sensitivity. The eleven-position vertical attenuator is conveniently calibrated in 1/2/5 step sequence.

SPECIFICATIONS

VERTICAL AMPLIFIER
Sensitivity: 10 mV/cm-20 V/cm ±5%, divided into 11 calibrated ranges, each with fine adjustment.
Frequency Response: DC, DC-10 MHz (3 dB); AC, 2 Hz-10 MHz (−3 dB).
Risetime: 35 nsec.
Overshoot and Ringing: 3% or less at 100 kHz square wave display.
Input Impedance: 1 megohm shunted by 22 pF (±3 pF).
Maximum Input Voltage: 300 VDC plus AC peak, or 600V p-p.

SWEEP
Sweep System: Automatic and triggered.
Sweep Time: 1 μsec/cm-.5 sec/cm, ±5%, divided into 18 calibrated ranges (1/2/5 step sequence), each with fine adjustment.
MAGNIFICATION: 5x at all speeds; increases maximum sweep to .2 μsec/cm.
Linearity: 5 sec/cm-2 μsec/cm ranges 3% or less; 1 μsec/cm 5% or less.

TRIGGERING
Source: Internal and external.
Slope: Positive or negative, continuously variable level control (pull for automatic triggering).
Range: 20 Hz-10 MHz (minimum 1.0 cm deflection on CRT screen).
TV SYNC: Vertical and horizontal sync separator circuit provided so that any portion of complex TV waveform can be synchronized and expanded for viewing. TV sync polarity is selected by Sync switch. TVH (line) and TVV (frame) sync switched automatically by SWEEP TIME/CM switch.
TVV (FRAME) = 0.5 sec/cm to 0.1 msec/cm.
TVH (LINE) = 50 μsec/cm to 1 μsec/cm.

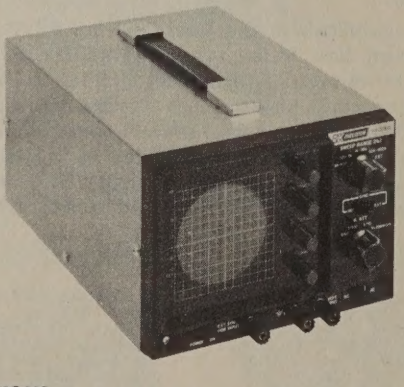
HORIZONTAL AMPLIFIER
Sensitivity: 100 mV/cm.
Response: DC-800 kHz (−3 dB) 100.
Input Impedance: 100k ohms (nominal), shunted by 40 pF.
Maximum Input Voltage: 300V (DC + AC Peak) or 600V p-p.

X-Y Operation: Y (vertical) signal supplied to scope INPUT jack; X (horizontal) signal supplied to H INPUT jack.
1V p-p square wave (±5%) at line frequency.
Intensity Modulation: 0-5V p-p (TTL logic-compatible). High logic-increases brightness; low logic-decreases brightness.
Input Resistance: 10 kΩ (nominal).
Power Requirements: 117 or 230 VAC, ±10%, 50/60 Hz, 20 watts. (3-wire line cord, CSA approved for oscilloscopes.) Calibration accuracy applies over full input voltage range.
Size (HxWxD): 18.4 x 25.3 x 36.9 cm (7⅜ x 10⅛ x 14¾").
Net Weight: 8 kg (17.3 lbs.).

PROBE (included)
Model No.: PR-31.
Attenuation: Combination 10:1 and direct.
Input Impedances: 10:1-10 megohms, 18 pF.
Connector: BNC.
Tip: Spring-loaded, hook-on tip.

3" SOLID STATE PORTABLE OSCILLOSCOPE

MODEL 1403A
$219.00



FEATURES

DC to 5 MHz bandwidth, with direct-deflection input for waveforms to 450 MHz • Sharp, bright trace • DC amplifiers on both axes • New high-brightness CRT • All solid state • Weighs only 8.4 lbs.

APPLICATIONS

The 1403A is ideal for many monitoring applications, freeing more expensive scopes from "menial" monitoring tasks. Just set the controls for the waveform being monitored and leave the rest to your tester. She'll appreciate the 1403A's sharp trace and stability. The 1403A takes up very little space on production line, classroom lab table or bench; its sturdy construction, bright display and portability make it ideal for use anywhere. This rugged "miniscope" has DC to 5 MHz bandwidth, DC amplifiers on both vertical and horizontal axes and direct-deflection terminals for waveforms up to 450 MHz. Model 1403A is completely solid state (except CRT), weighs just 8.4 lbs. and has a three-wire grounded AC cord. With test leads. Use optional PR-21 probe; all other probes with UHF to double-banana connector adapter.

SPECIFICATIONS

VERTICAL AMPLIFIER
Sensitivity: 10 mV/div or better.
Response: DC, DC 5 MHz (−3 dB); AC, 2 Hz-5 MHz (−3 dB).
Overshoot: 5% or less.
Maximum Input: 600V peak-to-peak.
Input Impedance: 1 meg shunted by 30 pF.
Attenuator: 1, 1/10, 1/100 multiplier, ±5%.
Gain Control Range: Continuously variable range greater than 22 dB.

HORIZONTAL AMPLIFIER
Sensitivity: 300 mV/div or better.
Response: DC-250 kHz.
Input Impedance: 1 meg shunted by 30 pF.

SWEEP SYSTEM
Type: Recurrent.
Time Base Ranges: 10-100 Hz, 100-1000 Hz, 1-10 kHz, 10-100 kHz; continuously variable between ranges.
Sweep Linearity: ±5%.
Synchronization: Internal, negative.
Signal Required for Sync: (Internal) More than 1 division deflection on screen of CRT. (External) More than 2V p-p.

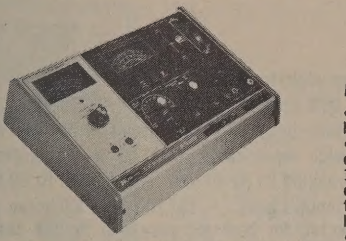
GENERAL
Intensity Modulation: 25V peak-to-peak.
Power Requirements: 117/234 VAC, 50-60 Hz, 15W; three-wire grounded line cord.
Accessories Included: Leads, spare fuse, instructions.
Size (HxWxD): 15 x 19 x 30 cm (6 x 7.25 x 12").
Net Weight: 3.8 kg. (8.4 lbs.).

B+K PRECISION DYNASCAN CORPORATION / **TRANSISTOR TESTERS**

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

LAB QUALITY SEMICONDUCTOR TESTER

MODEL 530
$295.00



FEATURES

- Measures transistor beta or FET gm
- Measures transistor cut-off frequency up to 1500 MHz
- Non-destructive testing of transistor and diode breakdown voltages
- Measures I_{CES} and I_{DSS}
- Fast testing of transistors, FET's, and SCR's — in or out-of-circuit
- Base diagrams are not required
- No biasing information required
- Identifies all leads of transistors and SCR's
- Automatic identification of PNP/NPN types and N or P channel FET's.

SPECIFICATIONS

IN-CIRCUIT TESTS
Good/Bad Test: For bipolar transistors, FET's and SCR's.
Identifies: All leads of bipolar transistors and SCR's, and gate lead of FET's. Also identifies device polarity by automatically indicating PNP, NPN, and P or N channel FET's.

OUT-OF-CIRCUIT TESTS
Measures: Transistor beta, gm, f_t, I_{CES}, I_{DSS}, BV_{CES}, and PIV.
Transistor Beta: Two I_C ranges (low power, 20-600; high power, 20-200).
gm OF FET's
f_t: Three ranges (1-100 MHz; 50-750 MHz; 750-1500 MHz). I_{CES} and I_{DSS}: From .5 μA to 5 mA. BV_{CES} of transistors and PIV of diodes at 10V (5 mA max.) or variable 10-100V (100 μA max.).
Accuracy: Within 10% for β, gm, and f_t tests.

INDICATORS
Audible tone for GOOD indication. Front panel switch provides tone defeat. LED Lamps identify device polarity, including NPN, PNP, or N or P channel FET's. Panel Indicator and Test Switch identifies all leads of transistors and SCR's and base lead of FET's.
Jacks and test leads are color coded.
Meters indicate other device parameters.

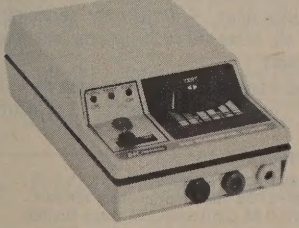
APPLIED TEST CURRENTS
Collector: 125 mA at 4% duty cycle.
Base: 250 mA at 4% duty cycle (HI drive); 1 mA at 4% duty cycle (low drive).
Test Repetition Rate: 10 per second.
Voltage for Leakage Test: Variable from 10-100 VDC.
High-power beta and gm Tests: Special 300 μS, 1% duty cycle current pulses enable testing at 2 amps without over-dissipation of device under test. Maximum beta (200) and maximum gm (400 millimhos) correspond to test current of 2 amps.

LIMITING IN-CIRCUIT SHUNT VALUES FOR IN-CIRCUIT GOOD/BAD TEST
Resistance: Down to 10Ω (HI drive). Down to 1.5 kΩ (LO drive).
Capacitance: Up to 15 μF (HI drive). Up to 0.3 μF (LO drive).

GENERAL
Color-coded Mini-lock clips for hands-free operation. Detailed instruction manual. Optional FP-5 Dynaflex three-lead, one-hand probe for easy in-circuit testing.
Power Required: 105-125 VAC, 60 Hz, 10 watts.
Size (HxWxD): 18 x 33 x 9 cm (7 x 13 x 3½").
Net Weight: 2.3 kg (5 lbs.).

PORTABLE INDUSTRIAL TESTER

MODEL 510
$90.00



FEATURES

- Fast GO/NO-GO in-circuit transistor testing
- Fast and thorough GOOD/BAD out-of-circuit testing
- Tests FET's and SCR's in-circuit or out-of-circuit
- Connect any test clip to any component lead
- Gives positive emitter-base-collector identification in LO drive — positive base identification in HI drive
- Light-Emitting Diodes indicate NPN-OK or PNP-OK
- Pocket-size — over 100 hours of testing from single set of "AA" cells
- Digital stability — no adjustments; nothing to go out of calibration.

SPECIFICATIONS

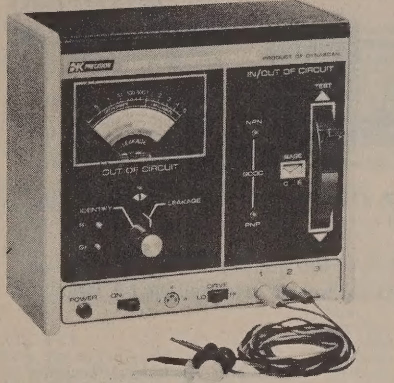
IN/OUT-OF-CIRCUIT TESTS
GOOD/BAD test for transistors, FET's and SCR's.
Identifies transistors as NPN or PNP.
FET as N-channel or P-channel.
Identifies FET gate lead.
Identifies all leads of transistors in LO drive; base lead in HI drive.
Identifies all leads of SCR.

APPLIED TEST CURRENTS
Base Drive: 250 mA (HI) or 1 mA (LO) at 2% duty cycle.
Collector Drive: 125 mA at 2% duty cycle.
Test Repetition Rate: 5 Hz.

IN-CIRCUIT SHUNT LIMITS FOR VALID GOOD/BAD TEST:
Resistance: Down to 10 ohms with HI drive; down to 1.5K ohms with LO drive.
Capacitance: Up to 25 μF with HI drive; up to .3 μF with LO drive.
Power Requirements: 6 VDC from four "AA" cells, not supplied. Standby current, 4 mA; average testing current, 12 mA.
Accessories: Carrying Case and test leads supplied. Model FP-5 Dynaflex Probe (optional) may be used in place of test leads.
Size (HxWxD): 4.4 x 9.5 x 6.6 cm (1.75 x 3.75 x 6.6").
Weight: 450g (1 lb.).

INDUSTRIAL TRANSISTOR TESTER

MODEL 520B
$160.00



FEATURES

- Now with HI/LO drive
- Works in-circuit when others won't
- Identifies all three transistor leads
- Random lead connection
- Audibly and visually indicates GOOD transistor
- Automatic NPN/PNP determination
- Positive Si/Ge identification
- Tests diodes, SCR's, FET's, and Darlingtons.

SPECIFICATIONS

IN-CIRCUIT TESTS
Good/Bad Test: For PNP and NPN transistors. FET's and SCR's.
Identifies: NPN or PNP.

OUT-OF-CIRCUIT TESTS
Good/Bad Test: For PNP and NPN transistors. FET's, SCR's, leakage and loss.
Identifies: NPN or PNP; silicon or germanium transistors.
Measures: Reverse leakage from 0.1 μA to 5 mA.
AUTOMATIC INDICATORS — Audible Tone for GOOD indication. LED Lamps identify NPN or PNP devices and Ge or Si types. Test Switch automatically identifies base or gate lead for good transistors or FET's.
Meter Scales: Readable from 0.1 μA to 5 mA for Ice leakage; calibrated for silicon and germanium power and signal transistor leakage limits.

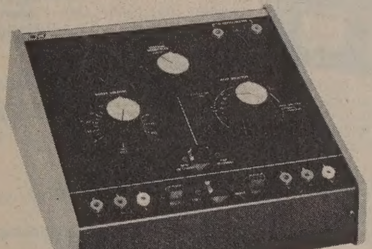
APPLIED TEST CURRENTS
Collector: 250 mA at 5% duty cycle.
Base: 125 mA at 5% duty cycle.
Test Repetition Rate: 10 per second.
Leakage Test Reverse Voltage: 2.0V.

LIMITING IN-CIRCUIT BASE-EMITTER SHUNT VALUES FOR VALID TESTS
Resistance: Greater than 10 ohms.
Capacitance: Less than 15 μF.

GENERAL
Accessories: Color-coded test leads with Mini-Lock clips; detailed instruction manual; optional FP-5 Dynaflex™ three-lead, one-hand probe for easy in-circuit testing available.
Power Required: 105-125 VAC, 50-60 Hz; also available for 230 VAC, 50-60 Hz.
Size (HxWxD): 20 x 17 x 8.9 cm (8 x 7 x 3.5").
Net Weight: 2.27 kg (5 lb.).

SEMICONDUCTOR CURVE TRACER

MODEL 501A
$182.00



FEATURES

- Display characteristic curves for all semiconductor devices on your scope
- Built-in current limiting protects devices under test
- Pinpoint bad devices in-circuit
- Measure breakdown voltage non-destructively
- Identify unknown devices.

SPECIFICATIONS

COLLECTOR SWEEP
Range: 0-100 VDC peak at 100 mA maximum.
Polarity: NPN (N-Channel) or PNP (P-Channel).
Current Limiting: Automatic at approximately 130% of full scale for each vertical attenuator range.

STEP GENERATOR
11 Current Ranges: 1, 2, 5, 10, 20, 50 μA per step; .1, .2, .5, 1, 2 mA per step; ±3% constant-current steps.
5 Voltage Ranges: .05, .1, .2, .5, 1V per step, ±4%; source resistance, 1K.
Number of Steps: Six, continuous display.
Step Polarity: Same as Collector Sweep (NPN or PNP); inverted in VOLTS/STEP positions.

CALIBRATION
Source: ±.05 to 5V p-p, ±3% accuracy.
Attenuator Range: 1, 2, 5, 10 mA per division vertically, ±3%.

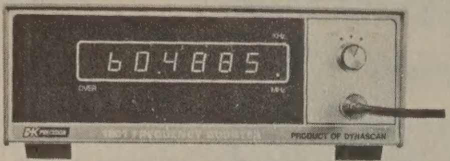
GENERAL
Sockets: Two TO-5 type transistor sockets (right and left) with each pin (three per socket) paralleled by a banana jack for external cables. Slide switch selects right or left socket.
Output Terminals: Banana jacks for vertical, horizontal and ground outputs to oscilloscope.
Accessories Included: Cables to scope, mylar 10 x 10-division graticule, detailed instruction manual and FP-5 probe.
Power Requirements: 105-125 VAC, 50-60 Hz; also available for 230 VAC, 60 Hz. With three-wire cord.
Size (HxWxD): 10.2 x 25 x 24 cm (4 x 10 x 9.5").
Net Weight: 1.35 kg (3 lbs.).

B+K PRECISION DYNASCAN CORPORATION / **FREQUENCY COUNTER POWER SUPPLIES**

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

40 MHz AUTORANGING COUNTER

MODEL 1801
$200.00



DISPLAY OF 60 MHZ TYPICAL FREQUENCY UPPER LIMIT

FEATURES

- Automatic ranging 20 Hz-40 MHz guaranteed • 1 Hz resolution
- Six-digit solid-state readout with discrete reliable TTL logic.
- Suppression of leading digit for extra resolution above 1 MHz on 1 sec gate time • 10 MHz crystal time base for stability • User-convertible to external time base • Three automatic decimal point positions • Accepts wide input range with no level adjustment normally needed • Autoranging 20 Hz-40 MHz (typically 10 Hz-60 MHz, but may require larger input signal) • 10, 100 or 1000 msec gate times automatically selected for best accuracy and fastest reading • One simple trimmer for time base adjustment (when needed).

MODEL PR-25 PROBE

10:1 and 1:1 compensated counter probe (optional)

SPECIFICATIONS

FREQUENCY

Range: 20 Hz-40 MHz guaranteed; 10 Hz to over 60 MHz typical.

Auto Gate Time: 10 msec or 100 msec (MHz reading) or 1 sec (kHz reading), chosen automatically.

Manual Gate Time: 1 sec (kHz reading, 1 Hz resolution).

Accuracy: ± time base accuracy, ±1 count.

Resolution: 1 Hz.

Display: Input signal frequency, automatically positioned decimal point. Units (kHz, MHz) displayed on front by illuminated indicator.

INPUT CHARACTERISTICS

Impedance: 1 meg/25 pF.

Sine Wave Sensitivity: 30 mV RMS (guaranteed); 15 mV RMS (typical); 20 Hz-40 MHz.

Max. Input (peak AC + DC): 200V to 500 Hz; linearity derated to 100V at 1 kHz; 100V, 1 kHz-5 MHz; linearly derated to 50V at 40 MHz.

INTERNAL TIME BASE CHARACTERISTICS

(Ref. 25°C after 30 min. warmup)

Type: 10 MHz. Xtal oscillator.

Setability: ±0.1 PPM (±1 Hz).

Line Voltage Stability: Better than 1 PPM for ±10% line variation.

Temperature Stability: Better than ±0.001% (i.e., ±10 PPM), 0-50°C.

Max. Aging Rate: 10 PPM/year.

DISPLAY CHARACTERISTICS

Visual: 6 digits with overflow, kHz and MHz indicators.

Overflow: Flashing light.

Display Refresh Interval: Fixed; 200 msec plus gate interval.

GENERAL

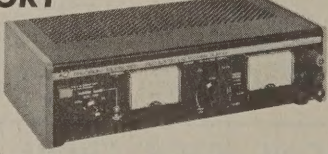
Power Requirements: 105-130V, 60 Hz, 25W max.

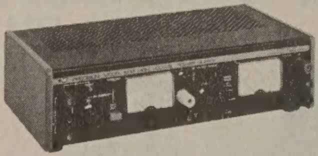
Size (HxWxD): 8.3 x 22 x 26 cm (3.3 x 8.7 x 10.5").

Weight: 2.5 kg (5.5 lbs.).

LABORATORY POWER SUPPLIES

MODEL 1601
$225.00
MODEL 1602
$250.00





FEATURES 1601

- Isolated 0-50 VDC, continuously variable; 02A in four ranges
- Fully automatic shutdown, adjustable current limit • Perfect for solid state servicing.

FEATURES 1602

- 0-400 VDC, 0-200 mA, continuously variable • 0 to −100 VDC, 0-2 mA and 12.6/6.3 VAC at 3.5A
- Fully automatic shutdown, adjustable current limit.

SPECIFICATIONS

1601

Input Voltage: 105-125 VAC, 60 Hz.
Output Voltage: 0-50 VDC, continuously variable; two ranges, 0-25 and 0-50 VDC.
Output Current: 02A in four ranges — 0-50 mA, 0-0.2A, 0-0.5A, 0-2A.
Load Regulation: Minimum, 0.05%; maximum, 0.1%; typical, 0.07%.
Line Regulation: 0.02% typical from 105 to 125 VAC with output of 50 VDC and 2A.
Ripple: 5 mV peak-to-peak.
Temperature Coefficient: .012% of output voltage per °C.
Size (HxWxD): 9.8 x 35 x 25 cm (3.88 x 14.13 x 10").
Net Weight: 5 kg (11 lbs.). Complete with leads and instruction manual.

1602

Input Voltage: 105-125 VAC, 60 Hz.

400 VDC SUPPLY
Output Voltage: 0-400 VDC, continuously variable.
Output Current: 0-200 mA.
Load Regulation: 0.1%.
Line Regulation: 0.1% for 105-125 VAC line.
Noise and Ripple: Less than 10 mV peak-to-peak.
Protection: 0-200 mA adjustable shutdown.

BIAS SUPPLY (100 VDC)
Output Voltage: 0 to −100 VDC continuously variable, floating.
Output Current: 0-2 mA.
Load Regulation: 1%.
Line Regulation: 1%.
Noise and Ripple: Less than 10 mV peak-to-peak.
Protection: Current-limiting resistance.

12.6 AND 6.3 VAC (NON-ADJUSTABLE)
Output Voltage: 12.6 or 6.3 VAC ±5% no-load, floating.
Output Current: 3.5A continuous.
Protection: Thermal circuit breaker on front panel.
Size (HxWxD): 9.8 x 35 x 25 cm (3.88 x 14.13 x 10").
Net Weight: 5 kg (11 lbs.).

MOBILE EQUIPMENT POWER SUPPLY

MODEL 1640
$100.00

FEATURES

- Regulated adjustable output from 11-15 VDC, 0-3A • Fully automatic overload protection, manual reset, 5A surge limit • Perfect for servicing CB radios and all other 12 volt mobile equipment.

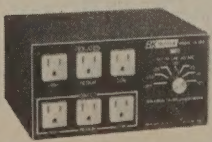
APPLICATIONS

Citizens Band transceivers . . . Auto tape decks . . . Auto radios . . . FM converters . . . Electronic ignitions.

SPECIFICATIONS

Input Voltage: 117 VAC, 60 Hz.
Output Voltage: 11-15 VDC, continuously variable.
Output Current: 0-3A continuous, 5A surge limited.
Meter: Voltmeter-ammeter, pivot and jewel movement (illuminated). Metering function selected by switch.
Overload Indicator: LED glows after overload; turns off when overload is cleared.
Ripple: Less than 8 mV RMS; 0-3A.
Load Regulation: Less than 0.8% voltage change from 0-3A, 11V to 15V.
Line Regulation: Less than 0.8% voltage change at 3A output ±10% line variation.
Short Circuit Protection: Voltage shutdown, manual reset. Surge current limited to 5A maximum.
Size: (HxWxD): 7.8 x 25 x 22 cm (3$\frac{1}{16}$ x 10 x 8½").
Weight: 3.6 kg (8 lbs.).

NEW ISOLATION AND AUTOTRANSFORMER



MODEL TR-100: $55.00

FEATURES

The TR-100 is a versatile isolation and autotransformer, designed for use in industry, shops or schools. Three isolated outlets permit safe testing of transformerless equipment. The TR-100 can also be used to vary the input line voltage applied to an electrical device under test.

SPECIFICATIONS

Switchable input line volts from 105 to 130 volts, three wire cord. Output receptacles provided for Low—105V, Medium—115, and High—120V. **Load ratings:** Isolated: 400 VA Continuous, 450 VA intermittent, Direct: 500/750 VA; Primary to secondary current leakage less than 0.1 mA—meets ANSI spec C101.1, 1971 for leakage. CSA approved. **Size** (HWD): 11.25 x 20.6 x 17.5 cm (4.5 x 8.25 x 7"). **Weight:** 5.4 kg (12 lbs.).

B+K PRECISION DYNASCAN CORPORATION / **DIGITAL MULTIMETERS**

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

NEW 3½ DIGIT PORTABLE DMM

MODEL 2800
$99.95

FEATURES

• Reliable—fully overload protected • 3½ digit easy to read LED display • Completely portable —use it anywhere! • Auto zeroing • High/Low-power ohms for in-circuit accuracy • 1 mV, 1 μA, 0.1 ohm resolution • 10 meg input impedance, industry standard • Excellent temperature coefficient • Typical DC accuracy 1%.

Combines the features of our most popular DMM with a new 3½ digit readout capability. Other new features include an auto-zero circuit and improved overload protection. The 2800 features 22 scales that range as high as 1000 volts, DC or AC. Resolution is to 1 mV, 1 μA or 0.1 ohm. Input impedance is 10 megohms.

The 2800 has 100% overrange reading capability. This allows you to read 1999 on a scale normally limited to a maximum reading of 1000.

Alternating high-/low-power ohms ranges permit analysis of solid-state circuitry without biasing semiconductor junctions. Typical accuracy is ±19° on DC and ±1.5% AC.

ACCESSORIES FOR 280, 2800, 2810

Model BC-28: $8.00. AC adapter/battery charger; **Model BP-28: $20.** Rechargeable batteries; **Model ES-10: $20.** 10 amp current shunt; **Model LC-28: $6.00.** Carrying case; **Model MS-28: $3.00.** Wire tilt stand; **Model PR-21: $10.00.** Isolation/direct probe; **Model PR-23: $15.00.** RF demodulator probe; **Model PR-28: $24.00.** High-voltage probe.

SPECIFICATIONS

AC-DC VOLTAGE
Ranges: ±0-1V, 100V, 1000 V.
Input Impedance: 10 megohms.
Circuit Protection: ±1000 VDC or AC RMS, all ranges.
Polarity Indication: Automatic.
Response: 50-400 Hz.

DC AND AC CURRENT
Ranges: 0-1 mA, 10 mA, 100 mA, 1000 mA.
Circuit Protection: Diodes and externally accessible fuse.

RESISTANCE
Ranges: 0-100Ω, 1kΩ, 10kΩ, 10MΩ. Alternate ranges are Hi and Lo power.
Protection: No component failure other than a fuse will result with application of +100 VDC or −450 VDC or 300 VAC RMS to input.

ACCURACY
Note: For all ranges add ±1 L.S.D.
DC Volts: ±1% of reading, ±0.25% of f.s. three lowest ranges; ±1.5% of reading, ±0.25% of f.s. 1000V range.
DC Current: ±2.0% of reading, ±.5% of f.s. range, 1 mA, 10 mA, 100 mA ranges, ±2.5% of f.s., ±.5% of f.s., 1A range.
AC Volts: ±1.5% of reading, ±.5% of f.s., 1V, 10V, 100V ranges. ±2.5% of reading, ±.5% of f.s., 1000V ranges.
AC Current: ±2.0% of reading, ±.5% of f.s., 1 mA, 10 mA, 100 mA ranges. ±3.0% of reading, ±.5% of f.s., 1A range.
Resistance: ±1.5% of reading, ±.5% of f.s., ±1 LSD, 1000Ω, 1kΩ 10kΩ, 100kΩ and 1mΩ ranges. ±2% of reading, ±.5% of f.s., ±1 LSD, 10MΩ range.

GENERAL
Readout: 3½ digits, 3″ LED.
Overrange Indication: Display flashes 1999.
Operating Temperature Range: +15°C to +35°C; usable range at reduced accuracy: 0°C to 50°C.
Includes: 2 test leads, manual, spare fuse.
Power: Four "C" size batteries—Ni-Cad, alkaline or carbon-zinc, with provision for AC adapter/charger (Batteries and AC adapter/charger not supplied).
Battery Life: Better than 40 hours of continuous use with alkaline batteries.
Size (HWD): 16 x 11 x 5 cm (6.4 x 4.4 x 2″)
Weight: 907g. (2 lbs.).

NEW 3½ DIGIT DMM WITH .5% ACCURACY

MODEL 2810
$119.95

FEATURES

• 3½ digit easy to read LED display • 0.5% DC accuracy with autozeroing • 100 mV, .01Ω resolution • 10 ohm range and control to zero lead resistance • Selectable High-Low-power ohms on four ranges • Completely overload protected on all 29 ranges • 100% overrange reading to 2000 counts full scale • Protected against RF interference • Completely portable.

THE MOST VERSATILE DIGITAL VOM WE'VE EVER OFFERED

While retaining the convenience of our popular user-oriented panel layout, we've designed into the B&K-PRECISION Model 2810 a combination of features uncommon in a portable digital VOM. Typical DC accuracy is 0.5% with a 3½ digit display. Auto-zeroing on all but the 10Ω range minimizes set-up time, while the 100% overranging capability reduces the need for frequent range changes.

The 10Ω range, with its .01Ω resolution, is ideal for locating a shorted winding in a transformer, motor or coil.

The high-/low-power ohms switch permits resistance measurements in solid-state circuitry without biasing semiconductor junctions. Unlike many electronic voltmeters, the 2810 can also be used in R-F energy fields. This includes use near business band, CB and amateur radio transmitters.

Like other B&K-PRECISION instruments, the 2810 is well protected against overloads.

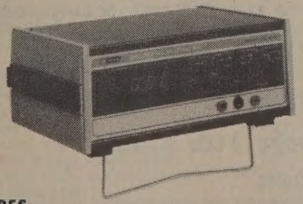
SPECIFICATIONS

AC-DC VOLTAGE
Ranges: ±100.0 mV, 1V, 10V, 100V, 1000V.
Input Impedance: 10 megohms.
Circuit Protection: ±1500 VDC or AC peak, all ranges.
Polarity Indication: Automatic.
Frequency Response: 50-1000 Hz; 50-400 Hz, 1000V range.
Protection: ±1500 VDC or AC peak, all ranges (50 Hz-1 kHz).
DC AND AC CURRENT
Ranges: 1 mA, 10 mA, 100 mA, 1000 mA.
Circuit Protection: Diodes and externally accessible fuse, all ranges.
Nominal Voltage Drop (full scale): 200 mV; 750 mV on 1 amp range.
AC Frequency Response: 50-400 Hz..
Overrange: 100% to 1999.
RESISTANCE
Ranges: 10Ω, 100Ω, 1kΩ, 100kΩ, 10MΩ.
Protection: No component failure other than a fuse will result with application of +100 VDC or −450 DC or 300 VAC RMS to input.
ACCURACY
Note: For all ranges add ±1 L.S.D.
DC Volts: ±0.5% of reading, ±0.1% of f.s., 1V, 10V, 100V ranges; ±1.0% of reading, ±0.2% of f.s., 100 mV, 1000V ranges.
DC Current: ±1% of reading, ±0.5% of f.s., 1 mA, 10 mA, 100 mA ranges; 1.5% of reading, ±0.5% of f.s., 1000 mA range.
AC Volts: ±1.0% of reading, ±0.25% of f.s., 1V, 10V, 100V ranges; ±1.0% of readings, ±0.5% of f.s., 100 mV range; ±2.0% of reading, ±0.5% of f.s., 1000V range.
AC Current: ±1.5% of reading, ±0.5% of f.s., 1 mA, 10 mA, 100 mA ranges; ±2.0% of reading, ±0.5% of f.s., 1000 mA range.
Resistance: ±1.0% of reading, ±0.25% of f.s., 1kΩ, 10kΩ, 100kΩ, and 1000kΩ ranges in High-Ω; ±1.5% of reading, ±0.5% of f.s., 10Ω, 100Ω, 1kΩ, 10kΩ, 1000kΩ ranges in low-Ω 1.5% of reading, ±0.5% of f.s., 10MΩ range.

GENERAL
Readout: 3½ digits, .3″ LED.
Overrange Indication: Display flashes 1999.
Operating Temperature Range: +15°C to +35°C; usable range at reduced accuracy: 0°C to 50°C.
Power: Four "C" size batteries—Ni-Cad, alkaline or carbon-zinc, with provision for AC adapter/charger (Batteries and AC adapter/charger not supplied).
Battery Life: Better than 40 hours of continuous use with alkaline batteries.
Size (HWD): 16 x 11 x 5 cm (6.4 x 4.4 x 2″).
Weight: 907 g. (2 lbs.).

3½ DIGIT PORTABLE MULTIPLIER

MODEL 283
$170.00



FEATURES

• High intensity, reliability 3½ digit LED display for maximum readability • Selectable HI/LO ohms function allows in-circuit resistance measurement without forward biasing semiconductor junctions • Universal AC power supply • Easily installed optional battery pack • Large, bright non-blinking 7-segment digits • DC accuracy, 0.5% • Automatic polarity • Full overload protection on all ranges • 1 mV resolution.

OPTIONAL ACCESSORIES

Model BP-83: $50.00. Rechargeable Battery Pack: Permits 8 hours of continuous use on one overnight recharging. **Model PR-21: $10.00.** Isolation/Direct Probe. **Model LC-83: $15.00.** Handsome leatherette case. **Model PR-23: $15.00.** Demodulator Probe. **Model PR-28: $24.00.** High Voltage Multiplier Probe (increases the voltmeter range to 40,000 VDC).

SPECIFICATIONS

DC VOLTAGE (Auto Polarity)
Ranges: ±1.000, 10,00, 100.0 1000V.
Maximum DC Input: 1500 VDC or DC plus AC peak.
Accuracy: 1, 10 100V range ±.5% of reading ±1 LSD, 1000V ranges, ±1% of reading, ±1 LSD.
Polarity: Automatic.

AC VOLTAGE
Ranges: ±0-1.000, 10.00, 100.0, 1000 RMS.
Maximum AC Input: 1500V peak or 1500 VDC plus AC peak.
Accuracy and Response: 1V, 10V, 100V range, ±1% of reading, ±1 LSD, 40-400 Hz; 1000 V range, ±1.5% of reading, ±1 LSD, 40-400 Hz.

AC-DC CURRENT
Ranges: 0-1.000, 10.00, 100.0, 1000 mA.
DC Accuracy: 1, 10, 100 mA ranges, ±1% of reading; ±1 LSD. 1000 mA range, ±1.5% of reading, ±1 LSD.
AC Accuracy: 1, 10, 100 mA ranges, ±1.5% of reading, ±1 LSD. 1000 mA range, ±2% of reading, ±1 LSD.

Frequency Response: 40-400 Hz.

RESISTANCE
Ranges: 0-100.0Ω; 1.000k, 10.00k, 100.0kΩ ; 1.000, 10.0MΩ.
Accuracy: 1k to 1000k ranges in Hi ohms, ±1% of reading, ±1 LSD. 10MΩ range, and five lowest ranges in low ohms, ±2% of reading, ±1 LSD.

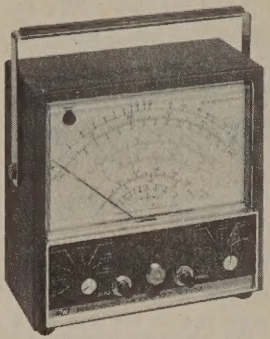
GENERAL
Display: 3½ digit, .41″ LED.
Accuracy Temperature Coefficient (15°C to 35°C): ± .025% of reading/°C on DCV ranges; ±.05%/°C, all other ranges.
Input Impedance: 10MΩ.
Overrange: 100%.
Overload Protection: Protected up to 1000V on ohms ranges; to 3A on current shunts; to 1500V on voltage ranges.
Power: 105-125 VAC, 50/60 Hz; 230 VAC, 50/60 Hz, with 3-wire grounded detachable AC line cord and test leads.
Size (WxDxH): 23 x 18 x 19 cm (9 x 7 x 3.5″).
Weight: 2.7 kg. (3 lbs.).

B+K PRECISION DYNASCAN CORPORATION / VACUUM TUBE VOLTMETER MULTIMETERS

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

VACUUM TUBE VOLTMETER

MODEL 177
$130.00



FEATURES

• Internal DC power supply for ohms ranges — no battery needed • 37 ranges, including dB and zero center scales.

The 177 includes the PR-43 DC/AC/Ohms probe with switch and ground lead. Low AC ranges have special calibrations. Features easy-to-read 7″ mirrored scale, DC polarity switch and 1% precision resistors in all critical circuits. See other meter probes on page 1497.

SPECIFICATIONS

DC Volts: 0-.5, 1.5, 5, 15, 50, 150, 500, 1500.

AC Volts: RMS, 0-1.5, 5, 15, 50, 150, 500, 1500; peak-to-peak, 4, 14, 40, 140, 400, 1400, 4000; frequency response, ±1 dB, 40 Hz-3 MHz (600 ohm source, 5V range).

Resistance: 0-1K, 10K, 100K; 0-1, 10, 100, 1000 meg; 10 ohms center scale.

Input Resistance: 11 megs (1 meg in probe).

Accuracy: DC, ±3% F.S.; AC, ±5% F.S.

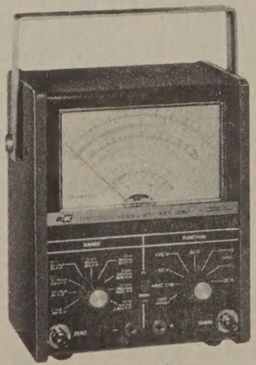
Power Required: 105-125 VAC, 50-60 Hz.

Size (HxWxD): 18 x 18 x 9 cm (7.1 x 7.25 x 3.6″).

Net Weight: 2.7 kg (6 lbs.).

SOLID STATE ELECTRONIC MULTI-METER WITH HIGH-LOW POWER OHMS

MODEL 277
FET METER
$120.00



FEATURES

• High and lower-power ohms ranges for transistor circuit test • 1 μA full scale current range for semiconductor leakage tests • 15 meg input impedance • FET input • 25 ranges; overload protected • Checks its own batteries

SPECIFICATIONS

Multipliers: 1% precision type, frequency-compensated.

Meter: 4.5″; 50 μA movement, mirrored scale.

Protection: Meter and FET input fully overload protected; current and resistance circuits overload protected by fuse.

DC Volts: 0-.1, .3, 1, 3, 10, 30, 100, 300, 1000; zero-center capability on all ranges; accuracy, ±2% F.S.; input resistance, 15 megs.

AC Volts: RMS, 0-.1, .3, 1, 3, 10, 30, 100, 300, 1000; peak-to-peak, 0-.28, .88, 2.8, 8.8, 28, 88, 280, 880, 2800; accuracy, ±3% F.S.; input impedance, 10 megs shunted by 100 pF; frequency response, flat, 50 Hz-150 kHz.

DC Current: 0-1, 10, 100 μA; 0-1, 10, 30, 100, 300, 1000 mA; accuracy, ±3% F.S.

Resistance: Rx1, x10, x100, x1K, x100K, x1 meg, switch-selectable for either .068 or 1.5 test volts; 10 ohms center-scale.

Decibels: 9 ranges from −20 to +60 dB; accuracy, ±3% F.S. (0 dB = 1 mW into 600 ohms).

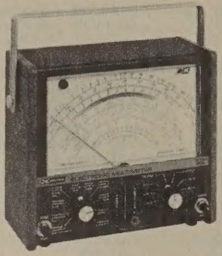
Power Required: One 9V type 2V6 battery and one 1.5V "D" cell.

Size (HxWxD): 18 x 14.5 x 9.1 cm (7.25 x 5.8 x 3.6″).

Net Weight: 907g (2 lbs.).

SOLID STATE ELECTRONIC MULTI-METER WITH HIGH-LOW POWER OHMS

MODEL 290
FET METER
$165.00



FEATURES

• 75 ranges; ±1.5% VDC accuracy • High and low-power ohms ranges • 15 meg FET input • Fully overload protected • 50 mV AC and DC full scale • 50 μA full scale current range • Rx0.1 ohm range with 1 ohm scale.

SPECIFICATIONS

DC VOLTS

10 Ranges: 0-50, 150, 500 mV; 1.5, 5, 15, 50, 150, 500, 1500V.

Accuracy: ±1.5% F.S.

Input Resistance: 15 megs, including 100K in PR-21 probe.

AC Rejection: Greater than 46 dB at 60 Hz.

AC VOLTS

10 RMS Ranges: 0-50, 150, 500 mV; 1.5, 5, 15, 50, 150, 500, 1500V.

Peak-to-Peak Ranges: 0-140, 440 mV; 1.4, 4.4, 14, 140, 440, 1400, 4400V.

Accuracy: ±3% F.S. at 60 Hz; ±5% on 500V and 1500V ranges.

Input Impedance: 15 megs shunted by 41 pF at input jacks.

Frequency Response: 50 mV-150V ranges, ±0.5 dB, 20 Hz-500 kHz; ±3 dB, 5 Hz-750 kHz.

DC CURRENT

10 Ranges: 0-50, 150, 500 μA; 1.5, 5, 15, 50, 150, 500 mA; 1.5A.

Accuracy: ±3% F.S., except ±4% on 1.5A range.

Internal Voltage Drop: At input terminals, 50 mV on 50 mA range.

AC CURRENT

10 Ranges: 0-50, 150, 500 μA; 1.5, 5, 15, 50, 150, 500 mA; 1.5A.

Accuracy: ±4% F.S. at 60 Hz; ±5% on 50 μA and 1.5A ranges.

Frequency Response: ±0.5 dB, 20 Hz-5 kHz; ±3 dB, 7 Hz-16 kHz.

Internal Voltage Drop: At input terminals, 50 mV to 50 mA range.

RESISTANCE

8 Low-Power Ranges (33 mV source): Rx0.1, Rx1, Rx10, Rx100, Rx1K, Rx10K, Rx100K, Rx1 meg.

Center Scale Reading: 1 ohm, Rx0.1; 10 ohms, Rx1 range.

Accuracy: ±3° of arc.

DECIBELS

10 Ranges: −40 to +66 dB.

Accuracy: ±3% F.S. (0 dB = 1 mW across 600 ohms).

GENERAL

Meter: 7″, with 6.63″ scale arc length; 100 μA movement, ±2%, 100°; mirrored scale.

Protection: Meter and FET input protected against overloads. Circuit overload protection by diodes and fuse; spark gaps for high voltage protection.

Power Required: 105-124 VAC, 50-60 Hz; also available for 240 VAC, 50/60 Hz. 3.9W; three-wire grounded cord.

Size (HxWxD): 18 x 20 x 9 cm (7.25 x 8 x 3.6″).

Net Weight: 1.96 kg (4.25 lbs.).

NEW COMPACT VOMs

MODEL 115: $37.50

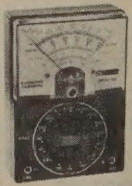
FEATURES

Unusual features include a 5 ohm mid-scale range for checking windings; and four DC current ranges to allow checks of thermocouples and oil burner controls. DC and AC voltage measurement extends to 1200 volts.

Test leads, and instructions are included; carrying case is optional. HV-12 high-voltage probe adapter is also optional and extends the 115 to 12k VDC.

SPECIFICATIONS

DC Volts: 0-60, 300, 1200 mV; 0-3, 12, 60, 300, 1200V. DC Current: 0-0.03, 0.06; 60, 600 mA. DC Accuracy: ±3% full scale. AC Volts: 0-6, 30, 60, 300, 600, 1200. ±4% full scale. Resistance: 0-500, 50k, 500k, 5MΩ. Meter: 30,000 Ω/VDC; 15,000 Ω/VAC. Battery: 1.5V "AA" battery; 15V W-10 battery. Size (HWD): 10.2 x 15 x 4.4 cm (6 x 4 x 1.75″). Weight: .45 kg (.5 lb.).



MODEL 110: $24.50

FEATURES

The 110's 10Ω mid-scale range allows accurate testing of coil and motor windings. Leakage resistances up to one megohm can also be measured.

Test leads and detailed instructions included; LC-10 case is optional.

SPECIFICATIONS

DC volts: 0-2.5, 10, 50, 250, 1000V. DC Current: 0.05, (250 mV), 25, 250 mA. DC Accuracy: ±3% full scale. AC Volts: 0-10, 50, 250, 500, 1000. AC Accuracy: ±4% full scale. Resistance: 0-1k, 100k, 1M. Meter: 20,000/VDC; 10,000/VAC. Battery: 1.5V "AA" battery. Size (HWD): (5 x 3.5 x 1.5″). Weight: .35 kg (.4 lb.).

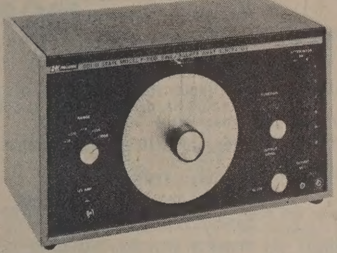
B+K PRECISION **DYNASCAN CORPORATION** / **SIGNAL GENERATORS**

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

SINE/SQUARE WAVE GENERATOR

MODEL E310B

$164.00



FEATURES

• Extended Frequency Range — Sine: 20 Hz to 2 MHz; Square: 20 Hz to 300 kHz • Constant-voltage output over each band and band-to-band • 56 dB step attenuation.

The industry standard for years! All solid-state circuitry uses FET's in oscillator, silicon transistors and zener-regulated power supply. Fully shielded — will not radiate to other equipment. Large, easy-to-read 5″ vernier dial scale for accurate repeatability. Handsome case and panel for professional appearance. Rugged enough to withstand continuous use in laboratories, schools and service shops.

SPECIFICATIONS

Sine Wave Frequency: 20 Hz to 2.0 MHz in five decade ranges.
Output: 8 VRMS into hi-Z loads; 0-7 VRMS into 600Ω; ±2 dB.
Distortion: 0.25% typical; 0.5% maximum (100 Hz to 2 MHz); 1% maximum below 100 Hz.
Square Wave Frequency Range: 20 Hz to 200 kHz in four decade ranges.
Rise Time: Less than 100 nsec at 20 kHz.
Symmetry: Balanced within 5% or less.
Frequency Calibration Accuracy: ±3%, 20 Hz to 2 MHz.
Attenuators (both sine and square wave): Six switches for a total of 56 dB; accuracy, ±5% when terminated in a 600Ω load. Continuously variable control adjusts output from maximum set by switches down to less than 0.25 mV.
Power Requirements: 100-130 VAC, 50-60 Hz; 15W. Also available for 117/234 VAC, 50-60 Hz.
Size (HxWxD): 18 x 32 x 20 cm (7.25 x 12.75 x 8″).
Net Weight: 4.3 kg (9.5 lbs.).

SOLID STATE RF SIGNAL GENERATOR

MODEL E200D

$250.00

FEATURES

• 100 kHz to 216 MHz in 5 bands • Completely shielded RF output w/modulation percent metering and variable monitored attenuation usable to less than 1 μV • Built-in 100 kHz and 1 MHz crystal calibration system • Easy-setting 2-color 5″ anti-backlash vernier dial.

Features 100% silicon transistor circuitry and zener-regulated power supply for accuracy, stability and long life. Double shielding eliminates spurious radiation even at outputs of 1 μV. Internal crystal calibrator has accuracy of better than 0.1%. Has 200 μA d'Arsonval meter for accurate monitoring and setting of RF carrier and modulation levels.

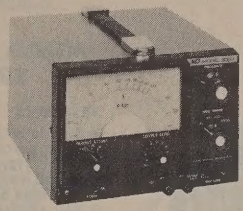
SPECIFICATIONS

Frequency Range: 100 kHz-54 MHz in 5 bands; 54/216 MHz on harmonics.
Accuracy: ±1.5% of highest frequency on any range used; better than 0.1% obtainable with crystal calibrator.
Output (calibrated into 50Ω load): 100,000 μV maximum.
Output Level Calibration Accuracy: ±1 dB to 54 MHz.
Attenuation: 6 individually shielded step attenuators with total attenuation capability of −96 dB. Outputs as low as 106 dB below 100,000 μV can be obtained with fine output level control and calibrated meter, which provides variable −10 dB to +2 dB output level indication (0 dB = 100,000 μV into 50Ω).
Modulation: 400 Hz, nominal. External sensitivity; 1 VRMS for 50% modulation.
Crystal Calibrator: 1 MHz ±.05% crystal oscillator. Built-in detector, amplifier and speaker provided for calibration.
Crystal Calibrator: 1 MHz ±.05% crystal oscillator. Built-in detector, amplifier and speaker provided for calibration.
Power Requirements: 110-130 VAC, 50-60 Hz; 6W. Also available for 234 VAC, 50-60 Hz. Three-wire grounded line cord.
Size (HxWxD): 18 x 32 x 20 cm (7.25 x 12.75 x 8″).
Net Weight: 4.5 kg (10 lbs.).

SINE/SQUARE WAVE GENERATOR

MODEL 3050

$144.00



FEATURES

• Sine/square waves, 20 Hz-200 kHz • Synchronizing input terminal • High stability, even with line voltage changes • 10 VRMS output, 0-40 dB attenuation • Each band position uses entire scale • Tests ultrasonic controls

This versatile audio frequency generator, based on the Wien bridge oscillator circuit, provides sine wave output voltage of 10 VRMS over its entire frequency range of 20 Hz to 200 kHz. WAVE FORM switch allows easy selection of either sine or square waves. An ideal signal source for phase and time measurements and for characteristic measurements using square waves, as well as a low-distortion signal source for audio frequency measurements.

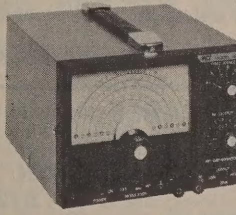
SPECIFICATIONS

Frequency Range (sine and square wave): 20 Hz-200 kHz in four decades.
Accuracy: ±(3% +2 Hz).
Sine Wave Output Voltage: 10 VRMS, ±10% at 1 kHz.
Output vs. Frequency Characteristics (referred to 1 kHz level): ±1 dB or better from 20 Hz to 200 kHz.
Distortion: 0.5% or less, 50 Hz-100 kHz; 1% or less, 20 Hz-200 kHz.
Square Wave Output Voltage: 10V p-p or more.
Tilt: 10% or less at 20 Hz.
Rise and Fall Times: 500 nsec or less.
Overshoot: 3% or less.
Symmetry: Within ±5% measured at 1 kHz with maximum output.
Output (sine and square wave): 0/20/40 dB step attenuator plus continuously variable OUTPUT vernier control that adjusts output from zero to maximum selected by step attenuator. Approx. 600Ω output impedance.
External Synchronization: Range, typically 1.5%V; 3 VRMS maximum input. Input impedance approximately 20,000Ω.
Stability with ±10% Line Voltage Variation: Less than ±0.5% frequency drift; less than ±0.5 dB output level variation.
Power Requirements: 117 VAC, 50-60 Hz; also available for 230 VAC; 30W.
Size (HxWxD): 15 x 19 x 24 cm (6 x 7.75 x 9.6″).
Net Weight: 2.8 kg (6.25 lbs.).
Accessories: Complete with one red and one black test lead, each terminated in insulated alligator clip and banana plug; spare fuse.

SOLID STATE RF SIGNAL GENERATOR

MODEL 2050

$120.00



FEATURES

• 100 kHz to 30 MHz in 6 bands, with 1.5% accuracy • 3 Outputs: RF, modulated RF (400 Hz) and externally modulated RF • Positive anti-backlash dial drive • Zener-regulated power supply • 100% solid state • FET's for stability.

Rugged, versatile, accurate RF signal generator is built to withstand the rigors of continuous industrial use, yet it's compact and lightweight — weighs only 5 lbs. Zener-regulated power supply is internally fuse-protected. Isolated RF output gives maximum protection against external voltage sources.

SPECIFICATIONS

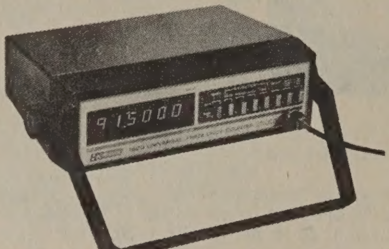
Frequency Ranges: 100 kHz to 30 MHz on 6 fundamental bands.
Accuracy: 1.5% of dial setting.
Output: 0.1 VRMS or better (20°C).
Attenuator: Combination HIGH-LOW switch, plus continuously variable RF OUTPUT control for approximately 20 dB change.
Modulation, Internal: 400 Hz; 40%, ±5%.
Modulation, External: 40 Hz to 10 kHz; modulating voltage input, 1.5 VRMS for 40% or better modulation.
Operating Temp. Range: 0-50°C.
Power Requirements: 117 VAC (also available for 230 VAC) 50-60 Hz; 2.8W. 3-wire grounded line cord.
Size: (HxWxD): 15 x 19 x 25 cm (6.1 x 7.5 x 9.75″).
Net Weight: 2.2 kg (5 lbs.).
Accessories: Supplied with shielded leads with insulated clip and banana plug; detailed instruction manual.

B+K PRECISION DYNASCAN CORPORATION

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

NEW 80 MHz COUNTER WITH PERIOD MODE

MODEL 1820
$260.00



FEATURES

• 5 Hz to 80 MHz reading guaranteed—100 MHz typical • Period measurements from 5 Hz to 1 MHz • Period average, auto and manual positions • One PPM resolution • Totalizes to 999999 plus overflow • Elapsed time measurements from .01 to 9999.99 seconds plus overflow • One-megohm input resistance • Bright .43″ high LED readouts.

For frequency measurements, the 1820 reads to a typical top frequency of 100 MHz and reads signals as low as 5 Hz. By the using the period mode, accurate resolution of a 5 Hz signal is to 1 Hz. The 1820 is fully autoranging, with automatic decimal point position and MHz/kHz readout.

In the accumulate mode, "event counts" are displayed by totalizing pulses counted, up to 999.999. The 1820 also counts from .01 to 9999.99 seconds (2.777 hours) plus overrange.

SPECIFICATIONS

FREQUENCY CHARACTERISTICS

Range: 5 Hz to 80 MHz.

Gate Time Auto: 10 ms (MHz reading) and 100 ms and 1 sec. (kHz reading).

Gate Time Manual: 1 sec. (kHz reading—1 Hz resolution).

Accuracy: ±t.b. accuracy ±1 count.

Resolution: ±0.0001% (i.e. 1 PPM of a 6 digit scale).

PERIOD CHARACTERISTICS

Range: 5 Hz to 1 MHz.

Period Average Auto: 1 period average (ms), 10 and 100 period average (μs).

Period Average Manual: 100 period average (μs reading with 1 ns resolution).

TOTALIZE CHARACTERISTICS

Range: 5 Hz to 80 MHz.

Capacity: 0 to 999999 plus overflow.

ELAPSED TIME

Range: .01 to 9999.99 sec. plus overrange.

INPUT CHARACTERISTICS

Impedance: 1 Megohm, 25 pF.

Sensiitvity: 30 mV RMS, 5 Hz to 40 MHz; 50 mV maximum at 80 MHz.

Max. Input: 200V (peak AC + DC) DC to 500 Hz, derate linearly to 30V (peak AC + DC) at 80 MHz.

Attenuator: X10 switch selectable.

INTERNAL TIME BASE (25°C)

Type: 10 MHz Crystal Oscillator.

Setability: ±1 PPM (±1 Hz).

Stability: Less than ±0.001% (i.e. ±10 PPM) from 0°C to 50°C ambient.

Display: 6 digits .43″ high with overflow, kHz/μs, MHz/ms indicator, and leading zero blanking.

GENERAL

Power: 105V to 130V and 212 to 258V, 50/60 Hz.

Size (HWD): 8.1 x 29 x 19 cm. (3.25 x 11.6 x 7.50″).

Weight: 2.55 kg (5 lbs.).

NEW 520 MHz FREQUENCY COUNTER

MODEL 1850
$450.00

FEATURES

• 5 Hz to 520 MHz reading guaranteed • Gate time from 10 ms to 10 seconds • Full period measurement capability • 50 mV input sensitivity at 520 MHz • Operates from 115 or 230 VAC, or 12 VDC • Well protected input circuitry • Temperature compensated crystal oscillator (TCXO).

For engineers and technicians requiring accurate frequency measurement extending into the UHF range, the new Model 1850 will seem "made to order." The prescaled range covers 10 to 520 MHz while the normal range is from 5 Hz to 60 MHz. Autoranging is featured on both. Gate times from 10 ms to 10 seconds are automatically selected in the prescale mode, and 10 ms to 1 second in normal. For manual gate time selection, 1 second operation in normal and 10 seconds in prescale are selectable.

A high-accuracy TCXO (temperature compensated crystal oscillator) time base is standard.

For accurate very low-frequency measurements, the 1850 has period measurement capability, covering 5 Hz to 1 MHz.

SPECIFICATIONS

FREQUENCY CHARACTERISTICS

Range: Normal—5 Hz to 60 MHz.

Prescale: 10 MHz to 520 MHz; Function switch selects kHz or AUTO display reading.

Gate Time Auto: Normal—10 ms, 100 ms and 1 sec.

Prescale: 10 ms and 100 ms, 10 sec.

Gate Time Manual: Normal—1 sec.

Prescale: 10 sec.

Accuracy: ±t.b. accuracy ±1 count.

Resolution: ±0.0001% (i.e. 1 PPM of a 6 digit scale).

PERIOD CHARACTERISTICS

(Normal input only)

Range: 5 Hz to 1 MHz.

Period Average Auto: 1 period average (ms), 10 and 100 period average (μs).

Period Average Manual: 100 period average (μs reading with 1 ns resolution).

INPUT CHARACTERISTICS

Impedance: Normal—1 Megohm, 25 pF.

Prescale: 50Ω with less than 2V RMS input.

SENSITIVITY

Normal: 30 mV. 5 Hz to 40 MHz; 50 mV maximum at 60 MHz (5 Hz to 1 MHz in period)

Prescale: 50 mV RMS, 10 MHz to 520 MHz with 50Ω.

MAX. INPUT

Normal: 200V (peak AC + DC) DC to 500 Hz, derating linearly to 30V (peak AC + DC) at 60 MHz.

Prescale: 5V RMS, 10 MHz to 520 MHz.*

INTERNAL TIME BASE (25°C)

Type: TCXO (Temperature Compensated Crystal Oscillator) 10 MHz.

Stability: ±1 PPM max. 0°C to 50°C ambient.

Output: 10 MHz TTL level (rear panel BNC jack).

Display: 6 digits .43″ high with overfiow kHz/μs, MHz/ms indicator and leading zero blanking.

GENERAL

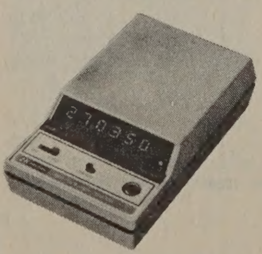
Power: 105 to 130V, and 212 to 258V, 50/60 Hz, 11 to 16 VDC Automotive battery with accessory power cable (provided with unit).

Size (HWD): 8.1 x 29 x 19 cm (3.25 x 11.6 x 7.50″).

Weight: 2.55 kg (5 lbs.).

NEW 30 MHz PORTABLE FREQUENCY COUNTER

MODEL 1827
$120.00



FEATURES

• 30 MHz reading guaranteed, 50 MHz typical—COVERS ALL 40 CB CHANNELS • Full 6-digit display with range switch allows 8-digit accuracy • 1 Hz resolution —even at 30 MHz and beyond • Completely portable for use anywhere • Exclusive battery saver features auto-shutoff of display to reduce battery drain • Operates on AA size batteries, AC with optional charger/adapter or 12 VDC with optional power cord/adapter • Complete range of optional accessories for unequaled versatility • Easy to use.

The B&K-PRECISION Model 1827 is a significant breakthrough in instrument technology. For the first time ever, a portable frequency counter is available that combines true versatility with a very low price. Not much larger than a pocket calculator, the 1827 offers such features as full six-digit display and guaranteed operation to 30 MHz with 1 Hz resolution.

Full autoranging provides direct frequency readout of the six most significant digits, or switch to the "1 second" position for 1 Hz resolution. Decimal point position and MHz/kHz indication are both automatic.

Battery saver feature electronically shuts off power to the LED display after 15 seconds of operation. DISPLAY button instantly restores the display for another 15 seconds. When on external power, DC or AC, the display remains on continuously. The 1827 can be powered from either an external 6.7 to 9.7 volts, 12 volts DC (for mobile operation) or 115 VAC with appropriate accessories.

SPECIFICATIONS

FREQUENCY CHARACTERISTICS

Range: 100 Hz to 30 Hz (guaranteed); 50 MHz typical. Function switch selects kHz or AUTO display reading.

Gate Time: (Auto) 10 ms, 100 ms or 1 sec. (kHz reading). (Manual) 1 sec (kHz reading, 1 Hz resolution).

Accuracy: ±1 count.

Resolution: 1 PPM of a 6 digit scale.

INPUT CHARACTERISTICS

Impedance: 10kΩ min.

Sensitivity: 100 mV RMS: 200 kHz—30 MHz 200 mV RMS; 100 Hz—200 kHz.

Max. Input: 200V (peak AC + DC) to 500 Hz; derate linearly to 25V (peak AC + DC) at 30 MHz.

TIME BASE (25°C)

Type: 4.0 MHz Crystal Oscillator.

Setability: ±0.25 PPM (±1 Hz).

Temp. Stability: Better than ±0.001% (i.e. ±10 PPM) from 0-50°C ambient.

Display: Six .3″ high LED digits with over-flow, LED kHz and MHz indicators and anti-glare window.

GENERAL

Power: 6 to 9V ("AA battery operation) or 6.7 to 9.7 VDC at external power jack.

Battery Life: Eight hours min. for normal usage pattern.

Battery Charging Time: 14-16 hours. Batteries are not required when operated on external power.

Size (HWD): 4 x 9.5 x 17 cm (1.75 x 3.75 x 6.6″).

Weight: Less than 0.45 kg (1 lb.) with batteries.

ACCESSORIES

Model SA-12: Automotive power cord. Plugs in to the cigarette lighter. BP-27 Battery Pack. CC-52 Cable. Allows operation on externål 6.7 to 9.7 volts DC.

Model BP-27: Rechargeable Battery Pack.

Model BC-27: Charger/AC Adapter.

Model SA-10: SA-10 R-F Signal Tap. Rated at 100 watts.

Model LC-18: Carrying Case.

Model MB-27: Mounting Bracket.

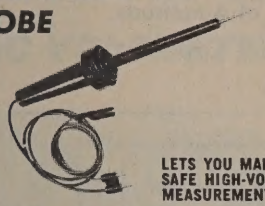
Model SA-27: Pick-Up Antenna.

B+K PRECISION DYNASCAN CORPORATION / PROBES AND CABLES

Dept. EM, 6460 West Cortland Avenue, Chicago, Illinois 60635 • (312) 889-9087

HIGH-VOLTAGE MULTIPLIER PROBE

MODEL PR-28
$24.00



LETS YOU MAKE SAFE HIGH-VOLTAGE MEASUREMENTS

FEATURES

• Extends voltmeter range to rated 40,000 VDC • Accurate to ±2% • Safe one-hand testing • Use with any high-impedance voltmeter (10 megohm input or greater)

Th PR-28 lets you read voltages beyond the range of your present voltmeter. In the safest one-hand-in-the-pocket manner, the shape of the handle and the long probe tip allow you to keep a safe distance from voltages to 40 kVDC.

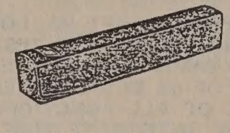
The PR-28 can be used to measure high-voltage power supplies in industry as well as in TV repair applications. When used with a good meter, the PR-28 is useful in other applications, including maintenance and repair of electrostatic precipitators, monitor oscilloscopes, x-ray machines and numerous computer-related equipment applications using high-voltage cathode-ray tubes.

The PR-28 can be used with B&K-PRECISION Models 277, 280, 281, 282, 283, 290, 2800 and 2810 or with any other constant-impedance voltmeter to extend its range to 40k VDC.

SPECIFICATIONS

Voltage Range: Usable to 40 kVDC and 20 kVAC (60 Hz); multiplies instrument range by 1000 (e.g., 40V becomes 40,000V); may be used with any instrument having a constant impedance of 10 megohms or greater.
Impedance: 600 ohms nominal.
Accuracy: ±2%, plus instrument accuracy.
Calibration: Internal; factory calibrated at 25 kV.
Frequency Range: DC-80 Hz; 20 kVAC max. at 60 Hz.
Size: (HxDia.xCord) 35.56 x 5.72 x 76.2 cm (14 x 2.25 x 30″).
Weight: 199g. (7 oz.).

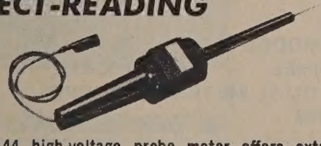
MODEL LC-32 CARRYING CASE
$12.00



Use this optional vinyl case to carry your PR-28 or HV-40 safely to any job.

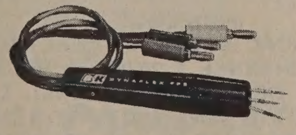
HIGH-VOLTAGE 40kVDC PROBES DIRECT-READING

MODEL HV-44
$35.00



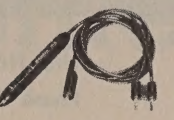
The HV-44 high-voltage probe meter offers extreme reliability and user safety. Voltage measurements up to 40,000 volts are performed accurately and quickly. The HV-44 is factory calibrated at 25 kV and should never need recalibration. Accuracy at 25 kV is ±2% and ±3% at full scale. The core magnet type meter is unaffected by common outside magnet fields and is highly shock resistant. The probe body is molded of high-impact ABS plastic for maximum insulation and lightest weight. The HV-44 will hold-up under the most active field service conditions, preventing down time and possible lost business. Supplied with two interchangeable tips: one conventional round needle type and one specially designed flat spring type for easy access to CRT anode. Model LC-32 vinyl carrying case is optional.

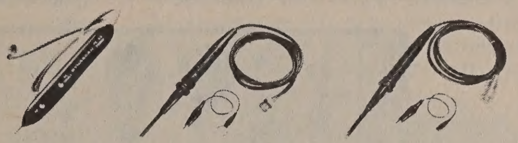
FP-5 "DYNA-FLEX" PROBE



Model FP-5 "Dynaflex Probe: $15.00. Positive contact is assured by spring-loaded needle-sharp tips. Spacing of 3 tips, adjustable with one hand, from 1/32″ to 5/8″. Each tip is colored-coded for fast easy identification. Can be used to make temporary component substitutions on PC boards. For use with Model 501A Curve Tester, Model 520, Model 520B, Model 530 or Model 162 Transistor Tester, or with any VTVM, or VOM having banana jacks.

OSCILLOSCOPE PROBES





Model PR-23 RF Detector/Demodulator Probe: $15.00. The B&K Model PR-23 is an all purpose detector/demodulator probe usable with any electronic voltmeter (both analog and digital) or oscilloscope Models 1403, 1431, 1440, 1460, 1465, 1470, and 1472. Typical Freq. Res. ±2 dB 15 kHz to 125 MHz, within 6 dB at 250 MHz. With UHF connector; banana plug adapter required for use with meters, 1403 and 1403A.

Model PR-30 Combination 10:1/Direct Probe: $25.00. Input Impedance: Low-capacity, 10:1, 10 megohms/12 pF; direct, 1 megohm/120 pF. With spring-loaded clip-tip and UHF connector. For B&K-PRECISION Models 1431, 1440, 1460, 1465, and 1470.

Model PR-31 Combination 10:1/Direct Probe: $25.00. Input Impedance: Low-capacity, 10:1, 10 megohms/12 pF; direct 1 megohm/120 pF. With spring-loaded clip-on probe tip and BNC connector. Required for B&K-PRECISION Models 1461, 1471, 1471B, and 1472C.

Model PR-34 10:1/Direct Low-Capacitance Probe: $30.00. Designed to prevent ringing when used with extended bandwidth oscilloscopes such as the B&K-PRECISION Model 1472. Input Impedance: 10:1, 10 megohms/18 pF; 1:1, 1 megohm, 120 pF. Max Input Voltage: 500 Vp-p. With spring-loaded clip-on tip and UHF connector.

Model PR-35 10:1/Direct Low-Capacitance Probe: $30.00. Designed for use with 15 MHz bandwidth oscilloscopes. Input Impedance: 10:1, 10 megohms/18 pF; 1:1, 1 megohm, 120 pF. Max. Input Voltage: 500 Vp-p. With spring-loaded clip-on tip and BNC connector. Can be used with B&K-PRECISION Models 1471, 1471B, and 1472C.

Model PR-36 10:1/Direct Low-Capacitance Probe: $35.00. Designed for oscilloscopes with bandwidth extending beyond 30 MHz. Required for B&K-PRECISION Model 1474. Input Impedance: 10:1, 10 megohms/18 pF; 1:1, 1 megohm, 120 pF. Input Voltage: 500 Vp-p. With spring-loaded clip-on tip and BNC connector. Can also be used with B&K-PRECISION Models 1471, 1471B, and 1472C.

Model PR-37 Deluxe 10:1 direct probe: $40.00. Designed for oscilloscopes and frequency counters to 100 MHz. Includes spring-loaded retractable tip cover, insulating tip, BNC tip, IC tip and compensation capacitor adjustment tool. Has BNC connector.

METER PROBES AND CABLES

Model AV-1A RF Probe: $13.50. Extends frequency range to 250 MHz. For use with Model 177 VTVM.

Model AV-2A High-Voltage Probe: $19.50. Extends DC voltage range to 50,000 VDC. For use with Model 177 VTVM. (See page 7 for other high voltage probes.)

Model PR-21 Isolation/Direct Probe: $10.00. For Models 277, 280, 281, 282, 283, 290, and 1403. Prevents capacitive loading and RF interference when measuring DC in RF circuits. Has switchable 100K ohm isolating resistor. Terminated in molded double banana plug.

Model PR-25 10:1 and 1:1 Compensated Counter Probe: $15.00. Reduce possibility of double counts when measuring square waves or digital steps, with Model 1801. Direct impedance 1 meg, shunted by 110 pF; 10:1 impedance 10 meg, shunted by 10 pF. Frequency Response: 20 Hz to 60 MHz. BNC connector.

Model PR-43 DC/AC/Ohms Probe: $9.00. Exact replacement for test probe supplied with B&K-PRECISION Model 177 VTVM's.

Model PR-151 Demodulator Probe: $13.50. Use for viewing RF and IF modulation waveforms on B&K-PRECISION scopes, and exact replacement for probe furnished with Model 415 Alignment Generator.

Model TP-41 Terminated RF Cable: $12.00. Exact replacement for cable furnished with B&K-PRECISION Model 415 Alignment Generator. With selectable terminations of 75 or 300 ohms.

INSTRUMENT CONNECTING CABLES

Model CC-41: $7.50. 36″ RG/58U with a BNC connector on each end.
Model CC-42: $6.50. 36″ RG/58U with BNC connector and UHF connector (PL-259).
Model CC-43: $6.50. 36″ RG/58U with BNC connector and banana plugs.
Model CC-44: $6.50. 36″ RG/58U with BNC connector and coaxial microphone connector.
Model CC-45: $8.00. 36″ RG/58U with BNC connector and Type N connector.
Model CC-46: $6.00. 36″ RG/58U with UHF connector (PL-259) on each end.
Model CC-47: $3.00. 36″ zip cord with spade lugs and cigarette lighter plug.
Model CC-48: $5.00. 36″ audio coax with 1/4″ phone plug and dual banana plug.
Model CC-49: $4.00. 36″ audio coax with phono plug to dual banana plugs.
Model CC-50: $4.00. 36″ audio coax with 3.5 mm mini-phone plug to dual banana plug.
Model CC-51: $6.00. 36″ audio coax with RCA phono plug to alligator clips.

DIGITAL CURRENT METER

DESCRIPTION

The Bell model 1776 digital current meter provides a revolution in metrology via its ability to accurately measure ac, dc, (and ac on dc) current with **non-contact clamp-on probes.** No longer is it necessary to break the circuit to make a current measurement. This time saving feature is extremely helpful in the troubleshooting, repair and design fields. Now it's possible to obtain current measurements more easily and safely than voltage measurement with complete isolation from the bus.

The Bell model 1776 digital current meter introduces virtually no resistance on dc readings and extremely small impedance on ac readings. In this way, measurements can be made with a minimum of disturbance in the measured circuit.

The unique circuit design coupled with the digital readout provides a wide dynamic range of measurements with excellent resolution. A peak reading capability is standard. This function permits you to read and hold the reading of the peak current appearing on the measured conductor. The 1776 is designed for portable operation with internal rechargeable batteries and for 115/230 Vac, 50-60Hz line operation.

PROBES

There are three **clamp-on probes** available for the Bell 1776 digital current meter. Each probe is designed for a distinct full scale range. These ranges are 1000 amperes, 100 amperes, and 10 amperes. The probes are self calibrating and are interchangeable on any 1776 digital current meter. The probes have a 100% overrange capability with reduced accuracy.

Unique probe configurations are available on a special order basis.

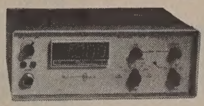
SPECIFICATIONS

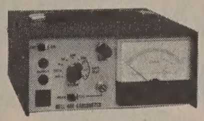
Current Ranges (with applicable probe)	1000 amperes, F.S. 100 amperes, F.S. 10 amperes, F.S.
Accuracy D.C. A.C. (Sinusoidal) Peak Detection (D.C. accuracy)	 ±1.0%, F.S. ±1.0%, F.S. ±2.0%, F.S.
Frequency Response	D.C. to 5 kHz
Power Requirements	115/230 Vac, 50/60Hz and internal rechargeable Nicad batteries, with built-in trickle charge circuitry

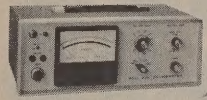
ORDERING INFORMATION

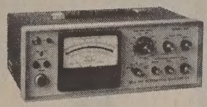
Contact F. W. Bell, Inc. for application assistance. Product assistance and technical literature are available. If standard models are not available, F. W. Bell, Inc. can design for your special electrical and physical requirements.

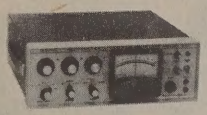
HALL EFFECT GAUSSMETERS











DESCRIPTION

Bell Gaussmeters are high quality instruments designed to accurately measure magnetic flux density. Twenty-eight models and one-hundred ten standard field probes meet the demanding requirements of most application.

Bell Gaussmeters provide four magnetic field measurement modes. They provide direct measurement of absolute magnetic field density, differential measurement of the difference in magnetic field density at two probe locations, incremental field measurements using an expanded scale, and summation measurements.

There are **110 standard probe models** for each gaussmeter model. Each probe is a precision solid-state magnetic field sensor built into a rugged package for accurate, repeatable, stable, field measurements. Models are available for transverse, axial, differential, two-axis, and three-axis measurements with a variety of field ranges, field sensitivities, and physical configurations for each.

SPECIFICATIONS

Gaussmeter model	ranges FS	accuracy	DC output voltage FS
811 digital	10 to 100,000 G	± 0.1% to 100 kg	1 Volt
810 field monitor	10 to 100,000 G	± 0.1% to 100 kg	1 Volt
660 digital	1 to 100,000 G	± 0.1% to 10 kg ± 0.3% to 30 kg	1 Volt
640 incremental	0.1 to 30,000 G	± 0.25% FS	1 Volt 5 Volts
620 precalibrated	0.1 to 30,000 G	± 0.25% FS	1 Volt
615 digital	10 to 100,000 G	± 0.5%	100 mV BCD
610 self-calibrated	1 to 100,000 G	± 0.5%	100 mV
600 general purpose	100 to 30,000 G	± 4% to 30 kg	1 Volt

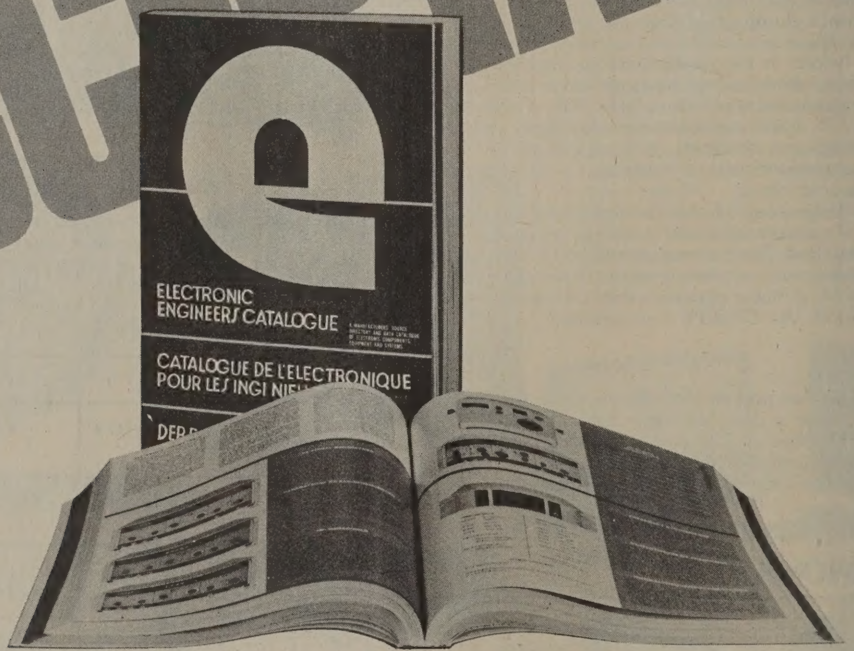
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



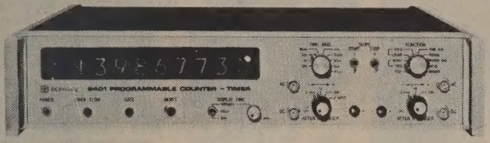
The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/ source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. 645 Stewart Avenue, Garden City, New York 11530 / 516 222-2500

FREQUENCY COUNTERS — SEMICONDUCTOR TESTERS PRINTERS — LINE NOISE GENERATORS



PROGRAMMABLE COUNTER-TIMER Model 6401

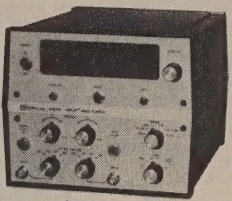
Actually two counters in one, the Model 6401 allows frequency ratio and time interval measurements between 2 signal sources. It features field-replaceable ICs, trigger point monitor lamps and burst frequence measurements. A choice of 3 standard oscillators is offered, with the "O" oscillator standard, and the "L" and "N" oscillators optional. Priced from **$1,975.00.**

INDUSTRIAL COUNTERS AND CONTROLLERS Models 6220A, 6235B and 6240B

Model 6220A is a dual preset controller which is ideal for programming external functions at two separate predetermined count lines. Model 6235B is a direct-count laboratory 5MHz IC counter for industrial use. Auxiliary input-output connector provides external control for remote synchronization. Model 6240B is a direct-count 10MHz 2-channel laboratory IC counter-timer. Measures frequency (0 to 10MHz) period and time interval plus ratio and stability.

$1,205

$1,205



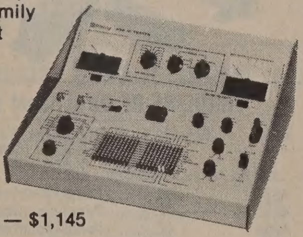
$1,205

DIGITAL / LINEAR IC TESTERS MODELS 998, 999 and 999-D

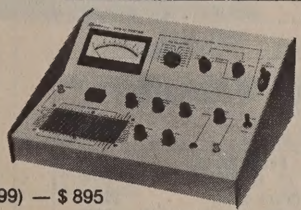
Model 998 is a precision linear IC tester which checks all important DC parameters including offset voltage and range, input and bias current, open loop gain, power dissipation and other voltage and current measurements.

Model 999 is a digital IC tester which checks RTL, RCTL, DTL, modified DTL, TTL, LPDTL, CML and ECLIC's for all important DC parameters. It accepts most types of digital IC packages.

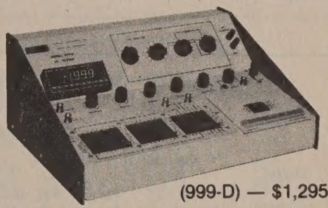
Model 999-D is a 24-pin digital IC tester which also tests CMOS. Featuring a digital readout and a 24-pin selector, it checks the entire IC family plus input threshold levels, output currents, truth tables, noise immunity and much more!



(998) — $1,145



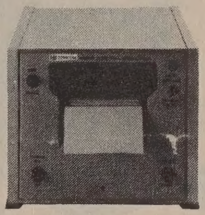
(999) — $ 895



(999-D) — $1,295

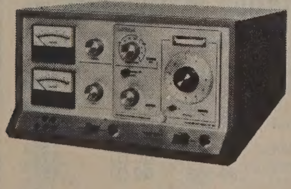
DIGITAL PRINTER MODEL 1454

21-column digital printer accepts data in BCD or ten live decimal codes. It features flexible input format, BCD column expansion capability, portability and decimal point, column suppression, and red/black print control. Input levels can be specified at IC levels or transistor levels. Replacement IC is socket-connected and instantly changeable. Priced from **$1,380.00.**



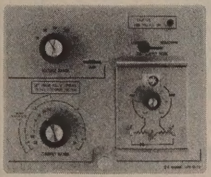
LINE NOISE GENERATOR — Models 3020 and 3021

These instruments offer a controlled method of generating line noise. Inexpensive, they serve a dual purpose: generating a controlled line transient similar to rectifier or SCR noise on the AC line, as well as measuring line noise up to one kilowatt peak. They also generate noise pulses to simulate power line interference up to 10 kilowatt peak power. Noise amplitude and phase position are continuously adjustable from 0 to 600 volts. Pulse rise time is 0.5 microsecond or better. A sweep mode is provided for scanning the noise pulse over the full 360° of line cycle. Model 3020 is priced at $1,195. Model 3021, which has a special variable pulse rate control, is priced at $1,295.



SEMICONDUCTOR TEST SET Model 70

Plug-in test modules provide the low-cost Model 70 with the scope and capabilities of a much more expensive test system. The basic unit contains power supplies and metering circuitry for settingup bias conditions. Interchangeable modules slide into and connect with the chassis. $1,073.00.



TEST MODULE 10-CD

Employs two plug-ins to test module — one for leakage measurement and breakdown voltage to 1000V, and the other for extreme low-leakage measurement. $1,073.

TEST MODULE 10-RF-1

Gives direct read-out of hfe from 3 MHz to 30 MHz. Accuracy is + 10% maximum error. $1,045.00.

BIRD

Quality Instruments For RF Power Measurement

50 ohms nominal

Insertion instruments for measuring and monitoring incident and reflected power in coaxial transmission lines with ±5% of full scale accuracy. Insertion VSWR is less than 1.05. Net power under any load condition is the difference between incident and reflected power readings, which also yield load VSWR from a nomograph. 4311 and 4314 THRULINE Peak and CW Wattmeters also measure power of pulsed RF systems such as air navigational aids, telemetry, radar, etc. from 0.4 microsecond pulse width (±8% accuracy).

4371 Digital Multirange Broadband Wattmeter, self-contained elements. (Analog Version: Model 4370)

Direct reading instruments for absorbing and measuring RF power. The load section of the TERMALINE Wattmeter serves as a dummy load. The indicating meter is calibrated to read RF power directly in watts with ±5% of full scale accuracy (to 500MHz).

COAXIAL RF FILTERS

Custom engineered or field-proven designs. High rejection attenuation filters available with Low-pass cut-off from 16 to 2700MHz (about fifty designs of 400MHz). Hi-pass cut-off frequencies from 30 to 1000MHz, Band-pass as narrow as 5% of center frequency. Sizes from ¼ cubic inches, with subminiature connectors, to 3⅛" line.

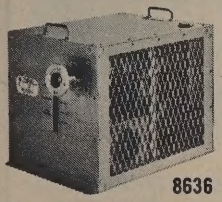
TERMALINE RF Coaxial Load Resistors for accurate, non-radiating termination of 50-ohm RF coaxial transmission lines are designed for use in permanent installations, development testing and trouble shooting of transmitters, intermediate components, power tubes, and accessories.



8636

No external water supply is needed for the new 10kW Self-Cooling MODULOAD® RF Load Resistor Module. In a scant three cubic feet of space, the integral heat-exchanger permits continuous 10kW dissipation in 5° to 45° ambients (−20°C to +20°C with anti-freeze).

QC-TYPE CONNECTORS (Quick Change): Adaptable to particular TERMALINE, THRULINE, and TENULINE units, these connectors may be quickly changed in the field. Connector types available are: Female or male BNC, TNC, N, C, SC, HN, LC, UHF, LT, 7/8″, and 1⅝″ EIA Flanged.

Normally supplied: (1) Female N, (2) Female LC, (3) Male N.

OTHER BIRD INSTRUMENTS: THRULINE® RF DIRECTIONAL POWER SENSORS • SENTRILINE® FILTER-COUPLERS • COAXIAL RF FILTERS • NEW: VSWR/WATTMETERS.

Prices are subject to changes without notice. F.O.B. Cleveland, Ohio.

Standard Units: Stock to 12 weeks delivery

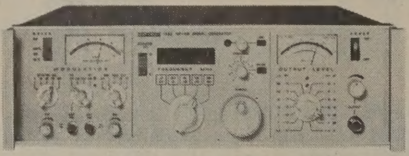
FM/AM Signal Generators—450 kHz to 520 MHz
Model 102C and Model 102D

The Model 102C and Model 102D Signal Generators provide an optimum balance of design features and performance characteristics at a reasonable price. They have a broad range of usefulness for measurements in the mobile radio, entertainment, avionics, telemetry, aerospace, components, communications, and educational fields. Both models exhibit the low noise, high stability, and excellent shielding characteristics particularly necessary for narrow band receiver measurements.

Synthesizer stability is provided by the Model 102D. Here the output frequency may be phase locked to either a stable internal temperature compensated crystal oscillator or an external standard reference frequency. A unique feature allows display of the true locked output frequency with full 100 Hz resolution even when the vernier is used to tune between lock points.

Except for the absence of phase-lock, the Model 102C is identical to the Model 102D.



SPECIFICATIONS

FREQUENCY

Ranges: 0.45-32.5, 32.5-65, 65-130, 130-260, 260-520 MHz
Accuracy: 102D, ±(100 Hz + 1 ppm); 102C, ±(100 Hz + 5 ppm)
Stability: 102D locked, bands 2-5, < 0.05 ppm/hr. after 4 hr.
band 1, < 100 Hz/hr.
102C, 102D unlocked, bands 2-5, < 4 ppm/10 min. after 4 hr.
band 1, < 1.5 kHz/10 min.
Residual FM: bands 2-5, < 0.2 ppm peak (20 Hz-15 kHz BW)
band 1, < 15 Hz peak
Display: six digit LED, resolution 100 Hz, 1 kHz, and 10 kHz

RF OUTPUT

Power Level: −130 to 13 dBm (0.07 µV−1 V into 50 Ω)
Attenuator: 13 steps, 10 dB/step, plus variable 13 dB
Accuracy: ±2 dB max.
Leveling: ±0.5 dB
SSB Noise Floor: 135 dB/Hz typical
Spurious Output: > 30 dB down (> 25 dB below 5 MHz)
Impedance: 50 Ω; VSWR < 1.5:1

FREQUENCY MODULATION

Deviation: 0 to 300 kHz in 5 ranges
Accuracy: ±10% fs, 20 Hz-200 kHz
Bandwidth: 102D locked, 50 Hz-200 kHz
102C, 102D unlocked, dc-200 kHz
Distortion: At 100 kHz deviation; band 5, 0.15%; band 4, 0.25%; band 3, 0.5%; bands 1 and 2, 1.0%

AMPLITUDE MODULATION

Percent: 0-100
Calibrated Ranges: 30%, 100%
Bandwidth: dc−20 kHz
Distortion (1 kHz rate): < 1% THD at 30%, < 2% at 70%, < 3% at 90%

INTERNAL MODULATION

Frequencies: 400 Hz, 1, 3, 10, 19 kHz
Accuracy: ±3%
Distortion: < 0.25% THD

MAJOR OPTIONS:

Ext. clock input, special modulation frequencies, NAV/COM version, fused rf output, accessory frequency doubler

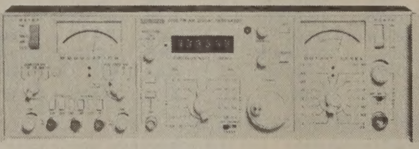
FM/AM Signal Generators - 125 kHz to 175 MHz
Model 103A and Model 103B

The Model 103A and Model 103B Signal Generators cover important applications in the design, production, and maintenance of receivers and systems in the entertainment and communication fields. Identical except for the addition of phase-lock in the 103B, these generators have a carrier frequency range from 125 kHz to 175 MHz displayed on a 6-digit LED readout with selectable resolution down to 1 Hz, below 16 MHz, and 10 Hz above 16 MHz.

This display is also available to count external signals from 5 Hz to 175 MHz with the same resolution and 100 mV sensitivity. A ± 1 ppm time base TXCO is standard.

Five sweep modes are supplied as standard with center frequencies of 262 kHz and 455 kHz and sweep widths of ±30 kHz, 1.2 MHz ±100 kHz, 10.7 MHz ±1 MHz, and 98 MHz ±10 MHz. Other sweep ranges may be substituted on special order. The sweep center frequency as well as the frequency of a variable marker can be read on the digital frequency display.

RF outputs in either the sweep or generator mode are leveled, monitored, and adjustable from −130 dBm to +13 dBm (+23 dBm in a high level position) by a 13-step 10 dB attenuator plus a variable 13 dB panel control.



SPECIFICATIONS

FREQUENCY

Range: 0.125 to 175 MHz in 11 bands
Accuracy: Resolution ± 1 ppm
Stability: 10 ppm/10 min. after 2 hr., unlocked (103A or 103B)
0.05 ppm/hr. after 4 hr., phase-locked (103B only)
Residual FM: < 0.2 ppm peak (20 Hz-15 kHz BW)

RF OUTPUT

Power Level: −130 dBm to +23 dBm (0.07 µV-3V into 50 Ω)
Attenuator: 13 steps, 10 dB/step, plus variable 13 dB, plus 10 dB high level
Accuracy: ±2 dB max.
Leveling: ±0.5 dB max.
SSB noise Floor: 135 dB/Hz
Spurious Output: > 30 dB down
Impedance: 50 Ω; VSWR < 1.3

FREQUENCY MODULATION

Deviation: 0-300 kHz, 32-175 MHz; 0-100 kHz, 8-32 MHz
Accuracy: ±7% fs
Bandwidth: dc-200 kHz (50 Hz-200 kHz, phase-locked, 103B only)
Distortion: 0.15% at 75 kHz, 64-138 MHz
Stereo Separation: > 43 dB, 50 Hz-15 kHz rates, 64-138 MHz

AMPLITUDE MODULATION

Percent: 0-100; 30% and 100% fs
Accuracy: ±(2% + 3% of reading) to 80% AM at 1 kHz
Bandwidth: dc −20 kHz above 1 MHz
Distortion: < 1% THD at 30%, 1 kHz rate

INTERNAL MODULATION

Frequencies: 400 Hz, 1, 3, 10, 19 kHz, plus 35 Hz ramp
Distortion: < 0.2% THD

FREQUENCY SWEEP

Standard Ranges: 262 kHz ±30 kHz, 455 kHz ±30 kHz, 1.2 MHz ±100 kHz, 10.7 MHz ±1 MHz, 98 MHz ±10 MHz
Output: Same power level, attenuation, accuracy, and leveling as rf output
Display: Center frequency and adjustable marker displayed on 6-digit LED readout

EXTERNAL COUNTER

Frequency Range: 5 Hz-175 MHz
Sensitivity: > 100 mV
Resolution: 1 Hz to 16 MHz; 10 Hz to 175 MHz
Reference Accuracy: < ±1 ppm, 15-35°C

MAJOR OPTIONS

Special modulation frequencies, special sweep ranges, fused rf output, FM down to 4 MHz.

BOONTON

BOONTON ELECTRONICS CORP. ■ PARSIPPANY, N.J. 07054 U.S.A. ■ (201) 887-5110 TWX: 710-986-8241

RF Millivoltmeters
Model 92 Series

Available in four versions, these rf millivoltmeters offer the best choice for sensitive, wide-band, accurate rf voltage measurements.

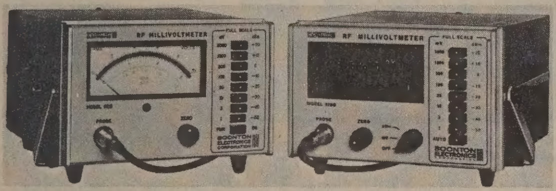
a) Model 92B, a programmable analog version, has a large mirrored-scale meter with linear 0-3 and 0-10 voltage ranges, a dBm scale (1 mW into 50Ω) and dc output.

b) Model 92BB is identical to Model 92B but with the addition of internal rechargable batteries.

c) Model 92BD, a programmable LED digital version, has 4 digit display, serial BCD data outputs, dc output, optional dBm display (0.01 dB resolution) and autoranging.

d) Model 92C, a low-cost analog version, saves by eliminating programming and dc output, by making the most sensitive range 3 mV fs, and by working to a more modest accuracy specification.

All models are supplied with rf probe, 50 Ω BNC adapter and probe tip. Many optional accessories extend their capability for other measurements.



SPECIFICATIONS

Analog Model 92B

Voltage Range: 200 μV to 3 V (300 V up to 700 MHz with divider). Useful indications down to 100 μV.
Frequency Range: 10 kHz to 1.2 GHz.
Basic Accuracy: ±(1% rdg + 1% fs).
Indicator: 4½" taut-band meter; scales 0-3, 0-10 and dBm.
Remote Control: All functions and ranges commanded by TTL inputs.
DC Output: 10 V fs.
Options: Many scale variations, other dB references, rear input.

Analog Battery Model 92BB

Specifications same as 92B. Sealed lead-acid rechargable 6 hour battery.

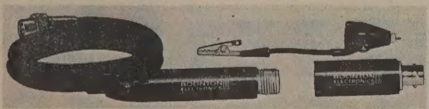
Digital Model 92BD

Voltage Range: 200 μV to 3 V (300 V up to 700 MHz with divider).
Frequency Range: 10 kHz to 1.2 GHz.
Basic Accuracy: ±(1% rdg + 1% fs).
Display: 4 digit LED, reads 1000 fs for "10" ranges and 3000 fs for "3" ranges. Small analog meter to right of display is scaled in dBm.
Data Outputs: BCD (serial) digits, binary coded range information. Overrange, underrange, encode complete.
Remote Control: All functions and ranges commanded with TTL inputs.
DC Output: 10 V fs.
Options: Autoranging, digital dBm readout (0.01 dB resolution), other dB references, rear input, BCD serial/parallel converter

Model 92C

Voltage Range: 500 μV to 3 V (300 V up to 700 MHz with divider).
Frequency Range: 10 kHz to 1.2 GHz.
Basic Accuracy: ±(1% rdg + 2% fs).
Indicator: 4½" taut-band meter; scales, 0-3, 0-10 and dBm.

FURNISHED ACCESSORIES



RF Probe with low noise cable and connector	91-12F
50 Ω BNC Adapter; 1 kHz to 600 MHz	91-8B*
Removable Probe Tip with grounding clip lead	91-13B

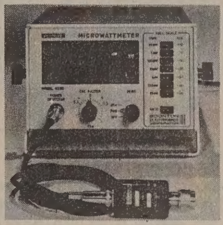
RF Microwattmeters
Model 42 Series

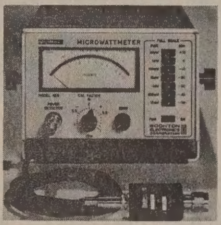
STANDARD VERSIONS

Virtually drift-free, these sensitive power meters cover a dynamic range of 70 dBm from 1 nW to 10 mW (−60 to +10 dBm.) Overload tolerance is 0.3 W cw. Three 50 Ω power detectors offer a choice of frequency range. All start at a low 200 kHz covering up to as high as 18 GHz. A 75 Ω detector is available for CATV applications. The analog models (line or battery) are scaled in power and dBm. The digital model gives 3½ digit resolution for power and 4 digit resolution (0.01 dB) for the optional dBm display.

HIGHER POWER VERSIONS

Specifically designed to use higher power detectors, these power meters cover a power range of 10 dB higher than the standard models and provide low VSWR. The dynamic range of 70 dB covers power measurements from 10 nW to 100 mW (−50 to +20 dBm.) Overload tolerance is greater than 2 W cw. All features and options of the standard models apply.





SPECIFICATIONS (Standard Versions)

Order with one of the following detectors:

41-4A: 50 Ω, 200 kHz-7 GHz
41-4B: 50 Ω, 200 kHz-12.4 GHz
41-4C: 75 Ω, 200 kHz-1 GHz
41-4E: 50 Ω, 200 kHz-18 GHz

Digital Model 42BD

Power Range: 10 nW fs to 10 mW fs.
Frequency Range: 200 kHz to 18 GHz.
Accuracy: Overall, instrument and detector. ±(0.2 dB + 1 digit) to ±(0.8 dB + 1 digit) depending on power range and frequency.
Stability: <1 nanowatt/hour at 25°C
Temperature Effect: 0.007 dB/ °C typ.
Indicator: 3½ digit LED display for power, 4 digit for dBm option.
Data Outputs: BCD (serial) digits, binary coded range, overrange, underrange, encode complete, TTL.
Remote Control: Input range, encode hold and trigger, manual disable, dBm and autorange commanded by TTL inputs.
DC Output: 10 V fs proportional to power.
Major Options: Autoranging, dBm display, BCD serial/parallel converter.

Analog Model 42B

Power Range: 10 nW fs to 10 mW fs.
Frequency Range: 200 kHz to 18 GHz.
Accuracy: Overall instrument and detector. ±(0.2 dB + 0.5% fs) to ±(0.8 dB + 1.0% fs) depending on power range and frequency.
Stability: <1 nanowatt/hour at 25°C
Temperature Effect: 0.007 dB/°C typ.
Indicator: 4½ inch taut band meter calibrated power and dBm.
Remote Control: Input range and manual disable commanded by TTL inputs.
DC Output: 10 V fs proportional to power.
Major Options: Meter scale and dc output linear with dBm. Rear input.

Analog Battery Model 42BB

Specifications same as 42B. Sealed lead-acid rechargeable 6 hour battery.

SPECIFICATIONS (Higher Power Versions)

Order with one of the following detectors:

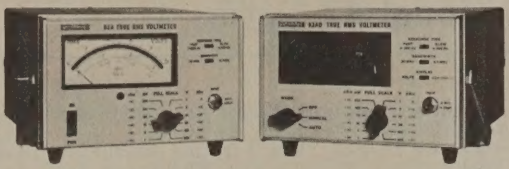
41-5B: 50 Ω, 200 kHz-12.4 GHz
41-5E: 50 Ω, 200 kHz-18 GHz

Models: 42C Analog, 42CB Analog – Battery, 42CD Digital.
Power Range: 100 nW fs to 100 mW fs.
VSWR: <1.07 at 200 kHz, <1.28 at 18 GHz.
Stability: drift <10 nW/hour at 25°C.

ALL OTHER SPECIFICATIONS ARE THE SAME AS THE STANDARD VERSIONS.

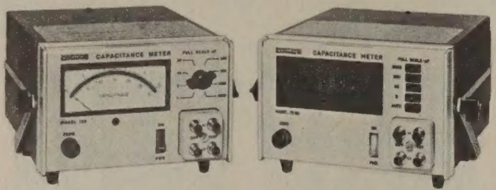
BOONTON

BOONTON ELECTRONICS CORP. ■ PARSIPPANY, N.J. 07054 U.S.A. ■ (201) 887-5110 TWX: 710-986-8241



RMS Voltmeters—93 Series

True rms responding programmable voltmeters with full-scale ranges from 1 mV to 300 V and a frequency range from 10 Hz to 20 MHz. Available in either analog (93A) or digital (93AD) versions. Model 93AD can be ordered with autoranging and dB display with 0.01 dB resolution.



1 MHz Capacitance Meters—72 Series

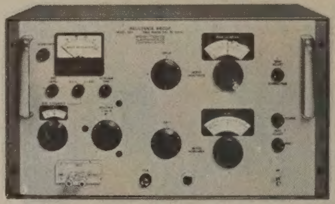
Models 72B and 72BD provide accurate three-terminal capacitance measurements at 1 MHz with 15 mV test level. Analog version has full-scale ranges from 1 to 3000 pF, digital from 2 to 2000 pF with BCD outputs. Fast responding dc output, bias input, and remote ranging are standard on either instrument.

1 MHz Inductance Meters—62 Series

The Model 62 Inductance Meters provide fast, accurate, two-terminal, series inductance measurements at 1 MHz with low test currents. Both the analog 62A with full-scale ranges from 1 to 3000 μH, and the digital 62AD with ranges from 2 to 2000 μH have a linear, high-speed dc analog output.

Capacitance Bridges

Capacitance bridges covering measurements from 0 to 1000 pF are available as the 5 kHz to 500 kHz Model 75C, and the 1 MHz Model 75D. All have conductance ranges from 0 to 1000 μS and adjustable test signals as low as 1 mV.



Inductance Bridges

Three unique Model 63 Inductance Bridges provide direct-reading measurements of series inductance and series resistance. Model 63H covers 0.2 nH to 110 mH at 5-500 kHz, 63M from 2 nH to 1.1 H at 1-100 kHz, and 63L from 20 nH to 11 H at 0.4 to 40 kHz.

Admittance Bridge

Model 33 RF Admittance Bridges measure two-terminal parallel capacitance to 150 pF and conductance to 25 mS at 1, 5, 10, 20, 50, and 100 MHz. Good resolution of conductance makes loss measurements possible on many high-Q diodes, varactors, and capacitors. Internal and external dc bias is standard.

Automatic 1 MHz Capacitance Bridge
Model 76A

The Model 76A combines established precision bridge techniques with an automatic balancing system and internal computing facilities. It makes fully automatic, triggered or free running, 1 MHz parallel capacitance and conductance measurements with test levels of from 5 to 200 mV rms. Independent range selection or autoranging for both capacitance and loss is made using the convenient front-panel push-button controls. Annunciators show the range or mode in use.

The bridge will compute and display on command the equivalent series capacitance, series resistance, dissipation (tan δ), or Q of the test. In addition, any capacitance measurement can be displayed as a deviation in capacitance or a percentage deviation versus a previously entered and stored value.

The push button controls have a secondary function when the "entry" mode is selected. In this mode they may be used to program numbers which appear in the right hand display. These numbers may be entered into storage as a reference capacitance value for deviation measurements or entered to set a dc bias voltage on the optional internal supply.

A unique "corrected zero" feature of the 76A supplements the front panel coarse and fine C & G zero controls. In this mode the zero offsets of every combination of C & G range are automatically measured and stored for correction of subsequent readings.

Measurements may be made at the front panel test inputs or at the end of shielded test leads. When "remote test point" is selected a stored program is used to calculate and correct for each measurement made through the 30 inch test cables supplied.

Versatile remote control input and data output options are available, including the IEEE 488-1975 interface bus.

SPECIFICATIONS

Capacitance: 0-2000 pF in 4 ranges;
0-1.9999 pF, 0-19.999 pF, 0-199.99 pF, 0-1999.9 pF

Basic Capacitance Accuracy: ±(0.1% rdg + 1 digit).

Conductance: 0-2000 μS in 4 ranges;
0-1.999 μS, 0-19.99 μS, 0-199.9 μS, 0-1999 μS

Basic Conductance Accuracy: ±(2% rdg + 1 digit).

Test Frequency: 1 MHz.

Test Level: 5-200 mV, adjustable.

Test Time: <100 ms, C >2 pF and G >2 μS.
<500 ms, C <2 pF or G <2 μS.

Display: Dual digital readout, decimal points, units, modes, active ranges.

Display Modes: C_p, C_s, ΔC, $\Delta\%$, G, R_p, R_s, D (tan δ), Q.

Autoranging: Standard.

Trigger Modes: Continuous (1 per sec), manual, external.

DC Bias: External input, ±200 V, 30 mA fused.

Supplied Accessories: Universal test fixture with 30" input cables.

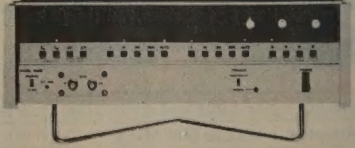
OPTIONS

Data Outputs/Remote Control Inputs: Three mutually exclusive interface options are available.

1. Parallel BCD outputs, TTL, isolated.
2. BCD Serial by bit, TTL, isolated.
3. IEEE 488-1975 Interface Bus.

Internal DC Bias Supply: Programmable from panel push buttons or remote input.

Range: 0-200 V unipolar, 5 mA max.
Resolution: 5 mV up to 20 V, 50 mV above 20 V.



BOONTON

CABLEMASTER®

A VERSATILE LINE OF COMPACT INSTRUMENTS FOR AUTOMATIC TESTING OF ELECTRICAL CABLE ASSEMBLIES, CONNECTORS AND HARNESSES

Cablemaster 400-C

A field proven 400 circuit tester for in-plant use.

The Cablemaster Model 400-C is a 400 point tester which measures continuity, insulation resistance and dielectric strength quickly — accurately — economically. It is ideal for use in receiving inspection, production, quality control, laboratories, field maintenance, operational sites and in a wide range of applications where complete and reliable cable or connector testing is desired with one compact unit. The Model 400-C is designed to provide maximum convenience and versatility. It is equipped with a mobile carrier to permit easy movement to any location. The unit can be removed from the carrier if desired. The 400-C sequences thru the 400 points at a rate of up to 120 steps per minute checking each point for the parameter under test.

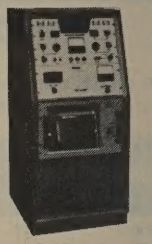
Cablemaster 400-S

For shipboard and aircraft cable checkout where terminations may be hundreds of feet apart.

The Model 400-S Cablemaster is a high speed, sequential wire analyzer designed primarily for shipboard and aircraft checkout. The unit incorporates all of the features of the Model 400-C with the added capability of convenient testing of long installed cables where the terminations may be hundreds of feet apart. The 400-S consists of a main console mounted on a mobile carrier and two extension units. Control cables (up to 250 feet long) connect the extension units to the main console. An additional feature allows automatic scanning of test points to locate crossed wires when an open is indicated. This feature permits a wire list to be generated with the aid of the optional printer.

Cablemaster 1200-C

Field expandable from 400 circuits to 1200 circuits.



The Model 1200-C Cablemaster (shown above with optional printer and low ohm analyzer) incorporates all of the features of the Model 400-C and functions identically except that it has the capability to test up to 1200 points. To accommodate the additional number of output modules it is mounted in a mobile console. When accessories such as a printer, low ohm analyzer, etc. are incorporated they are mounted within the same console. The 1200-C is modular in design and construction. This permits the unit to be obtained with fewer than the maximum 1200 test points but having the capability of being expanded to 1200 test points in the field by simply adding output modules obtained from the factory.

CHECK THESE OUTSTANDING FEATURES

EASE OF OPERATION

Simplified operating procedures permit the Cablemaster to be operated by non-technical personnel. Controls are conveniently located and are arranged to provide efficient operation. Test results are displayed on a digital readout to reduce errors. When a fault is located the test sequence automatically stops and an alarm is sounded to alert the operator. Testing can be continued at the operator's discretion.

PERMANENT TEST RECORD (Optional)

The Cablemaster is available with an optional printer to provide a complete and permanent record of each test. The type of test, circuit tested, and test results are recorded on a continuous paper tape. Failures are printed in red for easy identification. With the printer in operation the Cablemaster will not stop when a fault is located, but will record the fault and proceed with the test.

INSULATION RESISTANCE RANGE FROM 1 TO 5000 MEGOHMS

The Cablemaster automatically checks each conductor against all others to determine insulation resistance under any impressed voltage between 20 and 1000 vdc. Use of plug-in resistance standards and a front panel control allows rapid change from one acceptance level to another.

DIELECTRIC STRENGTH (HIPOT) RANGE FROM 0 TO 3000 VOLTS AC OR DC

The Cablemaster automatically checks each conductor against all others for shorts and leakage. Any test voltage up to 3000 vac or vdc can be selected by the operator. The voltage range is continuously variable and is monitored on the precision meter provided on the front panel. Hipot dwell time can be set for any period up to three minutes.

CONTINUITY RESISTANCE RANGE FROM 0.5 to 59 OHMS — 0.5 to 3 AMPERES

Termination-to-termination continuity on a maximum of 600 simple or complex circuits is quickly accomplished in one test setup. Resistance test level is selected with convenient digital switches.

SIMPLIFIED TESTING CAPABILITY FOR MULTIPLE CONDUCTORS

A unique programming circuit permits testing of multiple and simple circuits mixed in any sequence. No special programming is required and setup time is greatly reduced.

CHECK THESE VERSATILE ACCESSORIES

804W LOW OHM ANALYZER

This feature permits close tolerance readings in low ohms for testing of resistance in connectors and jumper cables by providing a high speed, sequential low ohm measurement test capability to the Models 400-C and 1200-C Cablemaster. Precise resistance from .001 to 0.5 ohm can be measured. The unit supplies a constant current source to the part under test and records the actual voltage drop across the component from which resistance of the component is calculated. A permanent record of each test position is printed out on a printer supplied with this feature.

PRINTER

The Cablemaster is available with an optional printer to provide a complete and permanent record of each test. The printout includes the type of test, the circuit test number and test results including the millivolt drop for the low ohm test. Failures are printed in red for easy identification.

RISE TIME CONTROL

This feature permits application of high voltage with a rise time range of 500 volts per second to avoid spikes due to sudden application of high voltage. (A fall time control is also available).

COMPENSATION PANEL

An auxiliary panel can be added to all models of the Cablemaster to null out the capacitive leakage effects of the test specimen. An A.C. current meter on the panel precisely measures the leakage. A Range Select switch allows two scale settings for the A.C. current meter: 2 Ma or 20 Ma full scale. Two additional switches on the front panel enable the operator to dial in compensating capacitance. The range of the compensating capacitance is from .001 to .059 microfarad.

MEGOHMMETER PANEL

A Megohmmeter Panel can be added to Model 400-C and 1200-C Cablemasters to give discrete insulation resistance reading from 0.5 to 20K megohms with a panel meter. The meter also has an adjustment set point for low limit reject capabilities. The range of the output is in 5 steps, midscale 1, 10, 100, 1000, or 10,000 megohms.

AC MONITOR PANEL

Discreet reading of hipot current can be added to the Cablemaster by the addition of an AC Monitor Panel. The unit contains a current meter with a variable trip level set point for monitoring current thru the hipot circuit.

Model 235

WIDEBAND WATTMETER

20Hz – 20 kHz; 2W – 20kW. Full scale up to 31 A/630 V. down to 100 mA/ 20 V. Accuracy 1%, any connection. Power Factors 0-1. Easy to connect and to read. BCD output available. Various range combinations available: 6 to 600 V, 10 mA to 31 Amperes.
Price $2495.00

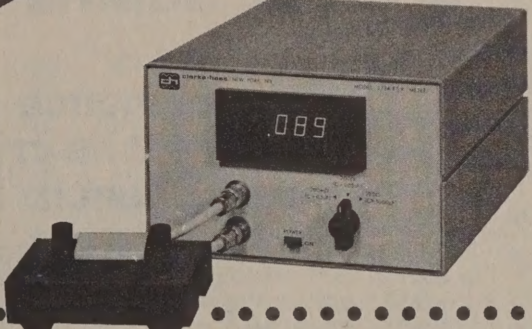
● ● ● ● ● ● ● ● ● ● ● ● ● ● ● ●

Model 273A

DIGITAL ESR METER

The industry standard for 100 kHz ESR measurements. The Model 273A measures Equivalent Series Resistance values from 0.1 milliohm to 20 ohms. Handles any type of capacitance with values from 5,000 pF up to 1 farad. In use by the world's leading capacitor users. The Model 273A allows production line monitoring in capacitor manufacture and 100% incoming inspection for capacitor users with critical loss requirements. BCD outputs standard. Price $820.00

Model 273A also measures internal impedance of *Batteries*, contact resistance of *Relays*, and the effective loss term in *Networks*.



● ● ● ● ● ● ● ● ● ● ● ● ● ● ● ●

function generators

All function generators with sine, square, and triangular waveshapes, Tone Burst, Phase Lock Synchronization, Wide Range low distortion VCF and/or FM. All extend down to 1 mHz with "Low Frequency Expand Switch". All generators have sine wave distortions below 46 dB and extremely flat sine wave amplitude vs frequency characteristics. Most units sweep to twice the upper dial frequency. All generators have 50 ohm output, 60 dB of output range.

Model 743

TONE BURST, PHASE LOCK SYNC.

Dial Controlled 1 Hz to 2 MHz. Low distortion FM or VCG. Price $385.00

Model 748

DIAL CONTROLLED 1 Hz to 2 MHz.

High quality, low distortion AM or suppressed carrier modulation or detection. Price $535.00

Model 744

TONE BURST, PHASE LOCK SYNC.

Dial Controlled 3 Hz to 3 MHz. Balanced 600 ohm output. Price $415.00

Model 750

DIAL CONTROLLED 1 Hz to 2 MHz.

Internal ramp generator with sweep times from 1 msec to 200 seconds.
Price $495.00

$1795
0.1Hz to 13MHz

the performance says . . . it's the utmost in synthesizers! the price says . . . use it everywhere — on the bench, in the lab, in your system.

COMSTRON MODEL 1013 FREQUENCY SYNTHESIZER

0.1Hz to 13MHz WITH FULL 5+ DIGIT ACCURACY AND PROGRAMMABILITY

Now you can have the precision and versatility of a synthesizer at the price of an ordinary oscillator.

Here's the synthesizer that gives you full 5+ digit crystal accuracy (no accuracy stealing verniers), clean signals, automatic leveling, and high output power.

The new 1013 is the only synthesizer using COMSTRON's Direct Programming Differential Synthesis Technique (Patent No. 3,895,311) that gives uncompromising precision and high speed programmability. It all adds up to a cost-performance breakthrough with unmatched reliability and data handling capability...your guarantee of performance with integrity.

SPECIFICATIONS

Range

Frequency Range:
0.1Hz to 13MHz in 5 ranges

Accuracy

Frequency Accuracy:
Full 5+ digits, ±0.001% of setting for 6 months, 0°C to 55°C

Frequency Stability:
Full 5+ digits, long term is ± 10 ppm of setting per year at ambient

Purity

Phase Noise:
Signal to phase noise (integrated), Greater than 40dB in a 30kHz band excluding ± 1Hz, centered on carrier 10MHz range, greater than 60dB, 1MHz range and below

Harmonic Distortion:
−40dB 1 MHz to 13MHz
−50dB 0.1Hz to 1MHz

Spurious:
Greater than 60dB below selected output level or less than −110dBm/50 ohm, whichever is greater

Amplitude:
Maximum 6Vrms open circuit
3Vrms (+23dBm) into 50 ohms

Output Impedance:
50 ohms

Amplitude Control:
Attenuator: +20 to −30dB in 10dB steps
Continuous control: +3 to −15dB
Meter indication in volts and dBm

Square Wave Output:
Positive going square wave TTL compatible

Options

Option 001: Programming—Parallel BCD
Option 002: Programmable Attenuator
Option 003: ASCII, Standard 488 Interface
Option 004: Ultra Stable Reference Oscillator
Option 005: External Reference
Option 006: 75 ohm Impedance

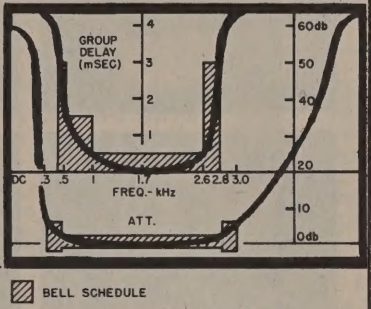
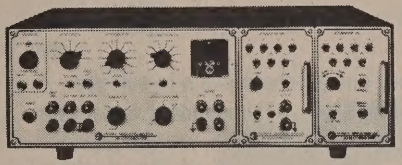
COMSTRON·SEG TELEPHONE CHANNEL TEST AND SIMULATION EQUIPMENT

STANDARD TELEPHONE DATA LINE SIMULATORS

- Simulates nominal worst case attenuation and delay per Bell, CCITT, and DCS Schedules.
- Simulates 3002, C1, C2, C4, and DCS-S1, S2, S3.
- Also available; C-Message Weighting, A Weighting, 3kHz Flat, and Tone Notches.



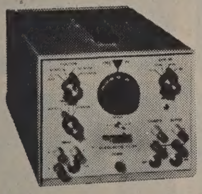
PHASE JITTER SIMULATOR



FA-1564 A

- Simulates normally encountered active telephone channel impairments such as phase jitter, phase hits, harmonic distortion, broadband and impulse noise and frequency translation
- Simulates phase jitter; 0 to 45° peak-to-peak; jitter frequencies, 20 to 300Hz
- Use for developing, testing and evaluating data-com equipment

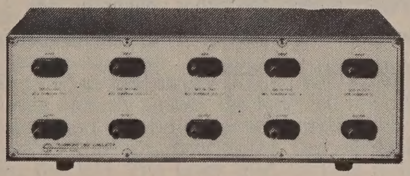
TUNABLE BAND PASS AND BAND REJECT FILTER



AF-850A

- Telephone channel filter tunable from 35Hz to 3500Hz
- Use for notched noise measurements and waveform analysis; 3.5Hz and 35Hz bandwidth
- Fully compatible with telephone channel transmission measuring techniques and equipment
- 0dB, 10dB, 20dB, 30dB gain and by-pass functions
- Generates reference signal at Fc of notch and bandpass

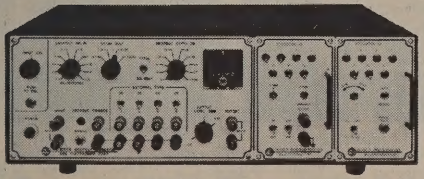
TELEPHONE DATA LINE SIMULATOR



Model LSCC-( )

- Contains up to 5 data line simulators
- Industry standard telephone line simulator
- Simulates nominal worst case attenuation and delay, per Bell, CCITT, and DCS schedules
- Simulates 3002, C1, C2, C4 and DCS-S3
- Controlled out-cf-band characteristics
- Also available: C-Message Weighting, F1A Weighting, Telephoto 1 and 2, etc.

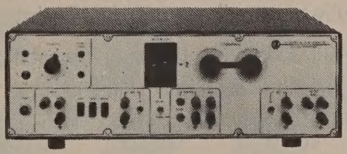
DROPOUT SIMULATOR



FA-1955 A

- Simulates data-channel dropout; adjustable duration from 1 ms to 10 seconds and depth from —3dB to greater than —50dB
- Simulates additive broadband and impulse noise, SFI tones and out-of-band signals
- Operates in band limited mode, with SEG Telephone Data Line Simulators, or in broadband metallic mode

DIGITAL DELAY (ECHO) GENERATOR



FA-1755

- Simulates data channel delay and/or echo
- Delay to 100 ms* in 1 ms steps
- Stores 99 ms* of transient input data and continuously regenerates it for analysis or utilization as additional channel impairment
- Bandwidth 200Hz to 3.4kHz delay-corrected to 50usec
- Echo adjustable to 49dB in 1dB steps

*Up to 2 seconds available

RENT-DON'T BUY!

Continental can deliver the right instrument at the right price — now!

We have rental, lease and purchase plans to suit your needs: **Standard Rental Plan** — The standard rental term is for one month. After the first month, rentals are pro-rated daily for partial months. **Rental/Purchase Plan** — Continental offers a rental plan with an option to purchase the equipment. A substantial portion of your rental payment is credited towards the purchase of the equipment. **40 Month Scope Lease Program** — This plan is available for Tektronix Model 465, 475 and other oscilloscopes. Reasonable quantities of Tektronix scopes are available for immediate delivery. Check our local office for a current price. **Special Annual Agreements** — These agreements are based on either volume or long term requirements and they provide for discounts that make renting even more attractive.

PLUS

LATEST EQUIPMENT. Your choice of hundreds of electronic instruments. All the latest models. From virtually every leading manufacturer.

IMMEDIATE PRE-PAID DELIVERY. Usually 24-48 hours, from any of our 10 regional centers located across the country. Pre-paid to 48 contiguous states.

RELIABLE EQUIPMENT. Continental's four complete calibration, repair, and maintenance laboratories assure you of receiving only fully tested, guaranteed instruments.

GUARANTEED PERFORMANCE. Should any Continental instrument ever fail, we'll immediately ship you a backup. And we'll pay the shipping charges.

CURTIS

ANALOG ELAPSED TIME INDICATORS

. . . Smallest size, lowest cost, AC or DC, any voltage

How they work — The patented Curtis Ampere Hour Meter is basically a mercury microcoulometer fabricated from precision bore, glass capillary tubing filled with two columns of mercury separated by a small electrolyte gap. Application of pure or pulsed DC signals to electrodes inserted in the mercury causes mercury at the anode to be electrochemically transferred across the gap to the cathode at a time rate proportional to the current. The gap moves along the tube length as a function of the current-time integral. A constant-current supply provides a precision timing device.

TYPICAL APPLICATIONS

Warranty — Low-cost meters for warranty of equipment based on both actual usage, and calendar period.

Reliability Engineering — Provides mean-time-to-failure or sub-system replacement time without costly, unreliable logging.

Test Equipment Utilization & Calibration — Provides calibration on actual hours of use with savings up to 50% compared to calendar-basis programs. Substantial savings in capital investments can be realized with accurate utilization data on test instruments, tools and equipment.

Curtis Instruments, Inc.
200 Kisco Avenue, Mount Kisco, N.Y. 10549
(914) 666-2971 • TWX 710-571-2163

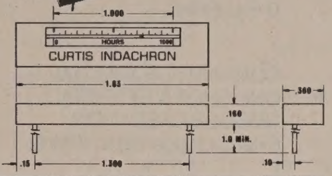
ANALOG COUNTERS

When operated by well defined pulses such as digital logic signals, any Curtis INDACHRON™ can be calibrated to provide direct indication of accumulated number of pulses with virtually any full scale reading. They can be used to count the number of lines, copies, characters, or other operating functions of computer peripherals, office or communication equipment.

L Series Curtis Indachron™

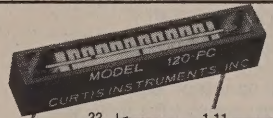
Used on OEM equipment as a very low-cost means of validating warranties and for P.M. scheduling. Under $2.00 each in production quantities. AC and DC Models. Various time scales and electrical ratings. Can be mounted on printed circuit cards or direct to chassis with adhesive strips.

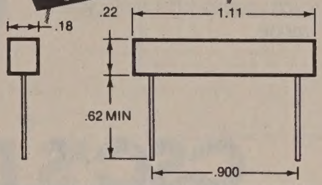
0
HOURS
2000
CURTIS INDACHRON



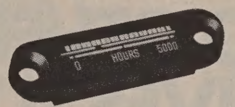
120-PC Series

Radial leads for installation directly on printed circuit cards for "mean-time-to-failure" or preventative maintenance scheduling. Can be instrumented from available DC voltages for any time scale by use of series resistor. Full scale of .65 inches = 4.16 milliamp-hours.





620 PC, 620N Series, MIL Type

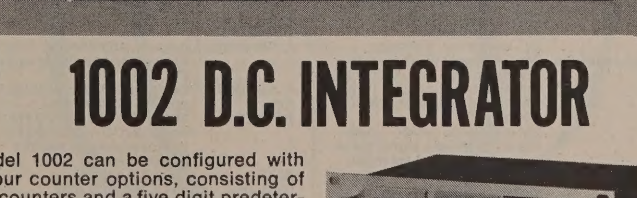


The Curtis MIL type analog timers are made in two configurations. The 620N Series meet MS90386, and are now available in 5V and 15V, as well as 28V DC and 115V AC models. The 5V and 15V units directly answer the long felt need for an elapsed time meter than can be powered **directly** from voltages available within the box, precluding the necessity of special wiring for the ETI. The units also provide dramatic economies over the older electromechanical types. The 28V DC version provides for internal regulation over the complete aircraft power range, and the 115V AC device is truly insensitive to variation in line frequency.

The 620 PC Series meets the MS-3311 (AS) and was specifically designed for repairable modules and subassemblies, is very low cost and installs directly on PC boards.

CP-3 Series

New low cost monitor for P/M scheduling and other applications requiring a simple means of reset to zero in the field. AC or DC. Scales for any type of scheduling.



Meter after a period of operation (800 hours).

1 Cover removed. Dot is at second guideline from right.

2 Scale "0" is set to second guideline from left.

3 Cover is reversed 180° and reinstalled. Meter is now at "0" for next period of operation.

1002 D.C. INTEGRATOR

The Curtis Model 1002 Integrator is a highly reliable, precision integration and control system for ampere hour applications in battery, solar energy and process control including the plating processes involving precious metals such as gold and silver. The 1002 maintains a guaranteed accuracy of ±1.0% over the full specified current or voltage range. Available in A.C. and D.C. powered models.

The Model 1002 can be configured with any of four counter options, consisting of six digit counters and a five digit predetermined counter. Single channel models are available in a half rack or full rack package and dual channel models are enclosed in a full rack package.

A related Integrator, the Model 1003, is available for bipolar D.C. integration.

SYNCHRONOUS OUTPUT GATING

100mV-10V POSITIVE OUTPUT Less than 30 nanosec rise/fall times

CSC'S DESIGN-MATE™ 4: $124.95. NO OTHER DIGITAL PULSE GENERATOR GIVES YOU SO MUCH, FOR SO LITTLE.

Sounds hard to believe . . . but even a brief look at Design-Mate 4's specifications proves CSC's engineers have done it again. Whatever your application—whether you're looking for precision, flexibility or just plain economy—this compact source of fast, clean digital pulses offers the performance you need . . . at a price that discourages procrastination.

Use it as a clock source, delayed pulse generator, synchronous clock, manual system stepper, pulse stretcher, clock burst generator or in dozens of other applications. Use it alone or in tandem with other DM-4's for gated control. The wide range of controls and multiple outputs give you enormous versatility . . . plus compatibility with all major logic families, for research, design, development, quality control, production testing, maintenance, troubleshooting . . . you name it.

Now, read the specs that follow . . . and check the price again. Or better yet, try DM-4 for yourself at your local CSC distributor. Once you do, we think you'll find it's as hard to do without as it is easy to own.

For more information about CSC's other fine products, and a list of distributors, please call or write.

DM-4 SPECIFICATIONS

Frequency Range:	0.5 Hz to 5 MHz
Pulse Width and Spacing Controls:	100 nanosec to 1 sec. in 7 overlapping decade ranges. A single-turn vernier control provides continuous adjustment between ranges.
Duty Cycle:	10^7-to 1 Range: adjustable over entire pulse width/spacing range, 100 nanosec "ON" 1 sec "OFF" to 1 sec "ON" and 100 nanosec "OFF".
Operating Modes:	
RUN	0.5 Hz to 5 MHz as per width/spacing and amplitude control settings.
TRIG	DC to approx. 10 MHz.
Input requirements:	Sine waves 2 VP-P; pulses 1 V peak, >40 nanosec wide; maximum input ±10 V. (Input Impedance: Approx. 10KΩDC coupled.)
GATE	Synchronous gating. Leading edge of gate signal turns generator "ON". Last pulse is completed, even if gate ends during pulse.
Input requirements:	Same as "TRIG" Mode.

ONE-SHOT	Pushbutton for single pulse. Output pulse occurs each time push-button is pressed.
OUTPUTS:	
VAR OUT	
Amplitude	0.1-10 V positive
Rise/fall time	Less than 30 nanosec
Impedance	400Ωmax.
TTL OUT	
Fan-out	40 TTL Loads
Sink	160 milliamps—0.8 V max.
Rise/fall time	Less than 20 nanosec
SYNC OUT	
Pulse width	Approx. 40 nanosec. Other sync pulse spec's same as TTL out.
Pulse lead time	Sync pulse leads outputs by approx. 20 nanosec.
POWER	117 VAC±10%, 50/60 Hz, 5 watts (220 VAC, 50/60 Hz also available, at slightly higher cost.)
SIZE (WxLxH)	7.5 x 6.5 x 3.25" 191 x 165 x 83 mm

THE LOGICAL CHOICE—First in a series

Logic Probe 1 is a compact, enormously versatile design, test and troubleshooting tool for all types of digital applications. By simply connecting the clip leads to the circuit's power supply, setting a switch to the proper logic family and touching the probe tip to the node under test, you get an instant picture of circuit conditions.

LP-1's unique circuitry—which combines the functions of level detector, pulse detector, pulse stretcher and memory—makes one-shot, low-rep-rate, narrow pulses—nearly impossible to see, even with a fast scope—easily detectable and visible. HI LED indicates logic "1", LO LED, logic "0", and all pulse transitions—positive *and* negative as narrow as 50 nanoseconds—are stretched to ⅓ second and displayed on the PULSE LED. By setting the PULSE/MEMORY switch to MEMORY, single-shot events as well as low-rep-rate events can be stored indefinitely.

While high-frequency (5-10MHz) signals cause the "pulse" LED to blink at a 3Hz rate, there is an additional indication with unsymmetrical pulses: with duty cycles of less than 30%, the LO LED will light, while duty cycles over 70% will light the HI LED.

In all modes, high input impedance (100K) virtually eliminates loading problems, and impedance is constant for all states. LP-1 also features over-voltage and reverse-polarity protection. Housed in a rugged, high-impact plastic case with strain-relieved power cables, it's built to provide reliable day-in, day-out service for years to come.

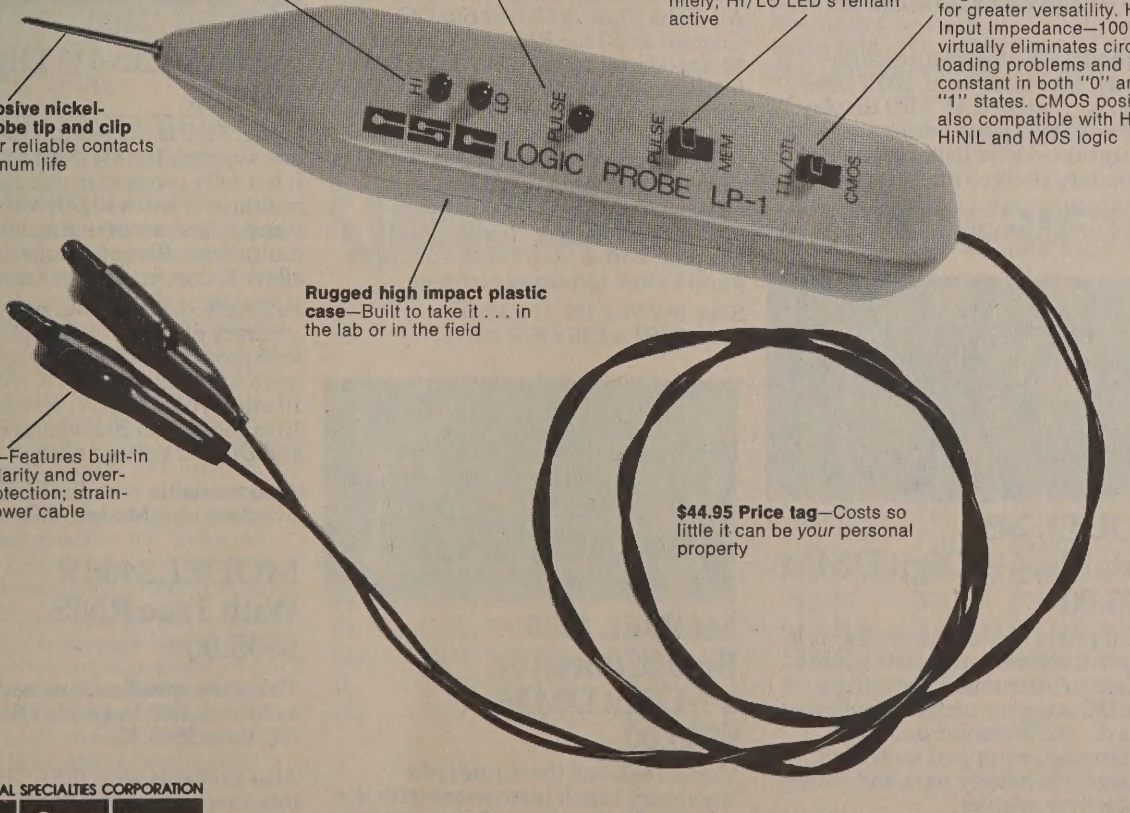
CSC'S MULTI-FAMILY LOGIC PROBE 1. AT $44.95, IT DIGS UP A LOT OF INFORMATION WITHOUT BURYING YOUR BUDGET.



HI
LO
PULSE
CSC LOGIC PROBE LP-1
PULSE
MEM
TTL/DTL
CMOS

PULSE LED—Lets you know what's going on—and off. Indicates positive *and* negative pulse and level transitions. LP-1 stretches pulses as narrow as 50 nanoseconds to full ⅓ sec. (3Hz pulse rate)

PULSE/MEMORY Switch—PULSE position detects and stretches pulses as narrow as 50 nanoseconds to ⅓ sec. Switch to MEMORY and it stores single shot and low-rep-rate events indefinitely; HI/LO LED's remain active

HI/LO LED's—Display level (HI-logic "1", LO-logic "0") of signal activity at node under test

Logic Family Switch—TTL/DTL or CMOS matches Logic "1" and "0" levels, for greater versatility. High Input Impedance—100K virtually eliminates circuit loading problems and is constant in both "0" and "1" states. CMOS position also compatible with HTL, HiNIL and MOS logic

Non-corrosive nickel-plated probe tip and clip leads—For reliable contacts and maximum life

Rugged high impact plastic case—Built to take it . . . in the lab or in the field

Protected—Features built-in reverse polarity and over-voltage protection; strain-relieved power cable

$44.95 Price tag—Costs so little it can be *your* personal property

Performance & Value.

MULTIMETERS

DATA PRECISION

MODEL 175
Portable, 3½ Digit DMM
$189.00

With a basic DC accuracy of ±0.1% input ±1 l.s.d., guaranteed for a full year, and 100μV resolution, the Model 175 is unsurpassed for accuracy and sensitivity. Battery and line operated and truly portable, it measures: DC Volts from ±100μV to ±1000V; AC Volts from 100μV to 500V (30Hz to 50kHz); DC Current from ±0.1μA to ±2A; AC Current from 0.1μA to 2A (30Hz to 50kHz); Resistance from 100mΩ to 20MΩ in two modes (HI excitation 2.5V and LO excitation 300mV).

The Model 175 also features auto-polarity, automatic zero, 100% overrange, big, bright 0.43" LED display and comes equipped with both rechargeable NiCd battery module and battery charger/line adaptor.

Size: 5½"W x 1¾"H x 3½"D
13.97 x 4.45 x 8.89 cm

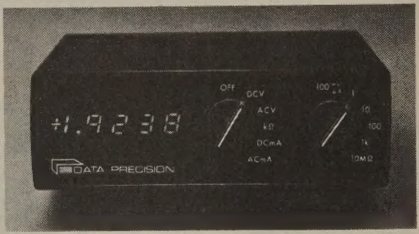
DATA PRECISION

MODEL 245
Portable, 4½ Digit DMM
$295.00

Ideal for field use, the Model 245 is a rugged, truly miniature, lab-quality, 5-function instrument featuring a basic DC accuracy of ±0.05% of input ±1 l.s.d., .005% resolution, 100% overranging, equipped with both rechargeable battery pack and battery charger/line adapter.

Model 245 measures ACV (100μV to 500V RMS), DCV ±100μV to 1000V, Resistance 100 milliohms to 20 Megohms, AC and DC current 1 microamp to 2 Amps. AC voltage/current response, 30Hz to 50kHz.

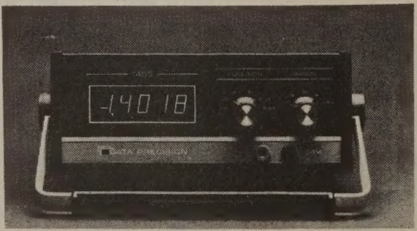
Size: 5½"W x 1¾"H x 3½"D
13.97 x 4.45 x 8.89 cm



MODEL 248
Portable, 4½ Digit DMM With True RMS Measurement
$345.00

This high-resolution instrument measures Resistance 100mΩ to 20MΩ, DC Volts ±10μV to ±1kV, True RMS AC Volts 10μV to 500V, both DC Current and True RMS AC Current 10 nanoAmps to 2A. The Model 248 features sensitivity of 10μV. Basic DC accuracy is ±0.05% of input ±1 l.s.d., guaranteed for a full year, 100% overrange, overload protection, large LED display, and comes complete with both rechargeable NiCd battery module and battery charger/line adaptor, with 6 hours of in-spec operation before requiring recharge.

Size: 5½"W x 1¾"H x 3½"D
13.97 x 4.45 x 8.89 cm



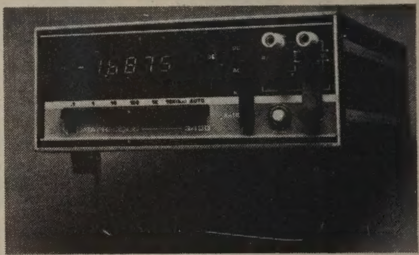
MODEL 1455
Bench/Portable 4½ Digit DMM
$355.00

Model 1455—all the virtues of a laboratory bench instrument with the added benefits of complete portability. A five-function multimeter featuring ½" high display, and 100% overranging, Model 1455 measures 100μV to 1000VDC, 100μV to 500 VAC; resistance 100 milliohms to 20 Megohms; AC and DC current, 1 microamp to 2 Amps. AC response, 30Hz to 50kHz.

Basic DC accuracy is ±0.02% of input ±1 l.s.d. for 6 months. Internal NiCd battery module and line cord recharger included.

MODEL 1450
4½ Digit DMM
$325.00

The same specifications and features as the Model 1455, line operation only.



MODEL 3400
System/Lab 4½ Digit
$795.00

Model 3400 is the world's most accurate systems/lab 4½ digit multimeter. It is a fully programmable system multimeter and a highly versatile stand-alone, autoranging laboratory multimeter. Remote triggering will allow 12 conversions per second.

Full 100% overranging, basic DCV accuracy of ±0.007% of input ±1 l.s.d. for 6 months, measures from ±10 microvolts to ±1,000 VDC, ACV from 10 microvolts to 750V, resistance from 10 milliohms to 20 Megohms, AC/DC and DC/DC voltage ratio.

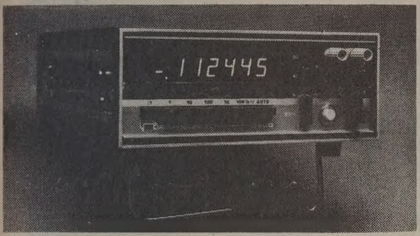
Also available with IEEE STD 488 interface unit Model 3410.

MODEL 3400 R
With True RMS
$895.00

The same specifications and features as Model 3400 but with TRUE RMS AC Volts $895.00.

Also available with IEEE STD 488 interface unit Model 3410.

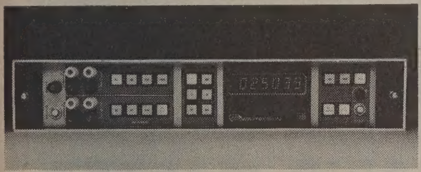
COUNTERS



MODEL 3500
5½ Digit Precision DMM
$995.00

The Model 3500 is a full function, autoranging DMM with 6 month basic accuracy of ±0.007% of input.±0.001% f.s. ±1l.s.d. Remote ranging and trigger, 20% overrange and ½ inch planor display.

- DCV ±1 μV to ±1000 volts. AC 1μV to 700 volts. 30Hz to 100 kHz.
- Resistance 1 milliohm to 12 Megohms.
- 1000 MΩ Input Impedance through 10 VDC. 2 and 4 wire Ratiohmic™ Resistance Method. DC/DC and AC/DC Ratio, BCD output and voltage ratio are included at no extra cost.



MODEL 7500
5½ Digit Programmable Systems Multimeter
$2995.00 Basic Price

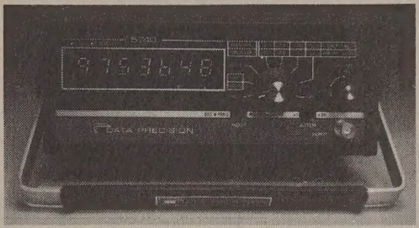
Model 7500 is a 5½ digit multi-speed instrument that will perform a full conversion *1000 times per second!* It's completely programmable in function, range, mode, timing, and conversion speeds. DCV accuracy is ±0.007% of input ±0.001% range ±1 l.s.d. for 6 months; sensitivity is rated at 1μV and 1mΩ; DCV and ACV measurement from 1μV to 1000V. A true universal ratiometer, Model 7500 enables the user to choose both the numerator and denominator independently, and every measurement—DC Volts, AC Volts, and Resistance—can be made on a ratio basis to any other if desired.

Model 7500 provides for full incorporation into any computer-based, high-speed, multi-channel automatic test or data acquisition system. In addition, a broad range of standard options, including built-in microprocessor-controlled IEEE 488 BUS or RS232/TTY Output.

MODEL 585
Portable, 250 MHz, 8 Digit Frequency Counter
$345.00

A completely portable—battery and line operated—8 digit frequency counter, it will measure frequency from 10Hz to 250MHz, always reading directly in MHz, with correctly positioned decimal point. Resolution 0.1Hz. It also has an excellent sinewave sensitivity (10m VRMS to 50MHz, 50m VRMS to 250MHz). Other features: dual Input Impedance (50Ω/1MΩ), an Attenuator, 3 gate times and bright 0.3" LED display for optimum reliability. Includes NiCD Module, Charger, and Carrying Case. Optional antenna and other accessories.

Size: 5½"W x 1¾"H x 3½"D
13.97 x 4.45 x 8.89 cm.



MODEL 5740
100MHz, 7 Digit Multifunction Counter
$295.00

The Model 5740 measures Frequency, Period, Period Average, Total Events and Elapsed Time.

The Model 5740 measures: Sinewaves, Square Waves, Pulses, Pulse Pairs, Complex Waves • Frequency: 5 Hz to 100 MHz; 10 ms/100 ms/1 sec./10 sec. gate times, resolution to 0.1 Hz
- Period: ½ microsecond to 0.2 sec.
- Period Average: 10, 100 and 1000 periods • Total Events: 0 to 9,999,999 (unlimited with "overflow" indicator)
- Elapsed Time: 0 to 99,999.99 sec. (27.8 hrs) • Sensitivity to 10mV.

For complete information on these and other Data Precision instruments or a demonstration, contact your local Data Precision representative or Data Precision Corporation, Audubon Road, Wakefield, MA. 01880 USA (617) 246-1600. TELEX (0650) 949341.

All instruments under $500. available from stock at local representatives.

THE MASTER CATALOG
THE ELECTRONIC DISTRIBUTORS
MASTER CATALOG
'78
FORMERLY: OFF-THE-SHELF CATALOG
THE ONLY NATIONAL CATALOG OF ELECTRONIC PARTS, INSTRUMENTS AND EQUIPMENT DESIGNED EXCLUSIVELY FOR DISTRIBUTORS AND THEIR CUSTOMERS.

YESTERDAY'S RADIO MASTER IS TODAY'S

ELECTRONIC DISTRIBUTORS MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

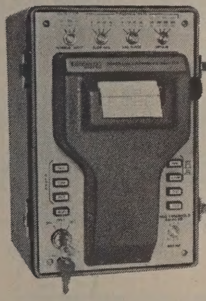
SERIES 606

POWER LINE DISTURBANCE ANALYZER/RECORDER



- For 115/230/460 V rms, 1 and 3 phase systems.
- Monitors, classifies, times and prints out line disturbances.
- Immediate and day-end printouts.
- Operates on command or disturbance — no wasted paper.
- For portable or permanent installation.
- 4 hour internal carry over power.

The 606 is designed specifically for monitoring power lines connected to computers, process control systems, hospital equipment and data communications devices, which are particularly susceptible to line transients, level changes or other disturbances. Using a digital microprocessor, the 606 classifies each disturbance into IMPULSE, CYCLE-TO-CYCLE CHANGE or SLOW RMS CHANGE. When preset thresholds are exceeded, the instrument prints out time, classification, magnitude, duration and channel designation. Data is also accumulated for overflow and day-end printout. The instrument is designed for unattended monitoring in a permanent installation or for temporary use at more than one site.

SPECIFICATIONS

Input Voltage Ranges: 115, 230, 460 V rms ±50%, all transformer isolated, Zin > 100 kΩ

Number of Inputs: Model 606-1, 1 input; Model 606-3, 3 inputs (3φ or separate circuits)

Test Modes:

AVG+ or AVG−: Increase or decrease in steady state rms, averaged over 10 sec

SURGE or SAG: Increase or decrease in cycle-to-cycle rms value

IMPULSE: 0-peak value of impulse (excluding line voltage waveform) having duration 0.5-800 μsec

ACCUMULATED COUNT: Summation of disturbance data in memory (includes time, HI AVERAGE, LO AVERAGE, HI SURGE and number of HITS, LO SAG and number of HITS, HI IMPULSE and number of HITS)

Printing Modes:

AVG+ or AVG−: Prints time, AVG+ or AVG−, rms VALUE, CHAN., when exceeding threshold of 3, 5, 10, 15 V rms*

SURGE or SAG: Prints time, SURGE or SAG, rms VALUE, CHAN. and duration (cycles) when exceeding threshold of 3, 5, 10, 15 V rms*

IMPULSE: Prints time, IMPULSE, 0-pk VALUE (excluding line voltage) and CHAN, when exceeding 0-pk threshold of 50, 100, 200, 400 V

SUPPLY DOWN or UP: Prints POWER OFF or POWER ON and TIME

STORED DISTURBANCES: Stores data on disturbances during printing. Prints out when printer clears

ACCUMULATED COUNT (Short Term): Overflow of data entering printer. Prints out automatically

DAILY ACCUMULATED COUNT: End-of-day print out. Prints number of day and ACCUMULATED COUNT

TEST: Prints time and ACCUMULATED COUNT

RESET: Prints time and ACCUMULATED COUNT, resets memory

PRINT OFF: Prints PRINT OFF and TIME, disables printer, all data goes into accumulator for delayed summary printout

Accuracy:

AVG+ or AVG−: At 60 Hz (sine wave signal), ±1% of reading ±1% of nominal input

SURGE or SAG: At 60 Hz (sine wave signal), ±1% of reading ±1% of nominal input

IMPULSE: ±5% of reading ±1% of maximum impulse calibrated with a positive going, 10 μsec, half sinewave impulse. 6 dB bandwidth with half sinewave impulses: 800 μsec to 0.5 μsec

Clock: Indicates real time in hours, minutes, seconds, crystal controlled. During power off, operates on internal batteries (4 hours). Clock resets from front panel buttons

Printer: 18 character, alpha-numeric, thermal, paper 2¼″ wide, prints 1 line/sec

Supply Power: 90 to 140 V rms, 45-450 Hz, 1φ, 1.0 A maximum (also DC operation 120-170 V maximum).

Case: Portable, removable cover with carrying handle.

Size (with cover): 11″ H x 7″ W x 9½″ D; shipping 11″ x 14″ x 18″.

Weight: 16 lbs. (7 kg.); shipping 24 lbs. (11 kg.).

Options: Opt. 101 (606-3 only), freq. disturbances; Opt. 102, 115/230 V supply power (switch selectable), 45-65 Hz; Opt. 103 (606-3, Opt. 101 only), monitors 400 Hz power lines; Opt. 104, external event indication; MR15 Rack Mount Series, 19″ rack plate and dust cover.

Model K103 Test Kit: Includes disturbance generator designed to verify operation of Series 606. Also includes a card puller, an extender card, and a set of programmed memories for assisting in calibration and troubleshooting.

Model 910 Uninterruptible Power Supply: For complete operation of 606 during power shutdown up to 2 hours. Fully protected from impulses to 1600 Volts, sags and surges of 50%, and total power interruptions.

Input (under normal conditions): 115/230 V rms nominal (switch selectable), 45-65 Hz, 1φ, 1.0 A maximum.

Output: 120 to 170 Volts, DC, 1.0 A.

Recharging Time: 18 hours.

Size: Portable carrying case same size as 606.

Weight: 35 pounds (16 kg.).

*These values for 115 V input; multiply by x2 or x4 for 230 V rms or 460 V rms.

SERIES 616

DC-AC VOLTAGE DISTURBANCE ANALYZER

- Isolated inputs for simultaneously monitoring AC and DC voltages.
- High sensitivity for detecting disturbances in DC voltage
- Perfect for pinpointing the effects of AC input line disturbances on the DC outputs of power supplies in computers, digital communications equipment, and medical instrumentation.

The Series 616 is a highly portable easy-to-connect analyzer for recording voltage disturbances on three channels: one AC channel (40-350 VRMS, 45-65 Hz) and two DC channels (4-50 VDC, independent of polarity). As in the Series 606 (described above), IMPULSES, SAGS and SURGES, and SLOW AVERAGE variations are conveniently recorded, when they occur, in an easy-to-interpret alphanumeric printout. The Series 616, with considerably higher disturbance sensitivity on the DC channels, than the 606, is specially adapted for a wide range of DC monitoring applications. Two models, the Model 616A and the Model 616B, are available for voltage ranges of 4 to 25 VDC or 8 to 50 VDC.

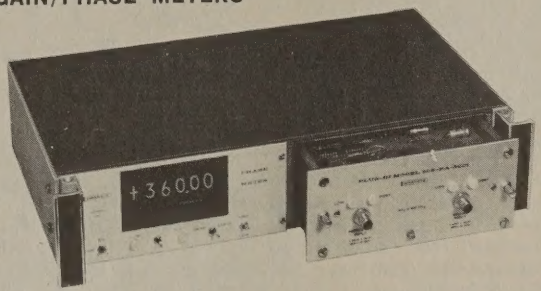
SERIES 305

SUPER PERFORMANCE PHASEMETERS AND GAIN/PHASE METERS*



305 Series Phasemeters provide the highest available accuracy, along with many operational features. Designed for the calibration laboratory, the design engineer's bench, the production line and automatic test systems, the 305 is the most widely accepted phasemeter in industrial, and governmental organizations. **

FEATURES

- No hands 86 dB dynamic range
- Automatic or programmable operation and calibration
- Highest accuracy — to 0.03°
- Repeatability better than 0.01°
- Rejects harmonics and noise
- Wide frequency range — 1 Hz to 11 MHz

FLEXIBILITY THROUGH PLUG-IN CONCEPT

The plug-in concept of the 305 offers a wide selection of characteristics. Three standard mainframes and nine plug-ins are complemented by a variety of options, such as programmability, high speed and autocalibration. Special modifications are also available. In addition, modular construction throughout provides maintainability at both component and P.C. card levels for ease and speed of servicing.

WIDE FREQUENCY RANGE

The basic mainframe provides a direct frequency coverage of 2 Hz to 700 kHz with high accuracy. By the use of frequency converting plug-ins such as the 305-PA-3005, standard units can handle frequencies up to 11 MHz. Special units can be provided for higher frequency.

NO HANDS OPERATION

The Series 305 Phasemeters require no controls or adjustments by the operator. These units are also equipped with several significant automatic features. These include automatic selection of angle range, automatic sensing of leading or lagging angle, automatic selection of the output time constants, and automatic setting of AC gains.

HIGHEST ACCURACY

Accuracy to better than ±0.03° is attained with precision mainframes and carefully designed plug-ins. Mainframes exhibit precise zero crossing detection, angle-to-DC conversion linearity to approximately ±0.01° and outstanding DC stability. Plug-ins are designed for accurate conversion of sine wave (also square wave) inputs to square waves through carefully controlled amplifier circuitry, use of gain autoranging, and harmonic filters where necessary.

INSENSITIVITY TO INPUT LEVEL

Series 305 plug-ins are available with a guaranteed accuracy of better than ±0.05° even with independent input level variations of 60 dB. Typical accuracy can approach ±0.03° as shown on the following page.

NON-AMBIGUOUS ANGLE READINGS

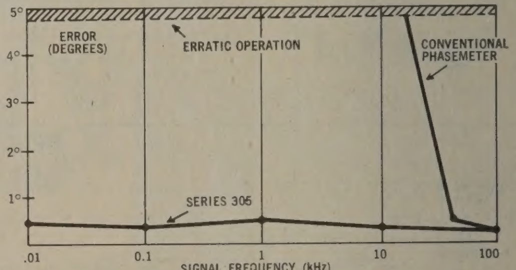
Two phase angle ranges in the 305 eliminate the ambiguity or "dead zone" error inherent in all other phasemeters (usually at 0°/360° or −180°/+180°). An automatic system switches to the 0°/360° range for angles near 180° and to the −180°/+180° range for angles near 0°. Unique guard bands prevent dead zones near switching points.

REPEATABILITY, STABILITY, AUTOCALIBRATE

Repeatability of the 305 is better than ±0.005°; temperature coefficient is ±0.001°/°C; and DC output drift is better than ±0.05° over any 30 day period. The autocalibrate feature eliminates virtually all DC errors in digital panel readout and BCD rear panel outputs.

NOISE IMMUNITY

Unique patented circuitry minimizes noise errors and makes possible accurate phase measurements under noise levels where other phasemeters become completely useless. The accompanying curve compares the phase error of the model 305 with that of a conventional phasemeter with broad band noise in both channels.



PHASE READING ERROR VS SIGNAL FREQ.
FOR GAUSSIAN NOISE (FLAT TO 5 MHz)
IN BOTH CHANNELS FOR S/N =10

PROGRAMMABLE OPERATION

Standard mainframes are provided with rear connections for overriding the automatic time constant and angle range selectors by relay contact closures. Options are provided for control by DTL and TTL logic.

DIGITAL READOUT

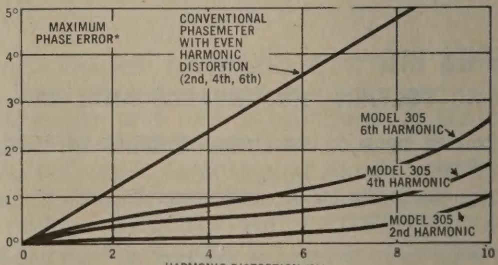
In addition to analog DC output, standard mainframes are available with up to 5 digit panel readouts (i.e., 0.00° to ±180.00° and 0.00° to +360.00°) and BCD outputs for each digit. Autocalibrate feature eliminates virtually all meter drift and scaling errors.

RAPID PHASE NULLING

For production testing of filters and other networks, an additional analog deviation-panel meter (305D) provides an easy means of adjusting a test angle to any accurate value. Presetting can be done in seconds without any other equipment. The precision digital panel meter monitors actual test angle continuously.

ABILITY TO REDUCE HARMONICS

The 305 is designed to reduce significantly the errors due to even harmonic distortion without the use of filters. The accompanying curve compares the error due to even harmonic distortion (maximized for worst case harmonic angle) on conventional phasemeters and on the model 305. (Odd harmonics in-phase with fundamental contribute no error.)



COMPARISON OF ERRORS DUE TO EVEN HARMONIC DISTORTION
(* For worst case phase relationship between harmonic and fundamental)

---

*Manufactured under U.S. Pat. No. 3,725,781

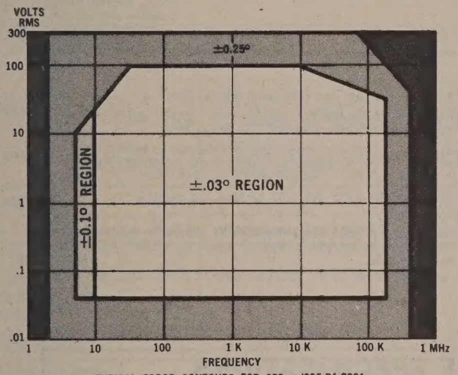
SERIES 305

SUPER PERFORMANCE PLUG-INS

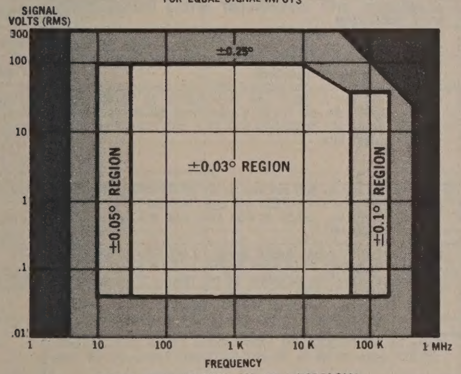
The variety of plug-ins available provides unlimited flexibility for the Series 305 Phasemeters in meeting many phase measurement problems. In addition to an expanding line of standard plug-ins, custom units can be designed for special needs.

305-PA-3001 AUTORANGING PLUG-IN

This plug-in features high accuracy over a broad range of input levels and frequencies. Autoranging of gain in each channel assures high accuracy (±0.05° guaranteed) over a dynamic range of 60 dB (50 mV to 50 V rms) for independent levels of inputs, with a useful range of 90 dB (10 mV to 300 V rms). This plug-in covers the range from 2 Hz to 700 kHz, with its highest accuracy in the 50 Hz to 50 kHz range. The curves shown illustrate typical accuracies as a function of level and frequency. The 305-PA-3001 also features compatibility with Tektronix probes and includes front panel lamps to indicate when either input signal is below 50 mV or above 50 V rms.



TYPICAL ERROR CONTOURS FOR 305 w/305-PA-3001 FOR EQUAL SIGNAL INPUTS



TYPICAL ERROR CONTOURS FOR 305 w/305-PA-3001 FOR UNEQUAL INPUTS — REF. 0.3 VOLTS RMS

While the above accuracies apply to sine wave inputs, this instrument can also be used for square wave and amplitude modulated signals.

305-PA-3002 SINGLE RANGE PLUG-IN

The 305-PA-3002 is similar to the model 305-PA-3001 except that it does not include autoranging or limit indicator lamps. For sine wave inputs the standard unit is designed for guaranteed ±0.05° accuracy (typically ±0.03°) over independent signal levels of 50 mV to 500 mV rms, with a slight reduction in accuracy from 10 mV to 3 V rms. Other level ranges can be supplied on special order; Tektronix probes can be used for high input levels. This plug-in is useful for sine wave, square wave and amplitude modulated signals.

305-PA-3005 HIGH FREQUENCY PLUG-IN

This high frequency plug-in is designed for high accuracy to 11 MHz. Using a self tracking oscillator, the input signals are converted to 40 kHz for precision measurement by the mainframe. Input attenuators (50 ohms) are provided with 10 dB steps, to cover a range of 1 mV to 3 V rms in either channel. Front panel lamps indicate when input levels are out of range or when level controls are improperly set. The self tracking oscillator can be controlled by channel A signal or by a third independent signal.

305-PA-3007 PROGRAMMABLE AND AUTORANGING PLUG-IN

This programmable plug-in features all of the characteristics of the model 305-PA-3001. In addition it includes increased input gain to achieve operation down to 1 mV rms. The unit can be operated either in an automatic or programmable mode. Without rear connections, the plug-in operates automatically as a 305-PA-3001; however, by utilizing rear connectors, the internal autoranging can be overridden and additional internal gain can also be inserted. Programming is available by DTL and TTL logic.

305-PA-3008 SINGLE FREQUENCY PLUG-IN

The 305-PA-3008 is a special purpose plug-in designed for precision calibration of 50 Hz, 60 Hz and 400 Hz power line equipment such as wattmeters, phase detectors and watt hour meters. This instrument can measure phase difference between two voltages, two currents or between a voltage and a current. The unit covers a voltage range of 25 V to 250 V rms and a current range of 0.1 to 5 A rms. The basic plug-in covers the frequency range of 50 Hz to 500 Hz. Plug-in filters, available for 50 Hz, 60 Hz and 400 Hz, assure reduction of second harmonic by at least 40 dB and higher harmonics by at least 50 dB. A front panel zero control provides adjustment for high accuracy (±0.1°) at any single frequency.

305-PA-3009 WIDE BAND NETWORK ANALYZER PLUG-IN (GAIN/PHASE/AMPLITUDE)

This plug-in measures the voltage amplitude of each signal input (in volts or dBV, selectable by operator), the phase difference between inputs, and the amplitude ratio of inputs. Featuring autoranging of gain in both channels, it requires no manual setting of gains for any measurement. Simultaneous DC outputs on mainframe are proportional to all four fuctions. A front panel switch selects the measuring mode for digital panel readout — channel A voltage, channel B voltage, phase difference, or amplitude ratio. Lamps on the front panel of the plug-in indicate the proper decade multiplier. The 305-PA-3009A is designed for extending the low frequency range.

305-PA-3010 SPECIAL PURPOSE PLUG-IN

This plug-in is typical of special purpose plug-ins which can be supplied to meet unique problems. Having high input impedance, it is equipped with closely matched low pass filters to pass 125 Hz signals while rejecting 400 Hz signals, solving problems in many types of servo control systems. Similar units can be readily designed for other special voltage and frequency applications.

305-PA-3015 PROGRAMMABLE PLUG-IN

Intended for use in automatic test systems, this plug-in has two selectable filters for harmonic rejection and selectable gains to handle inputs from 50 mV to 50 V rms. Filter (or filter out) selection as well as gain switching is accomplished by contact closures across terminals on the rear of the main frame.

PRECISION TRANSFORMER ISOLATION NETWORKS

Dranetz TR 3100 series networks are available for input voltage isolation with minimum phase error and flat gain response. For use with balanced or signal ended sources, these units are equipped with internal preamplifiers to produce outputs in the 30 mV to 3 V rms range (for use with 305 Series Phasemeters) for input levels from 50 mV to 500 V rms. These transformer units are packaged for direct plug-in into the input BNC's of the phasemeter, and draw B+ power from the front panel accessory connector of the phasemeter plug-in. Size: 2¾" x 2¾" x 2". Input: banana jack. Output: BNC.

Model TR___	Zin	Com. Mode Rej: >60 dB for frequency	Range for ±0.1° typical shift	Range for ±0.3° typical shift	Gain ±2%
3101	1 megΩ 70 pF	Below 1 kHz	20-400 V rms 50 Hz-20 kHz	5-400 V rms 10 Hz-25 kHz	x 0.01

SERIES 305

SUPER PERFORMANCE PHASEMETERS

MAINFRAME SPECIFICATIONS

Frequency Range: 2 Hz to 11 MHz (see plug-in data)

Angle Ranges: 0.00° to ±180.00° or 0.00° to +360.00° manually or automatically selected. End-of-range measurement errors are prevented by 15° automatic guard zones.

Analog Output

Range: −1.8000 to +3.6000 Vdc corresponding to measured angle; 10.0 mVdc per degree

Accuracy: See plug-in specifications

Output Impedance: 100 ohms

DC Resolution: Infinite

Linearity: Approx. ±0.01°

Repeatability: Better than ±0.005°

Time Constants: Automatically selected; 10 ms for frequency >5 kHz, 50 ms >500 Hz, 350 ms >50 Hz, 700 ms >2 Hz (Note: 4.6 time constants to respond to better than 99% of step change).

Warm-up Drift: Approx. 0.05° after first minute.

Long Term Drift: Typically less than ±0.05° per month

Temp. Coefficient: Approx. ±0.001°/°C

Recommended Output Devices: Recorders, DVM's, A-D Converters, Printers

Self Check: Front panel switches; dc outputs correspond to −180.00°, 0.00°, +180.00° and +360.00°

Error Rejection: False triggers due to high frequency noise are locked out for signal to noise ratios better than 10:1. Errors and fluctuations due to waveform dissymmetry or low frequency noise reduced by at least 10 to 1.

Harmonic Rejection: Worst case errors due to even harmonic distortion reduced by approximately 5:1 without filters. Odd harmonics in-phase with fundamental contribute no error.

Operator Adjustments: None.

Operating Temp. Range: 0° to +50°C

Grounding: Independent grounds for signal, chassis, and power line. (For safety, chassis and power line grounds connected at factory.)

Remote Programmability (standard on all mainframes): By rear connector pins. Override by contact closure of automatic time constant selection and angle range. Factory installed wiring from rear connector to plug-in for use with programmable plug-ins.

Modular Construction: Circuits on removable plug-in cards, extenders supplied for ease in servicing.

Size: 3½″ high, 16″ deep, 19″ rack/portable package; shipping 22½″ x 22½″ x 6½″.

Weight: 20 lbs. (9 kg.); shipping 30 lbs. (14 kg.).

Power: 115/230 V, 50-400 Hz, <0.75 A (specify voltage and frequency when ordering).

Plug-In Accommodation: Accepts 305-PA-( ) plug-ins. Mainframes and plug-ins are interchangeable.

ANGLE PRESENTATION

	Model 305	Model 305B	Model 305C	Model 305D
DIGITAL				
Display	None	4 digit plus sign	5 digit plus sign	
Angle Ranges	Not Applicable	0.0° to ±180.0° and 0.0° to +360.0°	0.00° to ±180.00° and 0.00° to +360.00°	
Resolution	NA	0.1°	0.01°	
BCD Output	None	BCD coded (1248), 4 lines per digit plus polarity line; TTL/DTL compatible (<0.8 V to > +2.4 V dc). Read and hold on command, and data ready features available on rear connector.		
Warm-up Time	NA	30 minutes (1 minute with option 107)		
Zero & FS Controls	NA	Front panel for FS & 0 (no adjustments with option 107)		
ANALOG				
DC Output	10.0 mV/°; 0.0000 V to 3.6000 V and −1.8000 V to +1.8000 V corresponding to 0.00° to 360.00° and −180.00° to +180.00°; infinite resolution.			
DC Offset	None			Continuously adjustable angle offset. Analog panel meter and DC output indicate deviation from offset.

OPTIONS

#101 Rear connectors for signal and reference inputs, BNC(4)

#102 Full mainframe programmability; includes self check, angle range and time constant selection, DTL and TTL compatible.

#103 High speed analog output response. Time to respond to within 99% of step change: 1 ms for frequency >5 kHz, 10 ms >500 Hz, 100 ms >50 Hz, 1 second >5 Hz. (Temp. stability ±0.01°/°C)

(Opt. 103 not available with Opt. 107 or Mod. 14 below.)

#105 Remote zero control.

#107 Automatic calibration checks and automatically readjusts digital readout and BCD output circuits to reduce readout errors to ±0.02°. This option available only on 305C.

Mod. 14 Higher accuracy below 12 Hz. Available only on 305B, 305C, and 305D.

COMBINED PLUG-IN AND MAINFRAME SPECIFICATIONS

MODEL	FREQUENCY RANGE	INPUT LEVELS (independent)	INPUT Z	ACCURACY(2) WITH INDEPENDENT LEVELS UNLESS OTHERWISE INDICATED Analog output accuracy: As specified below. Digital phase accuracv: For model 305C, same as analog accuracy. For model 305B, add ±0.15° digital readout error to analog accuracy specified.
305-PA-3001 Auto Ranging Plug-in	2 Hz to 700 kHz	10 mV to 300 V rms up to 10 kHz and to 50 V rms up to 700 kHz; can be extended to 40 kV rms with Tektronix probes. Each channel has automatic gain ranging, and lamps which indicate when level is below 50 mV and above 50 V rms.	1 megohm shunted with 40 pF	±0.05°, 50 mV to 50 V rms from 50 Hz to 50 kHz; typically ±0.03°, 50 mV to 50 V rms from 50 Hz to 50 kHz, ±0.05° to 10 Hz, ±0.1° to 250 kHz, and ±0.25° at other levels to 500 kHz.
305-PA-3002 Single Range Plug-in	2 Hz to 700 kHz	10 mV to 3 V rms(1); can be extended to 3 kV rms with Tektronix probes. Other ranges available on request.	1 megohm shunted with 40 pF	±0.05°, 50 mV to 500 mV rms from 50 Hz to 50 kHz; typically ±0.03°, 50 mV to 500 mV rms from 50 Hz to 50 kHz, ±0.05° to 10 Hz, ±0.1° to 250 kHz, and ±0.25° at other levels to 500 kHz.
305-PA-3005 High Frequency Plug-in	200 kHz to 11 MHz	1 mV to 3 V rms; manual level controls in 10 dB steps. Lamps indicate when inputs are out of range or when level controls are improperly set.	50 ohms	Broadband with equal inputs above 10 mV rms: ±0.4° from 200 kHz to 4 MHz; ±1° from 4 MHz to 11 MHz. With independent levels above 10 mV rms: ±1° up to 4 MHz and ±2° up to 11 MHz. Single frequency — above 10 mV rms: ±0.3° at any frequency from 200 kHz to 11 MHz at any fixed levels.
305-PA-3007 Programmable and Auto-Ranging Plug-in	2 Hz to 700 kHz	Autoranging: similar to levels of 305-PA-3001. Programmable: overrides autoranging; extends low levels to 1 mV rms; DTL, TTL logic; program connector in rear of mainframe.	1 megohm shunted with 40 pF	Same as 305-PA-3001 for levels above 10 mV rms; typically ±0.35° from 50 Hz to 50 kHz for levels below 10 mV rms.
305-PA-3008 Power Freq. Plug-in	50-500 Hz without filters. 50 Hz, 60 Hz and 400 Hz L.P. filters available(3)	25 V to 250 V rms; 0.1 A to 5 A rms. Inputs are transformer isolated.	100 k ohm (voltage) 0.02 Ω max. (current)	At any single frequency, with filter set: ±0.1°, 25 V to 250 V rms, or 0.1 A to 5 A rms.
305-PA-3009 Network Analyzer (Gain/Phase/Amplitude)	5 Hz to 700 kHz (Note: 305-PA-3009A operates to 1 Hz with 305 mod. 14)	10 mV to 40 V rms. Each channel has automatic gain ranging. Direct reading of phase angle, amplitude ratio and level of each input. Compatible with Tektronix probes.	1 megohm shunted with 40 pF	Phase: ±0.1° from 40 mV to 40 V rms from 50 Hz to 50 kHz; typically ±0.25° at all other levels from 5 Hz to 500 kHz. Voltage Amplitude: above 40 mV (channel A or B): ±2% reading ±0.03% FS, 50 Hz to 50 kHz; ±5% reading ±0.03% FS, 100 kHz to 500 kHz.(5) Ratio: ±0.5 dB, 50 Hz to 50 kHz; ±1 dB, 50 kHz to 500 kHz.(5)
305-PA-3010 Special Purpose Plug-in (with filter)	For use at 125 ±10 Hz; matched filters in both channels reject higher frequencies	500 mV to 5 V rms. Other ranges available on request.	1 megonm shunted with 40 pF	±0.1°, 500 mV to 5V rms; ±0.25°, 100 mV to 500 mV rms.
305-PA-3015 Selectable Filter Plug-in	5 Hz to 500 kHz without filters; uses 2 of type 305-PA-3008-( ) filters (3); filter selection programmable	Ranges of 50-500 mV rms, 0.5 to 5 V rms, and 5-50 V rms selectable by remote contact closures.	1 megohm shunted with 40 pF	With filters, ±0.1° at fixed frequencies over all levels; without filters ±0.1° from 50 Hz to 50 kHz at all levels (typically ±0.03°), typically ±.25°, 5 Hz to 500 kHz.

(1) Can be provided for other voltage levels.

(2) For sinusoidal signal; can be used for square wave inputs over limited frequency range; can be used for amplitude modulated signals up to 97% modulation, depending upon model, level and frequency.

(3) 50 Hz filter, P/N 305-PA-3008-50; 60 Hz filter, P/N 305-PA-3008-60; 400 Hz filter, P/N 305-PA-3008-400. (Other frequencies available on request.)

(4) Available for use with 305-PA-3001, -3002, -3007 and -3010. Specify when ordering plug-in.

(5) For higher accuracy below 50 Hz, specify Model 305-PA-3009A.

SERIES 331

HIGH ACCURACY ECONOMY PHASEMETERS

PHASE METER
DRANETZ
REFERENCE
CALIBRATE
DEGREES

- Accuracy to 0.05°, resolution to 0.01°
- Frequency range 2 Hz to 500 kHz
- Analog output and 4 or 5 digit panel readouts
- Input 0.05 to 220 V rms
- Accepts sine, square and other waveforms in either channel

The Dranetz 331 Series Phasemeters feature high accuracy over a broad amplitude and frequency range. Front panel controls (equipped with LO/HI indicators) are used to select proper voltage ranges, as well as to check and adjust calibration. The 331 incorporates several of the important features of the Superperformance 305 Series, including elimination of 0°/360° ambiguity and reduction of sensitivity to noise and even harmonics. The 331 is designed for calibrating equipment, for testing subassemblies and for general laboratory work.

SPECIFICATIONS

CHARACTERISTICS	331B	331C
Frequency Range:	2 Hz to 500 kHz	
Accuracy: Sine Wave:	±0.1° ±1 digit from 50 Hz to 50 kHz, add ±0.2° per 100 kHz above 100 kHz and ±0.2° ±1 digit at 5 Hz.	±0.05° from 50 Hz to 50 kHz; ±0.2° from 10 Hz to 100 kHz; add ±0.2° per 100 kHz above 100 kHz.
Square Wave:	±0.1° ±1 digit from 10 Hz to 20 kHz; ±.5° per 100 kHz above 20 kHz	±0.05° from 10 Hz to 5 kHz; ±0.1° to 20 kHz; ±0.5° per 100 kHz above 20 kHz.
Angle Ranges:	000.0° to 360.0° or −180.0° to +180.0° automatic or selectable.	
Display:	Beckman (Sperry) 0.6″ 4 digit for ranges above.	Beckman (Sperry) 0.6″ 5 digit for ranges above.
Drift (30 day period): Sine Wave: Square Wave: DC Drift:	 None None 0.1°	
Repeatability (DC):	Better than 0.1°.	Better than 0.01° after readjusting 0 and FS.
Temperature Coefficient:	0.01°/°C independent of other conditions.	
Input Signal Amplitudes:	0.05 to 220 Volts rms in 3 ranges (0.05-0.5, 0.4-5, 4-220; can be extended with Tektronix probes.	
Input Impedance:	1 megohm shunted by 50 pF nominal	
Response Time:	700 milliseconds	
Maximum DC Component:	±200 volts; can be extended with probes	
Analog Output:	0.0000 to 3.600 V and −1.8000 to +1.8000 V DC, +10.00 mV DC/degree phase; output impedance less than 100 ohms.	
Ambient Temperature	0°C to 45°C	
Panel Controls and Adjustments:	3 range input level pushbuttons each channel; read-hold; power; 0° cal and 360° cal adjustments.	
Connectors:	BNC, both input channels, rear and front; PC rear for analog output.	
Power Requirements:	105-125 or 210-250 volts, 50/60 Hz, 70 watts.	
Dimensions:	3½″ high x 16″ deep, 19″ rack/portable package; 22½″ x 22½″ x 6½″ shipping; 18 lbs. (7 kg) net wt., 25 lbs. (10 kg) shipping.	
Option:	None	#101: BCD output, TTL/DTL, 8421

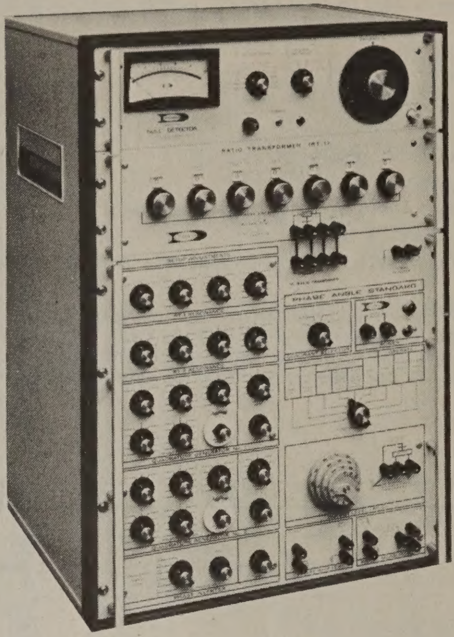
DYTRONICS



The first authentic Primary Phase Angle Standard for industry

MODEL 311/RT-1/717S PRIMARY PHASE ANGLE STANDARD

- 0.015° Accuracy
- Self-Calibrating
- Maximum 125 Volt Output
- Shift or Measure Phase Angle
- Frequency Range 30Hz to 10,000Hz
- 12 Microdegrees Resolution

Dytronics offers an array of instrumentation for the measurement and generation of phase angle. This successful and advanced measurement technique pioneered by Dytronics is recognized as the finest throughout the world. See our catalog for complete information or contact Dytronics Company Inc. 4800 Evanswood Drive, Columbus, Ohio 43229, Telephone (614) 885-3303.

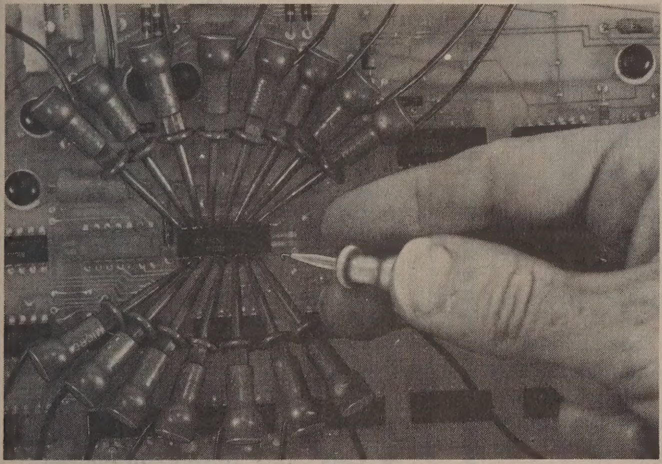
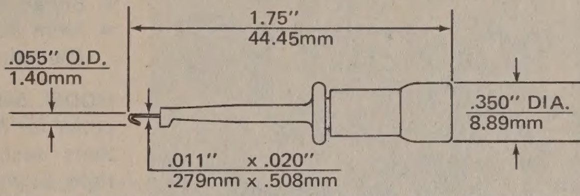
E-Z-HOOK® . . .THE BETTER MADE TROUBLE SHOOTERS

Quality engineered through precision tooling and the best selection of materials—Beryllium Copper, Nickel Silver or Stainless Steel with Gold or Nickel Plating. Non-conducting Parts made of Durable Heat and Chemical Resistant Nylon. Uniquely designed to give maximum holding power without damage to components, true readings through a single contact point, and maximum insulation in a minimum of space. Each size hook is available in the 10 standard RETMA colors, and by interchanging the plungers and bodies, 99 different color combinations can be created. Each size hook is available individually, or preconnected to a wide variety of test lead and coaxial interface connectors. An ever increasing range of applications throughout industry make E-Z-Hook products the most sought after test aids available. Truly, THE IMPOSSIBLE HOOKERS!



MICRO HOOK XM

The XM Micro Hook was designed for difficult IC test connections It's lightweight (less than 1 gram) and Finger-eze Hypo Action let you connect direct to delicate wires where weight and leverage may damage component. One-Piece Beryllium Copper, Gold-Plated Hook and Conductor. Stainless Steel Compression Coil Spring exerts about 8 oz./227gm of contact pressure. As with all E-Z-Hook Connectors, the XM Micro Hook Model is completely field serviceable.

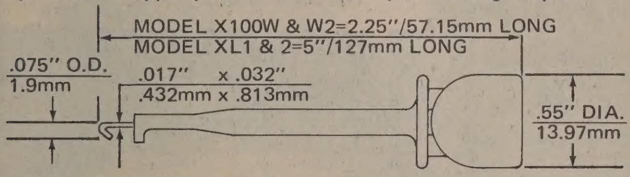


MODEL XM SHOWN ACTUAL SIZE WITH HOOK EXTENDED

MINI HOOK X100W OR X100W2 AND XL1 OR XL2

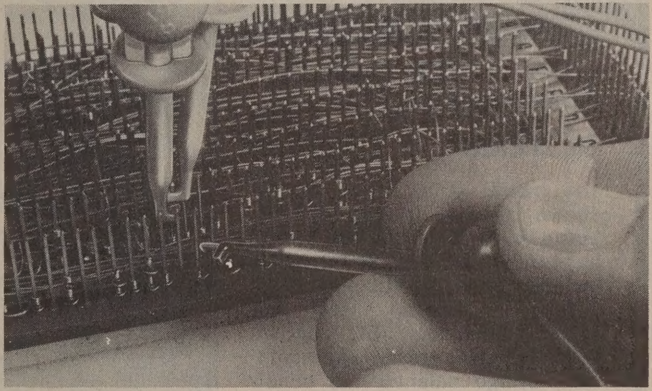
The X100W & W2 (2.25''/57.15mm long) and XL1 &2 (5''/127mm long) Mini Hooks combine proven construction, miniature size and Finger-eze Hypo Action to permit direct hook-ups to components. One-Piece Beryllium Copper, Gold-Plated Conductor and Hook. The Stainless Steel Coil Spring exerts 16 oz./454gm of contact pressure.

MODELS X100W & XL1	**MODELS X100W2 & XL2**
.040''/1.016mm square hole tip for wire wrapped pins.	.065''/1.65mm x .040/1.016mm hole tip for rectangular pins.



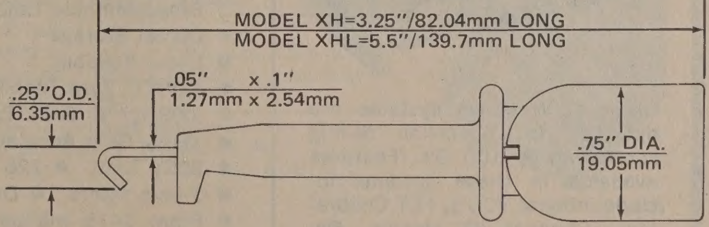
MODEL X100W & W2=2.25''/57.15mm LONG
MODEL XL1 & 2=5''/127mm LONG
.075'' O.D.
1.9mm
.017'' x .032''
.432mm x .813mm
.55'' DIA.
13.97mm

MODEL X100W SHOWN ACTUAL SIZE WITH HOOK EXTENDED



MACRO HOOK XH AND XHL

The XH (3.25''/82.04mm long) and XHL (5.5''/139.7mm long) Macro Hooks will span terminals up to .125''/3.175mm in diameter. The One-Piece Nickel Silver Conductor and Hook is equivalent in surface area to No.14AWG wire (.064''/1.65mm Dia.) The Stainless Steel Coil Spring exerts approximately 40 oz./1134gm of contact pressure, Heavily insulated to a single contact point.



MODEL XH SHOWN ACTUAL SIZE WITH HOOK EXTENDED

Ectron
CORPORATION

- Differential DC Amplifiers
- Strain Gage Signal Conditioners
- Thermocouple Signal Conditioners
- Signal Conditioning Systems
- Data Acquisition Systems
- Thermocouple/MV Calibrators

MODEL 314

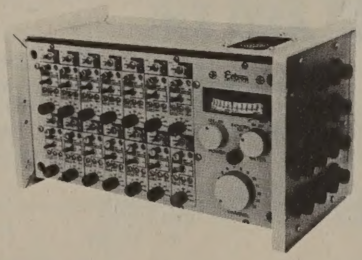
Miniature airborne amplifier occupies less than one cubic inch. Contains differential amplifier, strain gage excitation and power supply to operate from 28V dc. 20 kHz Bandwidth. Price $450. (Bulletin 2007)

400 ENVIRONMENTAL SERIES

- 100G Shock
- −25 to +71°C
- 0.5 μV/°C Stability
- Thermal Shock Resistant
- Bridge Excitation and Balance
- Thermocouple Conditioning
- RFI protection
- 120 dB CMR • 100V CMV
- Rack or Stud Mounting
- 12 or 28 V dc Power • 8 oz's.
- From $330 (Bulletin 2001A)

4000 SERIES, SIGNAL CONDITIONING SYSTEMS

The typical 4000 series system shown below is designed for Airborne or Vehicular service involving moderately high G forces. It includes 14 stable 400 series amplifiers, a monitor meter and monitor selection switch, individual CAL switches, bridge excitation, bridge balance and conditioning.



Other 4000 series systems are designed for operation during shocks up to 100 G's. Features available in these systems include integral VCO's, FET Calibration, Channel ID signals, Rechargeable Battery Pack and others. (See Bulletin 2001A)

500 ECONOMY SERIES

- 1μV/°C
- 114 dB CMR
- Gains X.01 to X2500
- 16 Amps per 3.5" high rack
- 80 kHz bandwidth
- Filtered output
- 10 ma, 100 ma, dual outputs
- Bridge Bal., Completion, CAL
- From $155 (Bulletin 2004A or B)

MODEL 540 — Four-channel amplifier for multi-channel data systems such as Model 6000 at right. From $400 (Bulletin 2004B)

600 INDUSTRIAL SERIES

- Strain Gage Conditioning
- Thermocouple Conditioning
- Thermocouple Linearization
- Reference Junctions
- Multifunction Amplifiers
- Bridge Excitation and Bipolar Cal.
- Expanded Scale Operation
- .2μV/°C Zero Stability
- 120 dB CMR and 300V CMV
- 12V dc, 28V dc or 115V ac power
- From $255 (Bulletin 2005)

700 WIDEBAND SERIES

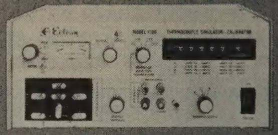
- 100 kHz Bandwidth
- Manual or Programmable Gain
- Digital Storage
- Local Readout
- 1μV/°C Zero Stability
- .003%/°C Gain T.C.
- .01% Gain Accuracy
- 300V CMV • 126 dB CMR
- 3-pole filters • Dual outputs
- From $415 manual gain
- From $775 programmable gain (Bulletin 2003A)

6000 SERIES DATA SYSTEMS

All 6000 Series Systems combine per-channel low level amplifiers with a high level multiplexer and a programmable gain amplifier to provide complete multi-channel signal processing in a small, rugged package. When equipped with Model 640 input modules, outstanding performance is provided by the chopper stabilized design which offers extremely low drift and noise and accommodates common mode voltages up to 300 volts dc or peak ac. The systems are capable of scan rates to 20,000 channels per second. Integral A-D converters are optional. Other key features are listed below.

- CMV 300V (higher on special orders)
- CMR 120 dB with 1K unbal.
- 0.5 μV Zero Stability
- .01% Gain Stability
- 3rd order filter, each channel (plug in)
- Sequential or Random Access
- 20 kHz Throughput Rate
- 64 Channels per 5.25" high enclosure (Bulletin 2008)

MODEL 1100 THERMOCOUPLE SIMULATOR CALIBRATOR



CALIBRATES . . .

- Digital Thermometers
- Temperature Recorders
- Thermocouple Transmitters

SIMPLE
Just dial the temperature (C or F) (or program remotely)

ACCURATE
Voltage output conforms to NBS 125 within 0.1°

UNIQUE
Outputs on thermocouple alloys or copper

VERSATILE
It's a DC Voltage Standard and a Differential Voltmeter, too!

What can I use to keep all the manufacturers' product data I receive in order?
What system makes filing or retrieving manufacturers' catalogs fast and easy?
Which file system have thousands of engineers purchased because they know it works?

eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

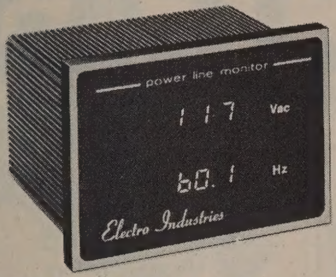
Electro Industries

SOLID-STATE DIGITAL POWER LINE MONITOR



The Power Line Monitor is a solid-state digital meter that was designed to satisfy the requirements for a digital readout device combining the functions normally provided by two distinct conventional line monitoring panel meters.

This digital meter has the unique two-fold capability of monitoring line voltage and line frequency fluctuations through visual presentation as well as by optional digital digit outputs for remote interface.

The unit was designed and built for ruggedness and durability, the LED's Display and the solid-state component will assume a long life operation.

The Power Line Monitor is suited ideally for use with power generation equipment, computerized measuring systems, control panel installations, and in instrumentation laboratories where power sources must be monitored for measuring test equipment accuracies.

SPECIFICATIONS COMMON TO ALL UNITS

OPERATING RANGE: Voltage — 85 - 145V (When power input is parallel Suffix A- 170 - 270V with the measurement input). Measurement input is 0 - 300V (when applying a fixed power input voltage)

VOLTAGE ACCURACY: Voltage — ±.5% f.s. ± 1 Digit

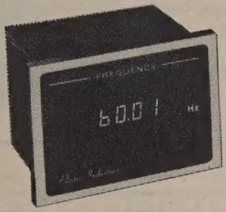
SAMPLE RATE: Voltage — 30m sec. - 600m sec.

DIGITAL DISPLAYS: LED — .3″ high

SIZE: 4.75″ W x 3.25″ H x 3.50″ L
Panel cut out required 4.125″ x 3.125″

MODELS	FREQUENCY RANGE	FREQUENCY ACCURACY		SAMPLE RATE FREQUENCY	PRICE (1 to 9)
LM 150	——	—	Crystal Controlled	—	$129.00
LM 160	42 - 99 Hz.	±1 Hz.		1 sec.	159.00
LM 1400	42 - 999 Hz.	±1 Hz.		1 sec.	189.00
LM 1600	42.0 - 99.9 Hz.	±.1 Hz.		10 sec.	195.00
LM 1600-1	42.0 - 99.9 Hz. or 42 - 999 Hz.	±.1 Hz. or ±1 Hz.		10 sec. or 1 sec.	225.00
LM 1600-10	42.0 - 99.9 Hz.	±.1 Hz.		1 sec.	270.00

SOLID-STATE DIGITAL FREQUENCY MONITOR



The Solid State Digital Frequency Monitor was designed to satisfy the requirements for high resolution and fast updating when measuring low frequency.

The fast updating feature is achieved through a unique phase lock loop scheme. In addition, this technique allows the unit to reject noise on the incoming signal. The accuracy of this unit is controlled by a crystal with maximum aging factor of 20 PPM.

This feature enables the unit to be free from calibration requirements.

The Frequency Monitor is ideally suited for use in monitoring Power Line frequencies and for general low frequency monitoring.

SPECIFICATIONS COMMON TO ALL UNITS

INPUT VOLTAGE RANGE: 2 - 300V.

FREQUENCY ACCURACY: ±1 Digit over operating temperature range

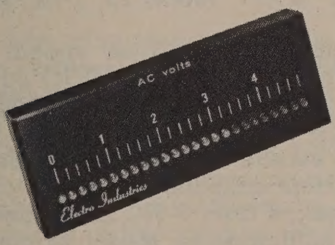
SAMPLE RATE: 1 second

DIGITAL DISPLAY: LED — .4″ high

SIZE: 4.75″ W x 3.25″ H x 3.50″ L

MODELS	FREQUENCY RANGE	FREQUENCY RESOLUTION	PRICE (1 to 9)
LF 60	5.00 - 99.99 Hz.	.01 Hz.	$275.00
LF 400	50.0 - 999.9 Hz.	.1 Hz.	275.00
LF 1000	5 - 9999 Hz.	1. Hz.	185.00

SOLID-STATE ANALOG INDICATOR & CONTROLLER



The Solid State Analog Indicator and controller is a combination of an analog meter and a digital controller. The unit is designed to obtain a highly visual analog indication, as well as being a low cost controller with up to 24 set points. It is a 100% solid state unit without moving parts to wear or break, which makes it extremely resistant to shock and vibration.

Because it is only 5/16″ wide, the unit can easily be mounted flush against a panel using only 2 set screws. The 24 set points can be suitably used on process control equipment, and are easily interfaced with computer systems.

As an option, different color LED's can be used to indicate special scale readings. The unit is low cost, and is available in different ranges.

SPECIFICATION COMMON TO ALL UNITS

ACCURACY: ±2% F.S.

LINEARITY: ±.5% F.S.

TEMPERATURE COEFFICIENT: 150ppm/°C

EMICO PRECISION-PLUS

HIGH TORK PRECISION METERS

PRODUCED IN VOLUME AT COMPETITIVE PRICES

EMICO is your dependable VOLUME source for 100% American-made AC and DC meters for a wide range of applications in the electronics, automotive, appliance, test equipment and process industries. Select any standard model or have EMICO design and engineer a meter to your exact requirements, including a custom dial face with special scale, trademark, name or colors. Send for a complete catalog of standard models or mail drawings and specifications for a prompt quotation on a custom meter.

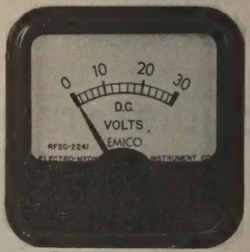
PANEL METERS WITH METAL OR PLASTIC BEZELS

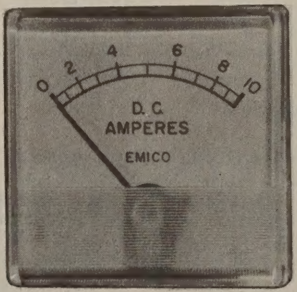
Plastic Bezel Meter
Model 42—2⁵⁄₁₆" square
Model 44—2¹³⁄₁₆" square

Metal Bezel Meter
Model 72—2¼" square
Model 74—2¾" square

Featuring the unique EMICO High-Tork movement, these versatile meters are available as AC or DC ammeters, voltmeters and milliammeters. All AC meters have 5% accuracy; DC meters available with 3% or 5% accuracy. These meters can be mounted into a 2 1-16" diameter panel hole.



THE CHARGE INDICATOR WITH A MODERN LOOK BUT AN OLD-FASHIONED PRICE



Plastic Face Meters

50 Series all approximately 2⅜" square

The eye-catching appearance, durability, and low price tag have made these meters especially popular. The one shown above (Model 53) is ideal for battery charger applications. Features attractive, clear molded plastic bezel and easy-to-read scale that can be customized. Specific models available as DC ammeters, voltmeters and milliammeters with 3% or 5% accuracy. AC model accurate to 5% of full scale.

ELECTRO MECH INSTR CO PERKASIE, PA. U.S.

Edge-Reading Meter
Model 13 1¹³⁄₁₆" x ¾"

You can engineer added sales appeal into your product by giving it the EMICO edge—either Model 12 or the slightly larger Model 13. Both feature a clear molded plastic front and case plus excellent readability. Model 12, primarily a current indicating device, is available in DC ranges from 0-500 microamperes through 0-50 milliamperes. Model 13 can be supplied as a 0-500 microampes DC meter, as well as an AC or DC ammeter, voltmeter and milliammeter. Either 3% or 5% accuracy is available on DC meters, depending upon the sensitivity. All AC meters have a 5% accuracy rating.

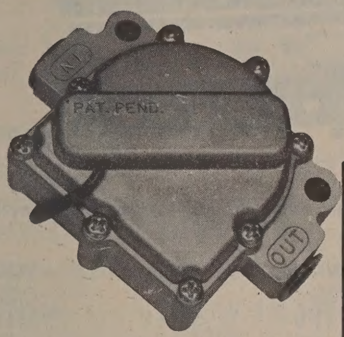
NEW from EMICO . . .

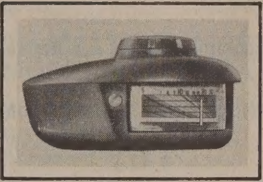
and a lot of other things

THE ENERGY SAVERS



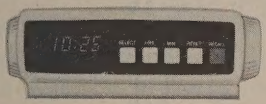
Monitor the usage of critical items and you've got a good head-start on conserving them. Fuel. Gas. Chemicals. Time. You name it.

One or more of these new EMICO products designed into your product or equipment may provide you with that conservation advantage you want and need in today's economy.



FLOW MONITOR—Measures usage of fluids and gases

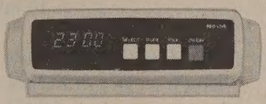
Featuring an uniquely designed and extremely rugged transducer, this monitor is capable of measuring from 0.5 to 16.75 gallons of most liquids per hour. It has a pressure range of 0-400 psi and provides an analog signal output in linear or nonlinear form. A warning light on the readout indicator flashes (see inset) when the flow being monitored falls below a preset performance standard.



TIME MONITOR

Digital clock that also measures elapsed time independently

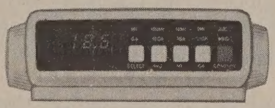
Operates on DC. Time elapsed counter reads in minutes and seconds to 59:59, then in hours and minutes to 99:59. Display and indicator lights change in intensity depending upon environment.



TACH/EVENT COUNTER

Measures RPM or events and signals when an adjustable pre-set standard is exceeded.

Continuously, accurately shows RPM's to nearest hundred. Includes memory for preset standard that can be reset at the push of two buttons.



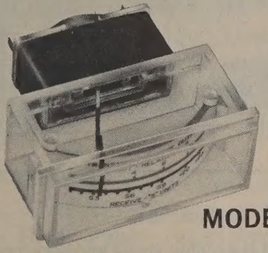
FOUR-FUNCTION COMPUTER

Determines relationship between two variables.

Keeps totals of both variables. Also computes accumulated average and displays total usage of both variables. Operates on DC. Example: miles per gallon computer.

For complete information on any or all of these products, send for detailed product bulletins, today.

NOW . . . BIG VISIBILITY WITH A LITTLE PRICE TAG



Edge-Reading Indicator

MODEL 14—1-13/16" x 3/4"

This new edge-reading indicator provides the same excellent readability as EMICO's Model 13 edge-reading meter but with the economy of an indicator. It's the best of both worlds; maybe the best answer for your product.

Basic DC milliammeter movement can easily be converted to a voltmeter by adding external resistor. Adjustment on the back affords a precise setting for best accuracy at one point on the scale. Available from 2 milliamperes up to 100 milliamperes. Clear plastic front and case for ease of illumination. Fits into same size panel cut-out as Model 13.

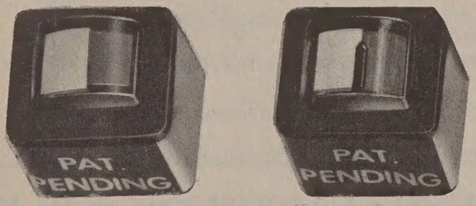
TINY INDICATORS KEEP A BIG EYE ON D.C. CIRCUITS



Flag **Pointer**

Model 802—approx. 1/2" square

Rugged, dependable, and extra low in cost, these micro-miniature circuit indicators:

- **Monitor on-off conditions**
- **Indicate battery-charge conditions**
- **Indicate circuit-operating conditions**

Less than 2 milliwatts required to move flag or pointer. Overload capacity is 15 times current rating without burn-out or calibration shift. All models are packaged in a high-impact, clear plastic case and are available either with wire leads or plug-in jacks for ease of installation.
